Merritt, George E., Elmira, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Interferometric comparator. 2,450,839, Oct. 5.

Metropolitan-Vickers Electrical Company Limited, assignee: *See*—
Baumann, Karl.

Meyer, Otto E., Sr.: *See*—
Williams, Armond, and Meyer.

Meyers, Charles O., Bartlesville, Okla., assignor to Phillips Petroleum Company. Isomerization of hydrocarbons and improved catalysts therefor. 2,450,764, Oct. 5.

Miller, Karl H.: *See*—
Magaw, Ronald R., and Miller.

Miller, Lloyd G., Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Lasting device. 2,450,557, Oct. 5.

Miller Pottery Engineering Company, assignee: *See*—
Miller, William J.

Miller, William J., Swissvale, assignor to Miller Pottery Engineering Company, Swissvale, Pa. Method and apparatus for manufacturing pottery ware. 2,450,437, Oct. 5.

Miller, William J., Swissvale, assignor to Miller Pottery Engineering Company, Swissvale, Pa. Apparatus for applying liquid size to pottery ware. 2,450,438, Oct. 5.

Millet, Hylton B., New Orleans, La. Apparatus for refrigeration of liquors. 2,450,735, Oct. 5.

Milligan, Joseph H., Framingham, Mass. Door lock. 2,450,840, Oct. 5.

Milliken, Thomas H., Jr., Rose Valley, Pa., assignor to Houdry Process Corporation, Wilmington, Del. Method of cleaning dried zirconia gel production equipment. 2,450,439, Oct. 5.

Mills, Roscoe H., Dayton, Ohio. Propeller blade construction. 2,450,440, Oct. 5.

Mitchell, Jay G., Eatontown, N. J., assignor to the United States of America as represented by the Secretary of War. Nonpositional line signal. 2,450,441, Oct. 5.

Moebes, August, Vallejo, Calif. Adjustable hat form. 2,450,521, Oct. 5.

Molitor, Edward T., Seattle, Wash. Egg cleaner. 2,450,606, Oct. 5.

Monarch Machine Tool Company, The, assignee: *See*—
Foster, Theodore.

Monroe Calculating Machine Company, assignee: *See*—
Fleming, Howard M.

Moore, Milford B., Brighton, assignor to Graflex, Inc., Rochester, N. Y. Sensitized-material holder for photographic cameras. 2,450,841, Oct. 5.

Morehouse, Neal F., and O. J. Mayfield, assignors to Dr. Salsbury's Laboratories, Charles City, Iowa. Poultry treatment composition. 2,450,866, Oct. 5.

Morin, Louis H., assignor of one-half to D. Marinsky, Bronx, N. Y. Forming and ejecting die castings. 2,450,482, Oct. 5.

Morris, Rupert C., Berkeley, A. V. Snider, Richmond, and P. H. Williams, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Cyclohexylcarbinyl thiocyano esters. 2,450,765, Oct. 5.

Morse Chain Company, assignee: *See*—
Howison, Robert J.

Motor Economy Products, Inc., assignee: *See*—
Callaway, Clarence R., and Dunn.

Mueller, Ervin H., Grosse Pointe, Mich. Gas burner. 2,450,483, Oct. 5.

Mueller, Ervin H., Grosse Pointe, Mich. Gas burner. 2,450,680, Oct. 5.

Muench, Carl G., Glenview, assignor to The Celotex Corporation, Chicago, Ill. Apparatus for coating fiber insulation board. 2,450,681, Oct. 5.

Murray, Forrest F., Brockton, assignor to F. F. and H. R. Murray, a co-partnership, doing business as Murray Manufacturing Co., Avon, Mass. Edge trimming machine. 2,450,842, Oct. 5.

Murray, Harry R., assignee: *See*—
Murray, Forrest F. and H. R.

Murray Manufacturing Co.: *See*—
Murray, Forrest F.

Myers, Claude G.: *See*—
Hansford, Rowland C., Rasmussen, Myers, and Sachanen.

Myers, Latimer D.: *See*—
Fitzpatrick, J. D., and Myers.

Nader Engineering Company, assignee: *See*—
Nader, Joseph.

Nader, Joseph, Glen Ellyn, assignor to Nader Engineering Company, Chicago, Ill. Condenser and brush mounting for dynamoelectric machines. 2,450,809, Oct. 5.

Nash-Kelvinator Corporation, assignee: *See*—
Wahlberg, Nils E., and Kishline.

National Acme Company, The, assignee: *See*—
Rundquist, Bennett C.

Navy, United States of America as represented by the Secretary of the, assignee: *See*—
McNall, John W.

Niles-Bement-Pond Company, assignee: *See*—
Chandler, Milton E.
Hunt, Scott F.
Lee, Leighton, II.

Nixon, Alan C., and O. L. Davis, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Aluminum oxide compositions. 2,450,766, Oct. 5.

Nokes, Ernest S.: *See*—
Chase, Ernest E., Nokes, Stratton, and Goodhue.

Noland, Thomas T.: *See*—
Berger, Henry G., Noland, and Fuller.

Nordlander, Birger W., Schenectady, N. Y., assignor to General Electric Company. Polymers of an unsaturated alkyd resin and an unsaturated halogenated compound and method of producing same. 2,450,682, Oct. 5.

North, James P., Green Bay, Wis. Liquid clarifier. 2,450,522, Oct. 5.

Northern Equipment Company, assignee: *See*—
Schlieder, Harold A.

Nyman, Carl R., Washington, D. C. Card separating device. 2,450,442, Oct. 5.

Ogden, Floyd H., Arlington, assignor to F. L. & J. C. Codman, Rockland, Mass. Manufacture of abrading elements. 2,450,859, Oct. 5.

Ogren, Oscar H., Rockford, Ill. Single blank container for paper sheets. 2,450,558, Oct. 5.

Olin Industries, Inc., assignee: *See*—
Reinhardt, Otto K., and Fallon.

Oliver, Sheffield F., Auburn, Calif. Sitz bath. 2,450,607, Oct. 5.

Opper, Anita V. L., New York, N. Y., and W. P. ter Horst, Little Silver, N. J., assignors to Virginia Carolina Chemical Corporation, Richmond, Va. Recovery of protein from proteinous materials. 2,450,810, Oct. 5.

P. & V. Quicklocking Co., assignee: *See*—
Smith, Vernon C., and Bohn.

Page, Herbert E., Alhambra, Calif. Hydraulic bumper jack. 2,450,608, Oct. 5.

Page, James M., Jr.: *See*—
Evering, Bernard L., Lien, and Page.

Palmer, Albert, and V. F. Sepavich, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Letoff for looms. 2,450,484, Oct. 5.

Palmer, Albert, and V. F. Sepavich, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Control means for motor driven letoffs. 2,450,485, Oct. 5.

Parke, Davis & Company, assignee: *See*—
Bambas, Louis L.
Bird, Orson D., and Binkley.

Parker, Charles F., Culver City, Calif. Portable tile cutter. 2,450,523, Oct. 5.

Parsons, Louis R., assignor of one-fifth to W. W. Holland, Macomb, Ill. Railroad rail clamp. 2,450,559, Oct. 5.

Penick, S. B., & Company, assignee: *See*—
Koons, Harold F.

Perry, Clarence J., Los Angeles, Calif. Plumber's snake and feeding device therefor. 2,450,486, Oct. 5.

Peterson, Carl J.: *See*—
Redward, Dorothy B., and Peterson.

Phelps, Louis E., Shreveport, La. Spring type guide for commode tanks. 2,450,609, Oct. 5.

Phelps, Walter A.: *See*—
Kinkead, Fullerton S., Phelps, Smith, Singer, and Melhuish.

Philco Corporation, assignee: *See*—
Bauman, John J.

Phillips Petroleum Company, assignee: *See*—
Clark, Alfred.
Frey, Frederick E.
Guyer, Jesse A.
Loy, John W.
Meyers, Charles O.

Photoswitch, Incorporated, assignee: *See*—
Thomson, E. Craig.
Thomson, Elihu C.

Pierce, Charles H., Kalamazoo, Mich. Brush holder. 2,450,736, Oct. 5.

Pierce, Edwin G., Cleveland, Ohio. Air filter. 2,450,610, Oct. 5.

Pittman, Ernest E., Elizabethtown, Ky. Refining of sugar. 2,450,683, Oct. 5.

Poltica, George K., Medford, Mass., assignor to Allied Chemical & Dye Corporation, New York, N. Y. Vat dyeing of alkali-sensitive fibers, including an acid reduction of the vat dye impregnated fibers. 2,450,767, Oct. 5.

Potts, Ralph H., La Grange, assignor to Armour and Company, Chicago, Ill. Distillation apparatus for treating fatty acid containing stock. 2,450,611, Oct. 5.

Potts, Ralph H., La Grange, assignor to Armour and Company, Chicago, Ill. Distillation of fatty acid stock by fractionation and flash steps. 2,450,612, Oct. 5.

Prince-Smith & Stells Limited, assignee: *See*—
Wright, Frank.

Proffit, Lester M., Superior, Wis. Lead trowel. 2,450,860, Oct. 5.

Pulver, Harold M., Douglass, assignor of fifty per cent to R. Bradshaw, Wichita, Kans. Nonskid attachment for shoes. 2,450,768, Oct. 5.

Radinsky, Felix, Olympia, Wash. Mechanical pool table. 2,450,613, Oct. 5.

Radio Corporation of America, assignee: *See*—
Hansell, Clarence W.
Rosencrans, Charles A.
Seeley, Stuart W.

Rambo, William H., Portland, Oreg. Loading platform. 2,450,684, Oct. 5.

Ramsey Accessories Manufacturing Corporation, assignee: *See*—
Frisby, Frank D.
Ramsey, Vernon E., Suffolk, Va. Closure means for containers. 2,450,811, Oct. 5.
Rasmussen, Herbert E.: *See*—
Hansford, Rowland C., Rasmussen, Myers, and Sachanen.
Hansford, Rowland C., Rasmussen, and Sachanen.
Rasmussen, Herbert E., and R. C. Hansford, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated. Production of alkyl derivatives of thiophene. 2,450,685, Oct. 5.
Rasmussen, Herbert E., and R. C. Hansford, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated. Production of methyl thiophene. 2,450,686, Oct. 5.
Rasmussen, Herbert E., and R. C. Hansford, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated. Production of dimethyl and ethyl thiophenes. 2,450,687, Oct. 5.
Ray, Clinton D., Mesa, Ariz. Fruit picker. 2,450,812, Oct. 5.
Redward, Dorothy B., and C. J. Peterson, Seattle, Wash. Hair curler. 2,450,560, Oct. 5.
Reinhardt, Otto K., and T. F. Fallon, New Haven, Conn., assignors to Olin Industries, Inc. Leakproof dry cell. 2,450,813, Oct. 5.
Ria, Seymon, Seattle, Wash. Heating plant. 2,450,561, Oct. 5.
Rich, Stanley R., New York, N. Y. Limiter. 2,450,443, Oct. 5.
Richard, Grant M., assignor to Toledo Scale Company, Toledo, Ohio. Meat tendering machine. 2,450,688, Oct. 5.
Richmond, Paul, Pontiac, Mich. Support for hammocks. 2,450,689, Oct. 5.
Ridbo Laboratories, Inc., assignee: *See*—
Zeiss, Harold H.
Ridgewood Inc., assignee: *See*—
St. Clair, Houston.
Ringer, Robert L., Jr., Warren, and C. E. Smith, Port Homer, assignors to The Taylor-Winfield Corporation, Warren, Ohio. Welding system. 2,450,614, Oct. 5.
Robertson, H. H., Company, assignee: *See*—
Hubbell, Dean S.
Robins, Jack B., assignor to Aircraft Mechanics Inc., Colorado Springs, Colo. Truck for handling electric refrigerators and the like. 2,450,690, Oct. 5.
Robinson, Harold A., assignor to The Dow Chemical Company, Midland, Mich. Composition for descaling ferrous metal. 2,450,861, Oct. 5.
Robinson, Jessie C., executrix: *See*—
Robinson, William B., and Swenson.
Robinson, Joseph, New York, N. Y. Electric vaporizer. 2,450,444, Oct. 5.
Robinson, William B., Sayville, and G. E. Swenson, Hastings on Hudson, N. Y.; J. C. Robinson, executrix of said W. B. Robinson, deceased, assignor to M. C. Fidao and G. Link, Jr., as trustees. Covering strip for roofs and sidings. 2,450,562, Oct. 5.
Rommel, Anton F., Tacoma, Wash. Roaster. 2,450,563, Oct. 5.
Root, Charles W., Sidney, assignor to Bendix Aviation Corporation, New York, N. Y. Starting and ignition system. 2,450,524, Oct. 5.
Roper, Geo. D., Corporation, assignee: *See*—
Whitehead, Grover F.
Rosencrans, Charles A., Haddonfield, N. J., assignor to Radio Corporation of America. Modulation. 2,450,445, Oct. 5.
Rothblum, Benjamin, New York, N. Y. Pattern grading ruler. 2,450,769, Oct. 5.
Roundy, Zola D., and H. L. Keil, Clarendon Hills, assignors to Armour and Company, Chicago, Ill. Making cheese. 2,450,814, Oct. 5.
Rubenstein Bros. Company, assignee: *See*—
Goldie, Hector E.
Rundquist, Bennett C., assignor to The National Acme Company, Cleveland, Ohio. Oil centrifuge with plural concentric separating zones. 2,450,737, Oct. 5.
Rupp, Earl V., Dayton, Ohio. Oxygen warning device. 2,450,446, Oct. 5.
Russell, Clyde E., Massillon, Ohio. Nonskid device. 2,450,691, Oct. 5.
Russell, Marshall E., Concord, N. C. Roller clearer stop motion. 2,450,738, Oct. 5.
Sacchini, Columbus R., Willoughby, assignor to The Marquette Metal Products Company, Cleveland, Ohio. Fluid operated motor with piston actuated distributing valve and manually actuated parking valve. 2,450,564, Oct. 5.
Sacchini, Columbus R., Euclid, and L. N. Vandervoort, assignors to The Marquette Metal Products Company, Cleveland, Ohio. Motion converter mechanism. 2,450,692, Oct. 5.
Sachanen, Alexander N.: *See*—
Hansford, Rowland C., Rasmussen, and Sachanen.
Hansford, Rowland C., Rasmussen, Myers, and Sachanen.
Sackey, Alexander A., assignee: *See*—
Weisbrod, Ivan V., and Sackey.
Saifyrd, Richard L., assignor to The Whitney Chain & Mfg. Co., Hartford, Conn. Transmission chain link. 2,450,565, Oct. 5.
St. Clair, Houston, Tazewell, assignor to Ridgewood Inc., Winchester, Va. Concentrated apple juice and milk modifier. 2,450,456, Oct. 5.
Salsbury's, Dr., Laboratories, assignee: *See*—
Morehouse, Neal F., and Maydeld.
Samson, René, Montreal, Quebec, Canada. Preparation of macaroni products. 2,450,525, Oct. 5.
Samuel, Charles H., San Francisco, Calif. Gun firing mechanism. 2,450,447, Oct. 5.
Sanders, Edna, executrix: *See*—
Sanders, William G.
Sanders, William G., deceased, Houston, Tex.; E. Sanders, executrix. Piston assembly and ring. 2,450,693, Oct. 5.
Sauer, John A., Elizabeth, assignor to Elastic Stop Nut Corporation of America, Union, N. J. Self-locking nut. 2,450,694, Oct. 5.
Sawyer, Lester T., Leominster, Mass. Making hair retainers. 2,450,448, Oct. 5.
Schaber, Elmer, Cold Spring, Ky. Tire chain. 2,450,487, Oct. 5.
Schedin, Robert S., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Two-speed motor drive for loom letoffs. 2,450,488, Oct. 5.
Schieder, John H., Los Angeles, Calif. Ski binding. 2,450,526, Oct. 5.
Schlage, Anna, executrix: *See*—
Schlage, Walter R.
Schlage Lock Company, assignee: *See*—
Schlage, Walter R.
Schlage, Walter R., deceased, Burlingame; A. Schlage, executrix, assignor to Schlage Lock Company, San Francisco, Calif. Door lock. 2,450,449, Oct. 5.
Schlesman, Carleton H.: *See*—
Francis, Alfred W., and Schlesman.
Schlieder, Harold A., assignor to Northern Equipment Company, Erie, Pa. Level responsive control device. 2,450,739, Oct. 5.
Schmerling, Louis, Riverside, assignor to Universal Oil Products Company, Chicago, Ill. Polymerization of ethylene. 2,450,451, Oct. 5.
Schmid, Martin, Lucerne, Switzerland. Motor sled. 2,450,566, Oct. 5.
Schmidinger, Joseph, Lake George, N. Y. Supervisory indicating circuit. 2,450,450, Oct. 5.
Schmitt, William H., Grand Rapids, Mich. Potato slicer having a stationary wire grid and a reciprocating plunger. 2,450,740, Oct. 5.
Schomer, Harold A., Cedar Lane, Md., assignor to the United States of America, as represented by the Secretary of Agriculture. Reducing scald development on fruit. 2,450,615, Oct. 5.
Schreter, Adolph, Baltimore, Md. Made-up bow tie. 2,450,741, Oct. 5.
Schultz, William O., South Milwaukee, Wis. Line anchor. 2,450,815, Oct. 5.
Schwartz, Jacob D., Pittsburgh, Pa. Flask. 2,450,567, Oct. 5.
Scott, Floyd L., assignor to Hughes Tool Company, Houston, Tex. Seal grip tool joint. 2,450,452, Oct. 5.
Seagram, Joseph E., & Sons, Inc., assignee: *See*—
Coles, Harold W.
Seeley, Stuart W., Roslyn Heights, N. Y., assignor to Radio Corporation of America. Electrical networks for phase shifters. 2,450,616, Oct. 5.
Sepavich, Victor F.: *See*—
Palmer, Albert, and Sepavich.
Sepavich, Victor F., and C. R. Kronoff, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Letoff for looms. 2,450,489, Oct. 5.
Shell Development Company, assignee: *See*—
Morris, Rupert C., and Snider, and Williams.
Nixon, Alan C., and Davis.
Vaughan, William E., and Barnett.
Sherman, Arthur G., Tracy, Calif. Dehydrating system. 2,450,843, Oct. 5.
Shinberg, Barney, and H. Shrager, Westerly, R. I. Method and apparatus for molding shoe uppers. 2,450,490, Oct. 5.
Short, Ronald V., assignee: *See*—
Greaves, Albert H.
Shrager, Hymen: *See*—
Shinberg, Barney, and Shrager.
Siefert, Anne, Chicago, and J. M. Laiho, Skokie, Ill. Making yarn articles. 2,450,695, Oct. 5.
Singer, Fred J.: *See*—
Kinkead, Fullerton S., Phelps, Smith, Singer, and Melhuish.
Singer Manufacturing Company, The, assignee: *See*—
Horwath, Theodore J.
Marsac, Leonard C.
Sinopoli, Frank R., San Diego, Calif. Shirt hold-down device. 2,450,568, Oct. 5.
Smith, Clyde E.: *See*—
Ringer, Robert L., Jr., and Smith.
Smith, Edward M.: *See*—
Kinkhead, Fullerton S., Phelps, Smith, Singer, and Melhuish.
Smith, Joseph L., Glen Ellyn, Ill. Buffing drum. 2,450,617, Oct. 5.
Smith, Sheldon S., Springfield, Mass. Buffing wheel. 2,450,454, Oct. 5.
Smith, Vernon C., Stockton, and P. E. Bohn, Angels Camp, assignors to P. & V. Quicklocking Co., Stockton, Calif. Semiautomatic coupling. 2,450,527, Oct. 5.

Smith, William R., Philadelphia, Pa., assignor to The A. C. Gilbert Company, New Haven, Conn. Toy car unloader. 2,450,867, Oct. 5.
Smullin, Louis D., Arlington, and J. B. Wiesner, Boston, Mass., assignors, by mesne assignments, to United States of America. Indicating device. 2,450,618, Oct. 5.
Snider, Alva V.: *See*—
Morris, Rupert C., Snider, and Williams.
Snider, Raymon W., Cheyenne, Wyo. Steriliser. 2,450,816, Oct. 5.
Snijders, Marcus J., Eindhoven, Netherlands, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. High-voltage rectifying tube. 2,450,770, Oct. 5.
Snyder, Carl J., Detroit, Mich. Hollow propeller blade. 2,450,455, Oct. 5.
Socony-Vacuum Oil Company, Incorporated, assignee: *See*—
Altamura, Mario S.
Berger, Noland, and Fuller.
Caldwell, Hamilton P., Jr., and Chapman.
Denton, William I., and Bishop.
Francis, Alfred W., and Schlesman.
Hansford, Rowland C., Rasmussen, Myers, and Sachanen.
Hansford, Rowland C., Rasmussen, and Sachanen.
Marisic, Milton M., Denton, and Bishop.
Rasmussen, Herbert E., and Hansford.
Solar Aircraft Company, assignee: *See*—
Conzelman, John E., Jr.
Solovioff, Nicholas N., and N. G. Kling, Great Neck, assignors to Airex Manufacturing Company, Inc., Long Island City, N. Y. Helicopter. 2,450,491, Oct. 5.
Sonkin, Simon, New York, N. Y., assignor to the United States of America as represented by the Secretary of War. Tunable magnetron. 2,450,619, Oct. 5.
Speicher, Gunther E., Washington, D. C. Locket. 2,450,620, Oct. 5.
Spence, John: *See*—
Carroll, Burt H., and Spence.
Sperry Corporation, The, assignee: *See*—
Halpert, Percy.
Sprigg, Edward A., assignor to H. H. Buggie & Company, Toledo, Ohio. Making electrical socket connections. 2,450,529, Oct. 5.
Sprigg, Edward A., assignor to H. H. Buggie & Company, Toledo, Ohio. Electrical connector. 2,450,528, Oct. 5.
Standard Oil Company, assignee: *See*—
D'Ouville, Edmond L., and Burney.
Evering, Bernard L., Lien, and Page.
Stenning, Luis C., assignor to The General Electric Company Limited, London, England. Apparatus for tuning variable electrical oscillators. 2,450,696, Oct. 5.
Sterling, James G., Cleveland Heights, Ohio, assignor to Thompson Products, Inc. Removal of annular scratches in hollow poppet valve stems. 2,450,817, Oct. 5.
Stevens, Clarence C., Forestville, Conn., assignor to General Motors Corporation, Detroit, Mich. Lapping or polishing. 2,450,742, Oct. 5.
Stevenson, Robert W., Columbus, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company. Removable screen structure for rotary beater mills. 2,450,492, Oct. 5.
Stratton, Frank E.: *See*—
Chase, Ernest E., Nokes, Stratton, and Goodhue.
Strub, René, La Chaux-de-Fonds, Switzerland. Turbine rotor and its method of manufacture. 2,450,493, Oct. 5.
Stuart, Fred W., Cincinnati, Ohio. Refrigerator provided with a refrigerated drawer. 2,450,844, Oct. 5.
Submarine Signal Company, assignee: *See*—
Benioff, Hugo.
Sussin, David, South Fort Mitchell, assignor to The Kelley-Koett Manufacturing Company, Covington, Ky. X-ray rectifying mechanism. 2,450,530, Oct. 5.
Swenson, George E.: *See*—
Robinson, William B., and Swenson.
Tappé, Frank G., Oslo, Norway. Ski binding. 2,450,531, Oct. 5.
Taylor-Winfield Corporation, The, assignee: *See*—
Ringer, Robert L., Jr., and Smith.
Te Grotenhuis, Theodore A., Olmsted Falls, assignor to The General Tire & Rubber Company, Akron, Ohio. Process and apparatus for coagulating a coagulable fluid. 2,450,457, Oct. 5.
Teigen, Austin F., Moorhead, Minn. Pocketknife. 2,450,697, Oct. 5.
Ter Horst, William P.: *See*—
Opper, Anita V. L., and Ter Horst.
Therapeutic Research Corporation of Great Britain, Limited, assignee: *See*—
Duffin, Walter M., and Wilkinson.
Thomas, Charles A., Fort Wayne, Ind., assignor to General Electric Company. Brush for dynamoelectric machines. 2,450,698, Oct. 5.
Thomlinson, William G., Glasgow, Scotland. Inking apparatus for printing machines. 2,450,494, Oct. 5.
Thompson, George J., G. L. Koester, Jr., and J. B. Fullman, United States Navy. Expansion coupling. 2,450,458, Oct. 5.
Thompson, Norman J., Newton, assignor to Factory Mutual Research Corporation, Boston, Mass. Fire extinguisher. 2,450,569, Oct. 5.
Thompson Products, Inc., assignee: *See*—
Heinrich, August H.
Johnson, Paul P.
Sterling, James G.
Thomson, E. Craig, Boston, assignor to Photoswitch, Incorporated, Cambridge, Mass. Electronic timing apparatus. 2,450,460, Oct. 5.
Thomson, Elihu C., Boston, assignor to Photoswitch, Incorporated, Cambridge, Mass. Electrode system. 2,450,459, Oct. 5.
Tognola, Tullio, Sidney, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Insulating means and method of making the same. 2,450,532, Oct. 5.
Toledo Scale Company, assignee: *See*—
Richard, Grant M.
Topham, Laurence E., Wenham, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Variable displacement pump. 2,450,570, Oct. 5.
Towne, Blanche, assignee, et al.: *See*—
McGillicuddy, Addeline J.
Towne, Frank L., assignee, et al.: *See*—
McGillicuddy, Addeline J.
Troxler, Charles G., and G. P. Daiger, Canton, assignors to The Hoover Company, North Canton, Ohio. Suction cleaner. 2,450,845, Oct. 5.
Ullmann, Henry, New York, N. Y. Easel. 2,450,495, Oct. 5.
United Shoe Machinery Corporation, assignee: *See*—
Cantley, Joseph C.
Chase, Ernest E., Nokes, Stratton, and Goodhue.
Harrington, Joseph, Jr.
Jorgensen, Bernhardt.
Jorgensen, Jacob C.
Miller, Lloyd G.
Topham, Laurence E.
United States of America, assignee: *See*—
Smullin, Louis D.
United States Rubber Company, assignee: *See*—
Brown, Charles F.
Griffin, John B., and Hagan.
Hurdis, Everett C.
Universal Oil Products Company, assignee: *See*—
Bloch, Herman S.
Grote, Henry W.
Schmerling, Louis.
Unk, Jacob M., Eindhoven, Netherlands, assignor, by mesne assignments, to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. Variometer with air dielectric. 2,450,743, Oct. 5.
Valley National Bank of Phoenix, The, assignee: *See*—
Focht, Carl W.
Vandervell Products Limited, assignee: *See*—
Johnson, Ernest W.
Vandervoort, Lorain N.: *See*—
Sacchini, Columbus R., and Vandervoort.
Vaughan, William E., Berkeley, and B. Barnett, assignors to Shell Development Company, San Francisco, Calif. Plastic sulfur vulcanizing agent, method for its utilization and vulcanizable compositions containing the same. 2,450,771, Oct. 5.
Veach, Harry O., Los Angeles, Calif. Air mattress construction. 2,450,699, Oct. 5.
Velten, Edmund M., assignor to Chemical Developments Corporation, Dayton, Ohio. Adsorption apparatus. 2,450,533, Oct. 5.
Vermillion, Raymond K., St. Petersburg, Fla. Electronic noise eliminator. 2,450,818, Oct. 5.
Vickers Incorporated, assignee: *See*—
Herman, Kenneth R.
Lane, Albert M., Kirkpatrick, and Erskine.
Vico Products Company, assignee: *See*—
Maizel, Ben.
Virginia Carolina Chemical Corporation, assignee: *See*—
Opper, Anita V. L., and Ter Horst.
Voet, Andries, assignor, by mesne assignments, to J. M. Huber Corporation, New York, N. Y. Emulsion printing inks. 2,450,534, Oct. 5.
Vokes, Cecil G., and A. H. Fowler, Guildford, assignors to Vokes Limited, Guildford, Surrey, England. Oil refilling device. 2,450,700, Oct. 5.
Vokes Limited, assignee: *See*—
Vokes, Cecil G., and Fowler.
Wahlberg, Nils E., and F. F. Kishline, assignors to Nash-Kelvinator Corporation, Kenosha, Wis. Vibration dampener. 2,450,701, Oct. 5.
Walds Koh-I-Noor, Inc., assignee: *See*—
Brosek, Lawrence.
Wallach, Robert S., Madison, N. J., assignor to Associated Development and Research Corporation, New York, N. Y. Diaphragm puncturing valve structure. 2,450,461, Oct. 5.
War, The United States of America as represented by the Secretary of the, assignee: *See*—
Mitchell, Jay G.
Sonkin, Simon.
Washburn, Harold W., assignor to Consolidated Engineering Corporation, Pasadena, Calif. Mass spectrometry. 2,450,462, Oct. 5.
Watkins, John E., Maywood, Ill. Measuring apparatus responsive to variable conditions. 2,450,772, Oct. 5.
Watson, Ernest A., G. Hill, Coventry, and R. J. Ifield, Ealing, London, assignors to Joseph Lucas Limited, Birmingham, England. Automatically controlling the supply of liquid fuel to prime mover. 2,450,535, Oct. 5.

Watts, Garland E., El Cerrito, Calif. Kitchen cabinet. 2,450,702, Oct. 5.
Weber, Edward, Winchester, Mass., assignor to Allied Chemical & Dye Corporation, New York, N. Y. Dyeing of wool with indigo dyestuffs. 2,450,773, Oct. 5.
Weinrich, Arthur R.: *See*—
Colbert, William H., and Weinrich.
Weisbrod, Ivan V., Douglaston, assignor to A. A. Sackey, New York, N. Y. Sanitary shield for telephone transmitters. 2,450,703, Oct. 5.
West, William H., assignor to The Alabama Textile Engineering Company, Inc., Montgomery, Ala. Pick motion for looms. 2,450,463, Oct. 5.
Western Electric Company, Incorporated, assignee: *See*—
Henning, George E.
Lodge, Joseph E.
Westinghouse Air Brake Company, The, assignee: *See*—
Bent, Arthur J.
May, Harry C.
Whelan, Alma E., assignee: *See*—
Whelan, Charles M.
Whelan, Charles M., assignor of one-half to A. E. Whelan, Altadena, Calif. Lock controlled switch. 2,450,819, Oct. 5.
Whitbread, Samuel A., assignor to Anthony Louison, Sydney, New South Wales, Australia. Animal trap. 2,450,536, Oct. 5.
White, Harry B., Canton, assignor to The Hoover Company, North Canton, Ohio. Converter for suction cleaners. 2,450,846, Oct. 5.
White head, Grover F. assignor to Geo. D. Roper Corporation, Rockford, Ill. Gas supply manifold assembly for gas ranges. 2,450,744, Oct. 5.
Whiteley, Arlie E., Los Angeles, assignor of one-half to J. J. Capitan, East Los Angeles, Calif. Dispenser for rolled sheet material. 2,450,496, Oct. 5.
Whitney Chain & Mfg. Co., The, assignee: *See*—
Saifyrd, Richard L.
Wiesner, Jerome B.: *See*—
Smullin, Louis D., and Wiesner.
Wilcox, Edward J., Lakewood, N. Y. Bedrail pin. 2,450,820, Oct. 5.
Wilkinson, George H., deceased, Windsor, Ontario, Canada; The Canada Trust Company, executor. Ankle support. 2,450,862, Oct. 5.
Wilkinson, Samuel: *See*—
Duffin, Walter M., and Wilkinson.
Williams, Armond, East Haven, and O. E. Meyer, Sr., North Haven, Conn. Distributor mechanism. 2,450,704, Oct. 5.
Williams, Eureka Corporation, assignee: *See*—
Foley, Charles F.
Williams, Floyd C., St. Louis County, assignor to Frank Adam Electric Company, St. Louis, Mo. Switch mechanism. 2,450,705, Oct. 5.
Williams, Paul H.: *See*—
Morris, Rupert C., Snider, and Williams.
Williamson, Hilding V., assignor to Cardox Corporation, Chicago, Ill. Apparatus for extinguishing fires. 2,450,537, Oct. 5.
Wilson, Matthew W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Apparatus for treating rubber-reinforcing cord fabric. 2,450,847, Oct. 5.
Wineman, Wade H., Michigan City, Ind., assignor to Joy Manufacturing Company. Forging machine. 2,450,621, Oct. 5.
Wisberger, Paul M., assignor to Goodyear Aircraft Corporation, Akron, Ohio. Pallet. 2,450,848, Oct. 5.
Woodworth, N. A., Company, assignee: *See*—
Hohwart, George and E. F.
Worthington Pump and Machinery Corporation, assignee: *See*—
Zwickl, Joseph R.
Wright, Frank, Haworth, assignor to Prince-Smith & Stells Limited, Keighley, England. Centrifugal spinning, twisting, and analogous machine. 2,450,622, Oct. 5.
Zahm, George G., Buffalo, assignor to Hurd Corporation, New York, N. Y. Evaporation and concentration of liquids. 2,450,774, Oct. 5.
Zahm, George G., Buffalo, assignor to Hurd Corporation, New York, N. Y. Concentrating highly colloidal food products. 2,450,775, Oct. 5.
Zeiss, Harold H., Fairlawn-Radburn, assignor to Ridbo Laboratories, Inc., Paterson, N. J. Methylation of methyl 6-hydroxydehydroabietate. 2,450,706, Oct. 5.
Zimmerman, Arthur B., Los Angeles, Calif. Tilting balanced duplex propeller. 2,450,821, Oct. 5.
Zwickl, Joseph R., East Orange, assignor to Worthington Pump and Machinery Corporation, Harrison, N. J. Purging system for refrigerating systems. 2,450,707, Oct. 5.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 5TH DAY OF OCTOBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Hydrated polysilicate, manufacture of. W. F. Wegst and J. H. Wills. Re. 23,043, Oct. 5.
Stall warning device. R. H. Upson. Re. 23,042, Oct. 5.

LIST OF DESIGN INVENTIONS

Aircraft engine, Turbine jet. M. U. Clauser and A. N. Hatch. 151,219, Oct. 5.
Alphabet for forming monograms or the like. J. Weisman. 151,306, Oct. 5.
Ashtray, glass and poker chip holder, Combined. M. Buehren. 151,217, Oct. 5.
Bathroom ensemble. J. Stanits. 151,294, Oct. 5.
Bib, Multiple. I. Shelton. 151,290, Oct. 5.
Boat. J. E. Jones. 151,242, Oct. 5.
Bottle cap. E. J. B. Miller. 151,283, Oct. 5.
Bracelet or similar article. A. Katz. 151,252, Oct. 5.
Brooch or similar article. A. Katz. 151,260–1, Oct. 5.
Brooch or similar article. A. Katz. 151,267, Oct. 5.
Brooch or similar article, Separable. A. Katz. 151,258–9, Oct. 5.
Brooch or similar article, Separable. A. Katz. 151,262, Oct. 5.
Brooch or similar article, Separable. A. Katz. 151,264–6, Oct. 5.
Cabinet or similar article. A. J. Buckner. 151,214–16, Oct. 5.
Cabinet, Radio phonograph. L. G. Stone. 151,296–7, Oct. 5.
Cabinet, Radio receiver. A. L. Jenks. 151,241, Oct. 5.
Cabinet, Refrigerator. J. M. Little. 151,277, Oct. 5.
Cap and clip for a fountain pen or similar article, Combined. A. S. Weston. 151,307, Oct. 5.
Case, Combined eye shadow and rouge. E. N. Graham. 151,234, Oct. 5.
Chain for a bracelet or similar article, Expansible link. E. E. Fachon. 151,230, Oct. 5.
Chair standard. W. H. Bond, Jr. 151,210, Oct. 5.
Chest or similar article, Portable storage. S. M. Meyer. 151,281, Oct. 5.
Clip or similar article. A. Katz. 151,245, Oct. 5.
Clock. W. F. Thompson. 151,300, Oct. 5
Costumer or the like. L. S. Crain. 151,220, Oct. 5.
Desk, Child's. P. P. Cameron. 151,218, Oct. 5.
Device for dispensing liquid in sprayed or gaseous form. H. R. Stagner. 151,293, Oct. 5.
Dining table and writing desk, Combined. M. Sanders. 151,287, Oct. 5.
Dog bed or similar article. P. E. Shoemaker and L. L. Lewis. 151,291, Oct. 5.
Earring or similar article. A. Katz. 151,263, Oct. 5.
Engraving machine. P. J. Brohawn. 151,212, Oct. 5.
Fan, Exhaust. H. Zeller and A. H. Herter. 151,311, Oct. 5.
Finding or similar article, Jewelry. A. Katz. 151,268, Oct. 5.
Fish lure. H. Lamb. 151,276, Oct. 5.
Floor polisher, Electric. K. C. Atkin. 151,207, Oct. 5.
Game board. J. E. Funderburg. 151,231, Oct. 5.
Head for railroad water hydrants and similar articles. T. E. Bart. 151,208, Oct. 5.
Heater, Oscillating electric fan type. S. A. Witte. 151,309, Oct. 5.
Helicopter. F. L. Sutton. 151,298, Oct. 5.
Hobby horse. R. C. Swengel. 151,299, Oct. 5.
Holder and containers for perfumery, Combined. G. Baud. 151,209, Oct. 5.
Holder, Twine. J. Lucchesi. 151,278, Oct. 5.
Jig-saw puzzle. R. B. Morris. 151,284, Oct. 5.
Knife, Paring. L. A. Heintzelman. 151,238, Oct. 5.
Lamp, Floor. L. C. Doane. 151,228, Oct. 5.
Lighter and cigarette case, Combined. D. M. King and A. Wewetzer. 151,271, Oct. 5.
Link for a necklace or similar article, Connecting. R. Gardel. 151,232, Oct. 5.
Lounge. M. Kaufman. 151,270, Oct. 5.
Measurer, Combined spoon and cup. L. E. Middleton. 151,282, Oct. 5
Microscope or similar article. J. T. Armbruster and T. G. Aitcheson. 151,206, Oct. 5.
Milking stool. C. C. Bruner. 151,213, Oct. 5.
Mirror or similar article, Rear vision. J. W. Anderson, Jr. 151,205, Oct. 5.
Motor, Electric. T. R. Wieseman and R. I. Robinson. 151,308, Oct. 5.
Mounting, Finger ring. D. Pfeffer. 151,285, Oct. 5.
Mower, Power lawn. M. H. Kluter. 151,275, Oct. 5.
Necklace or similar article. A. Katz. 151,244, Oct. 5.
Necklace or similar article. A. Katz. 151,246–51, Oct. 5.
Necklace or similar article. A. Katz. 151,253–7, Oct. 5.
Necklace or similar article. A. Katz. 151,269, Oct. 5.
Opener and closer, Railway car door. G. W. Merritt. 151,280, Oct. 5.
Ornament or similar article, Vehicle hood. H. F. Yaeger. 151,310, Oct. 5.
Pen and pencil, Combination. G. A. Goessling. 151,233, Oct. 5.
Pendant charm. E. G. Schwarz. 151,288, Oct. 5.
Pin tray unit, Articulated. R. M. Seeger. 151,289, Oct. 5.
Push button. C. E. Waltman. 151,305, Oct. 5.
Rack, Towel. K. Kipp. 151,272, Oct. 5.
Reel, Hose. H. E. Kirschner. 151,274, Oct. 5.
Refrigerator, Table type. E. A. Kirchhof. 151,273, Oct. 5.
Shoe. J. J. Walsh. 151,303–4, Oct. 5.
Soap dish. J. W. Bradbury. 151,211, Oct. 5.
Sofa bed. G. L. Stanley. 151,295, Oct. 5.
Spectacle frame. A. Ditto. 151,221–2, Oct. 5.
Stand for a hand telephone set, Desk. W. A. Marrison and F. M. Thayer. 151,279, Oct. 5.
Stand or the like, Smoker's. P. S. Harper. 151,236, Oct. 5.
Stirring apparatus. M. J. Zimmer. 151,312–13, Oct. 5.
Swimming flipper. D. F. Eddy. 151,229, Oct. 5.
Tea urn and stand, Combined. V. Hingelberg. 151,239, Oct. 5.
Textile fabric or similar article. S. A. Dix. 151,223–7, Oct. 5.
Therapy apparatus, Oxygen. A. H. St. Louis. 151,286, Oct. 5.
Toothbrush. K. Harris and O. A. May. 151,237, Oct. 5.
Toy jack-in-the-box. W. Smith. 151,292, Oct. 5.
Trailer, Two-wheel. O. W. Inskeep. 151,240, Oct. 5.
Vehicle, Trailer. G. J. Harman. 151,235, Oct. 5.
Vise, Bench. B. Uydess. 151,302, Oct. 5.
Watch dial. C. H. Adamson. 151,204, Oct. 5.
Water correction device, Electrolytic. T. C. Jones. 151,243, Oct. 5.
Wrist watch and stem guard, Combined. J. A. Tuffo. 151,301, Oct. 5.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 5TH DAY OF OCTOBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrading device. H. E. Goldie. 2,450,473, Oct. 5.
Abrading element. E. W. Hall. 2,450,792–3, Oct. 5.
Abrading elements, Manufacture of. F. H. Ogden. 2,450,859, Oct. 5.
Adsorption apparatus. E. M. Velten. 2,450,533, Oct. 5.
Aircraft control. W. W. Beman. 2,450,709, Oct. 5.
Air filter. E. G. Pierce. 2,450,610, Oct. 5.
Air heater for castings. A. M. Lister. 2,450,518, Oct. 5.
Alkaline primary battery. L. S. Dunham and E. O. Jegge. 2,450,472, Oct. 5.
Alkyl benzenes. A. W. Francis and C. H. Schiesman. 2,450,652, Oct. 5.
Alkyl derivatives of thiophene, Production of. H. E. Rasmussen and R. C. Hansford. 2,450,685, Oct. 5.
Amides from sulfonyl fluorides. M. S. Altamura. 2,450,863, Oct. 5.
Anchor, Line. W. O. Schultz. 2,450,815, Oct. 5.
Angling mechanism for disk harrows, Draft operated. J. T. Bibb. 2,450,574, Oct. 5.
Animal trap. S. A. Whitbread. 2,450,536, Oct. 5.
Ankle support. G. H. Wilkinson. 2,450,862, Oct. 5.
Antianemia vitamin product, Obtaining an. O. D. Bird and S. B. Binkley. 2,450,710, Oct. 5.
Apparatus and process for hydrocarbon conversion. J. A. Guyer. 2,450,753, Oct. 5.
Apparatus for applying liquid size to pottery ware. W. J. Miller. 2,450,438, Oct. 5.
Apparatus for coating fiber insulation board. C. G. Muench. 2,450,681, Oct. 5.
Apparatus for deoxidizing metal sheet edge portions. A. L. Kronquest. 2,450,669, Oct. 5.
Apparatus for diverting mineral wool from blow rooms. H. R. Harner, R. L. Lindemuth, and A. L. Jones. 2,450,511, Oct. 5.
Apparatus for extinguishing fires. H. V. Williamson. 2,450,537, Oct. 5.
Apparatus for refrigeration of liquors. H. B. Millet. 2,450,735, Oct. 5.
Apparatus for removal of annular scratches. A. H. Heinrich. 2,450,797, Oct. 5.
Apparatus for simulating wind effects in aviation ground trainers. C. J. Crane. 2,450,421, Oct. 5.
Apparatus for treating rubber-reinforcing cord fabric. M. W. Wilson. 2,450,847, Oct. 5.
Apparatus for tuning variable electrical oscillators. L. C. Stenning. 2,450,696, Oct. 5.
Apple juice and milk modifier, Concentrated. H. St. Clair. 2,450,456, Oct. 5.
Aqueous dispersions of synthetic rubbers, Preparation of. C. F. Brown. 2,450,578–9, Oct. 5.
Aromatic nitriles, Production of. W. I. Denton and R. B. Bishop. 2,450,639, Oct. 5.
Aromatic nitriles, Production of. M. M. Marisic, W. I. Denton, and R. B. Bishop. 2,450,677, Oct. 5.
Asphalt and catalytic preparation thereof, Air-blown. A. J. Hoiberg. 2,450,756, Oct. 5.
Assembly and ring, Piston. W. G. Sanders. 2,450,693, Oct. 5.
Assembly for gas ranges, Gas supply manifold. G. F. Whitehead. 2,450,744, Oct. 5.
Attachment for sewing machines, Binding. T. J. Horwath. 2,450,663, Oct. 5.
Attachment for shoes, Nonskid. H. M. Pulver. 2,450,768, Oct. 5.
Automatic adjustable chair. H. Gleitsman and D. Hoenig. 2,450,654, Oct. 5.
Bag coupling. C. F. Foley. 2,450,544, Oct. 5.
Bath tank, Spinning. R. H. de Lacotte and E. Colombu. 2,450,750, Oct. 5.
Baton. H. K. Foster. 2,450,545, Oct. 5.
Beaming or warping machine. F. Lambach. 2,450,431, Oct. 5.
Bed rail blank. W. R. Elrad. 2,450,723, Oct. 5.
Bedrail pin. E. J. Wilcox. 2,450,820, Oct. 5.
Belt connector. J. A. Luther. 2,450,519, Oct. 5.
Belting. H. Brammer. 2,450,576, Oct. 5.
Bicycle. C. W. Kerr. 2,450,598, Oct. 5.
Binding. C. E. Emmer. 2,450,785, Oct. 5.
Bit: *See*—
  Poultry bit.
Blade construction, Propeller. R. H. Mills. 2,450,440, Oct. 5.
Blower. B. Essick. 2,450,647, Oct. 5.
Bobbin winder for sewing machines. L. C. Marsac. 2,450,837, Oct. 5.
Board: *See*—
  Apparatus for coating fiber insulation board.
  Checkered game board.
Box: *See*—
  Folding box.
Bracket. M. Drije. 2,450,722, Oct. 5.
Brake: *See*—
  Load compensating brake.
Brush for dynamoelectric machines. C. A. Thomas. 2,450,698, Oct. 5.
Brush, Gin. E. C. May. 2,450,679, Oct. 5.
Brush holder. C. H. Pierce. 2,450,736, Oct. 5.
Buffing wheel. S. S. Smith. 2,450,454, Oct. 5.
Burner: *See*—
  Gas burner.
  Oil burner.
Butadiene in aqueous emulsion in the presence of an alkali metal salt of hydroxytetrahydroabietic acid, Polymerizing. J. N. Borglin. 2,450,416, Oct. 5.
Cabinet: *See*—
  Kitchen cabinet.
Calculator. E. G. Kesling. 2,450,668, Oct. 5.
Cap: *See*—
  Strainer cap.
Capacitor, Electric. R. G. and L. W. Flowers. 2,450,650, Oct. 5.
Carbon alignment device for arc lamps. H. I. Huff. 2,450,477, Oct. 5.
Carbonated water dispenser. W. C. Buttner and H. E. Allshouse. 2,450,825, Oct. 5.
Carburetor. S. F. Hunt. 2,450,831, Oct. 5.
Card separating device. C. R. Nyman. 2,450,442, Oct. 5.
Carriage, Embossing machine. J. H. Gruver. 2,450,725, Oct. 5.
Carriage for endless band meat cutting machines. Reciprocating. W. Lasar. 2,450,601, Oct. 5.
Carry mechanism, Grawl. H. M. Fleming. 2,450,787, Oct. 5.
Case and projection unit, Combined carrying. M. R. Hutchison, Jr. 2,450,757, Oct. 5.
Casing for pumps. I. R. Loss. 2,450,671, Oct. 5.
Catalyst chamber construction. J. W. Loy. 2,450,804, Oct. 5.
Cellular thermoplastic products, Manufacture of. O. R. McIntire. 2,450,436, Oct. 5.
Cement, Sorel. D. S. Hubbell. 2,450,513, Oct. 5.
Centrifugal casting. A. K. Higgins. 2,450,755, Oct. 5.
Centrifugal casting. T. C. Kuhlman. 2,450,832, Oct. 5.
Chain: *See*—
  Conveyer chain.
  Tire chain.
Chain link, Transmission. R. L. Saifyrd. 2,450,565, Oct. 5.
Chair: *See*—
  Automatic adjustable chair.
  Checkered game board.
Cheese, Making. Z. D. Roundy and H. L. Kell. 2,450,814, Oct. 5.
Chromium compounds and compositions containing them, Rust preventive. P. R. McCarthy. 2,450,806–7, Oct. 5.
Chuck, Diaphragm. G. and E. F. Hohwart. 2,450,800, Oct. 5.
Circuit: *See*—
  Supervisory indicating circuit.
Circuit maker and breaker. J. T. L. Brown. 2,450,499, Oct. 5.
Clamp: *See*—
  Railroad rail clamp.
Clarifier, Liquid. J. P. North. 2,450,522, Oct. 5.
Cleaner: *See*—
  Egg cleaner.
  Suction cleaner.
Closure for dishwashing machines, Multiple. L. A. Loeb. 2,450,670, Oct. 5.
Closure means for containers. V. E. Ramsey. 2,450,811, Oct. 5.
Coating apparatus, Confectionery. J. G. Herrmann. 2,450,661, Oct. 5.
Coating by evaporating metals. W. H. Colbert and A. R. Weinrich. 2,450,850–7, Oct. 5.
Coil tester, Electrical. A. G. Brown. 2,450,577, Oct. 5.
Collar, Horse. L. Y. Davis. 2,450,719, Oct. 5.
Comparator, Interferometric. G. E. Merritt. 2,450,839, Oct. 5.
Compartmented container. J. H. Cassidy and R. M. Grunden. 2,450,419, Oct. 5.
Composition for descaling ferrous metal. H. A. Robinson. 2,450,861, Oct. 5.
Compositions on surfaces, Forming plastic coating. F. E. Drummond. 2,450,503, Oct. 5.
Compounded oil. J. O. Clayton. 2,450,633, Oct. 5.
Compressor, Axial flow. K. Baumann. 2,450,745, Oct. 5.
Compressor, Motor-driven. R. T. Cornelius. 2,450,468, Oct. 5.
Condenser and brush mounting for dynamoelectric machines. J. Nader. 2,450,809, Oct. 5.

Connection, Swivel. N. M. Couty. 2,450,581, Oct. 5.
Connector: *See*—
  Belt connector.
  Electrical connector.
  Stamped chain connector.
Constant flow pump. C. A. Elwood. 2,450,751, Oct. 5.
Container: *See*—
  Compartmented container.
Container for paper sheets, Single blank. O. H. Ogren. 2,450,558, Oct. 5.
Control apparatus for internal-combustion engines. M. E. Chandler. 2,450,826, Oct. 5.
Control apparatus for internal-combustion engines. L. Lee, II. 2,450,834, Oct. 5.
Control circuit for indicating movements of position indicators, Electrical. J. R. Lindsay. 2,450,479, Oct. 5.
Control device, Level responsive. H. A. Schlieder. 2,450,739, Oct. 5.
Control means for motor-driven letoffs. A. Palmer and V. F. Sepavich. 2,450,485, Oct. 5.
Control means responsive to movements of a refrigerator door, Humidity. J. J. Bauman. 2,450,823, Oct. 5.
Control mechanism for guns, Fire. J. Harrington, Jr. 2,450,551, Oct. 5.
Control valve device, Duplex. H. C. May. 2,450,481, Oct. 5.
Converter for suction cleaners. D. C. Gerber. 2,450,828, Oct. 5.
Converter for suction cleaners. H. B. White. 2,450,846, Oct. 5.
Converter mechanism, Motion. C. R. Sacchini and L. N. Vandervoort. 2,450,692, Oct. 5.
Conveyer chain. J. L. Clarkson. 2,450,501, Oct. 5.
Coupler for air lines. R. T. McElhose. 2,450,808, Oct. 5.
Coupling: *See*—
  Bag coupling.
  Expansion coupling.
  Semiautomatic coupling.
Cover for textile fiber drafting, Roll. J. W. Baymiller. 2,450,409–10, Oct. 5.
Crystal apparatus, Piezoelectric. W. P. Mason. 2,450,434, Oct. 5.
Curler. J. K. O. Farrell. 2,450,752, Oct. 5.
Cutter: *See*—
  Portable tile cutter.
Cyclohexylcarbinyl thiocyano esters. R. C. Morris, A. V. Snider, and P. H. Williams. 2,450,765, Oct. 5.
Dampener, Vibration. N. E. Wahlberg and F. F. Kishline. 2,450,701, Oct. 5.
Data transmission system, Telemetric. F. S. Kinkead, W. A. Phelps, E. M. Smith, F. J. Singer, and L. E. Melhuish. 2,450,516, Oct. 5.
Decoy. V. Ballard. 2,450,572, Oct. 5.
Dehydrating apparatus, Sprayer for. S. A. Kloda. 2,450,599, Oct. 5.
Dehydrating system. A. G. Sherman. 2,450,843, Oct. 5.
Dental impression accessory. R. E. Hawkinson. 2,450,591, Oct. 5.
Dextrins from stillage sirup, Recovering. H. W. Coles. 2,450,717, Oct. 5.
Dimethyl and ethyl thiophenes, Production of. H. E. Rasmussen and R. C. Hansford. 2,450,687, Oct. 5.
Discharge tube with electronic velocity filter, Thermionic. A. Levialdi. 2,450,602, Oct. 5.
Dispenser: *See*—
  Carbonated water dispenser.
Dispenser for rolled sheet material. A. E. Whiteley. 2,450,496, Oct. 5.
Dispensing apparatus, Liquefied gas. W. C. Buttner. 2,450,824, Oct. 5.
Display device. W. S. Leech. 2,450,759, Oct. 5.
Distillation apparatus for treating fatty acid containing stock. R. H. Potts. 2,450,611, Oct. 5.
Distillation of fatty acid stock by fractionation and flash steps. R. H. Potts. 2,450,612, Oct. 5.
Distillation process for separating products of carbon tetrachloride fluorination. A. F. Benning. 2,450,415, Oct. 5.
Distillation process for separating products of chloroform fluorination. A. F. Benning. 2,450,414, Oct. 5.
Distributor mechanism. A. Williams and O. E. Meyer, Sr. 2,450,704, Oct. 5.
Door frame. R. R. Magaw and K. H. Miller. 2,450,673, Oct. 5.
Door lock. J. H. Milligan. 2,450,840, Oct. 5.
Door lock. W. R. Schlage. 2,450,449, Oct. 5.
Door structure, Disappearing. W. T. Hormes. 2,450,593, Oct. 5.
Double seal grip tool joint. M. E. Boehm. 2,450,453, Oct. 5.
Drafting element, Textile fiber. J. W. Baymiller. 2,450,408, Oct. 5.
Drier: *See*—
  Fruit drier.
Drum, Buffing. J. L. Smith. 2,450,617, Oct. 5.
Dry cell, Leakproof. O. K. Reinhardt and T. F. Fallon. 2,450,813, Oct. 5.
Dry-cleaning emulsion. J. R. Fisher, Jr. 2,450,505, Oct. 5.
Ductless system. A. H. Bahnson, Jr. 2,450,571, Oct. 5.
Dyeing of alkali-sensitive fibers, including an acid reduction of the vat dye impregnated fibers, Vat. G. K. Politica. 2,450,767, Oct. 5.
Dynamoelectric machine. R. D. Jones. 2,450,664, Oct. 5.
Earthworm disgorging device. J. B. Karnowski. 2,450,597, Oct. 5.
Easel. H. Ullmann. 2,450,495, Oct. 5.
Edge trimming machine. F. F. Murray. 2,450,842, Oct. 5.
Egg cleaner. E. T. Molitor. 2,450,606, Oct. 5.
Electric plug. M. M. Guernsey. 2,450,657, Oct. 5.
Electrical connector. E. A. Sprigg. 2,450,528, Oct. 5.
Electrical cord. G. E. Henning. 2,450,429, Oct. 5.
Electrical networks for phase shifters. S. W. Seeley. 2,450,616, Oct. 5.
Electrode system. E. C. Thomson. 2,450,459, Oct. 5.
Emulsion containing nitraniline sulfonic acids, Photographic. B. H. Carroll. 2,450,747, Oct. 5.
Enol acetates of alpha-diketones, Preparing. H. J. Hagemeyer, Jr. 2,450,754, Oct. 5.
Erythemal phosphor. J. H. Gisolf, F. A. Kröger, and J. Bakker. 2,450,548, Oct. 5.
Ethers of 1-methylolcyclohexyl-cyclohexyl-carbinol. J. E. Bludworth and D. P. Easter. 2,450,498, Oct. 5.
Ethylene, Polymerization of. L. Schmerling. 2,450,451, Oct. 5.
Evaporation and concentration of liquids. G. G. Zahm. 2,450,774, Oct. 5.
Expansion coupling. G. J. Thompson, G. L. Koester, Jr., and J. B. Fullman. 2,450,458, Oct. 5.
Facsimile synchronizing system. W. G. H. Finch. 2,450,649, Oct. 5.
Fan, Centrifugal. P. Anderson. 2,450,708, Oct. 5.
Fastener: *See*—
  Slide fastener.
Filter: *See*—
  Air filter.
  Safelight filter.
Filter. R. Lepsoe and E. L. Jones. 2,450,865, Oct. 5.
Fire extinguisher. N. J. Thompson. 2,450,569, Oct. 5.
Firing mechanism, Gun. C. H. Samuel. 2,450,447, Oct. 5.
Flashlight attachment for small arms. L. H. Dodge. 2,450,584, Oct. 5.
Flask. J. D. Schwartz. 2,450,567, Oct. 5.
Fluid heating and cooling system, Automatic electric. P. A. Johnson. 2,450,478, Oct. 5.
Fluid-pressure-responsive element. J. W. Beecher. 2,450,625, Oct. 5.
Folding box. E. Barber. 2,450,573, Oct. 5.
Folding breakfast nook. O. V. Kendall. 2,450,515, Oct. 5.
Folding ski. J. P. Beaudin. 2,450,538, Oct. 5.
Folding table. M. L. Clare. 2,450,827, Oct. 5.
Food, Freezing. F. B. Doyle. 2,450,645, Oct. 5.
Food products, Concentrating highly colloidal. G. G. Zahm. 2,450,775, Oct. 5.
Footwear and making it. J. S. Kamborian. 2,450,666, Oct. 5.
Forging machine. W. H. Wineman. 2,450,621, Oct. 5.
Forming and ejecting die castings. L. H. Morin. 2,450,482, Oct. 5.
Forming device, Charge. L. Lee, II. 2,450,833, Oct. 5.
Frame: *See*—
  Door frame.
Froth flotation of silicious gangue from an alkaline magnetic iron ore pulp with an amine. F. D. DeVaney. 2,450,720, Oct. 5.
Fruit drier. F. C. Gullo. 2,450,590, Oct. 5.
Fruit picker. C. D. Ray. 2,450,812, Oct. 5.
Garment. E. Buchler. 2,450,631, Oct. 5.
Garment hanger. W. F. Helwig. 2,450,512, Oct. 5.
Gas burner. A. H. Greaves. 2,450,790, Oct. 5.
Gas burner. E. H. Mueller. 2,450,483, Oct. 5.
Gas burner. E. H. Mueller. 2,450,680, Oct. 5.
Gauge: *See*—
  Lens marking gauge.
  Maximum load indicating gauge.
Gear: *See*—
  Milling machine control gear.
Generator: *See*—
  Ultra high frequency magnetron generator.
Generator vacuum tube and cathode structure therefor, Ultra high frequency. J. W. McNall. 2,450,763, Oct. 5.
Golf balls, Making practice. W. Grobner. 2,450,474, Oct. 5.
Grading ruler, Pattern. B. Rothblum. 2,450,769, Oct. 5.
Guard for fishhooks, Weed. H. M. Helmark. 2,450,796, Oct. 5.
Guide for commode tanks, Spring type. L. E. Phelps. 2,450,609, Oct. 5.
Gun sight, Multiple reticle collimating. L. H. Brown. 2,450,712, Oct. 5.
Hair curler. E. Eppich. 2,450,542, Oct. 5.
Hair curler. D. B. Redward and C. J. Peterson. 2,450,560, Oct. 5.
Hair retainers, Making. L. T. Sawyer. 2,450,448, Oct. 5.
Hanger: *See*—
  Garment hanger.
Hanger for frames, Adjustable. D. H. Bratburd. 2,450,465, Oct. 5.
Hat form, Adjustable. A. Moebes. 2,450,521, Oct. 5.
Headrest and backrest in a beach or lawn chair, Combination. H. H. Collins. 2,450,783, Oct. 5.
Heating plant. S. Ria. 2,450,561, Oct. 5.
Heating system, High-frequency induction. H. W. Anderson. 2,450,623, Oct. 5.
Helicopter. N. N. Soloviff and N. G. Kling. 2,450,491, Oct. 5.
Herbicidal composition. A. L. Flenner. 2,450,543, Oct. 5.
High-voltage rectifying tube. M. J. Snijders. 2,450,770, Oct. 5.
Hoist. V. L. Darnell. 2,450,718, Oct. 5.

Hoist. S. S. McIntyre. 2,450,605, Oct. 5.
Holder: *See*—
Brush holder. Toothbrush holder.
Ironing cord holder.
Sanitary dental floss holder.
Holder for photographic cameras. Sentitized-material. M. B. Moore. 2,450,841, Oct. 5.
Hull, Concave hydroplane. W. B. Jutte. 2,450,665, Oct. 5.
Hydraulic bumper jack. H. E. Page. 2,450,608, Oct. 5.
Hydrocarbons and improved catalysts therefor, Isomerization of. C. O. Meyers. 2,450,764, Oct. 5.
Hydrocarbons, Synthesis of. A. Clark. 2,450,500, Oct. 5.
Indicating apparatus. L. Lee, II. 2,450,835, Oct. 5.
Indicating device. L. D. Smullin and J. B. Wiesner. 2,450,618, Oct. 5.
Inking apparatus for printing machines. W. G. Thomlinson. 2,450,494, Oct. 5.
Insulating means and making the same. T. Tognola. 2,450,532, Oct. 5.
Ironing cord holder. G. E. Campbell. 2,450,714, Oct. 5.
Jack: *See*—
Hydraulic bumper jack.
Reversible rack and pawl jack.
Joint: *See*—
Double seal grip tool joint.
Seal grip tool joint.
Kitchen cabinet. G. E. Watts. 2,450,702, Oct. 5.
Lapping or polishing. C. C. Stevens. 2,450,742, Oct. 5.
Lasting device. L. G. Miller. 2,450,557, Oct. 5.
Lathe attachment. T. Foster. 2,450,788, Oct. 5.
Lawn mower. J. A. E. Carlson. 2,450,849, Oct. 5.
Lead trowel. L. M. Proffit. 2,450,860, Oct. 5.
Lens marking gauge. C. W. Focht. 2,450,651, Oct. 5.
Lens polishing. F. G. Leeman. 2,450,433, Oct. 5.
Letoff for looms. A. Palmer and V. F. Sepavich. 2,450,484, Oct. 5.
Letoff for looms. V. F. Sepavich and C. R. Kronoff. 2,450,489, Oct. 5.
Lift, Vehicle. J. Felzer. 2,450,648, Oct. 5.
Limiter. S. R. Rich. 2,450,443, Oct. 5.
Linkage for artificial legs. G. G. Havens. 2,450,728, Oct. 5.
Load compensating brake. A. J. Bent. 2,450,464, Oct. 5.
Lock: *See*—
Door lock.
Lock controlled switch. C. M. Whelan. 2,450,819, Oct. 5.
Lock device for well tools. A. A. Baker. 2,450,822, Oct. 5.
Locket. G. E. Speicher. 2,450,620, Oct. 5.
Locking member, Oxygen connection. J. L. Hight. 2,450,430, Oct. 5.

Wool with indigo dyestuffs, Dyeing of. E. Weber. 2,450,773, Oct. 5.
Wrecking truck boom support. A. F. Heinss. 2,450,798, Oct. 5.
X-ray rectifying mechanism. D. Sussin. 2,450,530, Oct. 5.
Yarn articles, Making. A. Siefert and J. M. Laiho. 2,450,695, Oct. 5.
Yeast products, Treatment of liquid. B. Maizel. 2,450,604, Oct. 5.
Zirconia gel production equipment, Cleaning dried. T. H. Milliken, Jr. 2,450,439, Oct. 5.

CLASSIFICATION OF PATENTS

ISSUED OCTOBER 5, 1948

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number = class, second number = subclass, third number = patent number

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

HUELSTER *v.* REITER
REITER *v.* HUELSTER

No. 5468 and No. 5470. Decided June 1, 1948

[168 F.2d 542; 78 USPQ 82]

1. INTERFERENCE—APPLICATION AND PATENT—BURDEN OF PROOF.

Where the counts are claims of a patent issued to appellee, and the application of appellant was filed after the issuance of the patent to appellee, *Held* appellant has the burden of proving his case beyond a reasonable doubt.

2. SAME—SAME—SAME.

Held that appellant had the burden of proving beyond a reasonable doubt conception of the involved invention, and also prior reduction to practice, or that he was diligent in reducing the invention to practice during the critical period.

3. SAME—REDUCTION TO PRACTICE—TESTS.

Where an important object of each of the parties is to avoid the defect of the prior art, i. e. the tendency of the prior art devices to be crushed or deflected in such a way as to render the fastener, of which they formed a part, inoperative, *Held* that, although the cap here in issue is simple in construction, it could not be ascertained from a mere inspection of the new cap whether or not the improved result would be obtained, and to determine that question it would be necessary to subject the new cap to the stresses which had produced the crushing of the prior art devices.

4. SAME—SAME—SAME.

Held that the invention here in issue is of such a nature that a successful test of it is necessary to establish a reduction to practice; and *Held* that appellant, having failed to prove that such a test was made, was properly restricted to the filing date of his application here involved for reduction to practice.

5. SAME—SAME—DILIGENCE.

Where appellee did not submit any testimony and is, therefore, restricted, for conception and reduction to practice to the filing date of the application on which his patent was granted, *Held* that, even assuming that appellant was the first to conceive the invention in issue, he cannot prevail unless he was diligent from a time just prior to the date appellee's application was filed until the date when appellant's application was filed.

6. SAME—SAME—SAME.

Where it is alleged that the failure by appellant to make an actual reduction to practice of the invention in issue during the war years was due to the fact that appellant and his assignee-employer were busy with war work and that necessary materials were lacking, *Held* that, even assuming that such failure to make an actual reduction to practice was justified, the failure to constructively reduce the invention to practice by the filing of an application has not been satisfactorily explained.

7. SAME—SAME—SAME.

Where the record shows that six applications for other invention by appellant were filed during 1942 and where appellant's application in interference was filed less than four months after the issuance of appellee's patent in 1943, and appellant admitted that he had knowledge of the patent prior to the filing of his application, *Held* that, since appellant, despite the burden of war work, was able to file his application promptly after learning that a rival was in the field, we are of the opinion that he was lacking in diligence during 1943 and the latter part of 1942.

8. SAME—PRIORITY—CAP FOR SNAP FASTENER.

Held that, since appellant was lacking in diligence during the critical period, the decision of the Board of Interference Examiners awarding priority of invention to appellee is affirmed.

APPEAL from the Patent Office. Interference No. 81,777.

AFFIRMED.

Samuel E. Darby, Jr., and *Floyd H. Crews* (*Darby & Darby* of counsel) for Huelster.

J. H. Kilcoyne (*Elmer L. Zwickel* of counsel) for Reiter.

HATFIELD, *J.*:

Patent Appeal No. 5468

This is an appeal in an interference proceeding from the decision of the Board of Interference Examiners of the United States Patent Office awarding priority of invention of the subject matter in issue to appellee, Harold J. Reiter, the senior party. The invention in issue is a cap for a snap fastener. It is defined in four counts, of which the following is representative:

1. A cap for a snap fastener, said cap having an imperforate center portion and an annular marginal portion, and an annular series of prongs cut from the marginal portion and integrally joined to the cap at the juncture of said portions, said prongs being of a length less than the width of the marginal portion thereby providing an unbroken peripheral edge on said portion.

The cap to which the invention relates forms a part of the socket member of a snap fastener. The other part of the socket member comprises an annular channel having its outer edge rolled upwardly and inwardly to a position slightly spaced from the inner edge of the channel. The cap is circular in form and includes an imperforate circular center portion surrounded by a flat flange. Portions of this flange are pressed out and bent to form prongs extending at right angles to the plane of the flange and surrounding the imperforate central portion of the cap. In assembling the socket member the prongs are passed between the inner edge and the rolled outer edge of the channel hereinbefore referred to

Vol. 615 • No. 1 Tuesday, October 5, 1948 Price $16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $19.50; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 25 cents each; copies of TRADE-MARKS and DESIGNS at 10 cents each. Address orders to the Commissioner of Patents, Washington 25, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or TRADE-MARKS will be sent without cost on request to the Commissioner of Patents, Washington 25, D. C.

and the prongs are then bent so that they lie along the inner face of the rolled outer edge of the channel and thus clench the cap and the other part of the socket member together.

[1] The counts are claims of a patent, No. 2,332,167, issued to appellee Reiter on October 19, 1943. The application of appellant Huelster was filed February 8, 1944, after the issuance of the Reiter patent, and appellant, therefore, has the burden of proving his case beyond a reasonable doubt. It is urged by appellant that this burden should apply to conception only and that as to such matters as reduction to practice and diligence, his burden should be a fair preponderance of evidence only. However, in the case of *Heddon* v. *Coudery et al.*, 26 CCPA (Patents) 743, 100 F.2d 426, 40 USPQ 124, 500 O. G. 513, we stated that an applicant whose case is filed after the issuance of a patent to another has the burden of proving "the essential elements of the case beyond reasonable doubt," and in the cases of *Walker* v. *Altorfer*, 27 CCPA (Patents) 1130, 111 F.2d 164, 45 USPQ 317, 519 O. G. 1043, and *Lichtenwalter* v. *Caron*, 34 CCPA (Patents) 792, 158 F.2d 1011, 72 USPQ 271, 598 O. G. 325, we held that this burden applied to the proof of reduction to practice. [2] In view of authorities cited, it must be held that appellant in the instant case had the burden of proving beyond a reasonable doubt conception of the involved invention and also prior reduction to practice, or that he was diligent in reducing the invention to practice during the critical period.

Appellee did not submit any testimony and is, therefore, restricted, for conception and reduction to practice, to October 29, 1942, the filing date of the application on which his application here involved was filed.

The Board of Interference Examiners held that appellant conceived the invention defined in counts 1, 2, and 4, and made fasteners conforming to the requirements of those counts prior to the end of 1941. As to count 3, the Board held that appellant had failed to establish conception prior to appellee's filing date. The Board further held that the invention in issue is of such a nature that an actual reduction to practice of it cannot be effected without a successful test; that no tests were made by appellant prior to his filing date, February 8, 1944; and that appellant was not diligent during the period between October 29, 1942, when appellee entered the field, and February 8, 1944, when appellant filed his involved application. The Board, accordingly, awarded priority to appellee as to all four counts.

It is not contended on behalf of appellant that he successfully tested a fastener which conforms to the counts in issue at any time prior to February 8, 1944. Counsel for appellant contend, however, that the invention in issue is of such a nature that merely making it, without testing, is sufficient to establish an actual reduction to practice.

[3] Although the cap here in issue is simple in construction, it is made of comparatively light metal and, in use, may be subjected to rather severe strains in the wearing, laundering, and ironing of the garment to which it is attached. It is true that the devices alleged to have been made by appellant in 1941 and relied on by him as showing a reduction to practice were generally similar to caps previously made. They differed somewhat, however, in proportion and design, and their ability to meet the stresses normally encountered in use could not, in our opinion, be foretold with certainty on the basis of tests of the prior art fasteners. Furthermore, the cap to which the interference counts are directed was not intended merely to duplicate prior fastener caps, but was intended as an improvement, and was held to be invention over the prior art devices.

As pointed out in appellant's application and in appellee's patent, the caps of the prior art had a tendency to be crushed or deflected in such a way as to render the fastener, of which they formed a part, inoperative. It was an important object of each of the parties to avoid those defects. It is clear, in our opinion, that it could not be ascertained from a mere inspection of the new cap whether or not the improved result would be obtained. To determine that question it would be necessary to subject the new cap to the stresses which had produced the crushing of the prior art devices. Only after the new cap had withstood such stresses could its success be considered to be established. Furthermore, it would not be possible to tell from inspection alone whether the prongs of the fastener caps allegedly made in 1941, or the flanges on which the prongs had been punched, were strong enough to meet the stresses encountered in the use of the fasteners.

Counsel for appellant rely on the case of *Sinko Tool & Manufacturing Co.* v. *Automatic Devices Corporation*, 157 F.2d 974, 71 USPQ 199, in which it was stated that a test "under service conditions" is necessary only in those cases in which "persons qualified in the art would require such a test before they were willing to manufacture and sell the invention as it stands." It is to be noted that that decision relates to the necessity of tests "under service conditions," and not to the necessity of any tests at all. In the *Sinko Tool & Manufacturing Co.* case, supra, there had been shop tests and demonstrations made. The case, therefore, is not directly in point in a situation where, as in the instant case, no tests whatsoever were made. Furthermore, although appellant and his witness Scovill stated that, in their opinion, the 1941 caps could have been marketed, they did not state definitely that they would have been willing to produce and market them without testing them, nor is there any evidence that they were ever actually produced and marketed without tests. Accordingly, the opinions of Huelster and Scovill, given years after the caps were made, are not considered sufficient to establish that tests were unnecessary.

It may be noted that in the case of *Warner* v. *Smith*, 13 App. D. C. 111, 1898 C. D. 517, 84 O. G. 311, the court held that the making, without testing, of a button having certain novel features, for use on garments did not constitute a reduction to practice.

[4] We are of opinion that the invention here in issue is of such a nature that a successful test of it is necessary to establish a reduction to practice and that appellant, having failed to prove that such a test was made, was properly restricted to the filing date of his application here involved; namely, February 8, 1944, for reduction to practice. [5] Accordingly, even assuming appellant to have been the first to conceive the invention in issue, he cannot prevail unless he was diligent from a time just prior to October 29, 1942, when appellee filed the application on which his patent here involved was granted, until February 8, 1944, when appellant's application was filed.

[6] It is not alleged that appellant was active in connection with the invention in issue throughout the critical period, but it is contended that appellant and the Scovill Manufacturing Company, his assignee and employer, were busy with war work and that, for that reason and because of a lack of necessary materials, the invention could not be put into production. Assuming, for the purpose of the decision in this case, that the failure by appellant to make an actual reduction to practice of the invention during the war years was justified, the failure to constructively reduce the invention to practice by the filing of an application has not been satisfactorily explained. [7] The record shows that six applications for other inventions by appellant were filed during 1942, one of those being filed on September 10, 1942, shortly before appellee's entry into the field, and another on December 1, 1942, shortly after such entry. It is evident, therefore, that appellant could have filed an application on the invention here in issue at any time during 1942, if he had desired to do so. Furthermore, appellant's application here involved was filed on February 8, 1944, less than four months after the issuance of appellee's patent on October 19, 1943, and appellant admitted that he had knowledge of the patent prior to the filing of his application. It is evident, therefore, that appellant, despite the burden of war work, was able to file his application promptly after learning that a rival was in the field. We are of opinion, therefore, that appellant was lacking in diligence during 1943 and the latter part of 1942, and that the Board of Interference Examiners properly awarded priority of invention to appellee.

In view of our conclusion, it is unnecessary to decide whether appellant established conception of the invention in issue prior to appellee's filing date.

[8] The decision of the Board of Interference Examiners awarding priority of invention of the subject matter in issue to appellee is affirmed.

AFFIRMED.

Patent Appeal No. 5470

Subsequent to appellant's appeal to this court, appellee filed a cross-appeal claiming that the Board erred in awarding to the party Huelster conception of counts 1, 2, and 4, in October 1941. Owing to the views hereinbefore stated in Patent Appeal No. 5468, the issues raised by appellee's cross-appeal are moot. Accordingly, it is unnecessary to decide that issue.

By reason of illness, O'CONNELL, *J.*, was not present at the argument of this case and did not participate in the decision.

NOTICES

Adjudicated Patent

(C. C. A. Calif.) McAdam patent No. 2,219,393, for a defrosting device, claims 1 to 9, 12, and 14 *Held* invalid, claims 10 and 11 *Held* valid, and claim 13 *Held* valid and infringed. *Refrigeration Engineering* v. *York Corp.*, 168 F.2d 896, 78 USPQ —.

Adverse Decisions in Interferences

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed.

Pat. 2,301,960, Basil Lermont and A. M. Wolf, Method and apparatus for forming metal sheets, decided June 22, 1948, claims 10 and 11.

Pat. 2,435,641, Victor Weber, Electric heating system for cooking appliances, decided August 31, 1948, claims 1, 2 and 3.

Pat. 2,403,025, A. L. Samuel, Electron beam device, decided September 7, 1948, claim 2.

Disclaimer

2,423,304.—*William A. Fitch*, Schenectady, N. Y. PULSE PRODUCING SYSTEM. Patent dated July 1, 1947. Disclaimer filed Sept. 1, 1948, by the assignee, *General Electric Company*.

Hereby enters this disclaimer to claims 1 and 2 of said patent.

Cancellation Notice

Willoughby Camera Stores, Inc., its assigns or legal representatives, take notice:

A cancellation proceeding has been instituted by this Office upon the application of The Spencer Company, 711 West Lake St., Chicago, Ill., to effect the cancellation of trade-mark registration of Willoughby Camera Stores, Inc., No. 300,972, dated February 14, 1933. The assignment records of this Office show a transfer of title to this registration to Robert B. Wheelan, New York, N. Y., joined as a respondent to defend the registration concerned. The Office having been unable to secure service upon the registrant or said Wheelan, notice is hereby given that unless they, their assigns, legal representatives, or other person claiming an interest in the registration shall enter an appearance therein within thirty days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS F. MURPHY,
Assistant Commissioner of Patents.

Sept. 13, 1948.

Interference Notice

The Big Store Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Marlboro Shirt Company, Inc., Lombard and Paca Sts., Baltimore, Md., for registration of a trade-mark and registration No. 277,138, issued November 4, 1930, to The Big Store Company, southeast corner of Seventh and Race Sts., Cincinnati, Ohio, and the notice of such declaration sent by registered mail to the said The Big Store Company at the said address having been returned by the post office undeliverable, notice is hereby given that unless The Big Store Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order, the interference will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS F. MURPHY,
Sept. 15, 1948. *Assistant Commissioner of Patents.*

Classification Order No. 34

August 16, 1948

The following changes in the classification of inventions are hereby directed to take effect immediately:

IN THE MANUAL OF CLASSIFICATION:

ESTABLISH CLASS

332—MODULATORS (Division 10) with the following subclass schedule.

Note.—Definitions of this class may be seen in the Search Room and in the Classification Group pending publication in the Classification Bulletin.

332, Modulators

Modulators
1 Modulation converters (e. g. pulse to F. M.; F. M. to A. M.)
2 Modulator combined with specific intelligence source (e. g. electroacoustic transducer)
3 Photo electric signal source
4 Thermal modulators
5 Magnetic field electronic tube type (e. g. magnetron)
6 Retarding field electronic tube type (e. g. Barkhausen-Kurz)
7 Electron bunching type (e. g. Klystron)
8 Spark or arc systems
9 Pulse modulation
10 With modulated carrier
11 (No subclass)
12 Saturable reactor or transformer type
13 Electron beam type
14 Pulse oscillator type (e. g. multivibrator)
15 Clipping level means type
16 Phase or frequency modulation
17 With amplitude modulation
18 Distortion introduction or control
19 Average control (e. g. A. F. C.)
20 With indicator, observing means and/or signal
21 Plural signal sources (e. g. multiplex)
22 Plural modulation
23 Plural path in modulator
24 Push-pull
25 Electron beam type
26 Electro-mechanical resonant element type (e. g. piezo-electric)
27 Variable parameter electronic tube type
28 Reactance tube
29 Variable circuit parameter type
30 Capacitative
31 Amplitude modulation
32 (No subclass)
33 (No subclass)
34 (No subclass)
35 (No subclass)
36 (No subclass)
37 Distortion introduction or control
38 Average control (e. g. percentage of modulation)
39 With indicator, observing means, and/or signal
40 Plural signal sources (e. g. multiplex)
41 Plural modulation
42 Plural output modulation (e. g. polyphase)
43 Push-pull
44 Carrier suppressed
45 Single side band
46 Third order modulation
47 Bridge with conjugate input and output
48 Plural path in modulator
49 Signal applied to diverse electrodes
50 Inverse feedback modulation
51 Magnetic
52 Non-linear device type
53 Loss modulation
54 Directive electromagnetic beam
55 Variable shunt type
56 Variable reactance type (e. g. variable tuning)
57 Gas or vapor electronic tube type
58 Electron beam type
59 Modulated power supply
60 Plate circuit modulation
61 Series limiting
62 Shunt diverting
63 Cathode circuit modulation
64 Grid circuit modulation
65 Secondary emission
66 Single grid for carrier and signal
67 Variable grid leak
68 Miscellaneous

ABOLISH SUBCLASSES

In *class 157, Wheelwright-Machines* (Division 29)

Tire setters
6 Rubber tires

In *class 179, Telephony* (Division 10)

Relays (i. e., one-way amplifiers)
171.5 Modulators

CHANGE SUBCLASS TITLES

In *class 27, Undertaking* (Division 20) change the titles of subclasses 21, 22 and 23 to read:

21 **Body preparation**
22 Embalming processes and compositions
23 Embalming chambers

In *class 72, Masonry and Concrete Structures* (Division 33) change the title of subclass 14 to read:

Tanks
14 Composite

In *class 179, Telephony* (Division 16) change the title of subclass 100.4 to read:

Telegraphophones
100.4 Stylus and composition record (e. g., Disk, Cylinder or Strip)

In *class 318, Electricity, Motive Power Systems* (Division 26) change the title of subclass 539 to read:

Motor structure adjustment or control
539 Both armature and field structures rotatable or adjustable

ESTABLISH SUBCLASSES

In *class 45, Furniture* (Division 8)

Book and music holders
.5 Telephone type

In *class 157, Wheelwright-Machines* (Division 29)

1.1 **Rubber tire mounting and/or demounting apparatus**
1.11 With carrier
1.13 For divided tire bands
1.14 Wire tightening and/or securing
1.17 For collapsing or shifting tire axially
1.2 Circumferentially distributed thrust
1.22 Circumferentially traveling
1.24 Pedestal type
1.26 Pushing elements on opposed faces of tire and/or rim
1.28 Both on tire
1.3 Single bar pry or lever type
1.33 For tire retaining ring
1.35 For split rims (i. e., rim breakers)
1.36 Three or more rim engaging elements
1.37 Including link or lever carried abutment
1.38 Plural force-mechanisms
1.39 Individually operated
1.4 Auxiliary type
1.41 Axial toggles or coplanar cam
1.42 Circumferentially divided engaging element type
1.43 Two hand lever type
1.44 Plural force-mechanisms
1.45 Screw and nut actuated
1.46 Sliding or rack actuated members
1.47 Pivoted linkage movable in tire plane
1.48 Two link type
1.49 Single link or pry type

In *class 178, Telegraphy* (Division 16)

Systems
Automatic
Facsimile
5.1 Secret

In *class 200, Electricity, Circuit Makers and Breakers* (Division 37)

Thermal
136.3 Time controlled or continuously driven

MISCELLANEOUS CHANGES

On page 27–1, subclass 25 should be moved one step of indentation to the right so as to be coordinate with subclass 24.

On page 91–1, subclass 7 should be moved one step of indentation to the right so as to be coordinate with subclass 4.

CHANGES IN "CLASSES ARRANGED BY DIVISIONS"

Under Division 10, cancel "179, Telephony sub 171.5", and add: *332, Modulators.*

Under Division 51, cancel "sub 41".

CHANGES IN "CLASSES ARRANGED IN ALPHABETICAL ORDER"

After "16 Miscellaneous Hardware . . . 20" insert: **332**—MODULATORS . . . 10

Under "250, Radiant Energy" cancel "sub 41 . . . 51".

Under "179, Telephony" cancel "sub 171.5 . . . 10".

CHANGES IN "CLASSES ARRANGED IN NUMERICAL ORDER"

Under "179 Telephony" cancel "sub 171.5 . . . 10".

Under "250 Radiant Energy" cancel "sub 41 . . . 51".

After "323, Electricity, Voltage Magnitude and Phase Control Systems" insert: **332**—MODULATORS . . . 10

PRINCIPAL DISPOSITION OF ART FROM ABOLISHED SUBCLASSES

Abolished		Disposition	
Class	*Subclass*	*Class*	*Subclass*

IN THE DEFINITIONS:

27, Undertaking

cancel the definition of subclass 21 and substitute:

21. Miscellaneous tools, apparatus, methods and compositions used on the corpse, or for supporting and/or arranging parts of the corpse during the process of preparing same for burial or other final disposition.

(1) Note.—This subclass includes those devices, which function to hold the eyes, teeth, etc., in the position desired for burial.

29, Metal Working

in subclass 231 after "pinions", second occurrence. insert: *hands from shafts.*

and change the period to a comma and add: *etc.*

32, Dentistry

in subclass 19, in the note cancel the reference to class 234, and substitute:

246—RECORDERS, appropriate subclass

35, Education

in subclass 2, add:

(7) Note.—Search class 178, TELEGRAPHY, subclass 5.1, for privacy ensuring facsimile or television systems having means for rendering the pictorial intelligence unintelligible during transmission and intelligible at the receiver.

(8) Note.—Search class 179, TELEPHONY, subclass 1.5, for privacy ensuring telephone systems having means for rendering the speech unintelligible during transmission and intelligible at the receiver.

in subclass 31, in the note, cancel "234" and substitute: *346.*

61, Hydraulic and Earth Engineering

in subclass 73, under "Search Class" add:

254—PUSHING AND PULLING IMPLEMENTS, subclass 29 (and see note (1) thereto) for pile-sinking apparatus in which a continuously applied force operates successively to first bring the apparatus into engagement with the pile and then push it into the ground.

68, Textiles, Fluid Treating Apparatus

in the class definition, under "Notes" before "Search Class"; second occurrence, insert (2) *Apparatus* and add in numerical order:

101—PRINTING, for application of coloring material to a textile by a printing operation, and see particularly subclass 172 for multi-color printing of yarn strands.

in subclass 200, add:

Search Class—
101—PRINTING, subclass 172, for multi-color printing of yarn strands.

72, Masonry and Concrete Structures

cancel the definition and note of subclass 13 and substitute:

13. Tanks and features of construction thereof involving masonry or concrete construction.

Search this class, subclass—
6—for elevators and bins
9—for cisterns

cancel the definition of subclass 14 and substitute:

14. Subject matter under subclass 13 wherein the walls of the tank comprise a layer of masonry or concrete and a layer of another material.

Search Class—
196—MINERAL OILS, subclass 133, for masonry or concrete lined tanks limited to use as mineral oil vaporizers.

81, Tools

in subclass 15.2, under "(3) Note," change "6" to *1.1+.*

96, Photography

in subclass 78 cancel "(2) Search Class" and the reference thereunder.

97, Plows

in subclass 72, cancel "(2) Note" and add:

Search this class, subclass—
50—for motor-operated frame or implement lifts.
51—for machines having a plurality of implements successively operable for raising or lowering.
76—for foot-operated frame or implement lifts.
81+—particularly 83, 85+ and 96, for wheeled plows having means for raising or lowering the plow.
135+—particularly 148, 156 and 157+, for wheeled cultivators having means for raising or lowering the cultivating implements.
243+—for implement-carrying frames with means for vertically adjusting the implements.

Search Class—
37—EXCAVATING, appropriate subclasses, for lifts for ditching plows, scoops, and scrapers.
55—HARROWS AND DIGGERS, subclass 19+, for harrow lifts.
56—HARVESTERS, subclass 386+, for draft dumper rakes.
111—PLANTING, the subclasses including a main and auxiliary frame for drill set lifts.

in subclass 212, cancel "Search this class . . . 213", and add:

Search this class, subclass—
37+—for rotary earth-working elements combined with a mount or frame with means to drive the element.

101, Printing

in subclass 172, add:

Search Class—
68—TEXTILES, FLUID TREATING APPARATUS, subclass 200+, for apparatus for applying liquids to textiles.

150, Cloth, Leather and Rubber Receptacles

under subclass 39, add:

Search Class—
206—SPECIAL RECEPTACLES AND PACKAGES, subclass 39, for pocket card and ticket cases of material other than cloth, leather or rubber.

under subclass 41, add:

Search Class—
206—SPECIAL RECEPTACLES AND PACKAGES, subclass 39, for pocket stamp cases of material other than cloth, leather or rubber.

152, Resilient Tires and Wheels

In the class definition, under "(8) note", change "6" to *1.1+*.

157, Wheelwright-Machines

establish the following subclass definitions:

1.1. Devices and methods under the class definition for setting or removing or for facilitating the setting or removing of a rubber tire from a rim.

(1) Note.—A "rim" is defined as the immediate support for a rubber tire and includes such elements whether integral with or detachable from the wheel.

(2) Note.—This subclass is the collecting place for devices which cause radial motion only of a rubber tire portion, or devices for squeezing the rubber tire circumferentially of its cross-section in connection with the operation of setting or removing the same.

(3) Note.—This subclass is the collecting place for holding devices designed merely to engage a portion of the tire and/or rim, and to maintain a prescribed position of the tire portions relative to each other or of the tire portion relative to the rim as an aid to tire setting or removing by other means. The position in which the tire is held is generally one in which (1) the casing is deformed from its normal cross section, or (2) the tire and rim occupy positions other than fully assembled or fully separated.

(4) Note.—Devices which set or remove a tire supporting rim upon or from the felley of a wheel are excluded and will be found primarily in this class, 157, subclass 1.

Search Class—
29—METAL WORKING, subclass 235 for devices for placing and removing resilient articles in general.
81—TOOLS, subclass 15.3 for casing-supported devices for retaining a tire casing in spread condition.
144—WOODWORKING, subclass 288 for devices for holding wheels and wheel portions.
154—LAMINATED FABRIC AND ANALOGOUS MANUFACTURES, subclass 9 for devices which are not casing supported for retaining a tire casing in spread condition.

1.11. Devices under subclass 1.1 combined with or convertible to a vehicle carried bracket or support for a tire rim.

Search Class—
224—PACKAGE AND ARTICLE CARRIERS, subclass 42.12+ for vehicle carried tire holders without tire setting or removing features.

1.13. Devices under subclass 1.1 for operating on rubber tires that are circumferentially discontinuous.

1.14. Devices under subclass 1.13 which include means to manipulate or facilitate the manipulation of the end portions of circumferentially extending binding elements associated with the tire.

Search Class—
140—WIREWORKING, subclass 93 for devices in general for applying wire and subclass 111+ for devices for joining wire.

1.17. Devices under subclass 1.1 having means for engaging the tire and/or rim and moving the tire or a portion thereof in a direction normal to the plane of the tire or rim.

(1) Note.—Devices which engage a movable flange to thereby move the tire are included.

(2) Note.—Devices which produce radial motion in addition to axial motion are included.

1.2. Devices under subclass 1.17 wherein the tire engaging means is circumferentially continuous or consists of elements which are distributed with uniform circumferential spacing and simultaneously operated.

Search this class, subclass—
1.26+—for devices having circumferentially distributed engaging elements which are individually operated.

1.22. Devices under subclass 1.17 in which a tire engaging element and the rim have relative movement in concentric paths, which movement effects the axial motion of the tire portion.

(1) Note.—In order to be classified in this subclass, the indicated manner of use must be disclosed, and (1) the tire or rim engaging portion must be particularly designed to operate in this fashion, or (2) a supporting arrangement particularly designed to cause or permit movement of the device peripherally of the rim must be provided.

1.24. Devices under subclass 1.22 which have a base or stand for supporting the tire and rim when detached from the vehicle.

1.26. Devices under subclass 1.17 wherein the engaging members are adapted to engage opposite sides of a tire, or of a tire and rim, and are arranged for movement relative to each other.

(1) Note.—The essence of this subclass is the substantial opposition of the pushing members. Devices, therefore, in which one of the members engages portions of a wheel other than the felley or tire-holding rim are excluded and will be found in subclass 1.17 supra.

Search this class, subclass—
1.2—for devices wherein the opposed engaging members are circumferentially distributed.
1.22+—for devices wherein one of the opposed engaging members is circumferentially traveling.

1.28. Devices under subclass 1.26 wherein both opposing members or parts thereof engage the tire.

(1) Note.—In cases where one of the opposing members engages the rim in addition to the tire and where the enclosure formed by the members embraces the rim rather than the tire, and where the primary function of the rim engagement is provision of an anchor point, the simultaneous tire engagement of said element is regarded as incidental and the patent is placed in subclass 1.26.

Search Class—
254—PUSHING AND PULLING IMPLEMENTS, subclass 50.1+ for similar devices used as resilient tire casing spreaders and compressors.

1.3. Devices under subclass 1.17 consisting of a single lever.

(1) Note.—This subclass is made up primarily of patents wherein the device is a single rigid element. Plural element devices are also included, however, when the relative movement of the parts occurs merely (1) for the purpose of moving the lever elements to change the overall dimensions subsequent to the initial operation of the device in the manner of a lever or pry, or (2) for purposes other than tire setting or removal (e. g. stowage).

1.33. Devices under subclass 1.1 which engage and remove or apply, or facilitate the removal or application of, an annular tire retaining element which is mounted on the rim as a barrier for the prevention of relative axial movement between the tire and rim.

(1) Note.—Retaining elements for the purpose of this subclass may include, for example, discontinuous groove-engaging lock rings as well as the retaining portions of rims which are separable in an axial direction.

(2) Note.—Loose flanges having a mere sliding fit on the rim and which are themselves retained in the manner of a tire do not normally furnish subject matter for this subclass unless the device is disclosed as primarily intended for their forcible application or removal.

(3) Note.—Devices which merely shift a flange or tire portion to expose the retainer prior to removal thereof are excluded and will be found in subclass 1.17+.

1.35. Devices under subclass 1.1 having means to engage and distort a circumferentially discontinuous rim in order to (1) contract and/or expand the same, or (2) to offset and/or align the rim end, or both (1) and (2).

Search Class—
301—LAND VEHICLES, WHEELS AND AXLES, subclass 33 for split rims in which the offsetting, contracting and/or expanding device is a part thereof intended to be retained in position thereon during normal use of the rim.

1.36. Devices under subclass 1.35 having three or more rim-engaging elements.

(1) Note.—In determining the number of elements, those which are rigidly connected together and those which engage on opposite edges or faces of the rim in substantially the same radial plane, as well as those combinations of members which constitute a unitary rim clamping structure are regarded as single elements.

1.37. Devices under subclass 1.36 in which two of the contacting elements are connected by a system including a movable link and/or lever for drawing the elements together or separating them, said link or lever having an abutment or hook mounted thereon for applying a force to a portion of the rim incident to movement of said elements and substantially perpendicular to the direction of said movement.

(1) Note.—Devices of the type having arms of substantial length which are designed to project in a radiating fashion are excluded from this subclass and will be found in subclasses 1.38 and 1.41.

1.38 Devices under subclass 1.36 provided with at least two arrangements for forcibly moving certain of the rim engaging elements.

Search this class, subclass—
1.44—for plural force-mechanism devices having less than three rim engaging elements.

1.39. Devices under subclass 1.38 in which at least two manually operated controllers for the driving arrangements are present.

1.4. Devices under subclass 1.39 in which the force-mechanisms are readily divisible into two categories; i. e., main and subsidiary.

(1) Note.—The subsidiary mechanism is usually of a character different from and/or simpler than the main mechanism and can be operated for its purpose without substantially affecting the operation of the main mechanism. The disclosed purpose for the subsidiary mechanism is frequently the offsetting of the rim ends, while the main mechanism is usually disclosed as operating to expand or contract the rim.

1.41. Devices under subclass 1.38 having (1) a plurality of toggle force-mechanisms lying in planes perpendicular to that of a rim being operated on, or (2) a radial or face cam whose axis is perpendicular to the plane of the rim.

Search this class, subclass—
1.35—for devices having less than three rim engaging elements and operated by a linkage which is movable in a plane perpendicular to the plane of the rim.

1.42. Devices under subclass 1.35 in which at least one of the rim-engaging elements consists of two or more circumferentially spaced rim-contacting portions which are by appearance distinct, but which are in fact the terminal portions of integrally connected arms, thereby forming a single engaging element as defined for subclass 1.36 in (1) Note thereunder.

(1) Note.—The integral connection between the arms is sufficient for this subclass if the arms are so mounted that relative movement circumferentially of the rim in either direction is precluded when the device is in extended condition ready for use.

Search this class, subclass—
1.36—for devices having similar structure, but in which relative movement between the arms is permitted.

1.43. Devices under subclass 1.35 composed of a linkage designed to operate on the rim in response to actuation of two levers having handle portions for engagement by the hands of the operator.

1.44. Devices under subclass 1.35 provided with at least two driving arrangements for forcibly moving the rim engaging elements.

Search this class, subclass—
1.38+—for plural force-mechanism devices having three or more rim engaging elements.

1.45. Devices under subclass 1.35 wherein the mechanism for moving the rim engaging means includes a screw and nut.

Search this class, subclass—
1.36—for devices of this character having three or more rim-engaging elements.
1.41—for devices of this character where the screw and nut mechanism actuates an axial toggle.

1.46. Devices under subclass 1.35 wherein the mechanism for moving the rim engaging means includes (1) members having sliding engagement with each other and/or (2) a rack and actuating means therefor (e. g., a pinion, pawls, or the like).

Search this class, subclass—
1.45—for devices including sliding members which are screw and nut actuated.

1.47. Devices under subclass 1.35 made up of one or more members such as pivoted links and/or levers which are constrained to move in one or more planes substantially normal to the axis of a rim on which the device is operating.

Search this class, subclass—
1.35—for devices having similar linkages not confined to planes normal to the rim axis.
1.37, 1.38 and **1.4**—for devices of this character having three or more rim engaging elements.
1.43—for devices of this character consisting of two levers each having a handle portion for manual actuation thereof.

1.48. Devices under subclass 1.47 composed of two link members pivotally interconnected.

(1) Note.—Devices in which no more than one of the links are extended for use as a manually actuated lever are included.

(2) Note.—In determining the number of elements in the linkage, parts whose primary purpose is to effect clamping engagement with the rim are disregarded.

Search this class, subclass—
1.43—for similar devices comprising two hand levers.

1.49. Devices under subclass 1.47 comprising a single rigid lever member movable relative to the rim and designed to produce relative movement between the rim ends.

(1) Note.—Devices which include elements designed to be clamped to the rim to operate as a part thereof and to which the lever member is pivotally related are included.

abolish the definition of subclass 6.

178, Telegraphy

establish the following subclass definition:

5.1. Subject matter under subclass 5 having means for rendering the pictorial intelligence unintelligible during transmission and intelligible at the receiving station.

(1) Note.—Note that any conventional television system is secret to an unauthorized intercepter who does not have conventional receiving equipment. Consequently, the "means for rendering . . . unintelligible . . . and intelligible" of the above definition should not be read upon conventional means which are necessary to a non-secret system.

Search this class, subclass—
22—for privacy ensuring telegraph systems.

Search Class—
35—EDUCATION, subclasses 2+ for cryptography and privacy ensuring systems which do not relate to telegraphy, telephony, television or typewriting.
179—TELEPHONY, subclass 1.5 for privacy ensuring telephone systems.
197—TYPEWRITING MACHINES, subclass 4 for cryptographic typewriters.

in subclass 6, under "(3) Search Classes", in the reference to class 179, cancel "and wave modulators".
add the following:
332—MODULATORS, appropriate subclasses, for modulators which may be used in television.

in subclass 22, in "(2) Search this Class", after "them" insert *and subclass 5.1 for privacy ensuring television systems.*
in subclass 44, under "(2) Search Class" add:
332—MODULATORS, appropriate subclasses, for modulators which may comprise filters, and particularly subclasses 18 and 37 for modulators having preemphasis networks.

in subclass 50, under "(1) Search Classes" add:
332—MODULATORS, subclass 9+ for multiplex pulse modulators, subclass 21 for multiplex frequency or phase modulators, and subclass 40 for multiplex amplitude modulators, respectively.

in subclass 66, add:
Search Class—
332—MODULATORS, appropriate subclasses, for modulators, and particularly subclasses 16+ for phase or frequency modulators and subclass 31+ for amplitude modulators.

179, Telephony

in subclass 1.5 under "(3) Search Class" cancel the reference to 178, Telegraphy, and substitute:
178—TELEGRAPHY, subclass 5.1 for privacy insuring television systems and subclass 22 for privacy insuring telegraphy systems.
332—MODULATORS, appropriate subclasses, for modulators, and particularly subclasses 18 and 37 for modulators which introduce or remove distortion.

in subclass 2, under "Search Classes" add:
332—MODULATORS, subclass 9+ for multiplex pulse modulators, subclass 21 for multiplex frequency or phase modulators and subclass 40 for multiplex amplitude modulators, respectively.

in subclass 15, under "Search Class" add:
332—MODULATORS, subclass 9+ for multiplex pulse modulators, subclass 21 for multiplex frequency or phase modulators and subclass 40 for multiplex amplitude modulators, respectively.

cancel the definition of subclass 100.4 and substitute:

100.4. Apparatus for electrically recording and/or reproducing sound having a stylus which engages a composition record in disk, cylinder, tape or other tablet form and methods of using such apparatus.

Search Class—
274—SOUND RECORDING AND REPRODUCING, subclass 7+ for non-electrical methods and apparatus for recording sound upon disk, cylinder, tape or other tablet form and/or for non-electrically reproducing the recorded sound.

in subclass 171, under "Search Class" add:
332—MODULATORS, appropriate subclasses, for modulators.

189, Metallic Building Structures

in subclass 1.5, add:
(1) Note.—See 135, TENTS, CANOPIES, UMBRELLAS AND CANES, subclass 1+ for tents used as hangars.

192, Clutches and Power-Stop Control

in subclass 2, under "Search Class" cancel the reference to class 188, Brakes.

196, Mineral Oils

in subclass 133, add:
Search Class—
72—MASONRY AND CONCRETE STRUCTURES, subclass 14, for masonry or concrete lined tanks.

200, Electricity, Circuit Makers and Breakers

in subclass 19 add:
(3) Note.—Search this class, subclass 136.3 for periodic switches having a thermal control.

in subclass 33, in "(1) Note" before the period insert:
and for time operated switches having a thermal control search this class, subclass 136.3

establish the following subclass definition:
136.3. Subject matter under subclass 136 in which the circuit controlling element is controlled by a continuously driven shaft.
(1) Note.—The continuously driven shaft may be that of an electric or spring driven clock, or the continuously driven shaft may be that of a motor which is continuously driven, without regard to time. The control need not act directly on the circuit controlling element but may act indirectly through intermediate means.

Search this class, subclass—
19+—for non-thermal periodic switches.
33+—for non-thermal time switches.

Search Class—
236—AUTOMATIC TEMPERATURE AND HUMIDITY REGULATION, for similar subject matter in combination with a temperature control system.

206, Special Receptacles and Packages

in subclass 39, add:
Search Class—
150—CLOTH, LEATHER AND RUBBER RECEPTACLES, subclass 39, for pocket card or ticket cases of cloth, leather or rubber and subclass 41 for stamp books or stamp receptacles of cloth, leather or rubber.

220, Metallic Receptacles

in subclass 63 under "Search Class", insert:
72—MASONRY AND CONCRETE STRUCTURES, subclass 14, for masonry or concrete lined tanks.

222, Dispensing

in the class definition, section 7, under "Search Class", add, in numerical order:
65—KITCHEN AND TABLE ARTICLES, subclass 31+, for pitchers having drip catching or drip preventing means.

in section 24, cancel the references to class 234, and add:
346—RECORDERS, sec. 5(1), 6.

in subclass 108, add:
Search Class—
65—KITCHEN AND TABLE ARTICLES, subclass 31+, for pitchers having drip catching or drip preventing means.

in subclass 571, add:
Search Class—
65—KITCHEN AND TABLE ARTICLES, subclass 31+, for pitchers having drip catching or drip preventing means.

224, Package and Article Carriers

in subclass 42.12 under "Search Class" insert:
157—WHEELWRIGHT-MACHINES, subclass 1.11 for wheel rim and/or tire carriers which are combined with or convertible to a device for applying a tire to and/or removing the same from a wheel or rim.

244, Aeronautics

in subclass 2, cancel "(2) Note", and add:
Search this class, subclass—
50—for aircraft operable as land or water craft.
63—for launching of aircraft not claiming the combination of a lifting or propulsive aircraft.

Search Class—
258—RAILWAY MAIL DELIVERY, subclass 1.2, for load pick-up or release by an aircraft in flight and see the reference to this class (244) for the line.

in subclass 63, add:
Search this class, subclass—
3+—for launching of aircraft claiming the combination of a propulsive and/or lifting aircraft even though the combination may exist for only a brief period of time such as may be required to condition the launched aircraft to be self-sustaining.

250, Radiant Energy

in subclass 2, under "(2) Search Classes", insert:
332—MODULATORS, appropriate subclasses, for modulators. Note that subclass 54 provides for modulators in which a directive electromagnetic beam is variably absorbed, reflected or diverted.

in subclass 8, under "(2) Search Class", add:
332—MODULATORS, appropriate subclasses, for modulators per se.

in subclass 9, under "Search Classes", add:
332—MODULATORS, subclass 9+ for multiplex amplitude modulators, subclass 21 for multiplex frequency or phase modulators and subclass 40 for multiplex amplitude modulators.

in subclass 17, under "(2) Search Classes", add:
332—MODULATORS, appropriate subclasses, for modulators per se.

in subclass 20, under "(2) Search Classes", add:
332—MODULATORS, subclass 31+ for modulators which may be used as heterodyning or homodyning means in a receiver.

in subclass 27, under "Search Class", in the reference to class 179, cancel "including (amplifiers), indented subclass 171.5 for such systems used as modulators", and add in numerical order:
332—MODULATORS, appropriate subclasses, for modulators.

in subclass 36, under "(2) Search Classes" add:
332—MODULATORS, appropriate subclasses, for oscillators which are modulated.

in subclass 41.5, under "Search Class", add:
332—MODULATORS, subclass 3 for photoelectrically controlled modulators.

in subclass 104, in "(2) Note" change "class 173, Electricity, Conductors" to *class 174, Electricity, Conductors and Insulators.*

254, Pushing and Pulling Implements

in subclass 50.1 under "Search Class", in the reference to class 157, change "6" to *1.17+*.

in subclass 50.2 under "Search Class", change "6" to *1.22+*.

in subclass 51 under "(3) Search Classes", in the reference to class 157, change "6" to *1.14*.

in subclass 131 under "(2) Search Classes", in the reference to class 157, change "6" to *1.1+*.

281, Books, Strips and Leaves

in subclass 15, under "(2) Search Classes" insert:
45—FURNITURE, subclass .5, for book supports which are telephone attachments.

294, Handling, Hand and Hoist Line Implements

in subclass 15, under "Search Classes" insert:
254—PUSHING AND PULLING IMPLEMENTS, subclass 29 (and see the notes thereto) for hand bars, etc., in which a continuously applied force operates successively to bring the apparatus into engagement with the load and then to handle the load.

in subclass 17, under "Search Classes", cancel the reference to class 157 and substitute:
157—WHEELWRIGHT-MACHINES, subclasses 1.1+ particularly, subclasses 1.26+ and 1.86, and subclasses 5 and 11, for similar structures adapted for the mounting and demounting of rubber tires.

301, Land Vehicles, Wheels and Axles

in subclass 33, add:
Search Class—
157—WHEELWRIGHT-MACHINES, subclass 1.35+ for rim breaking devices which are not a part of the rim and are intended to be removed therefrom during normal use of the rim.

323, Electricity, Voltage Magnitude and Phase Control Systems

the unnumbered subclass definition following subclass 40 should be numbered *41*.

343, Communications, Radiant Energy

in the class definition, under "Search Class", in the reference to class 179, cancel ", and subclass 171.5 for modulator systems"

and add in numerical order:
332—MODULATORS, appropriate subclasses, for modulators per se.

in subclass 5, under "Search Class" add:
332—MODULATORS, appropriate subclasses, for modulators.

THOMAS F. MURPHY,
Assistant Commissioner of Patents.

REGISTER OF PATENTS AVAILABLE FOR LICENSING OR SALE

(The "Groups" appearing after the patent abstracts are based on the Standard Industrial Classification Manual, Vol. I, Manufacturing Industries, Executive Office of the President, Bureau of the Budget)

Pat. 2,438,644. TURRET TOOL POST. Patented Mar. 30, 1948. Multi-tool holding device for lathes and the like has a spool-like turntable mounted on radiating rollers in base plate of a support. When turntable is rotated to various predetermined positions to shift the cutting tools, shallow rollers on its bottom will seat on the rollers, so that when turntable is held down, the rollers lock it to base plate. Various cutting tools carried by turntable are held by a plurality of rocker wedges adjustably mounted in concave grooves in the top surface of bottom flange of turntable. Each wedge is channeled to hold a tool, and each channel has an elongated adjustable stop to prevent axial movement of tool. Pairs of set screws carried by top flange of turntable bear against top side of each tool and its stop to firmly hold them in place. The channel of each wedge has stepped sides to accommodate tools of various sizes. (Owner) Alfred R. Oberwegner, 5911 Woodlawn Ave., Los Angeles 3, Calif. Group 35—41—43. Reg. No. 9,987.

Pat. 2,353,557. INSTANT FIELD KNIFE. Patented July 11, 1944. A one-piece base and knife blade for instant use as a dagger is stitched, by means of a facing strip of leather or canvas, to the back of a gauntlet worn by a man in combat. The front end of facing strip is cut away so the blade projects parallel with user's fingers. The portions of the gauntlet between the fingers serve to restrain the rearward thrust of the hand-covering when the knife is used as a dagger. (Owner) Andrew J. Guthrie, Box 83, St. Albans, W. Va. Group 33—51. Reg. No. 9,988.

Pat. 2,445,575. BALL ROLLING GAME. Patented July 20, 1948. A game board for this "Ride and Roll Game" has two holes side by side for receiving marbles. Player places one marble on top of another and propels them over the board by manipulating an elongated piece of wood having a longitudinal groove in its under side in which the upper marble travels. Considerable skill is required to direct the lower marble into one hole and the upper marble into the other hole. (Owner) Andrew J. Guthrie, Box 83, St. Albans, W. Va. Group 39—41. Reg. No. 9,989.

Pat. 2,417,840. PACKING RING. Patented Mar. 25, 1947. Assembly allows for wear about a moving part and provides an effective seal during operation of hydraulic or pneumatic mechanisms. Construction shows an upper and lower packing gland having a V-shaped surface and fitted with a pair of V-shaped packing rings. The rings are separated by a ring of rubber-like material cut at an angle slightly greater than the angle of the packing ring surfaces. The effect is such that, when the glands are pressed together to expand and seat the rings, the packing is compressed to a greater degree from the stationary side than the motion side. This produces less static friction in that the packing, when in motion, does not grip the adjacent surface with as great a pressure as would ordinarily be the case. Several modifications are shown. (Owners) Lester W. Rodgers and Stanley H. Simpson, 75 East Wacker Drive, Chicago 1, Ill. Group 35—69. Reg. No. 9,990.

Pat. 2,442,570. HOLDER. Patented June 1, 1948. A holder (to be clamped to arm of chair or to table) supports vertically a ball of crochet cotton, yarn, etc., for feeding thread out to user. A pair of juxtaposed arms, having finger pieces at one end, are fitted together at one point to form a fulcrum by conical section of upper arm fitting into recess of lower arm. Arms are fastened together by a coil spring so that coacting jaws are formed for clamping to chair arm or to table. At jaw end of upper arm a spindle is pivoted for rotatably holding the ball. When not in use, this spindle is folded flat into a groove on top of upper arm. (Owner) Frank H. Post, 5112 Perry Ave., Ashtabula, Ohio. Groups 39—81; 40. Reg. No. 9,991.

Pat. 2,442,023. VEHICLE CHOCK. Patented May 25, 1948. A pair of connected metallic blocks for placing in front of and behind a vehicle wheel to prevent movement of the wheel. Blocks have opposed curved surfaces conforming to curvature of tire. Two channel guides are attached to each block for supporting a notched iron locking bar. This locking bar is pivoted in the rear end channel and movable vertically in the other channel guides. Device is adjustable to tires of various sizes by adjusting front end of locking bar so that notches engage forwardmost channel. (Owner) William T. Schwarzhoff, Waukon, Iowa. Group 38—31. Reg. No. 9,992.

Des. Pat. 150,272. DESIGN FOR A BENCH. Patented July 13, 1948. Bench is supported between two box-like compartments. (Owner) Clytie Ann Thomson, P. O. Box 2224, Roanoke, Va. Group 25—11. Reg. No. 9,993.

Des. Pat. 138,926. DESIGN FOR A PEA SHELLER OR SIMILAR ARTICLE. Patented Sept. 26, 1944. A device for slipping over end of thumb or finger, with a protruding piece for shelling peas, etc. (Owner) Mrs. Lavin'a Reid, Denham Springs, La. Groups 33—73; 39—81; 40. Reg. No. 9,994.

Pat. 2,445,220. URINARY PAD. Patented July 13, 1948. Absorbent device for persons addicted to involuntary urinary discharge permits freedom of movement of wearer. It consists of a flattened, water-impervious, circular pouch with several replaceable absorbent pads arranged in layers inside pouch. The back of the pouch (which contacts wearer's body) and the innermost pad are each formed with a relatively large central opening with a tube projecting into the openings. The pad against innermost pad is formed with a slit in endwise alignment with the openings. A suspensory is used to hold device snugly in place on wearer. (Owner) Susan Louise Isaacson, 1655 East 64th St., Long Beach 5, Calif. Groups 23—86; 39—16. Reg. No. 9,995.

Pat. 2,443,415. DENTAL FLOSS HOLDER. Patented June 15, 1948. A small U-shaped holder for supporting a short length of dental floss taut between the ends of the arms for cleaning the teeth. A finger grip is provided below the arms of the U for forcing the floss between the teeth. Holder may be made of cardboard or plastic (with floss

firmly attached) and discarded after use, or made of plastic with notches in ends of arms to receive fresh pieces of floss for repeated use. Modifications are shown. Holders may be packed in boxes for inexpensive retailing. (Owner) James Buscarino, 12 West 60th St., New York 23, N. Y. Groups 26—91; 39—81; 40. Reg. No. 9,996.

Pat. 2,443,123. CUTTING WHEEL FOR FLINT IGNITERS. Patented June 8, 1948. Comprises a non-grooved section, and a grooved section which merges into the non-grooved section from both sides and has slanting ridged walls of progressively changing angularity. Rotating wheel strikes the flint at constantly shifting points on opposite sides of the center when the grooved section passes over it, and endwise when the non-grooved section passes over it. May be used in cigarette lighters, etc. (Owner) Philip O. Solon. Address correspondence to Adelbert Schapp, 582 Market St., San Francisco 4, Calif. Groups 33—53; 34—51; 40. Reg. No. 9,997.

Pat. 2,444,686. DOUBLE ADJUSTMENT WRENCH HAVING THREAD AND RACK ADJUSTMENTS. Patented July 6, 1948. Quick-set wrench has a movable jaw which may be readily slid to holding position and then minutely adjusted by turning a nut. The jaw is carried on a slider mounted on shank of wrench above the nut. Jaw has oppositely positioned pawl-like edges for engaging ratchet teeth in opposite edges of slider, with springs urging jaw into operative position on slider. When the jaw is tilted clockwise, it may be easily slid along the slider. Turning the nut moves the slider to minutely adjust the jaw. (Owner) James C. White, R. F. D. 4, Box 6, Richmond, Ky. Group 33—52. Reg. No. 9,998.

Pat. 2,442,487. SMOKER'S PIPE CASE. Patented June 1, 1948. Case consists of two separate sections encircled by a rubber band to hold them together. An upwardly extending head on one end of upper section is formed with an inverted cup for receiving top of pipe bowl. An upwardly extending flanged head on lower section receives lower end of bowl. The other end of upper section is formed with a depression on its under side for engaging a lug on lower section to provide hinging action when opening and closing case. When case is closed, sides of a pipe bowl are exposed so that bowl may be grasped by user's fingers. (Owner) Mrs. Helen Farmer, 2318 Harriet St., Racine, Wis. Group 39—72—81. Reg. No. 9,999.

Pat. 2,426,780. SLIDING CUTOFF GAUGE AND MEASURING DEVICE FOR CIRCULAR SAWS. Patented Sept. 2, 1947. A rule having a segmental end is slidably mounted on the table of a circular saw equipped with a cutoff guide. Positioned on the cutoff guide and used in combination with the rule is an elongated gauge plate having a center pointer that registers with the graduations on the rule to indicate distance from the end of guide to the near side of saw. Gauge plate has a series of markings on either side of pointer to represent the thicknesses of the saw cuts or grooves as well as markings for setting the guide for dado, mitre joints, and rabbeting. Adjustments are made by manipulation of screws in the segmental wing of the rule. (Owner) Harry F. Malseed, 1456 Adelaide Ave., St. Louis 7, Mo. Group 35—43. Reg. No. 10,000.

Pat. 1,858,140. CHART. Patented May 10, 1932. A frame for teaching elementary music has wires stretched horizontally (in elongated form of abacus) on which notes, sharps, and flats are slidably mounted. Frame has a back upon which treble and bass clef signs, as well as lines and spaces of staffs, are marked. Two closely adjacent parallel wires are stretched in front of each line and space so that markings on face of back show between the wires, causing the lines to appear of one color and the spaces of another color. Notes of one color for each line or space are mounted to slide into position on the wires, and sharps and flats are slidably and detachably arranged for desired placing. (Owner) Cora Grace Dewhirst, Kansas, Ill. Groups 25—99; 39—39—81. Reg. No. 10,001.

Pat. 2,445,235. AIRCRAFT WITH BLAST OR LIKE TUBE AND CLOSURE THEREFOR. Patented July 13, 1948. This patent shows a stream-lined door or closure for the outer end of an aircraft blast tube in which a gun is mounted to fire outwardly through the tube. A switch on the instrument panel may be selectively moved to automatically open the door and set the gun for firing, or to automatically close the door and set the gun on "safety." The door is also automatically locked in open or closed position. Bottom of the blast tube is recessed to receive the door when it is pivoted inwardly to open position. The recess is deeper than the thickness of the door so that rear edge of door is shielded from the gun blast. A double-acting solenoid motor pivoted to the aircraft structure includes two spaced coils through which a plunger is reciprocable to open and close the door. A pair of latches alternately engage the plunger in extended or retracted position. Each latch is formed as a solenoid plunger operable in an independent solenoid coil. A pair of controls for setting the gun on "safety" or setting it to fire are mounted on the gun. (Owner) Joseph C. Myers, 1126 South Wakefield St., Arlington, Va. Groups 33X9; 37—21. Reg. No. 10,002.

Pat. 2,277,778. PROCESS FOR PRODUCING SALTS. Patented Mar. 31, 1942. This patent describes an economical process for producing pure anhydrous potassium sulphite and similar salts by precipitation reaction. A clear mixture of a strong aqueous caustic potash is slowly added to a large volume of strong alcohol into which pure sulphur dioxide is introduced at such a rate that the potash is slightly in excess. Patentee states that the fine white precipitate of anhydrous potassium sulphite formed is free of the impurities normally present in commercial caustic potash. Several modifications are given. (Owner) Merle Randall, 2512 Etna St., Berkeley 4, Calif. Group 28—89. Reg. No. 10,003.

Pat. 2,300,965. METHOD FOR TREATING MERCURY MINES. Patented Nov. 3, 1942. Reg. No. 10,004.

Pat. 2,320,468. METHOD OF TREATING MERCURY CONTAMINATED SURFACES. Patented June 1, 1943. Reg. No. 10,005.

These two patents describe methods to eliminate the health hazard present in mercury mines because of the existence of mercury vapor in the air. Muck piles, walls, timbers, stopes, tunnels, and other surfaces are sprayed (Pat. 2,300,965) with a solution of calcium polysulphide. The solution may employ a spreader (such as casein, ammonia soap, and cresylic acid) and a petroleum base which acts as an adhesive. In the event that the mercury-contaminated surfaces are acid in nature, the above alkali solution cannot be used, as poisonous hydrogen sulphide is generated. Such difficulties are obviated by adding finely powdered sulphur to kalsomine and other paints (Pat. 2,320,468). Several modifications shown in both patents. (Owner) Merle Randall, 2512 Etna St., Berkeley 4, Calif. Group 28—89.

Pat. 2,445,421. ALPHABET JIGSAW GAME. Patented July 20, 1948. This game is particularly intended as an aid in teaching children the alphabet and coordination in a simple and entertaining manner. On a rectangular sheet of cardboard the letters of the alphabet and numbers up to 10 are outlined so that they may be cut out. Each letter and number is further imprinted with dotted lines to indicate where it is to be cut into sections, after which the parts are to be assembled again. Modifications are shown in which the game is of more permanent form. (Owner) Leo Davis, 101 Cooper St., New York 34, N. Y. Group 39—41. Reg. No. 10,006.

Pat. 2,445,619. RISER. Patented July 20, 1948. A portable device assists a convalescent patient to practice (without help) sitting up on side of bed, standing, and finally walking. A rectangular frame formed of four uprights, with connecting hand rails on three sides and having a low platform, may be placed beside bed. Side of frame resting against bed is open so that patient's legs may be swung into frame. A detachable front strap and back support are fastened to frame to steady patient sitting on edge of bed. Patient stands on platform, supported by hand rails. A gate in hand rail of one side of frame leads to a step at side. Platform is corrugated to prevent slipping, and extra supports on frame guard against tipping. Modification shows frame adapted for use by two patients between two hospital beds. (Owner) John J. Josephs, 3205 Ridge Ave., Philadelphia 32, Pa. Groups 25—32; 34—41. Reg. No. 10,007.

Pat. 2,445,953. SIGNAL DEVICE. Patented July 27, 1948. A warning signal for boats approaching a drawbridge. A signal of duplicate construction is mounted upon each lift span. Signals have tubular mounting shafts and move vertically with the spans, causing a green light to show an approaching boat when the span is raised and red when it is closed. A hanger shaft extends downwardly from a coupling about the mounting shaft. A sleeve is rotatable about the hanger shaft. A gear about the sleeve meshes with a fixed gear about the mounting shaft to turn the sleeve during swinging movement of the span. The lamp housing, turning with the sleeve, moves the green or red portion of its wall into position to be seen by pilot. (Co-owner) F. A. Lancaster, P. O. Box 1494, Lake Charles, La. Group 36—62. Reg. No. 10,008.

Pat. 2,398,577. PISTON FOR INTERNAL-COMBUSTION ENGINES. Patented Apr. 16, 1946. This piston may be repacked without removing the entire piston or making radical changes in the engine with which it is used. Piston is of standard type and made in two separable sections so that its head or cap may be unscrewed from the body. Grooves are provided in the cap for two packing rings, a third ring being placed just below the bottom edge of cap on a neck provided in the body, permitting replacement of the rings as soon as cap is removed. Cap is locked in place by screws held from turning by wire pins. Cooling of the hollow interior of the cap is provided by oil splash conducted from crank case and back through connecting radial vents and external flutings. (Owner) George V. Bratzel, 240 Menlo Oaks Drive, Menlo Park, Calif. Group 35—69. Reg. No. 10,009.

Pat. 2,445,209. ABSORPTIVE HEADWEAR PAD. Patented July 13, 1948. Replaceable absorbent pad may be secured to the sweatband of hats by adhesive tabs or clips. It consists of an absorbent backing having spaced pads on one side, and a moisture-proof envelope enclosing the backing. The pads protrude through openings in the envelope for contact with wearer's head. If desired, circular pads may be secured inside the top of the hat. Modifications are shown. (Owner) Edward S. Clark, 1004 Lindley Ave., Philadelphia 41, Pa. Groups 22—91; 23—X2—X3. Reg. No. 10,010.

Pat. 2,385,579. FROZEN CONFECTION DISPENSER. Patented Sept. 25, 1945. Removable device will dispense small portions of ice cream or the like from a can to fill individual orders. A cover plate removably secured to top of can carries a motor and suction pump on its top. A lower plate is freely slidable vertically inside can. Suction side of pump is connected by a conduit to a hood mounted over apertures in lower plate. A driven shaft extending downwardly through both plates has its lower end bent to form a horizontal arm. A scraper blade is mounted on under side of arm. When scraper is rotated, it cuts a layer from top of contents of can and carries cut portion around beneath lower plate to the apertures so that pump will dispense the cut portion. Lower plate and scraper are free to move downwardly, following the changing level of contents of can. (Co-owner) Irving King, King Investment Co., 129 West Third St., Los Angeles 13, Calif. Groups 33—73; 35—51. Reg. No. 10,011.

Pat. 2,443,792. ADJUSTABLE SHOE TREE. Patented June 22, 1948. Shoe tree is adjustable to fit shoes of different sizes. Tree consists of a two-part foot form connected by a toggle, and a two-part heel form connected by another toggle. Each toggle is connected to a separate sleeve, and the inner ends of the sleeves are threadedly connected to opposite ends of a threaded adjusting rod. Rotating the rod expands and contracts the tree. (Owner) Irving King, King Investment Co., 129 West Third St., Los Angeles 13, Calif. Group 25—95—99. Reg. No. 10,012.

Pat. 2,446,078. CHOKER FOR TRAPPED ANIMALS. Patented July 27, 1948. By use of this choker a trapped animal may be killed without damaging its pelt or endangering the trapper. A pair of arc-shaped spring-operated jaws are pivoted in a housing mounted at the end of a pole. Jaws are opened against the tension of springs enclosed within housing and locked by a trigger mechanism. Pressing the device against throat of a trapped animal releases trigger so that jaws of device engage animal's neck with sufficient force to cause strangulation. (Owner) Merton E. Churchill, Arcadia, Pa. Group 33—59. Reg. No. 10,013.

Pat. 2,444,986. HOLDER FOR PAINT BUCKETS AND THE LIKE. Patented July 13, 1948. Device (made of metal) for attachment to ladders embodies a detachable swinging hanger for holding a paint bucket perpendicularly at either side of ladder, and a detachable tray for holding other equipment. A U-shaped strap (for straddling either rail of ladder) has its inner leg connected to the lower end of a rung-engaging hook. A swinging vertical strap, pivoted near its upper end to the outer leg of the U-strap, is bent at the top to form a hook for receiving handle of paint bucket. An arcuate-shaped member for embracing sides of bucket is pivoted to lower end of the swinging strap. The tray is connected to inner leg of U-strap. (Owner) William Charles Gebhardt, 434 Porter St., San Antonio, Tex. Group 33—59—73. Reg. No. 10,014.

Pat 2,401,931. SEED POTATO CUTTING MACHINE. Patented June 11, 1946. Seed potatoes are manually fed into one end of this machine, and the cut potatoes discharged into a sack at same end, thus requiring only a single operator. A slidable gate on bottom of a hopper is actuated by operator to drop potatoes one at a time onto an inclined endless conveyor. The potatoes are conveyed diagonally upwardly to opposite end of machine and dropped singly onto a transverse chute. A sliding gate is automatically opened and closed to permit a potato to drop from chute into a cutting chamber, where it is centered on a cross-bladed knife by spring-influenced centering strips. A plunger (having grooved sides to permit it to slide past centering strips) forces the potato into engagement with knife. A second inclined endless conveyor receives the cut potatoes and conveys them to a discharge outlet. (Owner) Lester A. Hawkins, 207 Maywood Ave., Creve Coeur, Ill. Group 35—22. Reg. No. 10,015.

TRADE-MARKS

OFFICIAL GAZETTE, OCTOBER 5, 1948

[VOL. 615. No. 1]

ACT OF 1905

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication. As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Marks published for opposition under the act of 1946 follow the 1905 publications.

CLASS 4

ABRASIVE, DETERGENT, AND POLISHING MATERIALS

Ser. No. 494,428. DETERGENT PRODUCTS, INC., Philadelphia, Pa. Filed Jan. 8, 1946.

"Loads of Suds" is hereby disclaimed apart from the mark as shown in the drawing.

FOR HOUSEHOLD CLEANING PREPARATION.

Claims use since Nov. 8, 1945.

Ser. No. 506,591. I. J. FOX, INC., New York, N. Y. Filed July 31, 1946.

The words "Fox-Klenzed" are hereby disclaimed apart from the mark as shown on the drawing.

FOR CLEANING FLUID FOR CLEANING AND TREATING FURS.

Claims use since Aug. 7, 1945.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Ser. No. 506,382. R. LOWENBAUM MANUFACTURING CO., St. Louis, Mo. Filed July 27, 1946.

Taffeta
by
Minx Modes

No exclusive claim is made to the word "Modes" apart from the mark.

FOR PERFUME AND COLOGNE.

Claims use since July 1, 1946.

Ser. No. 506,529. CLARA HIRSCH, doing business as Rocca, Paris, France. Filed July 30, 1946.

WONDERFUL

FOR PERFUME, ROUGE, AND DENTIFRICE.

Claims use since May 25, 1897.

Ser. No. 509,557. AVON PRODUCTS, INC., New York, N. Y. Filed Sept. 23, 1946.

AVONETTE

FOR COSMETIC SETS, CONTAINING CLEANSING CREAM, NIGHT CREAM, AND SKIN FRESHENER.

Claims use since Sept. 19, 1946.

Ser. No. 512,079. JOHN HUDSON MOORE, INC., New York, N. Y. Filed Nov. 5, 1946.

FOR COLOGNE, BAY RUM, DEODORANT, FOOT POWDER, INSECT REPELLANT, SUN-SCREEN LOTION, AFTER SHAVE LOTION, HAIR LOTION, AND TALCUM POWDER.
Claims use since Oct. 20, 1944.

Ser. No. 513,830. LUS TR LOX PRODUCTS, INC., Salt Lake City, Utah. Filed Dec. 6, 1946.

Lus tr Lox

The word "Lustr" is disclaimed apart from the mark.
FOR SKIN CREAM, OIL PERMANENT WAVE SOLUTION, CREAM LOTION, COLD WAVE SOLUTION, COLD WAVE SHAMPOO, COLOR RINSE, FLUFF SHAMPOO, AND MACHINELESS HAIR WAVE PADS.
Claims use since January 1936.

Ser. No. 514,125. THE MENNEN COMPANY, Newark, N. J. Filed Dec. 12, 1946.

HALT

FOR DEODORANTS FOR APPLICATION TO THE BODY TO COUNTERACT BODY ODORS.
Claims use since Nov. 1, 1946.

Ser. No. 515,506. MICHIGAN CHEMICAL CORPORATION, Saint Louis, Mich. Filed Jan. 9, 1947.

CHLORBROM

FOR CHEMICAL FIRE EXTINGUISHING COMPOSITION FOR USE IN ORDINARY FIRE EXTINGUISHERS.
Claims use since Nov. 29, 1946.

Ser. No. 517,235. LILLIAN HUNTER BROWNBACK, doing business as Qui Salt Company, Linfield, Pa. Filed Feb. 10, 1947.

Yule Love

FOR PERFUME.
Claims use since August 1946.

Ser. No. 519,499. SARA H. UPTEGRAFF, doing business under the name and style of Stampoff, Lewiston, N. Y. Filed Mar. 24, 1947.

STAMPOFF

FOR LIQUID FOR LOOSENING POSTAGE STAMPS FROM ENVELOPES OR OTHER PAPERS.
Claims use since Feb. 19, 1947.

Ser. No. 521,677. ADAM OGINT, doing business as Carbutone Manufacturing Co., Hollywood, Calif. Filed May 1, 1947.

Carbutone

FOR CHEMICAL PREPARATION FOR DISSOLVING SLUDGE IN CARBURETORS IN INTERNAL COMBUSTION ENGINES.
Claims use since July 1, 1946.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

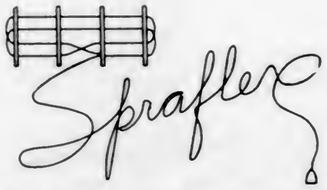
Ser. No. 481,686. ANCHOR POST FENCE COMPANY, Baltimore, Md. Filed Apr. 4, 1945.

ANCHOR

FOR METALLIC FENCING.
Claims use since July 1, 1892.

Ser. No. 497,436. AEROQUIP CORPORATION, Jackson, Mich., assignor to Standard Locknut & Lockwasher, Inc., Indianapolis, Ind., a corporation of Indiana. Filed Mar. 1, 1946.

X



FOR METALLIC WASHERS.
Claims use since Jan. 15, 1946.

Ser. No. 512,482. BAL-DART INCORPORATED, Detroit, Mich. Filed Nov. 13, 1946.

BAL DART

FOR LAWN SPRINKLERS.
Claims use since Apr. 15, 1946.

Ser. No. 520,572. FORREST B. STANNARD, Clinton, Conn. Filed Apr. 12, 1947.

FOR FLEXIBLE SHOWER SPRAYS AND SHOWER HEADS.
Claims use since Mar. 1, 1947.

CLASS 16

PAINTS AND PAINTERS' MATERIALS

Ser. No. 525,891. JOHN LUCAS & COMPANY, INC., Philadelphia, Pa. Filed July 3, 1947.

GIBBSBORO

FOR PAINTS (DRY, PASTE, OR READY-MIXED); VARNISHES; WOOD FILLERS; AND PAINTERS' MATERIALS—NAMELY, DRIERS, WHITE LEAD, WHITE ZINC, JAPANS AND COLORS (DRY, PASTE, OR READY MIXED).
Claims use since 1850.

CLASS 19

VEHICLES

Ser. No. 496,018. ENGINEERING AND RESEARCH CORPORATION, Riverdale, Md. Filed Feb. 5, 1946.

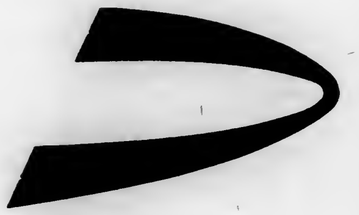
FOR AIRPLANES.
Claims use since October 1945.

Ser. No. 505,577. GRAHAM PAIGE MOTORS CORPORATION, Willow Run, Mich., assignor to Kaiser-Frazer Corporation, Willow Run, Mich., a corporation of Nevada. Filed July 13, 1946.

The drawing is lined for the colors red, blue and orange. The translation of the motto "Je Suis Pret" is I am ready.
FOR PASSENGER AUTOMOBILE.
Claims use since Jan. 17, 1946.

Ser. No. 513,434. MALLORY MANUFACTURING COMPANY, Chapin, Iowa. Filed Nov. 29, 1946.

CANVASMATIC



FOR WAGON BOXES HAVING UNLOADING MECHANISM.
Claims use since June 11, 1946.

Ser. No. 518,355. JAY ELECTRIC CO., Detroit, Mich. Filed Mar. 1, 1947.

Night-Glow

FOR REAR VIEW MIRRORS.
Claims use since September 1946.

Ser. No. 519,933. ENGINEERING AND RESEARCH CORPORATION, Riverdale, Md. Filed Apr. 1, 1947.

FOR AIRPLANES.
Claims use since October 1945.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 499,582. BLANCHE M. STURGEON, Santa Barbara, Calif. Filed Apr. 3, 1946.

Fantasy Children by Sturgeon

FOR DOLLS.
Claims use since Nov. 1, 1944.

Ser. No. 499,705. GOLFCRAFT, INC., Chicago, Ill. Filed Apr. 5, 1946.

Golfcraft

FOR GOLF CLUBS AND GOLF BALLS.
Claims use sinc Oct. 10, 1945.

Ser. No. 501,417. SPORT PRODUCTS INC., Cincinnati, Ohio. Filed May 3, 1946.

FOR ATHLETIC EQUIPMENT—NAMELY, BLOCKING PADS, SHOULDER PADS, HELMETS, NOSE GUARDS, SHOULDER PAD CUSHIONS, STRIKING BAGS, BOXING EAR AND FACE PROTECTORS, BASEBALL MITTS, LEG GUARDS, MASKS, BODY PROTECTORS, BAT BAGS, GLOVES, KNEE PADS, ELBOW PADS, SHIN GUARDS, BASKETBALLS, SOCCERBALLS, VOLLEYBALLS, FOOTBALLS, MEDICINE BALLS, SPEED BALLS, TETHER BALLS, SOFTBALLS, BASEBALLS, BASEBALL BATS, SOFTBALL BATS, SLIDING PADS, THIGH GUARDS, GOLF CLUBS, GOLF BALLS, KIDNEY PADS, BOXER'S HAND WRAPS, BOXING GLOVES, AND TENNIS RACKETS.
Claims use since Feb. 20, 1946.

Ser. No. 505,322. THE THOMPSON COMPANY, Cedar Rapids, Iowa. Filed July 9, 1946.

TELA TOY

The word "Toy" is disclaimed apart from the mark as shown.
FOR TOYS FOR EDUCATIONAL PURPOSES IN THE FORM OF METAL VIEWING BOXES EQUIPPED WITH SCREENS AND WITH MEANS FOR PROJECTING LETTERS, NUMERALS, AND PICTURES THEREON.
Claims use since Apr. 10, 1946.

Ser. No. 506,039. THE LA PORTE CORPORATION, Chicago, Ill., and Laporte, Ind. Filed July 22, 1946.

Pal SUPERBIKE

The word "Superbike" is disclaimed apart from the mark.
FOR TOY VELOCIPEDES.
Claims use since June 14, 1946.

Ser. No. 508,885. AUBURN RUBBER CORPORATION, Auburn, Ind. Filed Sept. 12, 1946.

ARCOR

FOR VEHICLES—NAMELY, MOTORIZED TOY REPRESENTATION OF SOME WEAPONS, TRACTORS, AUTOMOBILES, RACING CARS, SHOVELS, TRUCKS, TRACTOR-TRAILERS, MOTORCYCLES, FARM WAGONS, DELIVERY TRUCKS, HOOK AND LADDERS, PUMPERS AND HOSE CARS; WEAPONS—NAMELY, BOWIE KNIVES, DAGGERS, PISTOLS, JACK KNIVES, REVOLVERS AND TOMAHAWKS; TOOLS—NAMELY, HAMMERS, SAWS, HATCHETS, SCREW DRIVERS, PLIERS AND WRENCHES; AND MISCELLANEOUS TOYS SUCH AS SOLDIERS, FIREMEN, COWBOYS, FARMERS, FARM ANIMALS, AND FOWL.
Claims use since Mar. 1, 1945.

Ser. No. 510,818. CHARLES H. WATSON, doing business as Watson Industries, Laguna Beach, Calif. Filed Oct. 12, 1946.

Sportsation

FOR DEVICE COMPRISING A BASE WITH GUIDING FEATHERS EXTENDING THEREFROM, USED IN PLAYING AN OUTDOOR SPORT GAME KNOWN AS "PETEKA," WHEREIN THE DEVICE IS ADAPTED TO BE BATTED BACK AND FORTH BY PLAYERS WITH THE BARE HAND.
Claims use since Aug. 18, 1946.

Ser. No. 512,543. LUIS E. TACÓN, New York, N. Y. Filed Nov. 13, 1946.

SCRAPS 7★11

FOR PLAYING CARDS.
Claims use since June 25, 1946.

Ser. No. 525,599. HARVEY W. HUBNER, also doing business as Independent Iron Works, Los Angeles, Calif. Filed July 2, 1947.

PARAMOUNT

FOR BAR BELLS, DUMBBELLS, LEG-DEVELOPMENT WEIGHTS, NECK-DEVELOPMENT WEIGHTS, BAR BELL PLATES, DUMBBELL AND BAR BELL OUTFITS.
Claims use since Aug. 1, 1937.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Ser. No. 465,082. SEARS, ROEBUCK AND CO., Chicago, Ill. Filed Nov. 17, 1943.

FARM MASTER

Applicant disclaims the word "Farm" apart from the mark. The portrait is fanciful.
FOR HOG FEED AND OVERHEAD CONVEYOR TYPE LITTER CARRIERS, ROTARY WHEEL HOG OILERS, MILKING MACHINES, HEAD TRAP TYPE HOG CATCHERS, FENCE STRETCHERS, CHAIN HOISTS.
Claims use since July 15, 1940, on feed and litter carriers; and since Jan. 15, 1941, on hog oilers, milking machines, stretchers and hoists, and hog catchers.

Ser. No. 524,376. COCKSHUTT PLOW COMPANY, LIMITED, Brantford, Ontario, Canada. Filed June 18, 1947.

The wording "Plow Company Limited" is disclaimed apart from the mark. The drawing is lined to indicate red and yellow, but color is not considered an essential feature of the mark.
FOR FARM IMPLEMENTS OF ALL KINDS, SPECIFICALLY: PLOWS—NAMELY, WALKING PLOWS, BRUSH BREAKERS, ROAD PLOWS, SULKY PLOWS, GANG PLOWS, DISC PLOWS, TRACTORS, TRACTOR MOULDBOARD PLOWS, TRACTOR DISC PLOWS, PLOW SHARES, PLOW BOTTOMS; CORN AND COTTON PLANTERS; ROW CULTIVATORS; STIFF TOOTH AND SPRING TOOTH FIELD CULTIVATORS; BEET CULTIVATORS; SCUFFLERS; TILLER COMBINES, SEEDING ATTACHMENTS FOR, GRASS SEEDERS FOR, AND DISC PACKERS FOR, TILLER COMBINES; SEEDING MACHINERY—NAMELY, GRAIN DRILLS, GRAIN AND FERTILIZER DRILLS, PRESS WHEEL DRILLS, GRASS SEEDERS FOR DRILLS; ROD WEEDERS; HORSE-DRAWN AND TRACTOR-DRAWN MANURE SPREADERS; PULPERS AND SLICERS (CATTLE FEED); SOIL PULVERIZERS; BEET LIFTERS; TRANSPLANTERS; STALK CUTTERS; HAMMER MILLS; GRAIN GRINDERS; CORN SHELLERS; DRAG HARROWS—NAMELY, SCOTCH CLIP HARROWS, DIAMOND HARROWS, SPIKE TOOTH HARROWS, SPRING TOOTH HARROWS; HORSE-DRAWN AND TRACTOR-DRAWN DISC HARROWS; PULL TYPE AND SELF-PROPELLED TYPE HARVESTER COMBINES; GRAIN SWATHERS; HORSE-DRAWN AND TRACTOR-DRAWN HAY MOWERS; HAY RAKES; HAYLOADERS; HORSE-DRAWN AND TRACTOR-DRAWN GRAIN BINDERS; HORSE-DRAWN AND TRACTOR-DRAWN CORN BINDERS; FANNING MILLS; AND FARM TRACTORS.
Claims use since Dec. 1, 1939.

Ser. No. 525,177. AUTOMATIC WIRE GOODS MFG. CO. INC., New York, N. Y. Filed June 30, 1947.

"CHAMPION"

FOR MIXER STRAINERS WHICH ARE HOUSEHOLD KITCHEN TOOLS FOR SIFTING FLOUR AND STRAINING VEGETABLE PULP AND FOR STRAINING LIQUIDS GENERALLY, EACH OF SAID MIXER STRAINERS COMPRISING A WIRE MESH BOWL WITH LATERALLY EXTENDING HANDLE TO HOLD SAME IN HAND OVER A POT, AND ALSO HAVING A SHEET METAL VANE ROTATABLY POSITIONED IN THE BOWL AND MANUALLY TURNED BY A HANDLE.
Claims use since May 28, 1947.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

Ser. No. 497,053. SUN GLASS INDUSTRIES, Newark, N. J. Filed Feb. 21, 1946.

PUR-O-LITE

The word "Lite" is disclaimed apart from the mark.
FOR SUN GLASSES.
Claims use since Mar. 11, 1944.

Ser. No. 509,857. MANNING, MAXWELL & MOORE, INCORPORATED, New York, N. Y. Filed Sept. 27, 1946.

CARBOTROL

FOR COMBINATION INSTRUMENT CONSISTING OF A TWO STAGE PRESSURE REGULATOR, PRESSURE ELECTRIC SWITCH AND DUAL EDGEWISE PRESSURE GAUGE, INTENDED FOR APPLICATION TO BEVERAGE CARBONATING DISPENSERS FOR THE PURPOSE OF INSURING PROPER CARBONATION AND INDICATING THE PRESSURE OF CARBON DIOXIDE IN THE SUPPLY TANK AND IN THE CARBONATION APPARATUS.
Claims use since Jan. 19, 1945.

Ser. No. 514,621. VAN A. PARKER, doing business as Parker Company, San Diego, Calif. Filed Dec. 20, 1946.

AUTOFLEX

FOR CAMERA TRIPOD EQUIPMENT.
Claims use since Mar. 1, 1946.

CLASS 27

HOROLOGICAL INSTRUMENTS

Ser. No. 513,546. ZODIAC S. A., La Chaux-de-Fonda and Le Locle, Switzerland. Filed Nov. 30, 1946.

OLYMPOS
ΟΛΥΜΠΟΣ

FOR WATCHES AND PARTS THEREOF.
Claims use since 1905.

CLASS 31

FILTERS AND REFRIGERATORS

Ser. No. 487,166. BRIGGS CLARIFIER COMPANY, Washington, D. C., assignor to The Briggs Filtration Company, Bethesda, Md., a corporation of Maryland. Filed Aug. 17, 1945.

DISCEL

FOR OIL CLARIFIERS AND EQUIPMENT AND PARTS THEREOF, INCLUDING PARTICULARLY CLARIFIER REFILLS, FOR USE AS ACCESSORY TO INTERNAL COMBUSTION AND OTHER MOTORS, PUMPS, MACHINES AND THE LIKE.
Claims use since May 23, 1944.

CLASS 36

MUSICAL INSTRUMENTS AND SUPPLIES

Ser. No. 507,190. KOHLER & CAMPBELL, INC., New York, N. Y. Filed Aug. 10, 1946.

The Autopiano

Applicant owns Reg. No. 45,409.
FOR PIANOS.
Claims use since January 1904.

CLASS 37

PAPER AND STATIONERY

Ser. No. 474,754. THE MCBEE COMPANY, Athens, Ohio. Filed Sept. 30, 1944.

Athenian

Bond

No claim is made to the word "Bond" apart from the mark as shown.
FOR BOND PAPER.
Claims use since Mar. 31, 1944.

Ser. No. 505,259. SOUTHERN ADVANCE BAG & PAPER CO. INC., Bangor, Maine, and Boston, Mass. Filed July 8, 1946.

SOUTHERN ADVANCE BAG & PAPER CO. INC.

The words "Bag & Paper Co. Inc." are disclaimed apart from the mark.
FOR KRAFT WRAPPING PAPER, BOTH PLAIN AND TREATED TO MAKE IT WATER-RESISTANT FOR MEAT WRAPPING.
Claims use since June 10, 1946.

Ser. No. 506,676. THE LE SHORE CORPORATION, New York and Long Island City, N. Y. Filed Aug. 1, 1946.

TEL-EZE

FOR FILING EQUIPMENT—NAMELY, FILE CARDS AND FILE CARD BOXES.
Claims use since Dec. 20, 1945.

Ser. No. 514,084. THE ECLIPSE FOUNTAIN PEN AND PENCIL COMPANY, LIMITED, Toronto, Canada. Filed Dec. 11, 1946.

HOODED KNIGHT

FOR FOUNTAIN PENS, MECHANICAL PENCILS, AND DESK SETS.
Claims use since Jan. 5, 1946.

Ser. No. 521,045. WINSLOW PRODUCT ENGINEERING CORPORATION, Los Angeles, Calif. Filed Apr. 19, 1947.

ELASTICHUCK

FOR CHUCK PENCILS.
Claims use since June 9, 1945.

Ser. No. 524,777. COLOR-BANK COMPANY, Waynesboro, Pa. Filed June 25, 1947.

COLOR-BANK

No claim is made herein to the word "Color" apart from the mark shown in the drawing.
FOR CRAYON HOLDERS—NAMELY, BLOCKS EACH HAVING MEANS FOR HOLDING A SET OF CRAYONS IN SPACED APART RELATION FOR CONVENIENT SELECTION BY THE USER.
Claims use since Feb. 27, 1947.

Ser. No. 525,967. THE SORG PAPER COMPANY, Middletown, Ohio. Filed July 3, 1947.

WHITE ROCK

FOR WRITING PAPER, BOND PAPER, AND LEDGER PAPER.
Claims use since 1917.

CLASS 38

PRINTS AND PUBLICATIONS

Ser. No. 514,258. DUNCAN ELECTRIC MANUFACTURING COMPANY, Lafayette, Ind. Filed Dec. 14, 1946.

The word "Register" appears in black, and the words "The Duncan" and the background appear in two tones of the same color other than black, color being varied from issue to issue. The representation of the meter register face is left white. Applicant disclaims exclusive rights by this registration in the name "Duncan" except with respect to the remainder of the mark.
FOR PERIODICALS PUBLISHED AT IRREGULAR INTERVALS.
Claims use since Oct. 16, 1942.

Ser. No. 523,185. IDEAL PUBLISHING CORP., New York, N. Y. Filed May 28, 1947.

RADIO PARADE

No claim is made to the word "Radio" apart from the mark as shown.
FOR MONTHLY MAGAZINE.
Claims use since May 5, 1947.

Ser. No. 524,155. REGAL PUBLISHING CORPORATION, New York, N. Y. Filed June 13, 1947.

COMET
Professional Racing
FIGURES

The words "Professional Racing Figures" are disclaimed, except as used in this mark. The spaced horizontal lines in the word "Figures" are shade lines.
FOR DAILY PUBLICATION RELATING TO TURF DATA.
Claims use since May 30, 1947.

Ser. No. 525,508. IRENE F. SMITH, Hyattsville, Md. Filed July 1, 1947.

PROGRESS INTERPRETED

FOR SERIES OF PUBLISHED TRANSLATIONS, SOLD AS SUCH, OF FOREIGN-LANGUAGE DOCUMENTS PERTAINING TO TECHNICAL PROCESSES.
Claims use since Jan. 1, 1934.

CLASS 39

CLOTHING

Ser. No. 516,406. FOLLY COVE DESIGNERS, Gloucester and Annisquam, Mass. Filed Jan. 27, 1947.

FOLLY COVE DESIGNERS

Applicant disclaims exclusive use of the word "Designers."
FOR DIRNDLS, JUMPERS, PINAFORES, BLOUSES, BOLEROS, DAYTIME DRESSES, EVENING DRESSES, BATHING SUITS, BEACH COATS, HOUSE COATS, NEGLIGEES, SMOCKS, PAJAMAS, TROUSERS, HATS, CAPS, BERETS, NECKTIES, SCARVES, KERCHIEFS, APPAREL BELTS, AND HANDKERCHIEFS.
Claims use since Dec. 1, 1941.

Ser. No. 520,574. VICTORIA JUNIORS, New York, N. Y. Filed Apr. 12, 1947.

Tujacks

FOR MISSES' AND JUNIOR MISSES' COATS, SUITS, JACKETS, OUTER SKIRTS, AND JUMPER DRESSES.
Claims use since Mar. 15, 1947.

Ser. No. 522,685. ALBERT, INC., Chicago, Ill. Filed May 20, 1947.

Deena

FOR WOMEN'S, MISSES,' AND JUNIOR MISSES' OR GIRLS' UNDERGARMENTS—NAMELY, SLIPS AND NIGHTGOWNS.
Claims use since Apr. 14, 1947.

CLASS 44

DENTAL, MEDICAL, AND SURGICAL APPLIANCES

Ser. No. 493,991. X-RAY PRODUCTS CORPORATION, Los Angeles, Calif. Filed Dec. 28, 1945.

PENETREX

FOR MEDICAL AND DENTAL RADIOGRAPHIC AND FLUOROSCOPIC MACHINES AND APPARATUS FOR TAKING AND PROJECTING X-RAY PHOTOGRAPHS.
Claims use since Jan. 2, 1940.

Ser. No. 525,928. NATIONAL CARBON COMPANY, INC., New York, N. Y. Filed July 3, 1947.

National

FOR THERAPEUTIC ARC LAMPS AND CARBONS THEREFOR.
Claims use since about 1939 in respect of arc lamps; and since about 1926 in respect of carbon.

Ser. No. 526,328. PERCIVAL LYONS, Hove, England. Filed June 5, 1947.

RHEUMALON

FOR ELECTRO-THERAPEUTIC APPLIANCES—NAMELY, APPARATUS EMBODYING A CONTROL PANEL AND ELECTRODES FOR THE APPLICATION OF ELECTRICITY TO THE HUMAN BODY FOR USE IN THE TREATMENT OF RHEUMATISM AND ALLIED COMPLAINTS.
Claims use since May 17, 1946.

CLASS 45

SOFT DRINKS AND CARBONATED WATERS

Ser. No. 524,670. WM. FRANZ BEVERAGE CO., Philadelphia, Pa. Filed June 23, 1947.

Orange Grove

The word "Orange" is disclaimed apart from the word combination "Orange Grove."
FOR NON-ALCOHOLIC, NON-CEREAL, MALTLESS BEVERAGES SOLD AS SOFT DRINKS.
Claims use since May 19, 1947.

CLASS 46

FOODS AND INGREDIENTS OF FOODS

Ser. No. 484,660. BLUE MOON FOODS, INC., Thorp, Wis., assignor to Blue Moon Foods, Inc., Dover, Del., a corporation of Delaware. Filed June 18, 1945.

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Ser. No. 496,921. POROCEL CORPORATION, Wilmington, Del., and Philadelphia, Pa. Filed Nov. 5, 1947.

DRIOCAN

Applicant claims ownership of registration No. 408,187.

FOR PACKAGED ADSORBENT MATERIAL FOR ADSORBING EXCESS MOISTURE.

Claims use since Nov. 28, 1945.

Ser. No. 507,333. NOPCO CHEMICAL COMPANY, Harrison, N. J., now by change of name from National Oil Products Co. Filed Jan. 29, 1948.

MODICOL

FOR ORGANIC WETTING AGENTS FOR USE AS STABILIZERS AND PIGMENT DISPERSING AIDS IN THE COMPOUNDING OF NATURAL AND SYNTHETIC RUBBER LATICES.

Claims use since September 1945.

Ser. No. 509,343. HOLLAND-RANTOS COMPANY, INC., New York, N. Y. Filed Oct. 18, 1947.

HR

FOR VAGINAL JELLY.

Claims use since May 1, 1931.

Ser. No. 509,559. BURROUGHS WELLCOME & Co. (U. S. A.) INC., Tuckahoe, N. Y. Filed June 8, 1948.

'THEOBA'

FOR A SEDATIVE, VASODILATOR, CARDIOTONIC AND DIURETIC; USED IN THE SYMPTOMATIC TREATMENT OF HIGH BLOOD PRESSURE AND CERTAIN HEART CONDITIONS.

Claims use since Sept. 3, 1946.

Ser. No. 509,599. RARE CHEMICALS, INC., Harrison, N. J. Filed Jan. 29, 1948.

AMINOFERRATOSE

Applicant claims ownership of registration No. 343,055.

FOR PREPARATION FOR TREATMENT OF HYPOCHROMIC ANEMIA.

Claims use since August 1946.

Ser. No. 514,792. THE ARDMORE CHEMICAL COMPANY, Columbus, Ohio. Filed Dec. 22, 1947.

"DUTCH GIRL"

FOR CLOTHES BLEACH.

Claims use since Nov. 30, 1946.

Ser. No. 518,468. THE LANDER CO. INC., New York, N. Y. Filed July 24, 1947. Under section 2f of the act of 1946.

Dorothy Reed

The name shown in the drawing is merely fanciful.

FOR FACE POWDER, LIPSTICK, TOILET WATER, GLYCERINE AND ROSE WATER, SHAMPOO, AND SKIN FRESHENER.

Claims use since September 1937.

Ser. No. 518,554. NOPCO CHEMICAL COMPANY, Harrison, N. J., now by change of name from National Oil Products Co. Filed Jan. 29, 1948.

NOPDEX

Applicant claims ownership of registrations Nos. 349,176, 359,712, 360,494, and 395,122.

FOR HIGH POTENCY VITAMIN-CONTAINING SOLID, AS A DIETARY SUPPLEMENT FOR FORTIFYING ANIMAL AND POULTRY FOODS AND FEEDS.

Claims use since Jan. 14, 1947.

Ser. No. 523,251. TIFFIE C. ELKINS, doing business as Elko Division of W. C. Manufacturing Co., Stephenville, Tex. Filed Apr. 5, 1948.

ELKO

FOR RADIATOR STOP LEAK PREPARATION.

Claims use since Feb. 17, 1947.

Ser. No. 525,717. VELSICOL CORPORATION, Chicago, Ill. Filed Mar. 11, 1948.

VELSICOL

Applicant claims ownership of registrations Nos. 425,674, 425,676, and 435,038.

FOR HYDROCARBON SOLVENTS PREPONDERATELY COMPOSED OF AROMATIC HYDROCARBONS.

Claims use since April 1937.

Ser. No. 527,427. TABLE ROCK LABORATORIES, INC., Greenville, S. C. Filed July 5, 1947.

BUFOSAL

Applicant claims ownership of registration No. 364,337.

FOR A PREPARATION FOR THE TREATMENT OF RHEUMATISM, ARTHRITIS, COLDS, INFLUENZA, TONSILITIS, AND OTHER CONDITIONS THAT AN ANALGESIC OF THIS KIND WOULD BE PRESCRIBED, AND GOUT AND RHEUMATIC FEVER.

Claims use since Jan. 1, 1937.

MULSAVITE-F

Applicant disclaims the letter "F" apart from the mark. Applicant claims ownership of registration No. 389,056.

FOR VITAMIN PREPARATION.

Claims use since Nov. 4, 1947.

Ser. No. 542,471. LAMBERT W. HORN, San Francisco, Calif. Filed Nov. 26, 1947.

Horn OIL

The word "Oil" is disclaimed apart from the mark.

FOR BODY CLEANSING OIL.

Claims use since Sept. 17, 1947.

Ser. No. 543,209. THE MENNEN COMPANY, Newark, N. J. Filed Dec. 3, 1947. Under section 2f of the act of 1946.

SKIN BRACER

FOR SKIN LOTION.

Claims use since June 1931.

Ser. No. 543,247. WYETH INCORPORATED, Philadelphia, Pa. Filed Dec. 3, 1947.

BASALJEL

FOR BASIC ALUMINUM CARBONATE GEL.

Claims use since Nov. 11, 1947.

Ser. No. 543,311. THE MENNEN COMPANY, Newark, N. J. Filed Dec. 4, 1947. Under section 2f of the act of 1946.

MENNEN

Applicant claims ownership of registrations Nos. 121,288, 237,118, 287,514, 337,361, 337,749, and 358,165.

FOR TOILET POWDER, TALCUM POWDER, MEDICATED POWDER, BABY OIL, SKIN BALM, AND SKIN CREAM.

Claims use on toilet powder since July 12, 1889; on talcum powder since January 1928; on medicated powder since Jan. 4, 1939; on baby oil since 1930; on skin balm since 1930; and on skin cream since 1930.

Ser. No. 543,579. MABLE EVELYN ECK, Montoursville, Pa. Filed Dec. 6, 1947.

THAW-REEN

FOR PREPARATION FOR THE TREATMENT AND RELIEF OF FROZEN OR FROST-BITTEN PARTS OF THE HUMAN BODY.

Claims use since Nov. 12, 1947.

Ser. No. 543,938. KEYSTONE LABORATORIES, INC., Memphis, Tenn. Filed Dec. 10, 1947.

KEYSTONE'S TAKING LINIMENT

The wording "Taking Liniment" is disclaimed apart from the mark as shown in the drawing.

FOR PREPARATION TO BE TAKEN FOR RELIEVING DISCOMFORT OF GASTRIC FLATULENCE.

Claims use since Sept. 15, 1947.

Ser. No. 545,114. FELTS AND GUNNELS, Clovis, N. Mex. Filed Dec. 22, 1947.

FRANK FELTS

F & G Dandruff Remover

The picture forming part of the trade-mark is that of Frank Felts, a member of the firm. The words "Dandruff Remover" are disclaimed apart from the mark as shown.

FOR LIQUID DANDRUFF REMOVER.

Claims use since Aug. 15, 1945.

Ser. No. 545,275. PALMER LABORATORIES, Lancaster, Pa. Filed Dec. 23, 1947.

Resurgam LOTION

The word "Lotion" is disclaimed apart from the mark.

FOR A PREPARATION FOR THE TREATMENT OF VARICOSE ULCERS, MINOR BURNS AND EXTERNAL SKIN IRRITATIONS.

Claims use since Nov. 3, 1947.

Ser. No. 545,294. THE SHERWIN-WILLIAMS COMPANY, Cleveland, Ohio. Filed Dec. 23, 1947. Under section 2f of the act of 1946.

SAFE-N-LEAD

Applicant claims ownership of registration No. 386,608.

FOR INSECTICIDES AND FUNGICIDES.

Claims use since Feb. 19, 1940.

Ser. No. 545,297. THE SHERWIN-WILLIAMS COMPANY, Cleveland, Ohio. Filed Dec. 23, 1947. Under section 2f of the act of 1946.

SPRED-RITE

Applicant claims ownership of registration No. 349,746.

FOR INSECTICIDES AND FUNGICIDES.

Claims use since June 18, 1936.

Ser. No. 545,383. THE MCCAMBRIDGE & MCCAMBRIDGE CO., Baltimore, Md. Filed Dec. 24, 1947.

FIENDOIL

Applicant claims ownership of registration No. 241,645.
FOR CHEMICAL COMPOSITION FOR THE PREVENTION OF CORROSION.
Claims use since June 29, 1927.

Ser. No. 545,553. STANBACK COMPANY, LTD., Salisbury, N. C. Filed Dec. 26, 1947. Under section 2f of the act of 1946.

STANBACK

Applicant claims ownership of registration No. 208,001.
FOR ANALGESIC PREPARATIONS.
Claims use since Jan. 1, 1924.

Ser. No. 545,595. STAUFFER CHEMICAL COMPANY, San Francisco, Calif. Filed Dec. 27, 1947.

CRYSTEX

Applicant claims ownership of registration No. 374,896.
FOR SULPHUR.
Claims use since May 1, 1939.

Ser. No. 545,627. HUDSON'S EUMENTHOL CHEMICAL COMPANY PTY. LIMITED, Glebe, Sydney, New South Wales, Australia. Filed Dec. 29, 1947.

EUMENTHOL

Applicant claims ownership of Australian registration No. 5623 dated February 4, 1906.
FOR MEDICATED LOZENGES.

Ser. No. 546,374. DITTO, INCORPORATED, Chicago, Ill. Filed Jan. 7, 1948.

DOMINO

FOR SOLVENT FOR USE IN DUPLICATING PROCESSES OF THE TYPE WHEREIN COPY SHEETS ARE MOISTENED WITH THE SOLVENT AND BROUGHT INTO CONTACT WITH DATA APPEARING ON MASTER SHEETS.
Claims use since Dec. 13, 1947.

Ser. No. 546,537. AUGUSTUS JAMES AFFLECK, doing business under the name and style of Affleck Laboratories, Sacramento, Calif. Filed Jan. 9, 1948.

GEMOLYSIN

Applicant claims ownership of registration No. 260,489.
FOR HYGIENIC DOUCHE POWDER.
Claims use since 1935.

Ser. No. 546,605. THE PROCTER & GAMBLE COMPANY, Cincinnati, Ohio. Filed Jan. 9, 1948. Under section 2f of the act of 1946.

GLEEM

Applicant claims ownership of registrations Nos. 341,517 and 308,127.
FOR DENTIFRICE.
Claims use since Jan. 19, 1939.

Ser. No. 546,780. NEW JERSEY PHARMACAL COMPANY, Hillside, N. J. Filed Jan. 12, 1948.

Elixir Placatol

No claim is made to the word "Elixir" apart from the mark.
FOR SEDATIVE ELIXIR.
Claims use since July 24, 1947.

Ser. No. 546,829. THE DOW CHEMICAL COMPANY, Midland, Mich. Filed Jan. 13, 1948.

CEDAMBRETTE

FOR AROMATIC CHEMICAL USEFUL AS A PERFUME.
Claims use since Dec. 10, 1947.

Ser. No. 552,526. WHITEHALL PHARMACAL COMPANY, New York, N. Y. Filed Mar. 18, 1948. Under section 2f of the act of 1946.

TRUBLOND

FOR SHAMPOO.
Claims use since Mar. 9, 1934.

Ser. No. 553,128. PACIFIC GAS CORPORATION, New York, N. Y. Filed Mar. 26, 1948.

PACIFIC GAS

No claim is made to the word "Gas" apart from the mark as shown.
FOR BUTANE AND PROPANE GASES.
Claims use since Oct. 1, 1946.

Ser. No. 556,922. SMITH, KLINE & FRENCH LABORATORIES, Philadelphia, Pa. Filed May 12, 1948.

ESKADIAMER

Applicant claims ownership of registrations Nos. 415,090 and 415,091.
FOR SULFONAMIDE PREPARATION.
Claims use since Apr. 12, 1948.

CLASS 8

SMOKERS' ARTICLES, NOT INCLUDING TOBACCO PRODUCTS

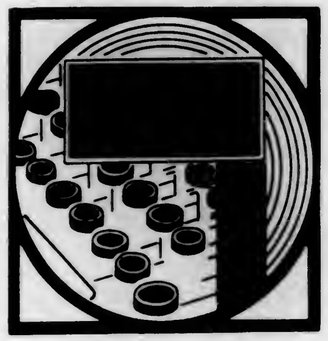
Ser. No. 532,560. CHAMPAGNE PAPER CORPORATION, Pisgah Forest, N. C., assignor to Ecusta Paper Corporation, Pisgah Forest, N. C., a corporation of Delaware. Filed Aug. 27, 1947.

The words "Fine Cigarette Paper Booklets" are disclaimed apart from the mark. Applicant claims ownership of registrations Nos. 399,962, 399,987, 420,410, and 421,169.
FOR CIGARETTE PAPER BOOKLETS.
Claims use since June 18, 1947.

CLASS 10

FERTILIZERS

Ser. No. 530,628. THE DAVEY TREE EXPERT COMPANY, Kent, Ohio. Filed Aug. 6, 1947. Under section 2f of the act of 1946.



Davey TREE FOOD

No claim is made to the words "Tree Food" apart from the mark as shown. Applicant claims ownership of registration No. 162,428.
FOR FERTILIZERS.
Claims use since May 13, 1921.

CLASS 11

INKS AND INKING MATERIALS

Ser. No. 517,456. CODO MANUFACTURING CORP., Coraopolis, Pa., and Chicago, Ill. Filed Jan. 7, 1948.

FOR CARBON PAPER AND TYPEWRITER RIBBONS.
Claims use since Jan. 3, 1942.

CLASS 12

CONSTRUCTION MATERIALS

Ser. No. 542,035. MEXICO REFRACTORIES COMPANY, Mexico, Mo. Filed Nov. 22, 1947.

MO-REX

FOR FIREBRICK.
Claims use since Sept. 4, 1930.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Ser. No. 497,905. HAROLD WARP, doing business as Warp Brothers, Chicago, Ill. Filed Sept. 9, 1947.

VENET-O-SCREEN

The word "Screen" is disclaimed apart from the mark.
FOR METAL AND PLASTIC PERFORATE SHEET MATERIAL EMPLOYABLE AS INSECT SCREENING AND AS SUN SCREENING.
Claims use since Feb. 4, 1946.

Ser. No. 526,573. THE E. W. CARPENTER MANUFACTURING COMPANY, Bridgeport, Conn. Filed July 5, 1947.

ROYSON

FOR VENETIAN BLIND HARDWARE—NAMELY, TILTERS, CORD LOCKS, HEAD BRACKETS, AND FITTINGS.
Claims use since May 23, 1947.

CLASS 14

METALS AND METAL CASTINGS AND FORGINGS

Ser. No. 528,253. THE BUNTING BRASS & BRONZE COMPANY, Toledo, Ohio. Filed July 10, 1947. Under section 2f of the act of 1946.

BUNTING

Applicant claims ownership of registration No. 125,194.
FOR BRONZE, CORED AND SOLID BARS.
Claims use since October 1907.

Ser. No. 529,320. TUNGSTEN ELECTRIC CORPORATION, Union City, N. J. Filed July 23, 1947.

TELCO

Applicant claims ownership of registration No. 304,795.
FOR REFRACTORY METALLIC COMPOSITIONS INCLUDING TUNGSTEN, MOLYBDENUM, URANIUM, THORIUM, CHROMIUM, HARDENED WITH CARBON, BORON, AND/OR SILICON.
Claims use since Dec. 29, 1932.

Ser. No. 534,154. LACLEDE STEEL COMPANY, St. Louis, Mo. Filed Sept. 11, 1947.

LACLEDE

Applicant claims ownership of registration No. 369,110.
FOR STEEL PRODUCTS, SPECIFICALLY WIRE, ROUND, OVAL, OR FLAT, SOLD IN COILS, HANKS, AND CUT LENGTHS (FOR USE IN THE MANUFACTURE OF OTHER ARTICLES SUCH AS STAPLES, BINDINGS, BOOK-BINDINGS, LOOPS, BAILS, COAT HANGERS, BROOMS AND BRUSHES, BOBBY PINS, HAIR PINS, MATTRESSES, FABRIC MESH AND NETTING, SPRINGS, MUSICAL INSTRUMENT STRINGS, WIRE ROPE, TIRE BEADS, TIRE CORDS, FLEXIBLE SHAFTS, LOCKWASHERS, FENCING, AND BALE TIES); SEMI-FINISHED STEEL (IN THE FORM OF INGOTS, SLABS, BLOOMS, BILLETS, RODS AND SKELP); BAR MILL PRODUCTS (IN THE FORM OF ROUNDS, SQUARES, FLATS, ANGLES, CHANNELS, OVALS, AND SPECIAL SHAPES AND SECTIONS); AND HOT ROLLED STRIP (IN COILS OR CUT LENGTHS).
Claims use since 1911.

CLASS 15

OILS AND GREASES

Ser. No. 534,803. THE OHIO OIL COMPANY, Findlay, Ohio. Filed Sept. 17, 1947.

MARATHON
Endurance
MOTOR OIL

No claim is made to the words "Best in the Long Run," "Products," and "Motor Oil" apart from the mark. Applicant claims ownership of registrations Nos. 97,301, 108,754, 118,702, 137,726, 306,851, 306,854, 327,310, 373,752, 379,986, 433,682 and 433,683.
FOR LUBRICATING MOTOR OILS.
Claims use since May 3, 1931.

Ser. No. 534,804. THE OHIO OIL COMPANY, Findlay, Ohio. Filed Sept. 17, 1947.

No claim is made to the words "Best in the Long Run" apart from the mark as shown. Applicant claims ownership of registrations Nos. 97,301, 108,754, 118,702, 137,726, 306,851, 306,854, 327,310, 373,752, 379,986, 433,682 and 433,683.
FOR MOTOR FUEL OIL, FUEL OIL FOR HEATING AND ILLUMINATING PURPOSES, LUBRICATING OILS, AND GREASES.
Claims use since July 19, 1939.

Ser. No. 535,873. QUAKER CHEMICAL PRODUCTS CORPORATION, Conshohocken, Pa. Filed Sept. 26, 1947.

FOR LUBRICATING OILS AND GREASES; CUTTING OILS FOR COOLING AND LUBRICATING CUTTING TOOLS ON METAL MACHINERY OPERATIONS; OILS FOR LUBRICATING NEEDLES AND SINKERS ON KNITTING MACHINES; RUST PREVENTATIVE CONTAINING OIL AND GREASE, VARNISH-LIKE AND WAXY IN CHARACTER, FOR COATING METALS.
Claims use since May 1, 1928.

CLASS 17

TOBACCO PRODUCTS

Ser. No. 529,774. D. EMIL KLEIN CO., INC., New York, N. Y. Filed July 28, 1947. Under section 2f of the act of 1946.

LAWRENCE
BARRETT

The name and portrait are those of a deceased person.
Applicant claims ownership of registration No. 115,698.
FOR CIGARS.
Claims use since 1884.

Ser. No. 529,780. D. EMIL KLEIN CO., INC., New York, N. Y. Filed July 28, 1947. Under section 2f of the act of 1946.

ABBOTT

FOR CIGARS.
Claims use since Feb. 15, 1932.

Ser. No. 531,927. METROPOLITAN CIGAR CORPORATION, Chicago, Ill. Filed Aug. 20, 1947. Under section 2f of the act of 1946.

ANDREW JACKSON

The trade-mark consists of the name of the seventh President of the United States of America, now deceased.
FOR CIGARS.
Claims use since Nov. 26, 1918.

CLASS 19

VEHICLES

Ser. No. 517,651. CORRECT CRAFT, INC., assignee of W. C. Meloon, doing business as Pinecastle Boat and Construction Company, Pinecastle and Titusville, Fla. Filed Feb. 16, 1948. Under section 2f of the act of 1946.

Correct Craft

The word "Craft" is disclaimed apart from the mark.
FOR MARINE RUNABOUTS AND CRUISERS.
Claims use since Nov. 15, 1936.

Ser. No. 519,878. MAGOR CAR CORPORATION, New York, N. Y. Filed Nov. 19, 1947. Under section 2f of the act of 1946.

MAGOR

FOR ALL TYPES OF RAILROAD CARS INCLUDING FREIGHT, PASSENGER, REFRIGERATOR, DUMP, CANE, FRUIT, CORDWOOD, AND COAL.
Claims use since Jan. 1, 1920.

Ser. No. 520,667. AMERICAN BRAKE SHOE COMPANY, New York, N. Y. Filed Feb. 3, 1948.

Applicant is the owner of registration Nos. 404,752, 404,753, 404,754, 404,755, 409,919, 410,556, and 434,630.
FOR CAR WHEELS; BRAKE SHOES, BRAKE SHOE KEYS; AND REINFORCING BACKS FOR BRAKE SHOES.
Claims use since Feb. 18, 1947.

Ser. No. 521,175. THE BROQUINDA CORPORATION, St. Petersburg, Fla. Filed Nov. 19, 1947.

Polarmobile

FOR REFRIGERATED TRUCKS, REFRIGERATED SEMI-TRAILER TRUCKS, REFRIGERATED TRAILER TRUCKS, REFRIGERATED AIRPLANES, REFRIGERATED RAILROAD CARS AND TRUCKS, AIRPLANES AND RAILROAD CARS CONTAINING REFRIGERATED CABINETS.
Claims use since Jan. 1, 1947.

Ser. No. 525,363. MEAD CYCLE COMPANY, Chicago, Ill. Filed Sept. 19, 1947.

Crusader

FOR BICYCLES.
Claims use since 1920.

Ser. No. 525,364. MEAD CYCLE COMPANY, Chicago, Ill. Filed Sept. 19, 1947.

Premier

FOR BICYCLES.
Claims use since 1910.

Ser. No. 542,165. PLAYBOY MOTOR CAR CORPORATION, Buffalo, N. Y. Filed Nov 24, 1947.

FOR MOTOR CARS.
Claims use since Feb. 18, 1947.

Ser. No. 552,632. BLAKE MANUFACTURING CO., Pawhuska, Okla. Filed Mar. 22, 1948.

Koolbreez

FOR AIR DEFLECTOR FOR THE DOORS OR WINDOWS OF AUTOMOTIVE VEHICLES.
Claims use since Feb. 15, 1947.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Ser. No. 505,611. THE NATIONAL TELEPHONE SUPPLY COMPANY, Cleveland, Ohio. Filed Nov. 6, 1947.

I - 114 - D

FOR CONNECTING AND TERMINATING DEVICES OR SLEEVES FOR WIRES AND CABLES USED IN COMMUNICATION, LIGHT AND POWER FIELDS.
Claims use since June 10, 1939.

Ser. No. 507,263. LAHER SPRING AND TIRE CORPORATION, Oakland, Calif. Filed Nov. 4, 1947. Under section 2f of the act of 1946.

Laher

FOR AUTOMOTIVE EQUIPMENT AND ACCESSORIES—NAMELY, BATTERIES.
Claims use since June 1, 1923.

Ser. No. 512,861. REMLER COMPANY, LTD., San Francisco, Calif. Filed Jan. 30, 1948.

FOR RADIO RECEIVING SETS.
Claims use since Apr. 1, 1933.

Ser. No. 516,458. JAMES H. CANNON, doing business as Cannon Electric Development Company, Los Angeles, Calif. Filed Sept. 27, 1947.

The word "Electric" is disclaimed apart from the mark. Applicant claims ownership of registrations Nos. 425,506, 425,507, 425,508, and 418,856.
FOR ELECTRIC EQUIPMENT AND PARTS THEREFOR—NAMELY, ELECTRICAL CABLE CONNECTORS; WALL AND BOX MOUNTING RECEPTACLES AND ACCESSORY EQUIPMENT FOR THIS TYPE OF PRODUCTION—NAMELY, DUST-CAPS, JUNCTION BOXES, PLUGS AND SPECIAL FLANGES; SPECIAL FUNCTION SOLENOIDS; ELECTRICAL RELAYS; ELECTRICAL SWITCHES AND PUSH-BUTTONS; AND INSTITUTIONAL SIGNAL EQUIPMENT—NAMELY, CALL STATIONS, ANNUNCIATORS, CORRIDOR PILOT LIGHTS, PAGING SYSTEMS, AND EXPLOSION AND VAPOR-PROOF SWITCHES.
Claims use since 1920.

Ser. No. 516,459. JAMES H. CANNON, doing business as Cannon Electric Development Company, Los Angeles, Calif. Filed Sept. 27, 1947. Applicant claims ownership of registrations Nos. 425,506, 425,507, 425,508, and 418,856.

FOR ELECTRIC EQUIPMENT AND PARTS THEREFOR—NAMELY, ELECTRICAL CABLE CONNECTORS; WALL AND BOX MOUNTING RECEPTACLES AND ACCESSORY EQUIPMENT FOR THIS TYPE OF PRODUCTION—NAMELY, DUST-CAPS, JUNCTION BOXES, PLUGS AND SPECIAL FLANGES; SPECIAL FUNCTION SOLENOIDS; ELECTRICAL RELAYS; ELECTRICAL SWITCHES AND PUSH-BUTTONS; AND INSTITUTIONAL SIGNAL EQUIPMENT—NAMELY, CALL STATIONS, ANNUNCIATORS, CORRIDOR PILOT LIGHTS, PAGING SYSTEMS, AND EXPLOSION AND VAPOR-PROOF SWITCHES.
Claims use since 1917.

Ser. No. 519,225. SEIBERLING RUBBER COMPANY, Barberton, Ohio. Filed Oct. 8, 1947.

FREEDOM

FOR RADIO RECEIVING SETS AND ELECTRIC TOASTERS.
Claims use since Oct. 19, 1945.

Ser. No. 519,721. BERSTED MANUFACTURING COMPANY, Fostoria, Ohio. Filed Nov. 1, 1947.

Lightning

Applicant claims ownership of registration No. 212,907.
FOR ELECTRICAL APPLIANCES—NAMELY, STOVES, PERCOLATERS, TOASTERS, WAFFLE IRONS, SANDWICH TOASTERS, IRONS, SPACE HEATERS, HAIR DRYERS FOR HOME USE, BROILERS, AND HEATING PADS FOR GENERAL USE.
Claims use since Mar. 19, 1947.

Ser. No. 520,598. ALTEC LANSING CORPORATION, Los Angeles and Hollywood, Calif. Filed Oct. 20, 1947.

Iconic

FOR SPEAKER SYSTEMS—NAMELY, UNITARY ASSEMBLIES EMBODYING A PLURALITY OF SPEAKER UNITS OF DIFFERENT FREQUENCY RANGES, WITH OR WITHOUT A DIVIDING NETWORK.
Claims use since July 1, 1937.

Ser. No. 522,787. DRY CLEANING MACHINERY CORPORATION, Syracuse, N. Y. Filed Oct. 25, 1947.

DRYCO

FOR STEAM ELECTRIC IRONS FOR TEXTILE AND FABRIC FINISHING.
Claims use since 1935.

Ser. No. 527,709. EDWIN L. WIEGAND COMPANY, Pittsburgh, Pa. Filed July 5, 1947.

CHROMALOX
ELECTRIC HEATING

Applicant does not claim the exclusive right to the words "Electric Heating" or the representation of any goods, apart from the mark.
FOR ELECTRIC HEATING UNITS AND ELECTRIC HEATERS—NAMELY, STRIP HEATERS, SEGMENT HEATERS, RING HEATERS, DISC HEATERS, HALF-SHEATHED HEATERS, CARTRIDGE HEATERS, CYLINDER HEATERS, SCREW-BASE HEATERS, ROD HEATERS, TUBULAR HEATERS, RADIANT HEATERS, OVEN HEATERS, BROILER HEATERS, FOOD TABLE HEATERS, AIR BLAST HEATERS, AIR DUCT HEATERS, UNIT HEATERS FOR SPACE HEATING, STEAM GENERATORS, CIRCULATION HEATERS, FLAT IRON HEATERS, PERCOLATOR HEATERS, CONVECTION HEATERS, HOT PLATES, RANGE PLATES, RANGE UNITS, STOVES, COOKING PLATES, HEATING PLATES, URN HEATERS, MELTING POTS, SOLDERING IRONS, FLUID SUPERHEATERS PRINCIPALLY FOR INDUSTRIAL PURPOSES, FLUID PRE-HEATERS PRINCIPALLY FOR INDUSTRIAL PURPOSES, RADIATORS, AIR HEATERS, BLOWER HEATERS, SPACE HEATERS, LIQUID HEATERS, IMMERSION HEATERS, INFRA-RED-RAY GENERATORS, FLATIRON BASES, AND BRANDING APPARATUS, AND PARTS THEREOF, AND ELECTRIC HEATING ELEMENTS, ELECTRIC RESISTANCE ELEMENTS, ELECTRIC RESISTANCE UNITS, ELECTRIC RESISTORS, ELECTRIC RHEOSTATS, ELECTRIC TRANSFORMERS, ELECTRO-MAGNETIC CONTACTORS, ELECTRIC SWITCHES, ELECTRIC THERMAL CUTOUTS, ELECTRIC CIRCUIT BREAKERS, ELECTRIC RESISTOR WIRE, ELECTRIC RESISTOR RIBBON, AND ELECTRICAL INSULATING TUBING, BEADS, BLOCKS, BUSHINGS, AND BODIES, AND PARTS THEREOF.
Claims use since 1927.

Ser. No. 529,414. SOLAR CORPORATION, Milwaukee, Wis. Filed July 24, 1947.

SOLAR

FOR STORAGE BATTERIES.
Claims use since 1925.

Ser. No. 535,097. TAYLOR, TAYLOR & HOBSON, LIMITED, Leicester, England. Filed Sept. 19, 1947. Under section 2f of the act of 1946.

TAYLOR-HOBSON

FOR ELECTRIC ARC ETCHING MACHINES FOR MARKING METALS.
Claims use since 1909.

Ser. No. 535,592. THE OKONITE COMPANY, Passaic, N. J. Filed Sept. 24, 1947.

PERMEX

FOR ELECTRIC CABLE.
Claims use since 1933.

Ser. No. 537,909. LORAIN PRODUCTS CORPORATION, Lorain, Ohio. Filed Oct. 15, 1947. Under section 2f of the act of 1946.

SUB-CYCLE

Applicant claims ownership of registration No. 358,697.
FOR ELECTRICAL STATIC FREQUENCY CONVERTERS.
Claims use since Jan. 8, 1936.

Ser. No. 539,832. MONARK BATTERY COMPANY, INC., Chicago, Ill. Filed July 17, 1947.

Monark

Applicant claims ownership of registration No. 295,332.
FOR STORAGE BATTERIES.
Claims use since Apr. 29, 1924.

Ser. No. 542,474. LODGE PLUGS LIMITED, Rugby, England. Filed Nov. 26, 1947. Under section 2f of the act of 1946.

LODGE

FOR SPARK PLUGS.
Claims use since November 1907.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 491,130. THE TRIGON CORPORATION, assignee of Serene & Reeves, Santa Monica, Calif. Filed Nov. 5, 1945.

TRIGON

FOR COMBINATION TOYS CAPABLE OF BEING CONVERTED INTO A TOY WAGON, A TOY TRICYCLE, A TOY SCOOTER, AND A TOY WHEELBARROW.
Claims use since Oct. 11, 1945.

Ser. No. 520,701. G. A. HENRY, doing business as Henry Engineering Company, Burbank, Calif. Filed Oct. 27, 1947.

Veco

The trade-mark of the applicant consists of the word "Veco" enclosed in an oval design.
FOR ACCESSORIES FOR MINIATURE TOY MODEL AIRPLANES—NAMELY, AIRWHEELS, SEMI-PNEUMATIC WHEELS, SPONGE WHEELS, BELL-CRANK LANDING GEAR CLIPS, CABLE BUSHINGS, WHEEL RETAINERS; MINIATURE TOY RACING CAR ACCESSORIES—NAMELY, RACING CAR WHEELS AND TOY MODEL KITS CONTAINING PARTS FOR MINIATURE RACING CARS.
Claims use since Feb. 20, 1947.

Ser. No. 523,042. LEVITT LUZERN CUSTER, doing business as The Custer Specialty Company, Dayton, Ohio. Filed Sept. 18, 1947.

BUBBLE BOUNCE

FOR AMUSEMENT RIDING DEVICES SIMULATING A MERRY-GO-ROUND, FOR USE IN PARKS, CARNIVALS, FAIRS, ET CETERA.
Claims use since Feb. 1, 1938.

Ser. No. 527,062. B. F. GLADDING & CO. INC., South Otselic, N. Y. Filed July 5, 1947. Under section 2f of the act of 1946.

OTSELIC

FOR FISHING LINES.
Claims use since 1897.

Ser. No. 528,123. JACK KENNETH SMITHWICK, Shreveport, La. Filed July 8, 1947.

TOP-N-BOTTOM

FOR ARTIFICIAL FISH BAIT.
Claims use since May 7, 1947.

Ser. No. 528,289. KNOX-REESE MANUFACTURERS, Philadelphia, Pa. Filed July 10, 1947.

DUAL-SKIPLET

FOR CHILDREN'S SKIPPING AND JUMPING ROPES.
Claims use since Mar. 5, 1947.

Ser. No. 530,045. ABERCROMBIE & FITCH COMPANY, New York, N. Y. Filed July 31, 1947.

AF

FOR DART BOARDS, BEACH EQUIPMENT—NAMELY, BEACH MATS, ROLLS, AND BACK RESTS.
Claims use since 1935.

Ser. No. 530,974. SPORT PRODUCTS, INC., Cincinnati, Ohio. Filed Aug. 9, 1947. Under section 2f of the act of 1946.

X10L

FOR BASKETBALLS.
Claims use since June 1, 1939.

Ser. No. 530,977. SPORT PRODUCTS, INC., Cincinnati, Ohio. Filed Aug. 9, 1947. Under section 2f of the act of 1946.

PAR-WIN

Applicant claims ownership of registration No. 210,114.
FOR GOLF CLUBS.
Claims use since Feb. 1, 1939.

Ser. No. 535,530. IDEAL NOVELTY & TOY CO., Hollis, N. Y. Filed Sept. 24, 1947.

BABY
Sparkle Plenty

The word "Baby" is disclaimed apart from the mark shown.
FOR DOLLS.
Claims use since June 7, 1947.

Ser. No. 538,877. BRONSON REEL COMPANY, Bronson, Mich., now by change of name, B. R. Company, assignor to McAleer Manufacturing Company, Rochester, Mich., a corporation of Michigan. Filed Oct. 24, 1947.

MERCURY

FOR FISHING REELS.
Claims use since July 1936.

Ser. No. 540,235. ALBANY BILLIARD BALL COMPANY, Albany, N. Y. Filed Nov. 6, 1947.

VITALITE

Applicant claims ownership of registration No. 278,289.
FOR BILLIARD BALLS.
Claims use since July 30, 1930.

Ser. No. 541,034. A. G. SPALDING & BROS. INC., Chicopee, Mass. Filed Nov. 13, 1947.

DL

FOR BASKETBALLS.
Claims use since 1939.

Ser. No. 541,041. A. G. SPALDING & BROS. INC., Chicopee, Mass. Filed Nov. 13, 1947.

YOUNGSTAR

FOR TENNIS RACKETS, BASEBALLS, FOOTBALLS, BASKETBALLS, SOCCER BALLS, VOLLEY BALLS, BASEBALL MITTS, BASEBALL GLOVES, AND FOOTBALL HELMETS.
Claims use since 1937.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Ser. No. 541,783. HYDE MANUFACTURING COMPANY, Southbridge, Mass. Filed July 31, 1947. Under section 2f of the act of 1946.

THEODORE HARRINGTON CO.

Applicant hereby disclaims the notation "Co." Applicant claims ownership of registration No. 220,035.
FOR SHOE KNIVES HAVING SQUARE, SHARP, ROUND, OR BEVELED POINTS; LIP KNIVES, SKIVING KNIVES, EXTENSION BLADES FOR KNIVES, EXTENSION BLADE HANDLES, RUBBER CUTTING KNIVES, CIRCULAR KNIVES AND VERTICALLY MOVING KNIVES FOR ELECTRICAL CLOTH CUTTING MACHINES, BUTCHER KNIVES, BONING KNIVES, SKINNING KNIVES, STICKING KNIVES, MEAT CUTTING KNIVES, CARVERS, SLICERS, SPATULAS, TURNOVERS, BREAD KNIVES, MEAT KNIVES, PARING KNIVES, FRUIT KNIVES, TABLE KNIVES OF BASE METAL, STEAK KNIVES; KNIVES FOR CUTTING CORSETS, COLLARS, CLOTHING, CUFFS AND SHIRTS; PAPER HANGERS' KNIVES, BOOK BINDERS' KNIVES, KNIVES AND CUTTERS FOR LINOLEUM AND OIL CLOTH, GARMENT KNIVES, KNIVES FOR BROOM MAKERS AND GLASS WORKERS, OYSTER KNIVES, CLAM KNIVES, BANANA KNIVES, BAKERS' KNIVES, FURRIERS' KNIVES, AND FEATHER CUTTING KNIVES.
Claims use since 1912.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

Ser. No. 535,123. BERNDT-BACH, INCORPORATED, Los Angeles, Calif. Filed Sept. 20, 1947.

MODULITE

FOR SOUND PICTURE FILM RECORDING GALVANOMETERS, AMPLIFIERS, CAMERAS, AND RECORDING MACHINES.
Claims use since May 31, 1944.

Ser. No. 542,593. THE KONO MANUFACTURING COMPANY, Woodside, N. Y. Filed Nov. 28, 1947.

LILYBET

FOR EYEGLASS AND SPECTACLE FRAMES.
Claims use since Nov. 19, 1947.

CLASS 29

BROOMS, BRUSHES, AND DUSTERS

Ser. No. 530,246. OWENS BRUSH COMPANY, Toledo, Ohio. Filed Aug. 1, 1947. Under section 2f of the act of 1946 as to "Owens."

Owens HIS

Applicant claims ownership of registrations Nos. 184,043, 405,743, and 435,377.
FOR TOOTHBRUSHES.
Claims use since Apr. 3, 1947.

Ser. No. 530,247. OWENS BRUSH COMPANY, Toledo, Ohio. Filed Aug. 1, 1947. Under section 2f of the act of 1946 as to "Owens."

Owens HERS

Applicant claims ownership of registrations Nos. 184,043, Owens Bottle Company, dated May 13, 1924; 405,743, Owens Staple-Tied Brush Company, Feb. 15, 1944; and 435,377, Owens Brush Company, dated Dec. 16, 1947.
FOR TOOTHBRUSHES.
Claims use since Apr. 3, 1947.

Ser. No. 535,471. E. L. BRUCE CO., Memphis, Tenn. Filed Sept. 24, 1947.

BRUCE
Doozit

Applicant claims ownership of registrations including the word "Bruce," Nos. 377,520, 378,111, and 266,804.
FOR COMBINATION HAND TOOL INCLUDING A STEEL WOOL PAD FOR USE IN CLEANING AND POLISHING FLOORS.
Claims use since May 31, 1946, not including the name "Bruce"; and since Sept. 22, 1947, as shown.

CLASS 32

FURNITURE AND UPHOLSTERY

Reg. No. 377,983. Registered May 21, 1940. THE GARLOCK PACKING COMPANY, Palmyra, N. Y., a corporation of New York. Republished by registrant.

GARLOCK

FOR SEALING COMPOUND FOR USE IN CONNECTION WITH GASKET AND PIPE JOINTS.
Claims use since Aug. 24, 1931.

Reg. No. 403,383. Registered Sept. 21, 1943. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

KEMI KOTE

The word "Kote" is disclaimed apart from the mark as shown.
FOR TREATMENT MATERIAL FOR TREATING CEMENT, CONCRETE, AND LIKE SURFACES, SUCH AS FLOOR SURFACES OR THE LIKE, FOR HARDENING AND DUST-PROOFING PURPOSES.
Claims use since July 8, 1928.

Reg. No. 406,018. Registered Mar. 7, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

PERMAJOINT

FOR PERMANENTLY ELASTIC COMPOUND FOR LEAKPROOFING AND RUSTPROOFING THREADS AND JOINTS IN METAL PIPING.
Claims use since Mar. 7, 1928.

Reg. No. 407,335. Registered May 30, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

DURABILT

FOR CAULKING AND POINTING COMPOUNDS AND ROOFING AND DAMPPROOFING COMPOUNDS.
Claims use since Mar. 30, 1942.

Reg. No. 407,710. Registered June 20, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMGLAZE

FOR MASTIC COMPOUND FOR USE AS A PUTTY SUBSTITUTE IN THE GLAZING OF WINDOWS.
Claims use since June 1, 1936.

Reg. No. 408,763. Registered Aug. 29, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

BLACLASTIC

FOR PLIABLE, ELASTIC MATERIAL FOR COATING ROOFS, FOR PROTECTING METAL SURFACES AND FOR DAMP-PROOFING WALLS AND THE LIKE, THE MATERIAL BEING OF PAINT-LIKE FORM CAPABLE OF APPLICATION BY A BRUSH OR A POWER SPRAY GUN.
Claims use since Mar. 20, 1928.

Reg. No. 410,891. Registered Dec. 26, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMFLEX

FOR PROTECTIVE LIQUID COATINGS FOR METAL, MASONRY AND OTHER SURFACES, SAID COATINGS HAVING EITHER AN ASPHALTUM BASE OR A TAR BASE.
Claims use since Feb. 27, 1940.

Reg. No. 410,901. Registered Dec. 26, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMSTIK

FOR MASTIC CEMENT FOR BONDING ACOUSTICAL TILE, WALL BOARD, CORK AND THE LIKE TO SURFACES OF WOOD, PLASTER, MASONRY, OR METAL.
Claims use since Apr. 15, 1940.

Reg. No. 416,434. Registered Sept. 11, 1945. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMCAULK

FOR MASTIC COMPOUND FOR CAULKING- POINTING, AND LIKE PURPOSES.
Claims use since Mar. 15, 1945.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Reg. No. 70,817. Registered Aug. 18, 1908. THE JACOB J. VOLLRATH MFG. CO., Sheboygan, Wis. Republished by The Vollrath Co., Sheboygan, Wis., a corporation of Wisconsin.

VOLLRATH

FOR ENAMELED METAL WARE CONSISTING OF BATH TUBS, BIGGINS, BOILERS, BOWLS, BUCKETS, CHAMBERS, CLOSETS, COVERS, COLANDERS, CUPS AND SAUCERS, CUSPIDORS, DIPPERS, SOAP AND VEGETABLE DISHES, FUNNELS, HAM BOILERS, KETTLES, LADLES, MUGS, PAILS, PANS, PITCHERS, PLATES, PLATTERS, POTS, SINKS, SKIMMERS, SPOONS, STRAINERS AND TRAYS.
Claims use 1893.

Reg. No. 260,791. Registered Aug. 27, 1929. LYON METAL PRODUCTS, INCORPORATED, Aurora, Ill., a corporation of Illinois. Republished by registrant.

SNAP-IN

FOR FASTENERS FOR SHELF DIVIDERS AND THE LIKE.
Claims use since Oct. 18, 1928.

Reg. No. 368,446. Registered June 20, 1939. AIRCRAFT SCREW PRODUCTS COMPANY, INC., Brooklyn, N. Y. Republished by Heli-Coil Corporation, Long Island City, N. Y., a corporation of New York.

AERO-THREAD

The word "Thread" is disclaimed apart from the mark as shown.
FOR BOLTS, STUDS, NUTS, SCREWS, AND SCREW CONNECTIONS.
Claims use since Mar. 4, 1938.

Reg. No. 404,065. Registered Nov. 2, 1943. AIRCRAFT SCREW PRODUCTS COMPANY, INC., Long Island City, N. Y. Republished by Heli-Coil Corporation, Long Island City, N .Y., a corporation of New York.

The representation of the goods and the word "Thread" are disclaimed apart from the mark as shown.
FOR SCREW CONNECTIONS AND PARTS OF SCREW CONNECTIONS—NAMELY, SCREWS, BOLTS, STUDS, NUTS, THREAD-INSERTS.
Claims use since Mar. 30, 1942.

Reg. No. 408,085. Registered July 18, 1944. THE KITCHEN MAID CORPORATION, Andrews, Ind., a corporation of Indiana. Republished by registrant.

KITCHEN MAID

FOR KITCHEN SINK TOPS.
Claims use since July 1, 1932.

Reg. No. 419,476. Registered Feb. 19, 1946. AIRCRAFT SCREW PRODUCTS COMPANY, INC., Long Island City, N. Y. Republished by Heli-Coil Corporation, Long Island City, N. Y., a corporation of New York.

HELI-COIL

The word "Coil" is disclaimed apart from the mark as shown.
FOR SCREW CONNECTIONS AND PARTS OF SCREW CONNECTIONS—NAMELY, SCREWS, BOLTS, STUDS, NUTS, THREAD INSERTS AND THREAD BUSHINGS, FOR USE IN DRILLED OR THREADED HOLES.
Claims use since Nov. 20, 1942.

CLASS 15

OILS AND GREASES

Reg. No. 15,013. Registered Dec. 13, 1887. AUGUSTUS C. BUZBY, Philadelphia, Pa. Republished by Keystone Lubricating Company, Philadelphia, Pa., a corporation of Pennsylvania.

LUBRICANT
TRADE MARK.

The word "Lubricant" forms no essential feature of the mark.
FOR LUBRICANTS FOR FRICTIONAL SURFACES.
Claims use since Dec. 1, 1885.

Reg. No. 173,468. Registered Sept. 25, 1923. GRACE B. CARRAN, doing business as Central Petroleum Company, Cleveland, Ohio. Republished by Central Petroleum Company, Cleveland, Ohio, a corporation of Ohio.

FOR LUBRICATING OILS AND GREASES.
Claims use since January 1914.

Reg. No. 227,199. Registered May 3, 1927. SMITH & NICHOLS, INC., New York, N. Y., a corporation of New York. Republished by registrant.

HYDRAULIC PRESSED

FOR CANDLES.
Claims use since May 1883.

Reg. No. 229,111. Registered June 21, 1927. SMITH & NICHOLS, INC., New York, N. Y., a corporation of New York. Republished by registrant.

CHALICE

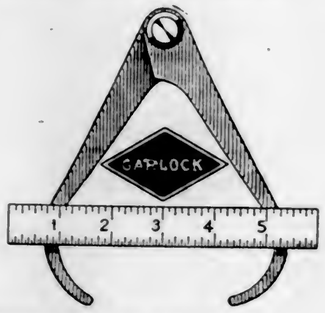
FOR CANDLES.
Claims use since 1926.

Reg. No. 325,198. Registered June 11, 1935. MARQUETTE PETROLEUM PRODUCTS, INC., Chicago, Ill., a corporation of Illinois. Republished by registrant.

The words "Lubrication By" are disclaimed apart from the mark as shown.
FOR LUBRICATION OILS AND GREASES.
Claims use since Oct. 10, 1934.

Reg. No. 377,981. Registered May 21, 1940. THE GARLOCK PACKING COMPANY, Palmyra, N. Y., a corporation of New York. Republished by registrant.

GARLOCK



FOR LUBRICATING OILS AND GREASES.
Claims use since Jan. 12, 1932.

Reg. No. 378,035. Registered May 21, 1940. THE GARLOCK PACKING COMPANY, Palmyra, N. Y., a corporation of New York. Republished by registrant.

The hatching is for shading only.
FOR LUBRICATING GREASE FOR USE IN CONNECTION WITH PACKINGS.
Claims use since about June 1928.

Reg. No. 381,919. Registered Oct. 15, 1940. THE GARLOCK PACKING COMPANY, Palmyra, N. Y., a corporation of New York. Republished by registrant.

The drawing is lined for shading only.
FOR LUBRICATING OILS AND GREASES.
Claims use since about 1904.

Reg. No. 415,073. Registered July 10, 1945. SMITH & NICHOLS, INC., New York, N. Y., a corporation of New York. Republished by registrant.

ST. JUDE

FOR CANDLES.
Claims use since Nov. 17, 1943.

Reg. No. 415,074. Registered July 10, 1945. SMITH & NICHOLS, INC., New York, N. Y., a corporation of New York. Republished by registrant.

FOR CANDLES.
Claims use since Nov. 17, 1943.

Reg. No. 418,052. Registered Nov. 27, 1945. THE DENTAL SPECIALTY MANUFACTURING CO., INC., Denver, Colo. Republished by Densco, Incorporated, Denver, Colo., a corporation of Colorado.

FOR HANDPIECE CLEANER AND LUBRICANT, AN OIL-BASE LIQUID.
Claims use since Jan. 1, 1939.

Reg. No. 424,499. Registered Oct. 8, 1946. THE DENTAL-SPECIALTY MANUFACTURING CO., INC., Denver, Colo. Republished by Densco, Incorporated, Denver, Colo., a corporation of Colorado.

The drawing is lined for the color green.
FOR HANDPIECE LUBRICANT AND CLEANER COMPRISING AN OILY-BASE LIQUID.
Claims use since Jan. 1, 1939.

CLASS 16

PAINTS AND PAINTERS' MATERIALS

Reg. No. 46,556. Registered Sept. 26, 1905. MAYER & LOEWENSTEIN, New York, N. Y. Republished by Clover Leaf Paint & Varnish Corporation, Long Island City, N. Y., a corporation of New York.

FOR VARNISHES, JAPANS, OIL-FINISH, AND BRONZING LIQUID.
Claims use since Feb. 7, 1891.

Reg. No. 246,553. Registered Sept. 11, 1928. ANDREW BROWN CO., INC., Los Angeles and Maywood, Calif. Republished by Andrew Brown Company, Los Angeles, Calif., a firm.

The drawing is lined for the color red.
FOR DRIED, PASTE, AND READY-MIXED PAINTS, LACQUERS, VARNISH, PAINT ENAMELS.
Claims use since Jan. 24, 1928.

Reg. No. 305,087. Registered Aug. 1, 1933. ANDREW BROWN COMPANY, Los Angeles, Calif. Republished by Andrew Brown Company, Los Angeles, Calif., a firm.

The drawing is lined for the color red.
FOR PAINT ENAMELS, VARNISHES, LACQUERS.
Claims use since May 16, 1932.

Reg. No. 344,275. Registered Mar. 16, 1937. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMLUX

FOR PAINT ENAMELS.
Claims use since Sept. 1, 1936.

Reg. No. 392,016. Registered Dec. 2, 1941. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

PERMAVAR

FOR PAINT ENAMELS.
Claims use since Apr. 7, 1928.

Reg. No. 392,676. Registered Jan. 6, 1942. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

DURZON

FOR PAINTS OF A VERY HEAVY CONSISTENCY OF A SEMI-PASTE-LIKE FORM FOR INTERIOR USE.
Claims use since Jan. 22, 1941.

Reg. No. 393,383. Registered Feb. 10, 1942. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

DURATREM

FOR PAINTS FOR METAL, WOOD, MASONRY, AND LIKE SURFACES, THE PAINTS BEING IN READY-MIXED FORM ALTHOUGH LINSEED OIL, TURPENTINE, AND THE LIKE MAY BE ADDED, IF DESIRED.
Claims use since May 7, 1940.

Reg. No. 401,058. Registered Apr. 20, 1943. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMFLAT

FOR READY-MIXED PAINT.
Claims use since Apr. 16, 1942.

Reg. No. 407,701. Registered June 20, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

DURABILT

FOR READY MIXED PAINTS.
Claims use since Nov. 5, 1943.

Reg. No. 408,181. Registered July 25, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

RAZON

FOR PAINT ENAMELS.
Claims use since Apr. 11, 1928.

Reg. No. 408,563. Registered Aug. 15, 1944. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMCOTE

FOR READY-MIXED PAINTS.
Claims use since Feb. 6, 1936.

Reg. No. 416,992. Registered Oct. 9, 1945. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMNAMEL

FOR ENAMEL PAINT.
Claims use since Mar. 9, 1945.

CLASS 19

VEHICLES

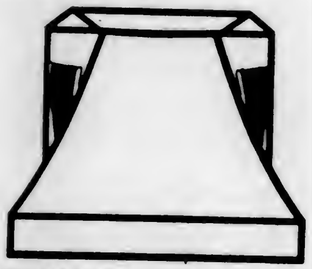
Reg. No. 146,910. Registered Sept. 20, 1921. WEST BEND EQUIPMENT CO., West Bend, Wis. Republished by West Bend Equipment Corporation, West Bend, Wis. a corporation of Wisconsin.

SPRING BEARING TRUCKS

The words "Spring Bearing Trucks" and the representation of a picture of a truck are disclaimed apart from the mark as shown.
FOR PLATFORM-TRUCKS.
Claims use since about Feb. 1, 1920.

Reg. No. 171,504. Registered Aug. 7, 1923. INTERNATIONAL MOTOR COMPANY, New York, N. Y. Republished by Mack Manufacturing Corporation, New York, N. Y., a corporation of Delaware.

SHOCK INSULATOR



FOR METAL PARTS FOR CUSHIONED CONNECTIONS IN VEHICLES, PARTICULARLY FOR A METAL HOUSING FOR CARRYING A DEFORMABLE BLOCK IN WHICH AN END OF A VEHICLE SPRING IS CARRIED.
Claims use since about July 10, 1922.

Reg. No. 171,507. Registered Aug. 7, 1923. INTERNATIONAL MOTOR COMPANY, New York, N. Y. Republished by Mack Manufacturing Corporation, New York, N. Y., a corporation of Delaware.

SHOCK INSULATOR

FOR CUSHIONED CONNECTIONS FOR USE IN VEHICLES, PARTICULARLY FOR A DEFORMABLE BLOCK MADE OF RUBBER OR THE LIKE, IN WHICH AN END OF A VEHICLE SPRING IS CARRIED.
Claims use since about July 7, 1922.

Reg. No. 187,497. Registered Aug. 5, 1924. INTERNATIONAL MOTOR COMPANY, New York, N. Y. Republished by Mack Manufacturing Corporation, New York, N. Y., a corporation of Delaware.

FOR MOTOR TRUCKS.
Claims use since about Sept. 21, 1921.

Reg. No. 394,290. Registered Mar. 31, 1942. SCULLY SIGNAL COMPANY, Cambridge and East Cambridge, Mass., a corporation of Massachusetts. Republished by registrant.

PORCUPINE

FOR ANTISIPHONING THEFT GUARDS FOR PARTIALLY OBSTRUCTING VEHICLE TANK FILLER PIPES.
Claims use since Sept. 3, 1941.

Reg. No. 410,586. Registered Dec. 5, 1944. KOPPERS COMPANY, doing business as Bartlett Hayward Division, Baltimore, Md. Republished by Koppers Company, Inc., doing business as Bartlett Hayward Division (1944), Baltimore, Md., a corporation of Delaware.

AERO MATIC

FOR PROPELLERS, PROPELLER HUBS AND PROPELLER ASSEMBLIES.
Claims use since Mar. 5, 1942.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Reg. No. 96,500. Registered Apr. 21, 1914. CRESCENT BELTING AND PACKING COMPANY, Trenton, N. J. Republished by Crescent Insulated Wire and Cable Co. Inc., Trenton, N. J., a corporation of New Jersey.

FOR INSULATED WIRE.
Claims use since Oct. 1, 1892.

Reg. No. 147,827. Registered Nov. 1, 1921. WARD LEONARD ELECTRIC COMPANY, Mount Vernon, N. Y., a corporation of New York. Republished by registrant.

RIBOHM

FOR ELECTRIC RESISTANCE UNITS, RHEOSTATS, REGULATORS, AND ELECTRIC RESISTORS.
Claims use since Apr. 14, 1920.

Reg. No. 147,828. Registered Nov. 1, 1921. WARD LEONARD ELECTRIC COMPANY, Mount Vernon, N. Y., a corporation of New York. Republished by registrant.

VITROHM

FOR ELECTRIC RESISTANCE UNITS, RHEOSTATS, REGULATORS, AND ELECTRIC RESISTORS.
Claims use since Jan. 22, 1920.

Reg. No. 263,208. Registered Nov. 5, 1929. UNITED STATES ELECTRICAL MANUFACTURING COMPANY, Los Angeles, Calif. Republished by U. S. Electric Motors, Inc., Los Angeles, Calif., a corporation of California.

UNICLOSED

FOR ELECTRIC MOTORS.
Claims use since June 4, 1929.

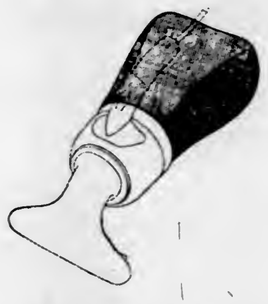
Reg. No. 274,965. Registered Sept. 9, 1930. HAMILTON BEACH MANUFACTURING COMPANY, Racine, Wis. Republished by Scovill Manufacturing Company, Waterbury, Conn., a corporation of Connecticut.

DRINKMASTER

FOR ELECTRICALLY-OPERATED DRINK MIXERS.
Claims use since Mar. 29, 1930.

Reg. No. 290,519. Registered Jan. 5, 1932. YATES-AMERICAN MACHINE COMPANY, Beloit, Wis., a corporation of Delaware. Republished by registrant.

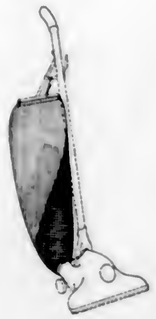
Y-A



FOR ELECTRIC MOTORS.
Claims use since on or about July 10, 1931.

Reg. No. 296,972. Registered Aug. 30, 1932. THE P. A. GEIER COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

ROYAL



FOR ELECTRICALLY-OPERATED SUCTION CLEANERS.
Claims use since September 1908.

Reg. No. 342,473. Registered Jan. 19, 1937. THE P. A. GEIER COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

The representation of the goods is disclaimed. The drawing is lined for the colors red and black.
FOR ELECTRICALLY-OPERATED SUCTION CLEANERS.
Claims use since Jan. 4, 1936.

Reg. No. 342,513. Registered Jan. 19, 1937. THE P. A. GEIER COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

The representation of the goods is disclaimed apart from the mark as shown. The drawing is lined for the colors red and black.

FOR ELECTRICALLY OPERATED SUCTION CLEANERS AND PARTS THEREOF AND ATTACHMENTS AND ACCESSORIES THEREFOR.

Claims use since July 11, 1934.

Reg. No. 361,657. Registered Oct. 25, 1938. CRESCENT INSULATED WIRE & CABLE CO. INC., Trenton, N. J., a corporation of New Jersey. Republished by registrant.

IMPERVEX

FOR RUBBER INSULATION FOR ELECTRICAL WIRE AND CABLE AND FOR ELECTRICAL WIRE AND CABLE EMPLOYING SUCH INSULATION.

Claims use since May 10, 1938.

Reg. No. 369,779. Registered Aug. 1, 1939. THE P. A. GEIER COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

Royalaire

FOR ELECTRICALLY OPERATED SUCTION CLEANERS.

Claims use since Dec. 13, 1938.

Reg. No. 399,390. Registered Jan. 5, 1943. AIRCRAFT SCREW PRODUCTS COMPANY, INCORPORATED, Long Island City, N. Y. Republished by Heli-Coil Corporation, Long Island City, N. Y., a corporation of New York.

HELI-COIL

The word "Coil" is disclaimed apart from the mark as shown.

FOR SPARK PLUG BUSHINGS.

Claims use since Mar. 13, 1942.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Reg. No. 252,324. Registered Feb. 5, 1929. MAY & MALONE, Chicago, Ill. Republished by The Richter & Phillips Company, Cincinnati, Ohio, a corporation of Ohio.

BIRDIE M&M

FOR GOLF BALLS.

Claims use since December 1926.

Reg. No. 345,479. Registered Apr. 27, 1937. THE BRUNSWICK-BALKE-COLLENDER COMPANY, Chicago, Ill., a corporation of Delaware.. Republished by registrant.

elik

FOR BILLIARD CHALK.

Claims use since Oct. 1, 1936.

Reg. No. 382,894. Registered Nov. 12, 1940. THE BRUNSWICK-BALKE-COLLENDER COMPANY, Chicago, Ill., a corporation of Delaware.. Republished by registrant.

BLACK DIAMOND

FOR BILLIARD AND POCKET-BILLIARD BALLS.

Claims use since May 15, 1919.

Reg. No. 406,351. Registered Mar. 28, 1944. THE BRUNSWICK-BALKE-COLLENDER COMPANY, Chicago, Ill., a corporation of Delaware.. Republished by registrant.

Blue Spot

The drawing is lined for the color blue.

FOR CAROM BILLIARD BALLS.

Claims use since Apr. 13, 1942.

Reg. No. 432,818. Registered Sept. 16, 1947. BERNARD M. WILBER, doing business as Wilber & Son, San Francisco, Calif. Republished by registrant.

WILCO

FOR LIFE SAVING EQUIPMENT—NAMELY, LIFE JACKETS, LIFE PRESERVERS, LIFE PRESERVING CUSHIONS AND RING BUOYS; AND CAMPING EQUIPMENT—NAMELY, SLEEPING BAGS PROVIDED WITH A MATTRESS, AND AIR MATTRESSES USED ON THE BEACHES AND WATER.

Claims use since Dec. 1, 1944.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Reg. No. 70,317. Registered Aug. 18, 1908. THE JACOB J. VOLLRATH MFG. CO., Sheboygan, Wis. Republished by The Vollrath Co., Sheboygan, Wis., a corporation of Wisconsin.

VOLLRATH

FOR ENAMELED METAL WARE CONSISTING OF BATH TUBS, BIGGINS, BOILERS, BOWLS, BUCKETS, CHAMBERS, CLOSETS, COVERS, COLANDERS, CUPS AND SAUCERS, CUSPIDORS, DIPPERS, SOAP AND VEGETABLE DISHES, FUNNELS, HAM BOILERS, KETTLES, LADLES, MUGS, PAILS, PANS, PITCHERS, PLATES, PLATTERS, POTS, SINKS, SKIMMERS, SPOONS, STRAINERS AND TRAYS.

Claims use since 1893.

Reg. No. 154,967. Registered May 16, 1922. ROBERT H. HENDERSON, Ampere, N. J. Republished by registrant, present location East Orange, N. J.

HENDERSON EZ

FOR PIPE BENDING TOOLS.

Claims use since about July 23, 1919.

Reg. No. 264,602. Registered Nov. 26, 1929. FARREL-BIRMINGHAM COMPANY, INCORPORATED, Ansonia and Derby, Conn., and Buffalo, N. Y., a corporation of Connecticut. Republished by registrant.

FARREL-BIRMINGHAM

FOR MACHINE FOR BREAKING DOWN RUBBER AND RENDERING IT PLASTIC, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION, EXCEPT, TREAD CALENDERS.

Claims use since on or about Apr. 13, 1928.

Reg. No. 285,418. Registered July 28, 1931. THE DORR COMPANY, New York, N. Y. Republished by The Dorr Company (1944), New York, N. Y., a corporation of Delaware.

DORRCO

FOR APPARATUS FOR THE TREATMENT OF SOLIDS SUSPENDED IN LIQUIDS, WHICH COMPRISE AGITATORS, THICKENERS, TRAY THICKENERS, WASHERS, ROTARY CONVEYERS, SAVEALLS, SLURRY MIXERS, CORD DIAPHRAGMS FOR PUMPS; CLARIFIERS FOR SEWAGE, WATER, AND CANE JUICE; CLASSIFIERS, BOWL CLASSIFIERS, PUMPS, ROTATING SCREENS, SAND WASHERS, DIGESTERS, SIZERS, TRACTION CLARIFIERS, EJECTORS, DETRITORS, REPULPERS, BAR SCREENS, AND CLOSED CIRCUIT GRINDING DEVICES, INCINERATORS, SEWAGE GRIT CHAMBER SCRAPERS, AND SEWAGE AERATORS.

Claims use since Nov. 13, 1922.

Reg. No. 288,283. Registered Oct. 20, 1931. HERCULES MOTORS CORPORATION, Canton, Ohio, a corporation of Ohio. Republished by registrant.

FOR INTERNAL COMBUSTION ENGINES; POWER UNITS INCLUDING INTERNAL COMBUSTION ENGINES AND ACCESSORIES—NAMELY, REDUCTION GEARS AND CLUTCHES FOR INTERNAL COMBUSTION ENGINES AND POWER UNITS.

Claims use since May 1916.

Reg. No. 288,791. Registered Nov. 3, 1931. THE FERRO ENGINEERING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

C & D

FOR HOT TOP CASINGS FOR USE ON INGOT MOLDS.

Claims use since on or about Feb. 8, 1930.

Reg. No. 288,814. Registered Nov. 3, 1931. HERCULES MOTORS CORPORATION, Canton, Ohio, a corporation of Ohio. Republished by registrant.

HERCANO

FOR INTERNAL COMBUSTION ENGINES, POWER UNITS, AND ACCESSORIES—NAMELY, REDUCTION GEARS AND CLUTCHES FOR INTERNAL COMBUSTION ENGINES AND POWER UNITS.

Claims use since on or about June 10, 1931.

Reg. No. 298,080. Registered Oct. 11, 1932. NATIONAL ALUMINATE CORPORATION, Chicago, Ill., a corporation of Delaware. Republished by registrant.

NALCO

FOR PUMPS, WATER-MOTORS AND MECHANISMS FOR PROPORTIONING REAGENTS FED TO A WATER PURIFYING SYSTEM.

Claims use since Sept. 10, 1929.

Reg. No. 347,508. Registered June 29, 1937. THE P. A. GEIER COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

ROYAL

FOR FLOOR POLISHERS AND FLOOR POLISHER ATTACHMENTS FOR SUCTION CLEANERS.

Claims use since February 1926.

Reg. No. 356,073. Registered Apr. 12, 1938. NATIONAL BROACH & MACHINE CO., Detroit, Mich., a corporation of Michigan. Republished by registrant.

RED RING

FOR GEAR MANUFACTURING EQUIPMENT—NAMELY, MACHINES FOR FINISHING, SHAVING, LAPPING, AND CHECKING GEARS; BROACHING TOOLS AND MACHINES, SPLINE GRINDERS; FLAT SEAL FACE GRINDING MACHINES; GEAR TOOTH FORM GRINDERS; GEAR TOOTH SHAPER CUTTERS, FORM AND SHAVING TOOLS FOR GEARS, LAPPING TOOLS, AND HOLDERS THEREFOR.
Claims use since Apr. 26, 1924.

Reg. No. 419,109. Registered Feb. 5, 1946. AIRCRAFT SCREW PRODUCTS COMPANY, INC., Long Island City, N. Y. Republished by Heli-Coil Corporation, Long Island City, N. Y., a corporation of New York.

HELI-COIL

The word "Coil" is disclaimed apart from the mark as shown.
FOR TOOLS, APPARATUS AND MACHINES FOR USE IN CONNECTION WITH SCREW CONNECTIONS AND THEIR PARTS—NAMELY, SCREW-THREAD-TAPPING TOOLS, COILING MACHINES FOR WIRE THREAD INSERTS, TOOLS FOR INSERTING AND EXTRACTING WIRE THREAD BUSHINGS, STAKING TOOLS FOR SECURING THREAD BUSHINGS IN BOSS MEMBERS.
Claims use since Nov. 20, 1942.

Reg. No. 428,164. Registered Mar. 11, 1947. WEBSTER ELECTRIC COMPANY, Racine, Wis., a corporation of Delaware. Republished by registrant.

Thermodrive

FOR THERMOSTATICALLY CONTROLLED, VARIABLE DIAMETER V PULLEYS.
Claims use since Mar. 15, 1946.

CLASS 24

LAUNDRY APPLIANCES AND MACHINES

Reg. No. 228,643. Registered June 7, 1927. WASMUTH-ENDICOTT COMPANY, Andrews, Ind. Republished by The Kitchen Maid Corporation, Andrews, Ind., a corporation of Indiana.

KITCHEN MAID

FOR IRONING BOARDS.
Claims use since Nov. 8, 1922.

Reg. No. 257,702. Registered June 18, 1929. TROY LAUNDRY MACHINERY COMPANY, INC., New York, N. Y. Republished by American Machine & Metals, Inc., New York, N. Y., a corporation of Delaware.

TITAN

FOR LAUNDRY WASHING MACHINES.
Claims use since Dec. 28, 1928.

Reg. No. 407,623. Registered June 13, 1944. THE KITCHEN MAID CORPORATION, Andrews, Ind., a corporation of Indiana. Republished by registrant.

KITCHEN MAID

FOR IRONING BOARDS.
Claims use since July 1, 1932.

CLASS 25

LOCKS AND SAFES

Reg. No. 87,302. Registered July 2, 1912. YORK SAFE AND LOCK CO., York, Pa. Republished by Diebold, Incorporated, Canton, Ohio, a corporation of Ohio.

YORK SAFES

FOR SAFES AND VAULT DOORS.
Claims use since about January 1884.

Reg. No. 161,934. Registered Nov. 28, 1922. DIEBOLD SAFE AND LOCK COMPANY, Canton, Ohio. Republished by Diebold, Incorporated, Canton, Ohio, a corporation of Ohio.

DIEBOLD

FOR FILING SAFES, FIRE-PROOF SAFES, BURGLAR-PROOF SAFES, VAULT DOORS, LOCKS, AND SAFE-DEPOSIT BOXES.
Claims use since June 25 1859.

Reg. No. 404,085. Registered Nov. 2, 1943. DIEBOLD SAFE & LOCK COMPANY, Canton, Ohio, now by change of name Diebold, Incorporated. Republished by Diebold, Incorporated, Canton, Ohio, a corporation of Ohio.

DIEBOLD

FOR FILING SAFES, FIREPROOF SAFES, BURGLARPROOF SAFES, VAULT DOORS, LOCKS, SAFE-DEPOSIT BOXES, MONEY CHESTS, LEDGER SAFES, RECORD DESK SAFES, AND TELLERS' SAFETY LOCKERS.
Claims use since Oct. 5, 1922.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

Reg. No. 347,909. Registered July 13, 1937. BACHARACH INDUSTRIAL INSTRUMENT COMPANY, Pittsburgh, Pa., a corporation of Pennsylvania. Republished by registrant.

draft-rite

FOR DRAFT GAUGES.
Claims use since Oct. 26, 1935.

Reg. No. 385,376. Registered Feb. 25, 1941. SCULLY SIGNAL COMPANY, Cambridge, Mass., a corporation of Massachusetts. Republished by registrant.

Whisalarm

FOR LIQUID LEVEL INDICATORS FOR LIQUID FUEL TANKS AND THE LIKE.
Claims use since Aug. 26, 1936.

FOR WHEAT FLOUR.
Claims use since May 18, 1910.

Reg. No. 93,904. Registered Oct. 21, 1913. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

MASTERSTROKE

FOR WHEAT FLOUR.
Claims use since on or about Apr. 18, 1913.

Reg. No. 94,007. Registered Oct. 28, 1913. JOHN F. LALLA COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

SCOUT

FOR MACARONI, SPAGHETTI, NOODLES, SARDINES IN OIL, SARDINES IN MUSTARD SAUCE, CANNED VEGETABLES, TOMATO PUREE, CANNED PORK AND BEANS, DRIED CURRANTS, SEEDED AND SEEDLESS RAISINS, ROLLED OATS, CANNED CORN SYRUP, AND CANNED FRUITS.
Claims use since Oct. 15, 1910.

Reg. No. 127,692. Registered Nov. 18, 1919. SUN HARBOR PACKING CORPORATION, San Diego, Calif. Republished by Sun Harbor Packing Company, San Diego, Calif., a corporation of California.

WARRANTY

The representation of the fish is disclaimed apart from the mark as shown.
FOR CANNED SARDINES AND CANNED TUNA.
Claims use since June 14, 1918.

Reg. No. 143,430. Registered May 31, 1921. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

FOR FLOUR MADE FROM WHEAT.
Claims use since on or about Sept. 1, 1885.

Reg. No. 188,151. Registered Aug. 19, 1924. WESTGATE SEA PRODUCTS CO., San Diego, Calif., a corporation of California. Republished by registrant.

MORO

FOR CANNED TUNNY FISH.
Claims use since July 1922.

Reg. No. 236,895. Registered Dec. 27, 1927. S. S. PIERCE CO., Boston, Mass., a corporation of Massachusetts. Republished by registrant.

FOR FRESH, DRIED, AND STUFFED FRUITS, RAISINS, CANNED AND PRESERVED FRUITS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION.
Claims use since May 1, 1877.

Reg. No. 237,507. Registered Jan. 10, 1928. JOSEY-MILLER CO., Beaumont, Tex. Republished by Josey-Miller Company, Inc., Beaumont, Tex., a corporation of Texas.

IDEAL

FOR CHICKEN FEED.
Claims use since July 1, 1924.

Reg. No. 238,737. Registered Feb. 14, 1928. THE FRENCH SARDINE COMPANY OF CALIFORNIA, Terminal Island, Calif., a corporation of California. Republished by registrant.

EATWELL

FOR CANNED FISH.
Claims use since May 14, 1927.

Reg. No. 249,808. Registered Nov. 20, 1928. WOOD FRUIT COMPANY, INC., Atwater, Calif. Republished by E. B. Wood, Atwater, Calif.

WHITE CHAIN

FOR FRESH DECIDUOUS FRUITS.
Claims use since May 1, 1928.

Reg. No. 249,809. Registered Nov. 20, 1928. WOOD FRUIT COMPANY, INC., Atwater, Calif. Republished by E. B. Wood, Atwater, Calif.

BLUE CHAIN

FOR FRESH DECIDUOUS FRUITS.
Claims use since May 1, 1928.

Reg. No. 282,157. Registered Apr. 14, 1931. M. A. REX, doing business as California Sea Food Company, San Francisco, Calif. Republished by California Sea Food Corp., Long Beach, Calif., a corporation of California.

SUNRISE

The pictorial representation of the goods is disclaimed apart from the mark as shown.
FOR CANNED TUNA FISH AND CANNED SARDINES.
Claims use since October 1929.

Reg. No. 282,745. Registered Apr. 28, 1931. WINSTON AND NEWELL COMPANY, Minneapolis, Minn., a corporation of Delaware. Republished by registrant.

18-K

FOR CANNED FISH—NAMELY, CRAB MEAT, FISH BALLS, AND ALL THE OTHER ITEMS NAMED IN THE ORIGINAL REGISTRATION.
Claims use since Jan. 1, 1916.

Reg. No. 283,554. Registered June 2, 1931. SWANSON BAKING COMPANY, Fitchburg, Mass., a corporation of Massachusetts. Republished by registrant.

WISDOM TOWN TALKIES

FOR CUP CAKES.
Claims use since Mar. 1, 1930.

Reg. No. 291,599. Registered Feb. 23, 1932. L. MAXCY, INC., Frostproof, Fla., a corporation of Florida. Republished by registrant.

BOULEVARD

FOR FRESH CITRUS FRUITS.
Claims use since Jan. 5, 1931.

Reg. No. 293,505. Registered Apr. 26, 1932. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

PAN KING

FOR WHEAT FLOUR.
Claims use since Dec. 26, 1928.

Reg. No. 296,114. Registered July 26, 1932. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

KORSAK

FOR FLOUR MADE FROM WHEAT.
Claims use since Jan. 28, 1932.

Reg. No. 306,600. Registered Sept. 26, 1933. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

LITE-VELVA

FOR FLOUR MADE FROM WHEAT.
Claims use since Apr. 18, 1933.

Reg. No. 320,806. Registered Jan. 8, 1935. RELIABLE GROCERY CO. INC., Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

CO-REL

FOR CANNED FRUITS, VEGETABLES, CANNED FISH, PEANUT BUTTER, TEA, COFFEE, TABLE SYRUP, CANNED EVAPORATED MILK, TOMATO CATSUP, PREPARED MUSTARD, WHEAT FLOUR, RICE, PICKLES, SOUR GHERKINS, CANNED SHRIMP, INDIA RELISH, STRAWBERRY JELLY AND STRAWBERRY PRESERVES.
Claims use since May 15, 1934.

Reg. No. 326,648. Registered July 30, 1935. CENTRAL WISCONSIN CANNERIES, INC., Beaver Dam, Wis. Republished by Minnesota Valley Canning Company, Le Sueur, Minn.

Tem-ting

FOR CANNED PEAS.
Claims use since May 1, 1934.

Reg. No. 334,193. Registered Apr. 21, 1936. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

NORTHWESTERN BEAUTY

FOR WHEAT FLOUR.
Claims use since Oct. 30, 1935.

Reg. No. 342,948. Registered Feb. 2, 1937. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

OVEN EZE

FOR WHEAT FLOUR.
Claims use since Apr. 9, 1936.

Reg. No. 347,575. Registered June 29, 1937. ALBERS BROS. MILLING CO., Sacramento, San Francisco, Los Angeles, Oakland, Riverside, Fresno, and San Jose, Calif., and Seattle, Tacoma, and Spokane, Wash. Republished by Albers Milling Company, Los Angeles, Calif., a corporation of Oregon.

SIMILENE

FOR STOCK AND POULTRY FEEDS.
Claims use since Jan. 21, 1937.

Reg. No. 350,693. Registered Oct. 5, 1937. UNION PREMIER STORES, INC., Philadelphia, Pa., by change of name, Union Premier Food Stores, Inc. Republished by Food Fair Stores, Inc., Philadelphia, Pa., a corporation of Pennsylvania.

FRE-MAR

FOR CANNED VEGETABLES, CANNED FRUITS, PICKLES, OLIVES, PACKAGED LEGUMES, SANDWICH SPREAD AND MAYONNAISE.
Claims use since Sept. 1, 1936.

Reg. No. 350,937. Registered Oct. 12, 1937. CENTRAL WISCONSIN CANNERIES, Beaver Dam, Wis. Republished by Minnesota Valley Canning Company, Le Sueur, Minn., a corporation of Minnesota.

SQUARE DEAL
"IS ALL ANYONE WANTS"

FOR CANNED VEGETABLES.
Claims use since 1908.

Reg. No. 351,206. Registered Oct. 19, 1937. SALERNO-MEGOWEN BISCUIT COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

Salerno

The word "Finest" and the several representations of the goods are disclaimed apart from the mark as shown.
FOR CRACKERS, COOKIES, WAFERS, AND BISCUITS.
Claims use since June 10, 1937.

Reg. No. 354,823. Registered Feb. 22, 1938. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

PANCRAFT

FOR WHEAT FLOUR.
Claims use since Sept. 9, 1937.

Reg. No. 354,824. Registered Feb. 22, 1938. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

PANFUL

FOR WHEAT FLOUR.
Claims use since Sept. 9, 1937.

Reg. No. 355,525. Registered Mar. 22, 1938. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

Northern Special

The word "Special" is disclaimed apart from the mark as shown.
FOR FLOUR, PARTICULARLY WHOLE WHEAT FLOUR.
Claims use since Apr. 16, 1937.

Reg. No. 361,930. Registered Nov. 8, 1938. CENTRAL WISCONSIN CANNERIES, Beaver Dam, Wis. Republished by Minnesota Valley Canning Company, Le Sueur, Minn., a corporation of Minnesota.

FOR CANNED VEGETABLES.
Claims use since 1920.

Reg. No. 364,192. Registered Jan. 24, 1939. HUNTER PACKING COMPANY, East St. Louis, Ill., a corporation of Illinois. Republished by registrant.

Thrifty

FOR DOG FOOD, POTTED MEATS, AND VIENNA SAUSAGE.
Claims use since October 1936.

Reg. No. 369,703. Registered Aug. 1, 1939. THE PICKAWAY CANNING COMPANY, Circleville, Ohio, a corporation of Ohio. Republished by registrant.

Mountain GLEN

FOR CANNED VEGETABLES.
Claims use since Aug. 31, 1938.

Reg. No. 369,951. Registered Aug. 8, 1939. THE WINORE CANNING COMPANY, Circleville, Ohio, a corporation of Ohio. Republished by registrant.

Greaties

FOR CANNED VEGETABLES.
Claims use since Feb. 15, 1939.

Reg. No. 371,060. Registered Sept. 19, 1939. CENTRAL WISCONSIN CANNERIES, Beaver Dam, Wis. Republished by Minnesota Valley Canning Company, Le Sueur, Minn., a corporation of Minnesota.

OUR FANCY

FOR CANNED VEGETABLES.
Claims use since 1908.

Reg. No. 372,482. Registered Oct. 31, 1939. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

PANCHIEF

FOR WHEAT FLOUR.
Claims use since Jan. 12, 1939.

Reg. No. 373,730. Registered Dec. 19, 1939. WESTGATE SEA PRODUCTS CO., San Diego, Calif., a corporation of California. Republished by registrant.

ALLIANCE

FOR CANNED FISH.
Claims use since 1927.

Reg. No. 374,131. Registered Jan. 2, 1940. GROWERS FRUIT COMPANY, INC., Edinburg, Tex. Republished by The H. Rouw Company, Edinburg, Tex., a corporation of Arkansas.

Editex

FOR FRESH CITRUS FRUITS AND FRESH TOMATOES.
Claims use since Sept. 1, 1936.

Reg. No. 374,196. Registered Jan. 2, 1940. PILLSBURY FLOUR MILLS COMPANY, Minneapolis, Minn. Republished by Pillsbury Mills, Inc., Minneapolis, Minn., a corporation of Delaware.

NORTHERNER

FOR FLOUR MADE FROM WHEAT.
Claims use since Aug. 26, 1937.

Reg. No. 375,172. Registered Feb. 13, 1940. F. C. TRIPI CO. INC., also doing business as Indian Head Products Co., Buffalo, N. Y. Republished by Indian Head Products Co., Buffalo, N. Y., a corporation of New York.

INDIAN HEAD

FOR CANNED FRUITS, CANNED VEGETABLES, AND TOMATO JUICE.
Claims use since July 1920.

Reg. No. 381,567. Registered Oct. 1, 1940. WESTGATE SEA PRODUCTS CO., San Diego, Calif., a corporation of California. Republished by registrant.

ALAMO

FOR CANNED FISH.
Claims use since March 1921.

Reg. No. 383,118. Registered Nov. 26, 1940. WESTGATE SEA PRODUCTS CO., San Diego, Calif., a corporation of California. Republished by registrant.

The representation of a fish, the outline of the label, and the words "Snow White" are disclaimed apart from the mark as shown.
FOR CANNED FISH.
Claims use since Aug. 2, 1939.

Reg. No. 384,003. Registered Dec. 31, 1940. COMEX TRADING CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

FOR OLIVE OIL.
Claims use since Oct. 18, 1934.

Reg. No. 387,716. Registered May 27, 1941. ROPER BROS., INC., Winter Garden, Fla., a corporation of Florida. Republished by registrant.

The word "Fancy," the corporate name, and the representations of the label, an orange or tangerine are disclaimed apart from the mark as shown.
FOR FRESH CITRUS FRUITS—NAMELY, ORANGES, TANGERINES, AND GRAPEFRUIT.
Claims use since Nov. 18, 1938.

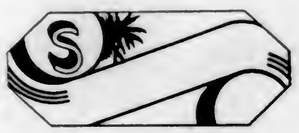
Reg. No. 388,995. Registered July 22, 1941. THE H. ROUW COMPANY, Van Buren, Ark., a corporation of Arkansas. Republished by registrant.

FAMOUS

FOR FRESH FRUITS AND VEGETABLES—NAMELY, STRAWBERRIES, APPLES, ORANGES, TANGERINES, GRAPEFRUIT, LEMONS, PEACHES, GRAPES, TOMATOES, CUCUMBERS, GREEN BEANS, PEPPERS, SWEET POTATOES, SPINACH, CABBAGE, POTATOES, RADISHES, BEETS, CARROTS, TURNIPS, AND CANTALOUPES.
Claims use since June 1, 1925.

Reg. No. 392,583. Registered Jan. 6, 1942. WESTGATE SEA PRODUCTS CO., San Diego, Calif., a corporation of California. Republished by registrant.

BITS-O-SEA



FOR CANNED FISH—NAMELY, CANNED TUNA.
Claims use since July 11, 1940.

Reg. No. 392,650. Registered Jan. 6, 1942. STANFORD FRUIT GROWERS, INC., Lake Alfred, Fla., a corporation of Florida. Republished by registrant.

KING ALBERT

FOR FRESH CITRUS FRUITS—NAMELY, ORANGES, GRAPEFRUIT, TANGERINES, AND LIMES; AND CANNED CITRUS FRUITS.
Claims use since Dec. 1, 1939.

Reg. No. 393,393. Registered Feb. 10, 1942. STANFORD FRUIT GROWERS, INC., Lake Alfred, Fla., a corporation of Florida. Republished by registrant.

FOR FRESH CITRUS FRUITS—NAMELY, ORANGES, GRAPEFRUIT, TANGERINES, AND LIMES.
Claims use since Nov. 1, 1939.

Reg. No. 395,215. Registered May 19, 1942. WESTGATE SEA PRODUCTS CO., San Diego, Calif., a corporation of California. Republished by registrant.

The representation of a fish is disclaimed apart from the mark as shown.
FOR CANNED FISH.
Claims use since Oct. 18, 1924.

Reg. No. 395,769. Registered June 9, 1942. STANFORD FRUIT GROWERS, INC., Lake Alfred, Fla., a corporation of Florida. Republished by registrant.

FOR FRESH CITRUS FRUITS.
Claims use since Sept. 1, 1939.

Reg. No. 395,892. Registered June 16, 1942. STANFORD FRUIT GROWERS, INC, Lake Alfred, Fla., a corporation of Florida. Republished by registrant.

FOR FRESH CITRUS FRUITS.
Claims use since Sept. 1, 1939.

Reg. No. 398,634. Registered Nov. 10, 1942. VONHIFF-DRAYER COMPANY, Baltimore, Md., a corporation of Maryland. Republished by registrant.

Miss America

The word "America" is disclaimed apart from the mark as shown.
FOR CANDIES.
Claims use since Mar. 1, 1920.

Reg. No. 399,679. Registered Jan. 26, 1943. GEORGE M. VAN KIRK, Davie, Fla. Republished by registrant.

FOR CITRUS FRUIT.
Claims use since Feb. 9, 1942.

Reg. No. 406,700. Registered Apr. 18, 1944. JOHN C. MORGAN CO., INC., Traverse City, Mich., a corporation of Michigan. Republished by registrant.

"Morgan"

FOR APPLE JUICE.
Claims use since September 1937.

Reg. No. 421,428. Registered June 4, 1946. F. C. TRIPI COMPANY, INC., doing business as Indian Head Products Co., Buffalo, N. Y. Republished by Indian Head Products Co. Inc., Buffalo, N. Y., a corporation of New York.

INDIAN HEAD

FOR CANNED FRUITS, CANNED VEGETABLES, CANNED GRAPE-FRUIT JUICE, CANNED ORANGE JUICE, CANNED PINEAPPLE JUICE, CANNED TOMATO JUICE, CANNED ORANGE AND GRAPEFRUIT JUICE, CANNED FISH, TOMATO PASTE, COFFEE, TEA, PEANUT BUTTER, AND CATSUP.
Claims use since July 1920.

CLASS 47

WINES

Reg. No. 311,754. Registered Apr. 3, 1934. B. C. COMPANY, LTD., New York, N. Y. Republished by Gordon-O'Neill Company, Jersey City, N. J., a firm.

B C

FOR WINES.
Claims use since Nov. 17, 1933.

CLASS 48

MALT BEVERAGES AND LIQUORS

Reg. No. 415,068. Registered July 10, 1945. FIRST CARAMEL MALTING CORPORATION, Paterson, N. J., a corporation of New Jersey. Republished by registrant.

CARA-LITE

The word "Lite" is disclaimed apart from the mark as shown.
FOR LIGHT MALT USED AS AN AID IN MAKING BEER.
Claims use since September 1944.

CLASS 49

DISTILLED ALCOHOLIC LIQUORS

Reg. No. 310,695. Registered Mar. 6, 1934. UNITED DISTILLERS LIMITED, Vancouver, British Columbia, Canada. Republished by United Distillers (of Canada) Ltd., Vancouver, British Columbia, Canada, a corporation of the Dominion of Canada.

YankeeDoodle

FOR WHISKEY, GIN AND RUM.
Claims use since Feb. 1, 1932.

Reg. No. 350,969. Registered Oct. 12, 1937. B. C. COMPANY LTD., New York, N. Y., assignor to Gordon O'Neill Co., Inc. Republished by Gordon-O'Neill Company, Jersey City, N. J., a firm.

FOR WHISKEY, GIN, RUM, BRANDY, COGNAC AND ALCOHOLIC CORDIALS.
Claims use since July 7, 1936.

Reg. No. 362,754. Registered Nov. 29, 1938. CHARTREUSE CORPORATION, New York, N. Y., a corporation of New York. Republished by registrant.

CHARTREUSE

FOR LIQUEURS.
Claims use since Jan. 1, 1870.

Reg. No. 418,251. Registered Dec. 11, 1945. LE SAGE COMPANY, Dallas, Tex. Republished by Le Sage Company, Dallas, Tex., a corporation of Texas.

OLD KICKAPOO

The word "Old" is disclaimed apart from the mark as shown.
FOR WHISKEY.
Claims use since Mar. 8, 1945.

CLASS 50

MERCHANDISE NOT OTHERWISE CLASSIFIED

Reg. No. 95,516. Registered Feb. 24, 1914. BOUTWELL MILNE & VARNUM CO., Barre, Vt. Republished by Rock of Ages Corporation, Barre, Vt., a corporation of Vermont.

ROCK OF AGES

FOR GRANITE BLOCKS AND MONUMENTAL STONES.

Claims use since Aug. 1, 1913.

Reg. No. 197,643. Registered Apr. 21, 1925. THE BURKHARDT COMPANY, INC., Detroit, Mich. Republished by The Burkhardt Company, Detroit, Mich., a corporation of Michigan.

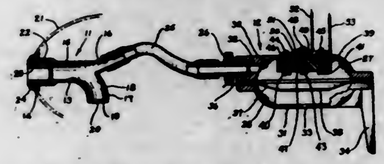
BurkArt

FOR IMITATION LEATHER.

Claims use since about January 1923.

REISSUES

OCTOBER 5, 1948



23,042

STALL WARNING DEVICE

Ralph H. Upson, Minneapolis, Minn.

Original No. 2,406,719, dated August 27, 1946, Serial No. 513,241, December 7, 1943. Application for reissue August 25, 1947, Serial No. 770,362

12 Claims. (Cl. 200—83)

1. In an airplane angle-of-attack indicator, a conduit having an open end adapted for engagement with the leading edge of an airplane wing, a rigid casing communicating with the conduit, a flexible slack impervious diaphragm supported by the casing and dividing the casing into separate compartments, means carried by the casing for actuating a signal, and means carried by the diaphragm for operating said actuating means, said diaphragm being dependent upon its gravitational weight to maintain the means carried by the diaphragm normally out of actuating relationship, the communication between said casing and conduit being directed to one compartment whereby a reduced air pressure at the open end of said conduit functions to actuate the diaphragm.

23,043

MANUFACTURE OF HYDRATED POLYSILICATE

Walter F. Wegst, Wyandotte, Mich., and John H. Wills, Chester, Pa., assignors to Philadelphia Quartz Company, Philadelphia, Pa., a corporation of Pennsylvania

No Drawing. Original No. 2,179,806, dated November 14, 1939, Serial No. 111,556, November 18, 1936. Application for reissue September 25, 1945, Serial No. 618,591

8 Claims. (Cl. 23—110)

1. A crystalline product composed of fine crystals whose elongation is γ, extinction parallel and wherein α equals $1.463 \pm .003$, and γ equals $1.483 \pm .003$; said crystals having a molecular ratio of Na_2O to SiO_2 of from 1:4.3 to 1:4.5 and containing approximately 2 to 4 molecules of water.

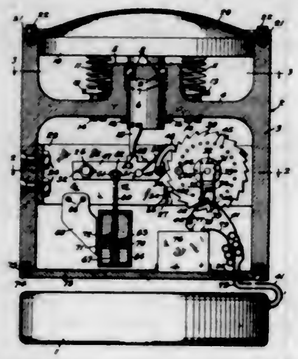
PATENTS

GRANTED OCTOBER 5, 1948

2,450,405
MINERAL OIL COMPOSITION AND IMPROVING AGENT THEREOF
Henry G. Berger, Thomas T. Noland, and Everett W. Fuller, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application December 23, 1943, Serial No. 515,418
13 Claims. (Cl. 252—46.6)

1. An improved mineral oil composition comprising a mineral oil fraction having in admixture therewith a minor proportion, sufficient to enhance the stability of said mineral oil fraction, of a stable, oil-soluble, phosphorus- and sulfur-containing reaction product obtained by reaction of phosphorus pentasulfide and a thermal cycle stock at a temperature between about 125° C. and about 200° C. for a relatively short reaction time whereupon a stable, oil-soluble product is obtained, said cycle stock being characterized by an olefin content of from about 3 per cent to about 7 per cent and an aromatic content of from about 40 per cent to about 60 per cent, and the said phosphorus pentasulfide representing from about 1 per cent to about 8 per cent by weight of the said cycle stock.

2,450,406
PROCESS FOR OBTAINING THIOSEMICARBAZIDE
Louis L. Bambas, Grosse Pointe Woods, Mich., assignor to Parke, Davis & Company, Detroit, Mich., a corporation of Michigan
No Drawing. Application November 5, 1945, Serial No. 626,909
8 Claims. (Cl. 260—552)



1. Process for obtaining thiosemicarbazide of the formula,

$$NH_2NH-\overset{S}{\overset{\|}{C}}-NH_2$$

which comprises reacting neutral hydrazine sulfate with an alkali metal thiocyanate in aqueous solution, removing the alkali metal sulfate so formed, rearranging the intermediate thiocyanic acid salt of hydrazine in admixture with a solvent selected from the class consisting of water-miscible alcohols, lower alkoxy substituted water-miscible alcohols and water-miscible ethers until the residual solution contains less than about 15% of water, heating said residual solution to rearrange said intermediate thiocyanic acid salt of hydrazine, cooling the solution and separating the crystalline thiosemicarbazide from said solution.

2,450,407
MINE
James E. Bartgis, Jr., Frederick, Md.
Application July 30, 1943, Serial No. 496,843
9 Claims. (Cl. 102—8)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

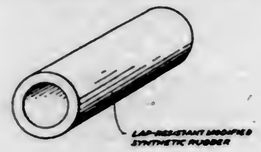
3. A land mine comprising a depressible member adapted to be directly depressed by the pressure engendered by the passage of a vehicle thereover and returning to an undepressed position after depression thereof, an explosive; and means mechanically and directly actuated from the motion of said depressible member, for detonating

said explosive upon the occurrence of a predetermined plurality of depressions of said depressible member.

2,450,408
TEXTILE FIBER DRAFTING ELEMENT
John W. Baymiller, Manheim Township, Lancaster County, Pa., assignor to Armstrong Cork Company, Lancaster, Pa., a corporation of Pennsylvania
Application September 16, 1943, Serial No. 502,553
6 Claims. (Cl. 19—131)

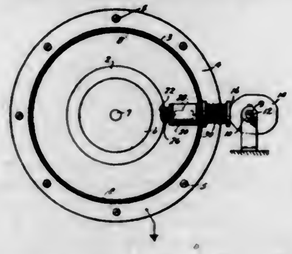
1. A lap-resistant textile fiber drafting element having a fiber working surface comprising the reaction product of a free halogen and a vulcanized synthetic polymerization product of an open-chain aliphatic conjugated diene, said polymerization product having carbon to carbon double bonds, said fiber working surface being characterized by its lap resistance.

2,450,409
ROLL COVER FOR TEXTILE FIBER DRAFTING
John W. Baymiller, Manheim Township, Lancaster County, Pa., assignor to Armstrong Cork Company, Lancaster, Pa., a corporation of Pennsylvania
Application December 11, 1945, Serial No. 634,230
19 Claims. (Cl. 19—143)



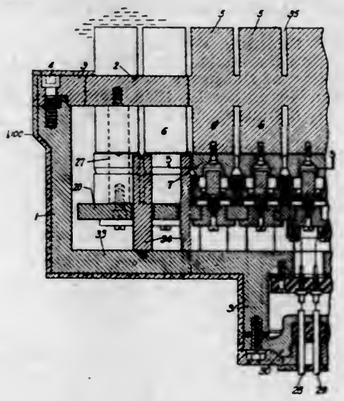
1. A lap-resistant roll cover for textile fiber drafting having a working surface made of a vulcanized rubber-like butadiene acrylonitrile copolymer, having uniformly dispersed therein as the

dispersed phase between about 40 and 60 parts of glue to 100 parts of the butadiene acrylonitrile



copolymer, whereby the roll cover is rendered lap-resistant.

2,450,410
ROLL COVER FOR TEXTILE FIBER DRAFTING
John W. Baymiller, Manheim Township, Lancaster County, Pa., assignor to Armstrong Cork Company, Lancaster, Pa., a corporation of Pennsylvania
Application February 27, 1946, Serial No. 650,609
19 Claims. (Cl. 19—143)

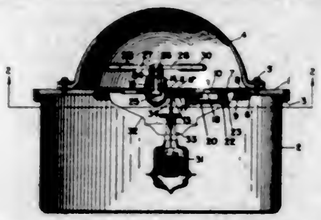


1. A lap-resistant roll cover for textile fiber drafting having a working surface made of a vulcanized oil-resistant resilient non-thermoplastic somewhat water vapor permeable synthetic rubber which is normally non-resistant to lapping up, having uniformly dispersed therein as the dispersed phase an effective amount of the reaction product resulting from the digestion in water dispersion of a protein and a water-ionizable modifying agent which does not deleteriously affect the protein or the synthetic rubber and combines with the protein to produce a compatible water-soluble digestion product which is readily dispersible in the synthetic rubber, whereby the roll cover is rendered lap-resistant.

2,450,411
PLATE TRIMMER CONTROL
Albert O. Behnke, Dayton, Ohio, and Charles Kriegel, Wharton, Tex.
Application December 5, 1945, Serial No. 633,033
6 Claims. (Cl. 315—3)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In combination with an air cooled vacuum tube having plate cooling fins which tend to resonate at a frequency in the band of operating frequencies of the tube, a device for permitting normal operation of said tube throughout its operating band, said device comprising a grounded reactance means movably mounted adjacent said cooling fins to selectively connect said cooling fins to ground through said reactance means to shift the resonant frequency of said cooling fins thereby enabling said tube to operate through its entire frequency band.

2,450,412
DEVICE FOR TRANSMITTING AND RECEIVING COMPRESSIONAL ENERGY
Hugo Benioff, Pasadena, Calif., assignor, by mesne assignments, to Submarine Signal Company, Boston, Mass., a corporation of Delaware
Application November 20, 1942, Serial No. 466,535
8 Claims. (Cl. 177—386)

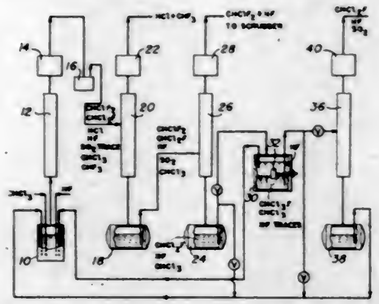


1. A device for transmitting and receiving compressional energy comprising a casing having a radiating member at one side thereof with the external surface in acoustic relationship with the sound-propagating medium and the interior surface shielded therefrom, said radiating member comprising a heavy plate with elements aligned and projecting at right angles to the surface of the plate and forming longitudinal resonant vibratable elements in which the plate contains the nodal plane, and a second resonant vibrator for translating acoustic energy into electrical energy, or vice versa, attached at one end of said first resonant vibratable element, said second resonant vibrating element comprising a longitudinal resonant magnetostrictive shell attached at the end of said first vibrating element, a plate member supported from said radiating member, a permanent magnet positioned within said magnetostrictive shell and an energizing coil surrounding said shell and means suspended by said plate supporting both said permanent magnet and said coil.

2,450,413
SPARK TRANSMITTER
Hugo Benioff, Pasadena, Calif., assignor, by mesne assignments, to Submarine Signal Company, Boston, Mass., a corporation of Delaware
Application February 7, 1946, Serial No. 646,080
7 Claims. (Cl. 250—17)

1. An ultra high frequency spark transmitter comprising an oscillatory circuit having a pair

of opposed plates with discharge electrodes opposed to one another and an antenna system having an input loop one arm of which has a portion adjacent the discharge electrodes.



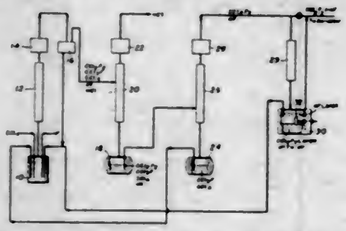
2,450,414

DISTILLATION PROCESS FOR SEPARATING PRODUCTS OF CHLOROFORM FLUORINATION

Anthony F. Benning, Woodstown, N. J., assignor to Kinetic Chemicals, Inc., Wilmington, Del., a corporation of Delaware

Application November 14, 1946, Serial No. 709,879
6 Claims. (Cl. 202—51)

4. The process of separating valuable components from a reaction mixture comprising HCl, HF, $CHClF_2$ and $CHCl_2F$, of the character of that obtained by the reaction of HF on $CHCl_3$, which comprises the steps of subjecting the reaction mixture to anhydrous fractional distillation under pressures of about 100 pounds per square inch gauge and at about −50° C. to about −40° C. to distill off the HCl as substantially pure anhydrous hydrogen chloride, then subjecting the remaining mixture to a further anhydrous fractional distillation under pressures of about 50 pounds per square inch gauge and at about −5° C. to about 0° C. to distill off a mixture comprising substantially the monochlorodifluoromethane and part of the hydrogen fluoride.



2,450,415

DISTILLATION PROCESS FOR SEPARATING PRODUCTS OF CARBON TETRACHLORIDE FLUORINATION

Anthony F. Benning, Woodstown, N. J., assignor to Kinetic Chemicals, Inc., Wilmington, Del., a corporation of Delaware

Application November 19, 1946, Serial No. 710,890
9 Claims. (Cl. 202—51)

1. The process of separating valuable components from a reaction mixture comprising HCl, HF, CCl_2F_2 and CCl_3F, of the character of that obtained by the reaction of HF on CCl_4, which comprises the steps of subjecting the reaction mixture to anhydrous fractional distillation under pressures of from about 40 to about 200 pounds per square inch gauge and at temperatures of from about −63° C. to about −20° C., adjusted to the pressures to distill off the HCl as substantially pure anhydrous hydrogen chloride, then subjecting the remaining mixture to a further anhydrous fractional distillation under pressures of from about 0 to about 100 pounds per square inch gauge and at temperatures of from about

−36° C. to about +32° C., adjusted to the pressures to distill off a mixture comprising substantially the dichlorodifluoromethane and the hydrogen fluoride, condensing the distilled mixture, settling the condensed mixture until it forms a layer of substantially anhydrous hydrogen fluoride containing a minor proportion of dissolved dichlorodifluoromethane and a layer of dichlorodifluoromethane containing a small proportion of dissolved HF, and then separating the layers.

2,450,416

PROCESS FOR POLYMERIZING BUTADIENE IN AQUEOUS EMULSION IN THE PRESENCE OF AN ALKALI METAL SALT OF HYDROXYTETRAHYDROABIETIC ACID

Joseph N. Borglin, Wilmington, Del., assignor to Hercules Powder Company, Wilmington, Del., a corporation of Delaware

No Drawing. Application June 17, 1944, Serial No. 540,888
7 Claims. (Cl. 260—27)

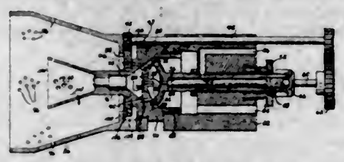
1. The process which comprises polymerizing in aqueous emulsion a conjugated butadiene hydrocarbon in the presence of an alkali metal salt of hydroxytetrahydroabietic acid.

2,450,417

UNIVERSAL RAY OR BEAM REFLECTING DEVICE

Romeo A. Bossi, Newton Center, Mass.

Application May 19, 1944, Serial No. 536,400
23 Claims. (Cl. 9—8)



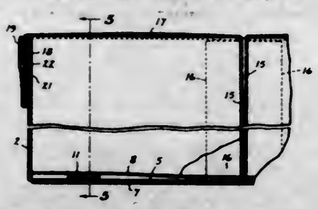
8. A maritime self-positioning reflecting buoy comprising a group of similar reentrant trihedral reflecting units with their inner apices symmetrically positioned with respect to a common center and having floats at all of their remote apices forming a triangular base support irrespective of the rotative position of the reflector with respect to said center.

2,450,418

OIL BURNER

Delphis C. Breault, Lowell, Mass.

Application July 13, 1943, Serial No. 494,484
9 Claims. (Cl. 299—140)



1. A process of atomizing liquid fuel which comprises introducing a stream of liquid into a closed chamber, introducing into the chamber from the opposite direction a plurality of jets of gas arranged about a common axis coincident with the stream of liquid, and introducing a central jet of gas in direct opposition to the stream of liquid whereby the gas and liquid impinge and the liquid is atomized, and passing the atomized liquid from the chamber through the outer gas jets.

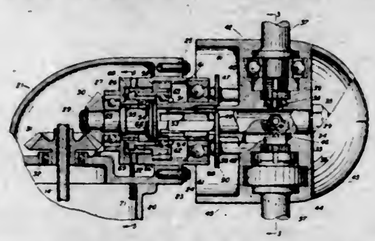
2,450,419

COMPARTMENTED CONTAINER

John H. Cassidy and Reed M. Grunden, Sandusky, Ohio, assignors to The Hinde & Dauch Paper Company, Sandusky, Ohio, a corporation of Ohio

Application May 18, 1943, Serial No. 487,472
6 Claims. (Cl. 229—15)

1. A container having side and end walls, a pair of supporting flaps hinged to the bottom edge of each end wall and adapted to occupy horizontal positions between the lower edges of the side walls with the flaps of each pair adjacent opposite side walls, a foldable bottom extension hinged to each side wall and having an interior flap folded against the top faces of the adjacent supporting flaps with its free edge contiguous to the side wall to form a section of the container bottom, a pair of interior flaps hinged to the top edge of each side wall and adapted to be folded against the interior of the side wall with their free edges engaging the top face of an interior bottom flap adjacent its free edge, and a partition having opposite side edge portions disposed between the interior flaps of opposite side walls, said partition having anchoring flanges at its opposite side edges underlying interior side wall flaps.



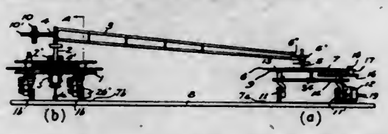
2,450,420

VARIABLE PITCH IMPELLER

Cranmore W. Cline, United States Navy, Jacksonville, Fla.

Application September 13, 1946, Serial No. 696,970
2 Claims. (Cl. 170—163)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

2. A variable pitch impeller including, a rotatable shaft, a hub mounted on the shaft and having a plurality of radial sockets, a blade having its root rotatably mounted in each socket, gear teeth carried by the root of each blade, gear racks reciprocably mounted in the hub in meshing engagement with the gear teeth for adjusting the pitch of the blades, a member slidably mounted on said shaft and fixed against rotation, the member having connection with the gear racks for reciprocating the same, a worm gear rotatably mounted on said shaft and having screw-threaded



connection with said member, a worm drive for imparting rotation to the worm gear so as to slide said member and actuate said gear racks, a control mechanism having a pair of rotatable drums, the drums having operative connection with said shaft and worm drive, respectively, and idler means adapted to operatively connect the rollers whereby rotation of said shaft is transmitted to said worm drive for effecting adjustment of the blade pitch.

2,450,421

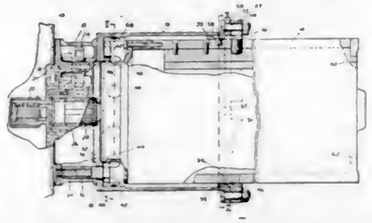
APPARATUS FOR SIMULATING WIND EFFECTS IN AVIATION GROUND TRAINERS

Carl J. Crane, Dayton, Ohio

Application May 8, 1940, Serial No. 334,002
10 Claims. (Cl. 346—8)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In combination, a supporting surface, a carriage adapted to be propelled over said surface at a velocity proportional to the assumed air speed of an aircraft and directionally controlled in accordance with the instant heading of an associated ground trainer, a tracer device supported by said carriage and movable therewith, a second carriage movable over said surface at a velocity proportional to the velocity of an assumed wind, means for steering said second carraige in the direction of said assumed wind, and a record chart carried by said second carriage and movable therewith, said record chart being adapted to have a record impressed thereon by said tracing device representing the ground track of said assumed aircraft flight.

2,450,422



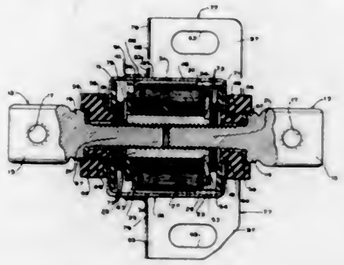
DYNAMOELECTRIC MACHINE MOUNT

William J. Elks, United States Navy

Application January 12, 1945, Serial No. 572,504
8 Claims. (Cl. 171—252)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In the combination of a driving element with a driven element removably coupled thereto;

means associated with one of said elements and cooperable with the other element to insure alignment of said other element with said one element upon assembly of said other element with said one element, said means including a rigidly fixed frame peripherally spaced from said removable



element and having axial and radial aligning surfaces cooperating with corresponding axial and radial surfaces on lugs at spaced intervals about the middle of said removable element, and cooperating peripheral surfaces between said frame and the inner end of said removable element.

2,450,423

TERMINAL STRUCTURE

John W. Fraser, Detroit, Mich., and Louis Gordon, Eatontown, N. J.

Application August 1, 1944, Serial No. 547,622
4 Claims. (Cl. 174—77)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

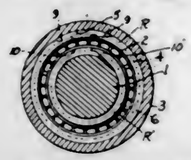
1. A casing-terminal structure for a capacitor comprising a metallic housing surrounding said capacitor, said housing including two cylindrical housing caps provided with non-circular openings at their outer ends, said caps being of like diameter and facing each other, and said caps and openings being coaxial; a cylindrical cup of an outside diameter to form a snug slidable fit within both housing caps; an electrical terminal extending through each of said openings and provided with non-circular shoulders; means to lock said terminals against relative longitudinal movement; a resilient gasket means interposed between the outer end of each of the housing caps and the associated terminal to make a moistureproof seal between the said housing cap and the said terminal, each of said gasket means being provided with a non-circular projection adapted to engage the non-circular opening in one of the housing caps aforesaid and with a non-circular recess adapted to engage the non-circular shoulders on one of the electrical terminals aforesaid.

2,450,424

MOLDABLE REACTION PRODUCTS OF SULFUR DIOXIDE AND OLEFINS

Frederick E. Frey, Bartlesville, Okla., assignor to Phillips Petroleum Company, a corporation of Delaware

No Drawing. Application February 10, 1942, Serial No. 430,294
5 Claims. (Cl. 260—94.5)



1. The process of producing a molded product comprising a reaction product of sulfur dioxide and 2-butene which comprises forming a resinous reaction product of approximately equimolecular proportions of 2-butene and sulfur dioxide containing sufficient chemically uncombined sulfur dioxide to yield a substantially plastic mass and containing some of the 2-butene in unreacted condition, intimately admixing the resinous product with the uncombined sulfur dioxide and unreacted 2-butene and a catalyst consisting of lithium nitrate for promoting the reaction of 2-butene and sulfur dioxide, and thereafter subjecting the resulting mixture to molding conditions effecting the setting thereof.

2,450,425

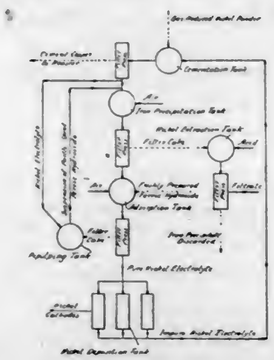
RETAINING RING

Frank D. Frisby, St. Louis, Mo., assignor to Ramsey Accessories Manufacturing Corporation, St. Louis, Mo., a corporation of Missouri

Application May 3, 1945, Serial No. 591,669
7 Claims. (Cl. 85—8.5)

7. A retaining ring comprising two similar annular coils formed from a continuous winding, said coils lying in adjacent parallel planes in intimate relation and connected by an offset portion, the ends of the coils being in spaced relation and lying within the outer and inner margins of the ring, and having suitable recessed formations to permit reception of a tool.

2,450,426



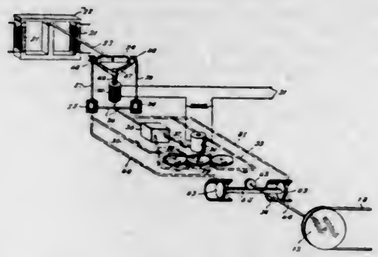
ELECTROLYTIC REFINING OF NICKEL

Anton Martin Gronningsaeter, New York, N. Y., and Bertin G. Hommeren, Kristiansand S., Norway, assignors to Falconbridge Nickel Mines, Limited, Toronto, Ontario, Canada, a corporation of Canada

Application May 19, 1944, Serial No. 536,402
2 Claims. (Cl. 204—112)

1. In the electrolytic refining of nickel, in which the impure nickel electrolyte, containing a limited amount of iron in solution, coming from the electrolytic cell is subjected to cementation and neutralization with nickel until the electrolyte is only slightly acid to remove the greater part of such impurities as copper and arsenic; the solids are separated from the electrolyte; the electrolyte is aerated to precipitate practically all of the iron as ferric hydroxide, which carries with it a substantial amount of the impurities lead, arsenic and copper; the electrolyte before it is aerated contains substantially no more iron in solution than can be precipitated solely by the aeration; and the acidity of the electrolyte is insufficient to dissolve the ferric hydroxide so formed: the

improvement which comprises subjecting the purified nickel electrolyte to the additional purifying action of ferric hydroxide especially prepared outside of the electrolyte by wet precipitation, the ferric hydroxide being introduced while still wet from the precipitation into the electrolyte in amount sufficient to adsorb thereon a sub-



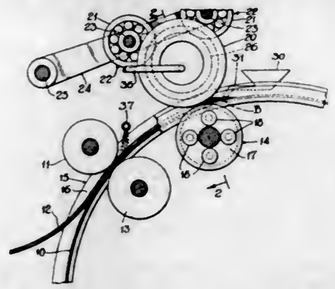
stantial amount of the remaining impurities lead, arsenic and copper, the acidity of the electrolyte being insufficient to dissolve the ferric hydroxide, separating the ferric hydroxide and its adsorbed residual impurities from the electrolyte, and subjecting the electrolyte thus purified to electrolysis to produce nickel cathodes of high purity.

2,450,427

SERVO UNITS FOR AUTOMATIC PILOTS

Percy Halpert, Hempstead, N. Y., assignor to The Sperry Corporation, a corporation of Delaware

Original application May 15, 1942, Serial No. 443,146, now Patent No. 2,392,381, January 8, 1946. Divided and this application December 18, 1945, Serial No. 635,710
5 Claims. (Cl. 60—52)



5. An automatic pilot for aircraft having a fluid servo unit supplied by a motor driven, continuously operating, pump and operated through two fluid circuits controlled by differentially movable valves mounted on a rocker arm, a torque motor for moving the valves by way of the rocker arm from a central position to unbalance the fluid circuits, automatic means for controlling said torque motor, a normally ineffective spring for positively centralizing the rocker arm of the valves, a motor circuit, and a solenoid, situated in said motor circuit, operable to render said spring effective when said circuit is opened.

2,450,428

STRIP FORMING APPARATUS

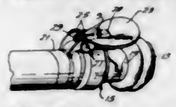
Clarence W. Hazelett, Greenwich, Conn.

Application March 23, 1944, Serial No. 527,704
13 Claims. (Cl. 22—57.3)

3. In a combination of the class described, a pair of cooling members having cooling surfaces, means mounting said cooling members for movement whereby said surfaces approach one another for the passage of metal therebetween to form continuous metal strip, said metal moving from a bath of metal contained by said surfaces, the ends of said cooling members tapering upwardly and toward one another while remaining out of contact so that the cooling surfaces thereof contain the side ends of the bath of metal through said upward tapering rather than by end dams, and with the edges of the side ends of the bath of metal and the strip out of contact with an end cooling or containing surface, the said cooling surfaces including said upwardly tapering ends functioning as complementary opposed cooling surfaces for the opposed upper and lower surfaces of the metal strip passing therebetween from said bath as well as the containing surfaces for said bath.

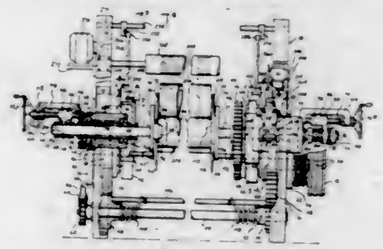
2,450,429

ELECTRICAL CORD



George E. Henning, Baltimore, Md., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York

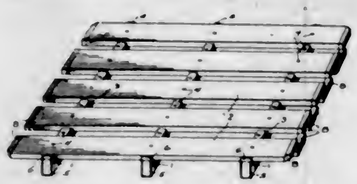
Application August 4, 1944, Serial No. 548,099
7 Claims. (Cl. 174—113)



7. An electrical cord, which comprises a plurality of fine cotton threads stranded together, each thread extending in the same direction as and having substantially the same lay as the other threads, a conductor enclosed in a covering of insulated material served around the stay cord in the same direction as and with approximately the same lay as that of the threads, a second conductor enclosed in a second covering of insulating material served around the stay cord parallel with the first-mentioned conductor and covering and in the same direction as and with approximately the same lay as that of the threads, said lays of the coverings and the threads serving to prevent cutting of the coverings by the threads, and a jacket of weatherproofing material enclosing said coverings and said stay cord.

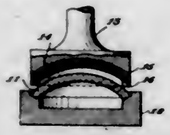
2,450,430
OXYGEN CONNECTION LOCKING MEMBER
James L. Hight, Dayton, Ohio
Application July 3, 1946, Serial No. 681,276
4 Claims. (Cl. 285—173)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a standard low pressure oxygen mask, a hose connection comprising a male connection member attached to a mask hose and a female mating member attached to the end of the supply hose, a spring pressed latch provided on said female mating member which is pivoted at one side thereof and provided with extending arms which are pivotally mounted on a pin forming an aperture bounded by said latch, said latch arms, and said pin, a generally U-shaped locking member secured to said mask hose, a projecting element on said locking member adapted to fit in said latch aperture, a bearing surface on said latch which bears against said projecting element of said locking member under the action of said latch spring whereby said connection members are positively locked in a coupled position.



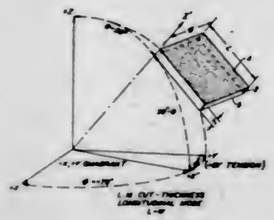
2,450,431
BEAMING OR WARPING MACHINE
Fritz Lambach, Tenafly, N. J.
Application June 17, 1946, Serial No. 677,297
23 Claims. (Cl. 28—32)

1. A beaming or warping machine comprising: a drive for rotating a beam, a support swingably mounted on the machine, lifting means associated with said swingable support for lifting same from a lower beam receiving position into an upper operative position, a pair of spaced beam engaging means rotatably arranged in said swingable support, each of said beam engaging means being shiftable in the direction of the longitudinal axis of a beam placed between same, adjusting means associated with each of said beam engaging means for setting same in engagement with such a beam, and coupling means associated with at least one of said beam engaging means for coupling same with said drive when the support is in its upper operative position.



2,450,432
PALLET
Harry Lehrman, Brooklyn, N. Y.
Application September 26, 1944, Serial No. 555,861
5 Claims. (Cl. 248—120)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A pallet comprising a plurality of wooden stringers formed with transverse notches in at least one face thereof, the notches at the ends of the series extending to the ends of the stringers, metal collars encircling and binding the ends of the stringers, a flange extending from each

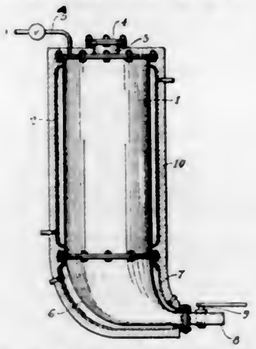


collar to form one wall of the notch at the respective end of the stringer, a series of planks extending transversely of the stringers and seated in the series of notches, and means for securing the planks within the notches.

2,450,433
LENS POLISHING
Frederick G. Leeman, Ann Arbor, Mich., assignor to Argus, Incorporated, Ann Arbor, Mich., a corporation of Michigan
Application December 2, 1944, Serial No. 566,306
2 Claims. (Cl. 51—305)

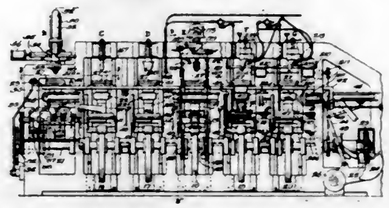
1. An article of manufacture comprising a body of pitch or like solidified binder material containing a uniform dispersal of cerium oxide particles.

2,450,434
PIEZOELECTRIC CRYSTAL APPARATUS
Warren P. Mason, West Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application April 4, 1946, Serial No. 659,469
15 Claims. (Cl. 171—327)



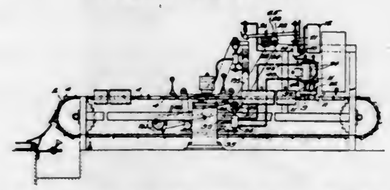
1. Crystal apparatus comprising an ethylene diamine tartrate crystal element of high electromechanical coupling having major faces, the normal to said major faces lying in a plane which is disposed substantially 70 degrees from the +X axis and 20 degrees from the +Y axis as measured in the XY plane, said normal being inclined at an angle of substantially 50 degrees with respect to the +Z axis.

2,450,435
POLYMERS OF VINYL CHLORIDE PLASTICIZED WITH A DIOCTYL PHTHALATE AND LIQUID PETROLATUM
Addeline J. McGillicuddy, Spokane, Wash., assignor of one-fifth to Bennett H. Levenson, Washington, D. C., and two-fifths to Frank L. Towne or Blanche Towne, his wife, Spokane, Wash.
No Drawing. Application April 6, 1944, Serial No. 529,813
6 Claims. (Cl. 260—31.8)



4. A resinous composition comprising a polymer of vinyl chloride and a plasticizer mixture consisting of a dioctyl phthalate and liquid petrolatum, the content of said liquid petrolatum being in the range of 10% to 30% of said plasticizer mixture.

2,450,436
MANUFACTURE OF CELLULAR THERMOPLASTIC PRODUCTS
Otis Ray McIntire, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Delaware
Application July 26, 1947, Serial No. 763,989
12 Claims. (Cl. 18—48)

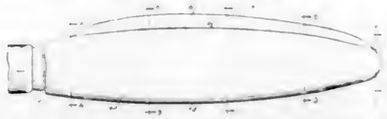


1. In a method for the production of a substantially uniform solid cellular thermoplastic article which is composed of individual closed cells having thin walls of a solid thermoplastic polymer, the smallest linear dimension of which article is at least 2 inches, the steps which consist in charging a vessel with a solid thermoplastic polymer, also introducing into the vessel a normally gaseous agent capable of being dissolved by the polymer so that the polymer and the normally gaseous agent are in contact with one another, subjecting the mixture to superatmospheric pressure while at a temperature within the range of from room temperature to below the critical temperature of said agent for a time sufficient to form a gel of the polymer, which gel is capable of flowing, the normally gaseous agent having been introduced and dissolved in the polymer gel in amount such as to be vaporized substantially completely upon release of the pressure with resultant swelling and cooling, due principally to the heat of vaporization of said agent, of the polymer to form a cellular mass which, when formed, is at a temperature within the range of between —30° C. and ten degrees above the heat distortion temperature of the polymer, and opening an outlet, having an aperture of minimum cross sectional area corresponding to that of a circle of at least three-fourths inch diameter, near the bottom of the vessel so as to cause the gel to flow from the vessel and form the cellular product.

2,450,437
METHOD AND APPARATUS FOR MANUFACTURING POTTERY WARE
William J. Miller, Swissvale, Pa., assignor to Miller Pottery Engineering Company, Swissvale, Pa., a corporation of Pennsylvania
Application May 16, 1942, Serial No. 443,226
36 Claims. (Cl. 25—22)

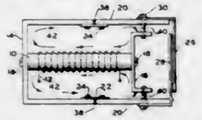
14. In combination, means for advancing pugs of clay to a severing zone, a severing means for cutting off slices or charges of clay therefrom and means operable on the lead end face of the pug to puddle and smooth the end of the pug being severed.

2,450,438
APPARATUS FOR APPLYING LIQUID SIZE TO POTTERY WARE
William J. Miller, Swissvale, Pa., assignor to Miller Pottery Engineering Company, Swissvale, Pa., a corporation of Pennsylvania
Original application August 21, 1941, Serial No. 407,733. Divided and this application December 10, 1942, Serial No. 468,514
2 Claims. (Cl. 91—12)



1. Apparatus for applying decalcomania size to fired potteryware and the like comprising, in combination, a ware support, a size applying member thereabove, means for moving said support and said member relative to one another to effect a size applying operation, a source of size supply, a pump having a piston for delivering size from the source of supply to said member, means for varying the stroke of the pump piston to thereby vary the amount of size delivered by the pump, and a drive for co-ordinating the operation of said first named means and said pump.

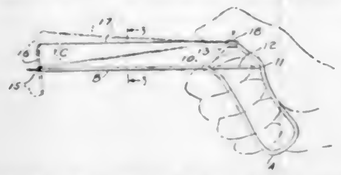
2,450,439
METHOD OF CLEANING DRIED ZIRCONIA GEL PRODUCTION EQUIPMENT
Thomas H. Milliken, Jr., Rose Valley, Pa., assignor to Houdry Process Corporation, Wilmington, Del., a corporation of Delaware
No Drawing. Application June 26, 1945, Serial No. 601,722
8 Claims. (Cl. 134—13)



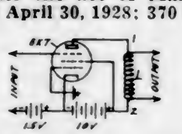
1. The method of cleaning equipment which has been employed in contact with a zirconia gel during the drying of said gel which comprises washing said equipment with a caustic alkali solution containing at least one gram of dissolved silica therein per 100 cc. of solution at a temperature below 70° C.

2,450,440
PROPELLER BLADE CONSTRUCTION
Roscoe H. Mills, Dayton, Ohio
Application December 19, 1944, Serial No. 568,914
3 Claims. (Cl. 170—159)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a basic propeller blade construction having the cross-sections thereof of airfoil section terminating in a trailing edge, means for increasing the blade area and altering the pitch distribution, comprising a thin rigid metal plate secured to the basic blade such that the plate extends beyond the said basic blade trailing edge to increase the blade area, and the said plate extending radially over at least the working section of the blade, and the plane of the plate at any point being warped angularly away from the plane containing the extended mean camber line curves of the blade sections at that point, the angle of warpage changing progressively from the shank end of the blade to the tip to thereby alter the aerodynamic properties of the sections and to alter the distribution of pitch from that of the basic blade.



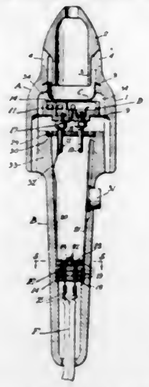
2,450,441
NONPOSITIONAL LINE SIGNAL
Jay G. Mitchell, Eatontown, N. J., assignor to the United States of America as represented by the Secretary of War
Application October 2, 1945, Serial No. 619,913
4 Claims. (Cl. 177—329)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



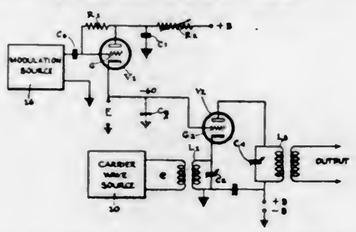
1. A non-positional signal device comprising electromagnet means, armature means actuated upon the energization of said electromagnet means by a signal current and indicating means comprising a pair of shutters mounted in constant parallel relationship on said armature means, at least one of said shutters being actuatable by said armature means.

2,450,442
CARD SEPARATING DEVICE
Carl R. Nyman, Washington, D. C.
Application February 12, 1945, Serial No. 577,395
4 Claims. (Cl. 129—16.1)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

4. A device for sorting or classifying perforated record cards and the like, according to the size of the engaged perforations in the cards, said device comprising: a first elongated member shaped into the form of a pistol-grip; a second elongated member extending across and secured at spaced points to said pistol-grip to brace the same and also extending from said pistol-grip at a point intermediate the ends thereof to form a substantially straight needle adapted to have the outer end thereof passed through aligned perforations or openings in a stack of cards or the like, said needle being of oblong cross-section and being laterally flexible; and a third elongated member secured adjacent one end thereof to the upper portion of said pistol-grip, having a first longitudinal section extending outwardly from said pistol-grip for a distance corresponding substantially to the length of said needle, and having a second longitudinal section extending at an angle from said first section and toward said needle, said second section terminating in a hook-shaped part for engaging said needle adjacent the outer end thereof, said third member being oblong in cross-section and having a 90 degree twist therein between said first and second sections thereof, said first section being resilient in a plane passing through said needle.



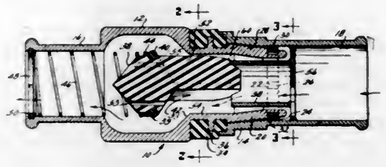
2,450,443
LIMITER
Stanley R. Rich, New York, N. Y.
Application June 5, 1944, Serial No. 538,801
5 Claims. (Cl. 178—44)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



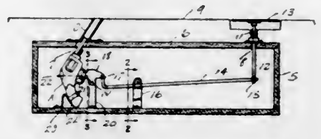
5. A method of limiting the intensity of a current wave by means of a pentode vacuum tube having the usual elements, comprising the steps of applying to the suppressor grid of said tube a small negative bias, applying to the plate and to the screen grid a low positive bias, grounding the number one grid and cathode, and applying to the suppressor grid a fluctuating signal voltage that swings the suppressor grid alternately positive and negative the plate current being substantially constant while said suppressor grid is positive.

2,450,444
ELECTRIC VAPORIZER
Joseph Robinson, New York, N. Y.
Original application May 25, 1942, Serial No. 444,360. Divided and this application June 21, 1944, Serial No. 541,321
3 Claims. (Cl. 128—192)

1. An electric vaporizer comprising in combination, an elongated hollow handle, an electric cord and pressure actuated switch assembly in said handle, a heater-container-applicator unit into the bottom of which said handle removably projects to support said unit and to bring said switch and electric cord assembly into circuit with said heater, said heater-container-applicator unit including a base and being adapted to be carried by said handle for use thereon or to be removed therefrom as a unit and transported and used independently thereof, said heater and container being insulated by said base, means for permanently locking said heater and container in said base with the heater engaging the bottom of said container, said locking means having direct engagement with said base, and a nasal part mounted on said base above said container for directing the vapors, said nasal part being removable from said base to permit access to said container while the container remains in said base.

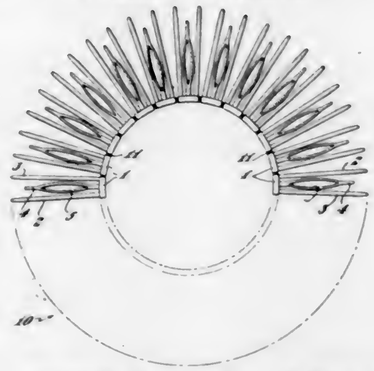


2,450,445
MODULATION
Charles A. Rosencrans, Haddonfield, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application January 18, 1944, Serial No. 518,700
10 Claims. (Cl. 179—171.5)



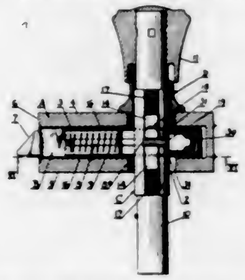
1. In a modulation system, an electron discharge radio frequency amplifier tube having a control grid, and means for modulating the potential on said control grid including, a source of modulating potentials, a modulator tube having a control grid and output electrodes including an anode and a cathode between which an electron discharge takes place, a coupling between said source of modulation potentials and the control grid of the modulator tube, a circuit including a source of direct current potential connecting the output electrodes of said modulator tube between which said discharge takes place, to the control grid and cathode of the amplifier tube to apply to the control grid of said amplifier a controllable negative bias, a resistance in a direct current circuit between the anode of the modulator tube and the control grid of said modulator tube to set up on the control grid zero bias in the presence of zero modulating potentials, and an impedance in series in said circuit including said direct current source for relating the bias on said grid of said amplifier tube to zero bias on said modulator tube grid.

2,450,446
OXYGEN WARNING DEVICE
Earl V. Rupp, Dayton, Ohio
Application December 12, 1946, Serial No. 715,785
4 Claims. (Cl. 284—18)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



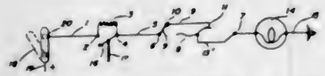
1. A slip joint of the character described which comprises a housing in two main separable parts, the first part adapted for connection to an oxygen mask and the second adapted for connection to a source of oxygen supply, detent means to hold the two parts assembled but allow them to pull apart upon application of predetermined opposite forces, valve means in the mask part, means in the supply part adapted when the two parts are assembled to prop the valve means open, and means to permit a predetermined leakage past the valve when it is closed.

2,450,447
GUN FIRING MECHANISM
Charles H. Samuel, San Francisco, Calif.
Application June 11, 1945, Serial No. 598,797
1 Claim. (Cl. 89—1)



The combination with a firearm having a barrel, a trigger and a slotted trigger guard, of means for housing and concealing the firearm, said housing means comprising a box-like structure, a lid for said structure having spaced openings therein, an inclined tube connected to the lid of the housing and positioned above one of the lid openings and constructed and arranged to receive therein the barrel of the firearm, a vertical tube positioned on said lid and overlying the other of said openings, a trip plate positioned above said last mentioned tube, mechanism connected to said plate and the firearm trigger to discharge the firearm upon the application of pressure to said plate, said mechanism comprising a plunger rod secured at one end to said plate and extending through one of the lid openings, an elongated rod connected to the opposite end of said plunger rod, a bracket positioned on the base of said housing to support said rod, a yoke element pivotally mounted on the base of the housing and movable under the influence of said elongated rod to actuate the trigger of a firearm, and a pin carried by said yoke and arranged to contact the trigger of the firearm, whereby upon the application of pressure to said plate a projectile will be emitted through said inclined tube and will be directed toward the operator of said trip plate.

2,450,448
METHOD OF MAKING HAIR RETAINERS
Lester T. Sawyer, Leominster, Mass.
Application February 21, 1946, Serial No. 649,306
7 Claims. (Cl. 18—47.5)

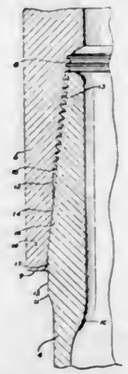


5. The method of manufacturing hairpins and the like hair-retaining articles each having a closed end or back adjoining a plurality of hair-engaging teeth including alternate teeth having offset portions engaging the adjacent teeth, which method comprises molding from a suitable plastic material a plurality of such articles in the form of a substantially flat annular member wherein the backs of such articles collectively define the inner periphery of said annular member and their teeth extend approximately radially in out-of-contact relation with each other with their outer ends circumferentially spaced so as collectively to define the outer periphery of said annular member, temporarily plasticizing said annular member, applying the plasticized annular member about a cylindrical member so as to convert said annular member into a generally cylindrical crown-like member wherein said out-of-contact teeth are closed in to bring the teeth having offset portions into engagement with adjacent teeth, and thereafter severing from said crown-like member the individual hair-retaining articles.

2,450,449
DOOR LOCK
Walter R. Schlage, Burlingame, Calif.; Anna Schlage, executrix of said Walter R. Schlage, deceased, assignor to Schlage Lock Company, San Francisco, Calif., a corporation of California
Application November 21, 1945, Serial No. 629,955
6 Claims. (Cl. 292—337)

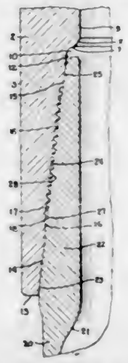
1. In a door lock having a tubular spindle housing extending therethrough and said spindle housing having a length sufficient to extend beyond opposite faces of a door in which a lock is mounted, a plurality of raised surfaces formed on the exterior surface of the spindle housing and extending from end to end thereof, said raised surfaces being spaced apart circumferentially and said raised surfaces being threaded at each end of the spindle housing, a pair of escutcheon plates each having a hub threaded to permit the escutcheon plates to be screwed on the respective ends of the spindle housing, and an extension on each hub to guide the threaded portion of each hub into position to align and engage the threaded ends of the spindle housing.

2,450,450
SUPERVISORY INDICATING CIRCUIT
Joseph Schmidinger, Lake George, N. Y.
Application May 8, 1945, Serial No. 592,667
3 Claims. (Cl. 177—311)



1. A guard circuit comprising in combination a resistor, a normally closed flasher switch and a signal lamp all connected in series across a voltage supply, said resistance, switch and lamp being so proportioned relative to the voltage supply that the current through the circuit is insufficient to operate said switch but is sufficient to cause said lamp to glow dimly and thereby indicate both a normal guarded condition and an unimpaired circuit, and means independent of said resistor and responsive to a condition to be guarded for shunting said resistor when the guarded condition departs from normal to increase the current through the switch and lamp sufficiently for operation of the switch with consequent flashing of the lamp, the lamp glowing brightly during the on periods.

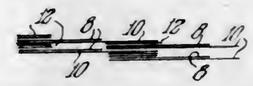
2,450,451
POLYMERIZATION OF ETHYLENE
Louis Schmerling, Riverside, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware
No Drawing. Application May 31, 1946, Serial No. 673,610
17 Claims. (Cl. 260—94)



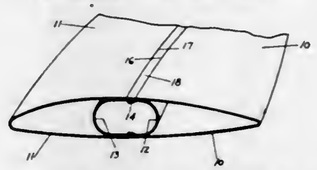
2. A process for producing polymers from ethylene which comprises subjecting ethylene to the action of an organic peroxide polymerization catalyst at a pressure above about 15 atmospheres, a temperature of from about the decomposition temperature of the catalyst to about 150° C. higher than said decomposition temperature, and in the presence of a saturated hydrocarbon diluent containing at least three carbon atoms and a metal selected from the group consisting of magnesium, zinc, cadmium, and mercury.

2,450,452
SEAL GRIP TOOL JOINT
Floyd L. Scott, Houston, Tex., assignor to Hughes Tool Company, Houston, Tex., a corporation of Delaware
Application July 29, 1944, Serial No. 547,187
9 Claims. (Cl. 285—146)

1. In a drill stem connection, a tapered pipe end having a threaded portion to engage a tool joint socket, the threaded portion extending over approximately one half the length of the tapered portion, the remainder being smooth and unthreaded, and having a taper which inclines inwardly toward the joint axis and in substantial alignment with the taper of the roots of the thread on the pipe end, a joint socket threaded to engage said pipe end and having a smooth unthreaded area extending a material distance beyond the threaded portion to contact and form a seal with said smooth area upon said pipe, there being a substantially cylindrical surface in said socket between the root of the outermost thread of the threaded portion and the remainder of the unthreaded area.



2,450,453
DOUBLE SEAL GRIP TOOL JOINT
Milos Emanuel Boehm, Houston, Tex., assignor to Hughes Tool Company, Houston, Tex., a corporation of Delaware
Application July 24, 1945, Serial No. 606,836
6 Claims. (Cl. 285—146)

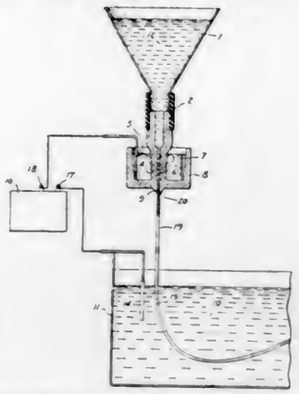


3. In a pipe and tool joint pin and socket connection including a socket in the tool joint, said socket having a uniformly tapered inner peripheral surface with spaced smooth end portions and a threaded intermediate area, the crests of the threads of said area being substantially on the line of said taper, a pin end on the pipe, said pin having a uniformly tapered peripheral surface with smooth end portions and an intermediate threaded area, the roots of the threads of said area being substantially on the line of said taper, said smooth tapered surfaces and said threaded areas being complementary so as to provide a threaded connection having a seal at both the inside and the outside ends thereof.

2,450,454
BUFFING WHEEL
Sheldon S. Smith, Springfield, Mass.
Application September 18, 1947, Serial No. 774,794
2 Claims. (Cl. 51—193)

1. A buffing wheel comprising in combination, superposed and centrally secured together layers of circumferentially arranged flexible sections, each of said sections including a folded disc having a forward two ply portion with a forward folded edge and an intermediate four ply section with a forward folded edge angularly and rearwardly disposed relative to the first edge and a rear eight ply portion with a forward folded edge angularly and rearwardly disposed relative to the second-named edge, the two ply portions of the sections of each layer superposed on the eight ply portions of adjacent sections and the eight ply portions of the sections of one layer superposed over the corresponding portions of the sections of the layer therebelow.

2,450,455
HOLLOW PROPELLER BLADE
Carl J. Snyder, Detroit, Mich.
Application September 13, 1944, Serial No. 553,876
6 Claims. (Cl. 170—159)



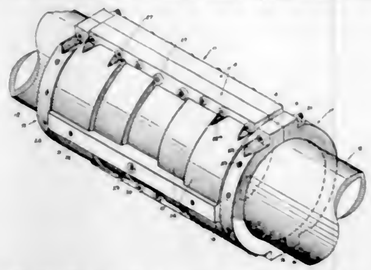
6. A propeller blade comprising a U-shaped sheet metal blade section with its bight portion constituting the trailing edge of the blade, a second U-shaped sheet metal blade section with its bight portion constituting the leading edge of the blade, a channel shaped elongated sheet metal member between the legs of each blade section, the sides of the channels having interfacial contact with the legs of the sections, the edges of the channels extending beyond the edges of the blade sections, the two sections being disposed in facing relation with the extending edge portions of one channel overlapping the edges of the other channel and in interfacial contact, the edges of the blade sections lying in facing relation and spaced apart, and a weld metal filler between the spaced edges for uniting edges of the blade sections and the edges of the channels.

2,450,456
CONCENTRATED APPLE JUICE AND MILK MODIFIER
Huston St. Clair, Tazewell, Va., assignor to Ridgewood Inc., Winchester, Va., a corporation of Virginia
No Drawing. Application May 3, 1945, Serial No. 591,849
10 Claims. (Cl. 99—54)

1. A cow's milk modifier comprising the concentrates, partially neutralized natural juice of fresh apples having a pH of not less than about 4.5 and not more than about 5.5 as determined by the glass electrode pH meter, the concentrated

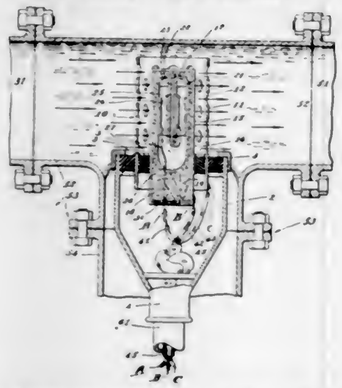
juice being a viscous fluid readily soluble in cold cow's milk and having a density of not less than about 68° Brix and not more than about 75° Brix.

2,450,457
PROCESS AND APPARATUS FOR COAGULATING A COAGULABLE FLUID
Theodore A. Te Grotenhuis, Olmsted Falls, Ohio, assignor to The General Tire & Rubber Company, Akron, Ohio, a corporation of Ohio
Application November 9, 1945, Serial No. 627,646
10 Claims. (Cl. 18—12)



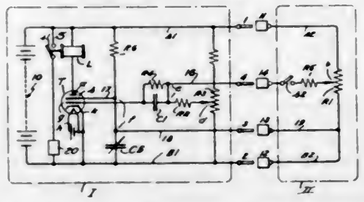
1. A process of coagulating an unfrothed coagulable fluid into permanent form, comprising forming the fluid into a fluid stream of the approximate shape desired in the article to be formed, contacting a shaped portion of said stream with a porous material containing a conductive fluid therein, causing said stream to flow relative to said porous material, and while said stream of fluid is flowing passing an electric current in series through said conductive fluid and said coagulable fluid to cause said coagulable fluid to coagulate in the shape of said stream whereby gases due to electrolysis are not evolved in contact with said coagulable fluid to cause deformation in the surface thereof.

8. Apparatus for gelling a fluid stream of heat-coagulable, electrically conductive fluid into a desired shape, comprising a porous wall of non-conductive material containing a solution of an electrolyte, means for forming a fluid stream of said coagulable fluid and for causing said fluid to flow relative to and bearing against said wall to make contact with the electrolyte in said wall, means for making electrical connection with the electrolyte in said wall, connecting means spaced along said stream in said wall for making electrical connection with said stream, and means for passing an electric current between said connecting means and said wall.



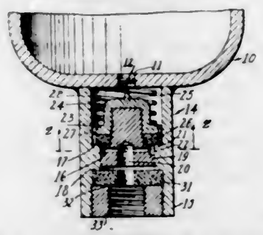
2,450,458
EXPANSION COUPLING
George J. Thompson, George L. Koester, Jr., and James B. Fullman, United States Navy
Application July 9, 1945, Serial No. 604,005
6 Claims. (Cl. 285—162)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. An expansion coupling comprising a pair of mating longitudinal coupling sections, a gland at one end of said coupling adapted to fit within said coupling sections, said gland comprising a pair of mating gland sections, a wedge-shaped projection formed externally on said gland, a wedge-shaped projection formed internally on said coupling sections with a portion of said projection formed on one of said mating coupling sections and a portion of said projection formed



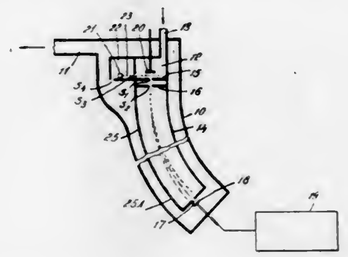
on the other of said coupling sections so that when the longitudinal coupling sections are in assembled relation said portions complement each other to form a single continuous projection, said gland projection being arranged for screwing action relative to said coupling projection to effect longitudinal alignment of said mating longitudinal coupling sections.

2,450,459
ELECTRODE SYSTEM
Elihu Craig Thomson, Boston, Mass., assignor to Photoswitch, Incorporated, Cambridge, Mass., a corporation of Massachusetts
Application January 13, 1944, Serial No. 518,128
3 Claims. (Cl. 175—183)



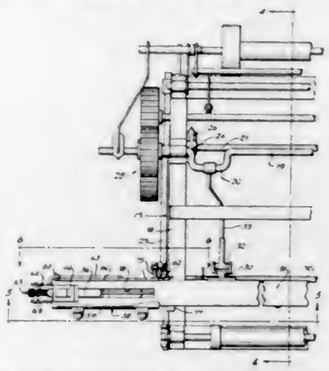
1. An electrode system for measuring the conductivity of fluid of varying temperature, comprising in combination with a holder a probe unit insulated from and supported by said holder, said unit including an outer guard electrode adapted to pass said fluid, a container electrode located within said guard electrode and insulated therefrom, a sealed vessel of insulating material secured in said container electrode and being filled with material of known electrical characteristics, a first electrode located in said vessel and means for electrically connecting said electrode to said container electrode through a wall of said vessel, a second electrode located in said vessel and spaced from said first electrode, and an electrical conductor connected to said second electrode and leading through said vessel and outside of said container electrode.

2,450,460
ELECTRONIC TIMING APPARATUS
E. Craig Thomson, Boston, Mass., assignor to Photoswitch, Incorporated, Cambridge, Mass., a corporation of Massachusetts
Application August 23, 1944, Serial No. 550,808
4 Claims. (Cl. 250—27)



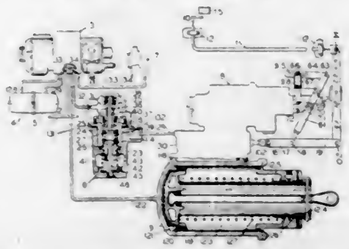
1. In electric timing apparatus the combination of: a controlled unit comprising a current source; an electron discharge device having two control electrodes and an output circuit connected to the respective terminals of said source; four connector contacts; connections from said terminals to a first and a second of said connector contacts; a blocking network including a resistor and a capacitor connected in series between said terminals, a connection from a tap intermediate said resistor and said capacitor to one of said electrodes and a connection from said tap to a third one of said connector contacts; and a timing network including a voltage-apportioning means having an adjustable tap and being connected across said terminals, a capacitor and a resistor connected in series between said adjustable tap and the second electrode, a resistor in parallel to said capacitor and a connection from said adjustable tap to the fourth connector contact; with a setting unit comprising four contact receptacles; a potential-apportioning means whose ends are connected to a first and second of said contact receptacles and which has an adjustable tap; a connection from a third of said contact receptacles to one end of said second apportioning means; and a normally open switch connected in series between said second tap and said fourth contact receptacle; said connector contacts being adapted for connection with and substantially simultaneous separation from correspondingly numbered ones of said contact receptacles.

2,450,461
DIAPHRAGM PUNCTURING VALVE STRUCTURE
Robert S. Wallach, Madison, N. J., assignor to Associated Development and Research Corporation, New York, N. Y., a corporation of New York
Application October 4, 1945, Serial No. 620,357
4 Claims. (Cl. 222—7)



3. A valve comprising a tubular housing having a concentric inwardly extending cylindrical sleeve provided intermediate the ends thereof, an end of said sleeve forming valve seating means; a valve member within said housing and guided for axial movement by engagement with said cylindrical sleeve and the wall of said housing above said sleeve, said valve member having flow passages communicating between the interior of said housing and the discharge end thereof; a valve disc carried by said valve member for cooperation with said valve seat; means for normally urging said valve member into seating relationship; an annular coupling member disposed within said housing at the outflow end thereof; and a flexible, annular disc secured within said housing between the inner end of said coupling in engagement with the lower end of said cylindrical sleeve and extending across the end wall of said coupling, said annular disc being immediately adjacent the lower end of said valve means and having an axial passage communicating with said valve passage, whereby upon distorting the annular disc in the direction of said valve member as by a tubular conduit inserted into said coupling member and engaging the surface of said disc the latter will press against the underside of said valve member to move it into unseated position while sealingly engaging the end of said tubular conduit.

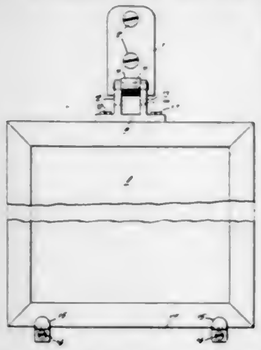
2,450,462
MASS SPECTROMETRY
Harold W. Washburn, Pasadena, Calif., assignor to Consolidated Engineering Corporation, Pasadena, Calif., a corporation of California
Application November 4, 1943, Serial No. 508,923
4 Claims. (Cl. 250—41.9)



1. In a mass spectrometer having an ionization chamber, a sample chamber, means for introducing a material to be analyzed into the ionization chamber from the sample chamber, means for shooting an electron beam against molecules of the material in the ionization chamber, an analyzer connected to the ionization chamber through a restricted passage, and means for expelling ions formed from the material from the ionization chamber into the analyzer, the combination which comprises an electron producer chamber, means disposed in that chamber for producing an electron beam, a conduit connected between the electron producer chamber and the ionization chamber for admitting the beam to the latter, said conduit acting to restrict the flow of gas from the ionization chamber to the electron producer chamber, and a pump for evacuating the electron producer chamber, the ionization chamber and the analyzer, said pump being connected to the electron producer chamber and the analyzer so that gas is drawn from the ionization chamber into both the electron producer chamber and the analyzer.

2,450,463
PICK MOTION FOR LOOMS
William H. West, Montgomery, Ala., assignor to The Alabama Textile Engineering Company, Inc., Montgomery, Ala., a corporation of Alabama
Application August 28, 1945, Serial No. 613,143
9 Claims. (Cl. 139—145)

9. A pick motion for a loom which includes an oscillating lay, a normally expanded shuttle box adjacent one end of the lay, a picker movable longitudinally through the shuttle box, means actuated by the impact of a shuttle against the picker to contact the shuttle box and bind the shuttle therein, and means carried by the lay and actuated by the impact of the shuttle against the picker to latch the picker in retracted position.

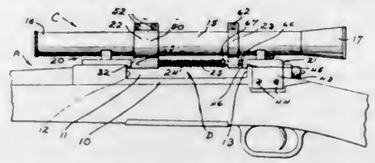


2,450,464
LOAD COMPENSATING BRAKE
Arthur J. Bent, Penn Township, Allegheny County, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a corporation of Pennsylvania
Application January 31, 1946, Serial No. 644,446
44 Claims. (Cl. 303—22)

1. A fluid pressure control mechanism comprising a casing having a chamber to which fluid under pressure may be supplied and in which the pressure of fluid may be varied to effect the control of a device to be controlled, valve means operative to admit fluid under pressure to said chamber, a control element operatively engaging said valve means and being responsive to a control fluid pressure to admit fluid under pressure to said chamber, means subject to the pressure of fluid in said chamber and operative to actuate said valve means to cut off the supply of fluid to the chamber when the force of the means exceeds the actuating force of said control element, said control element being movable relative to said valve means to different positions to produce different actuating forces on said valve means in response to a given control fluid pressure, and means operative to move said control element relative to said valve means.

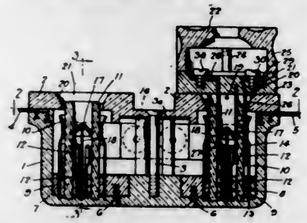
29. A variable control mechanism comprising a control element having a normal position and movable therefrom to various other positions of adjustment, resilient means constantly urging said control element toward its normal position, power means operative to move said control element out of said normal position to one of said various other positions of adjustment against the opposing force of said resilient means, a locking means for locking said control element in its adjusted position against movement in a direction toward its normal position, and means operative by said power means to render said locking means ineffective prior to the movement of said control element and to render said locking means effective at all other times.

2,450,465
ADJUSTABLE HANGER FOR FRAMES
David Harris Bratburd, Bayside, N. Y.
Application June 9, 1945, Serial No. 598,511
3 Claims. (Cl. 24?—28)



1. An adjustable hanger for frames and the like comprising a base plate adapted to be fixed to a wall and flat against the same, a block bearing against said plate and having a horizontal threaded opening at right angles to said plate, a screw passing from the back of said plate and into said opening, a hole in said block intersecting said opening at right angles thereto, a hanger adapted to be secured to the top of a frame, a horizontal pivot pin in said hole and held therein by the end of said screw, said hanger being mounted on said pin, screw being a pivot about which said block apted to swivel.

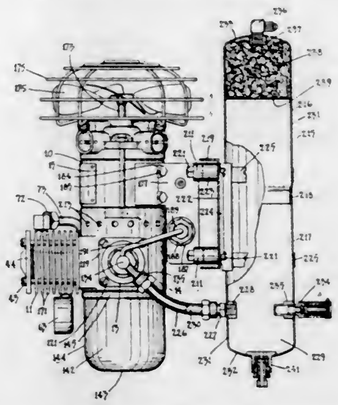
2,450,466
TELESCOPE MOUNTING FOR GUNS
Richard Carlson, Hamilton, Mont.
Application January 6, 1947, Serial No. 720,336
6 Claims. (Cl. 33—50)



1. In a telescope mounting for a gun, a forward V-base; a rearward V-base, each base having a bolt-receiving recess, with said recesses facing one another; a forward clamp means for the telescope to retain said telescope within the V of the forward V base, including a portion provided with a forwardly extending bolt, constructed and arranged to slide into and out of the recess in said forward V-base, when the telescope is disposed upon said V-base, and a socket facing the recess

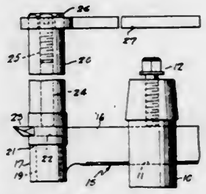
in said rearward V-base; a rearward clamp means for said telescope to retain said telescope within the V of the rearward V-base, including a portion provided with a bore; a plunger with one end section extending into said socket and the other

end section extending through said bore and into the recess of said rearward V-base; said plunger having an enlargement disposed intermediate said portions; and an expansion spring with one end bearing against said first portion and its other end bearing against said enlargement.



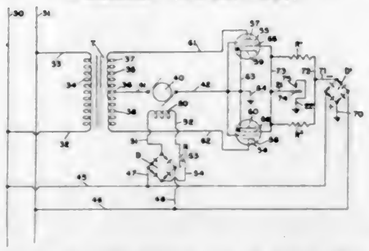
2,450,467
POLARIZED HOUSE WIRING RECEPTACLE AND PLUG
Charles L. Clark, Brockway, Pa.
Application October 26, 1945, Serial No. 624,642
5 Claims. (Cl. 173—330)

1. A polarized house wiring receptacle for use with wall plates and outlet boxes, comprising a body and a cover for the body, the cover formed with plug sockets, plugs to be fitted in said sockets, a pair of spaced concentric cylindrical conductors in each plug, terminal blocks in said body adjacent the lower inner ends thereof, positive and negative terminals in said blocks adapted to receive and engage the cylindrical conductors on the plugs, a cylindrical tubular insulating tube set in each block intermediate of said positive and negative terminals, wiring contact posts connected with the positive and negative terminals, the cylindrical conductors of each plug fitting respectively inside and outside of the insulating tube and between tube and the positive and negative terminals, a conical rubber member over the terminal within the tube to prevent explosion of air and gas when an electric circuit is broken by withdrawing a plug and a pin carried by each terminal block for mounting said rubber member within said insulating tube in spaced relation thereto.



2,450,468
MOTOR-DRIVEN COMPRESSOR
Richard T. Cornelius, Minneapolis, Minn.
Application October 1, 1943, Serial No. 504,556
11 Claims. (Cl. 230—182)

2. A multiple stage compressor comprising a case, a motor mounted on the upper end of the case and having an armature shaft extending into said case, a crank attached to said armature shaft and disposed within said case, a plurality of compressor units carried by said case and disposed radially with reference thereto and operating at different pressures, means for operating all of said compressor units from said crank, a conduit having a reach extending upwardly from the discharge of a lower pressure compressor unit and another reach inclining downwardly toward



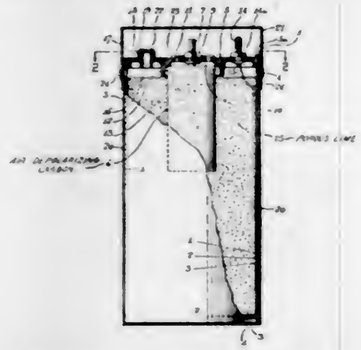
the intake of a higher pressure compressor unit, the intake of said higher pressure compressor unit being disposed at the uppermost portion thereof to cause condensation collected in said last-named reach to flow by gravity into the higher pressure compressor unit.

2,450,469
RADIUS TOOL
Anthony E. De Martin, Derby, Conn.
Application July 25, 1945, Serial No. 606,923
3 Claims. (Cl. 29—98)

1. A tool of the character described comprising a support including a shank so shaped as to be adapted to be mounted and clamped in the tool post of a machine tool and provided with a transversely extending cylindrical bearing at one end, a supporting shaft member provided with a cylindrical bearing portion mounted in the first bearing for turning movements therein and a shoulder to rest on said first bearing, said shaft member being adapted to be reversed in said first bearing, means for mounting a cutting bit in the shaft member for adjustment toward and from the axis of said bearing, the respective ends of the first bearing being at different levels with respect to the adjacent edge of the shank so that when the shaft member is reversed in this bearing the cutting bit will be at a different level with respect to the shank than before the reversal, and a handle for slowly turning said member to swing the cutting end of the bit in an arc about the axis of the bearing during the cutting operation.

2,450,470
ELECTRONICALLY CONTROLLED MOTOR-DRIVEN LOOM LETOFF
Raymond F. Dion, Leominster, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application July 26, 1946, Serial No. 686,297
4 Claims. (Cl. 139—110)

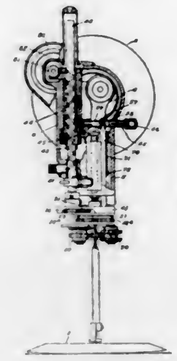
1. In letoff mechanism for a loom having a warp beam operatively connected to a motor which when running causes the beam to turn to deliver warp for the weaving process, said motor having an armature and a field coil, the latter being energized during loom operation, electronic circuit means for the armature including two electronic tubes each having a plate, a grid, and a grounded cathode, a transformer winding excited by alternating current and having a center tap connected to one side of the armature and having one side of the winding connected to one of said plates and the other side of the winding connected to the other of said plates, said electronic circuit means including a common connection between the cathodes and the other side of the armature and tending normally to cause electric current to flow through said tubes and armature, a source of direct current the positive side of which is grounded, a contact which is closed and grounded when the warp tension attains a given maximum and is open when the warp tension is less than said given maximum, and grid control circuit means including said source of direct current and contact normally effective when the latter is open to enable the grids to prevent flow of electric current through the tubes to prevent operation of the armature and effective when said contact is closed to alter the grids in such manner that current derived from said winding can flow through said tubes and armature to energize the latter.



2,450,471
NECKTIE FORMING DEVICE
Jess J. Dorkin, Brooklyn, N. Y.
Application February 19, 1947, Serial No. 729,447
2 Claims. (Cl. 2—153)

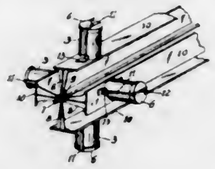
1. In a necktie knot former, the combination with a tie of the four-in-hand type, of a pin element detachably engaging a doubled-over portion of the tie that passes through the knot in forming the same, and a handle member extending from the pin element to a point below the knot to withdraw the pin element from the tie after the knot has been formed.

2. In a necktie knot former, the combination with a tie of the four-in-hand type, of a pin element detachably engaging a double-over portion of the tie that passes through the knot in forming the same, and a handle member suspended by a flexible cord from the pin element and hanging loosely below the knot to withdraw the pin element from the tie after the knot has been formed.



2,450,472
ALKALINE PRIMARY BATTERY
Le Roy S. Dunham, East Orange, and Ernest O. Jegge, Glen Ridge, N. J., assignors to Thomas A. Edison, Incorporated, West Orange, N. J., a corporation of New Jersey
Application March 15, 1947, Serial No. 734,956
10 Claims. (Cl. 136—164)

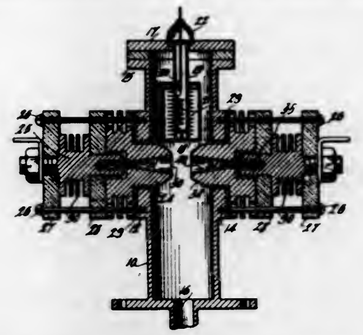
5. In a primary battery including a container: the combination of cathode and zinc anode elements in said container, a mass of porous, granular lime filling said container substantially to the top of said electrodes, said lime including a minor proportion of a hard, permanent material tending to give physical strength and permanence to the granules thereof, and a caustic alkaline electrolyte solution contained in said granular lime mass and having a solution strength of the order of 5 normal.



2,450,473
ABRADING DEVICE
Hector E. Goldie, Montreal, Quebec, Canada, assignor to Rubenstein Bros. Company, Montreal, Quebec, Canada, a corporation of Quebec
Application April 5, 1946, Serial No. 659,778
In Canada January 23, 1946
7 Claims. (Cl. 51—249)

1. An apparatus of the type described, comprising, a single motor, a straight knife reciprocable by said motor, a rod having a helically double-threaded keyway in its peripheral surface adapted for rotation and reciprocation parallel to the knife, a follower adapted to engage the thread on said rod for causing reciprocation of said rod on its rotation, a carriage mounted on the rod, rotatable abrading means mounted on said carriage and rotatable by said rod, a driven element connected to said rod for rotating it, a driving element connected to said motor, a clutch between said driven element and said driving element, said rod being positively driven from the motor when the clutch is engaged thereby to cause outward and return sharpening movements of the abrading means in a sharpening

cycle and rotating sharpening movements of the abrading means, manual means for causing engagement of said clutch, and means operated by contact with said carriage in its return movement for causing disengagement of said clutch.

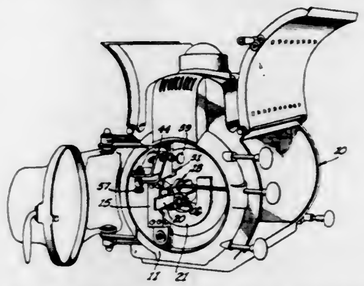


2,450,474
METHOD OF MAKING PRACTICE GOLF BALLS
Walter Grobner, Wallington, N. J., assignor to Botany Worsted Mills, a corporation of New Jersey
Application November 4, 1944, Serial No. 561,911
3 Claims. (Cl. 28—72.3)

1. A method of making a practice golf ball which consists in the steps of forming a body of wool in rough ball shape, and then tumbling the rough ball in a container in the presence of a felting liquid and beater balls until the fibres of the ball are felted both interiorly and exteriorly and the initial diameter of the ball is substantially reduced.

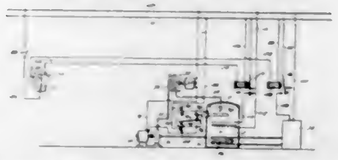
2,450,475
GAS DISCHARGE OSCILLATOR
Clarence W. Hansell, Port Jefferson, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application February 28, 1946, Serial No. 650,955
19 Claims. (Cl. 250—27.5)

1. A gas discharge device including an evacuated casing adapted to contain an ionizable gas, a thermionic cathode, a pair of first anodes each having an aperture therethrough, a pair of second anodes, one in back of the aperture in each of said first anodes, means for establishing an arc discharge between each of said first anodes and said cathode, means for alternately establishing an arc discharge from said cathode to one of said second anodes.



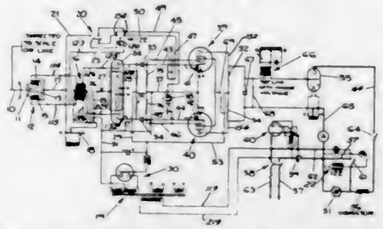
2,450,476
ONE-PIECE WOODEN BODY PENCIL
Carl C. Harris, Orange, Mass.
Application June 9, 1944, Serial No. 539,543
3 Claims. (Cl. 120—83)

1. A pencil comprising an integral straight wooden body of uniform cross sectional area having an axially burned bore of small diameter provided with a thinly charred wall and a graphitic lead filling said bore firmly united to said charred wall.



2,450,477
CARBON ALIGNMENT DEVICE FOR ARC LAMPS
Harold I. Huff, Los Angeles, Calif.
Application December 5, 1946, Serial No. 714,251
6 Claims. (Cl. 176—41)

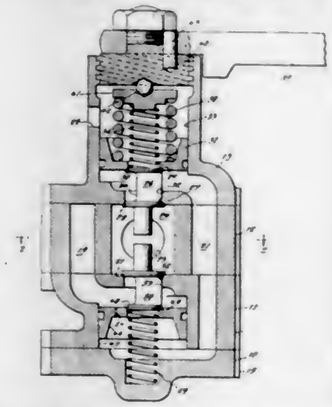
1. In an apparatus for laterally adjusting one of a pair of axially aligned carbons for an arc lamp, the adjustable carbon being carried on a support member movably mounted on a frame, the combination of a pair of spaced stationary elements fixed on the frame and projecting through spaced apertures provided in the support member, means providing a slot at one of the apertures adapted to cooperate with the first stationary element to permit linear movement of the movable member in one direction relative to the frame, primary adjusting means associated



with the second stationary element adapted to move the support member linearly in said direction, and secondary adjusting means associated with said second stationary element adapted to swing the support member in an arc about the first stationary element.

2,450,478
AUTOMATIC ELECTRIC FLUID HEATING AND COOLING SYSTEM
Paul A. Johnson, Kansas City, Mo.
Application June 12, 1944, Serial No. 539,965
5 Claims. (Cl. 257—3)

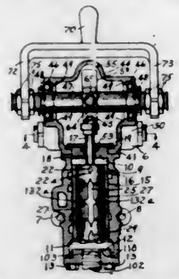
3. In an air temperature regulating system a fluid container; a heat exchanger including a coil and a motor driven fan and having supply and return connections with said container, an electric heater immersed in the fluid within said container; an electric refrigerator having a cooling unit immersed in the fluid within said container; an electrically driven pump in one of said connections between the heat exchanger and container, whereby fluid from said container is forced through said heat exchange coil; and an electric circuit controlled by the differential of temperature in the room being regulated whereby the heating coil and the refrigerator are selectively operated to maintain the temperature of said room within certain predetermined limits.



2,450,479
ELECTRICAL CONTROL CIRCUIT FOR INDICATING MOVEMENTS OF POSITION INDICATORS
James Robert Lindsay, Bexley, Ohio, assignor to The Jeffrey Company, a corporation of Ohio
Application August 16, 1944, Serial No. 549,739
3 Claims. (Cl. 250—27)

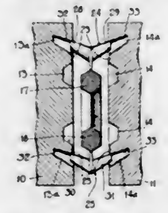
1. A control system for an electronic tube including a magnetic pick-up device operable in response to heavy and light conditions of an indicator, and switch means for temporarily disabling the light side of said pick-up.

2. A control circuit including a condition indicator adapted to indicate a normal condition and opposite abnormal conditions such as heavy and light, an electrical pick-up device of the reactance type operative variably as determined by said condition indicator, amplifier means connected to and controlled by said pick-up device and providing an output alternating current voltage varying in amount and direction as said indicator moves to opposite sides of its normal position, a condenser connected to said amplifier to receive a charge in either of reverse directions as determined by the condition indicator, a pair of resistors connected in series across said condenser, combination rectifier amplifiers connected to the output of said amplifier and energized by said output voltage and including means effective to control the charge on said condenser and to produce a direct current voltage in the output circuits of said rectifier amplifiers under the control of said condenser and also including means to short circuit said resistors successively in response to the alternating current voltage across them, an electronic tube, and means responsive to said produced direct current voltage for controlling the current output of said electronic tube.



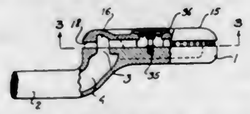
2,450,480
VALVE
John W. Marsh, Alexandria, Va.
Application May 30, 1945, Serial No. 596,637
14 Claims. (Cl. 303—55)

1. In a fluid pressure control valve, the combination of a housing having an inlet port, an outlet port, an exhaust port, and a control chamber, a double-seated valve provided with a first seat forming a closure between said inlet and outlet ports, a second seat forming a closure between the outlet port and the control chamber, a fluid pressure actuated element positioned between said outlet port and said control chamber for controlling movement of the double-seated valve, the housing having an opening between the inlet port and the control chamber, and a manually controllable valve for closing such opening and for exhausting fluid from the control chamber.



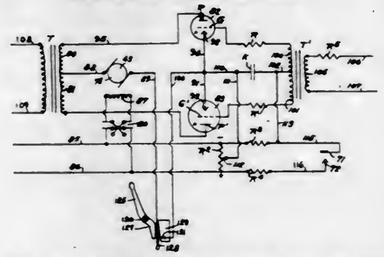
2,450,481
DUPLEX CONTROL VALVE DEVICE
Harry C. May, East McKeesport, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a corporation of Pennsylvania
Application July 31, 1943, Serial No. 496,868
12 Claims. (Cl. 251—4)

8. A control valve device comprising a casing having fluid pressure conducting control passages therein, a valve mounted in said casing for operation to control the flow of fluid through said control passages, said valve being rotatable for controlling the flow of fluid through certain of said control passages and being shiftable axially for controlling the flow of fluid through other of said control passages, a member rotatably mounted on said casing, a shaft carried by said member for end for end rotary movement relative to said casing and for rotary movement about its axis relative to the member, means operative in response



to the end for end rotation of said shaft for rotating said valve and operative in response to the rotation of the shaft about its axis for shifting said valve axially, and means for actuating said shaft.

2,450,482
METHOD OF FORMING AND EJECTING DIE CASTINGS
Louis H. Morin, Bronx, N. Y., assignor of one-half to Davis Marinsky, Bronx, N. Y.
Application August 5, 1944, Serial No. 548,259
5 Claims. (Cl. 18—55)

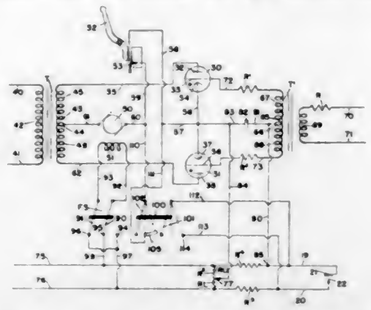


1. The method of forming and ejecting die castings, which comprises forming in cavities on adjacent surfaces of relatively movable dies a die cast body comprising a product part and integral ejector portions, shaping that part of the die cavities forming the ejector portions in such manner as to form oppositely extending and angularly arranged ejector pins on said portions with common surfaces of the ejector pins of both ejector portions in parallel relationship to each other, and camming the whole die cast body out of the cavities of both die parts by means of the ejector portions by moving the die parts in engagement with a surface of each ejector portion and at an angle thereto.

2,450,483
GAS BURNER
Ervin H. Mueller, Grosse Pointe, Mich.
Application June 4, 1945, Serial No. 597,520
9 Claims. (Cl. 158—116)

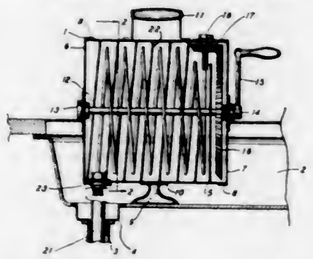
1. A gas burner comprising, a body member, a cap member, the body member haing a channel defined by inner and outer annular walls, a cross member extending across the space within the inner wall, the tops of the walls and the cross member presenting contact surfaces, the cap member having a channel defined by inner and outer annular walls, a cross member extending across the space within the inner wall, one of the cross members having a passage therein leading into the central portion of its cross member and which passage is defined on opposite sides by walls, the tops of the walls of the cap member presenting contact surfaces, the cap being inverted and disposed on the body member with the said surfaces of the walls contacting so that the channels align and form a passage for gaseous fuel and so that the passage in the cross member of the cap member is closed for conducting gaseous fuel, outlet ports in one of the outer walls for the issuance of flame supporting gas and outlet ports in the center portion of the cap cross member for the issuance of flame supporting gas.

2,450,484
LETOFF FOR LOOMS
Albert Palmer and Victor F. Sepavich, Worcester, Mass., assignors to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application May 10, 1945, Serial No. 592,986
26 Claims. (Cl. 139—110)



6. In a letoff mechanism for a loom having a beam which turns to supply warp the tension of which increases when the beam turns too slowly to supply the warp needed for the weaving operation, a motor operatively connected to the beam to cause turning of the beam to supply warp when the motor is running, an electronic tube including a grid, electric circuit means including the tube and motor, primary electric controller means for the grid operative under normal conditions to maintain the grid in such electric condition as to permit an amount of current to flow in said electric circuit means sufficient only to cause the motor to turn the warp beam at too slow a rate to supply the warp required for weaving, an indicator responsive to warp tension and closing a contact when the warp tension increases to a given point, and secondary electric controller means including the contact and grid and operative when the contact is closed to alter the electric condition of the grid so that more current flows through said tube with resultant increase in the rate of turning of the motor.

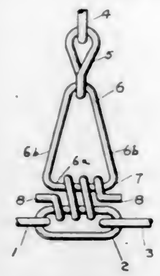
2,450,485
CONTROL MEANS FOR MOTOR-DRIVEN LETOFFS
Albert Palmer and Victor F. Sepavich, Worcester, Mass., assignors to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application July 26, 1946, Serial No. 686,291
5 Claims. (Cl. 139—110)



5. In letoff mechanism for a loom having a warp beam operatively connected to a motor

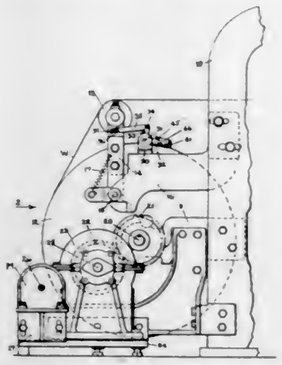
which when running effects turning of the beam, operating electric circuit means for the motor, a control circuit means for the operating electric circuit means which when in one condition causes the operating electric circuit means to effect running of the motor and when in another condition prevents said operating electric circuit means

from causing running of the motor, said operating electric circuit means normally being inoperative during loom stoppage, and normally open manual switch means effective when closed during loom stoppage to cause said control circuit means to be in said one condition thereof to cause said operating electric circuit means to effect running of the motor.



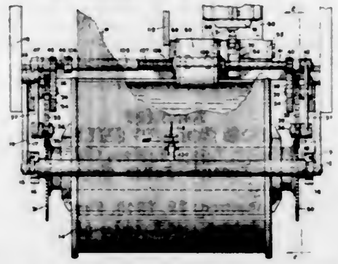
2,450,486
PLUMBER'S SNAKE AND FEEDING DEVICE THEREFOR
Clarence J. Perry, Los Angeles, Calif.
Application October 8, 1945, Serial No. 620,967
5 Claims. (Cl. 15—104.30)

2. In a device for opening drains and the like, a housing having an annular wall with disc-like sides, a helical partition in the housing forming a helically shaped chamber, a hand operable means having a gear fixed thereto, a pinion gear at one end of the chamber in mesh with the first mentioned gear, and an outlet at another end of the chamber having a bore, an elongated flexible shaft in the helical chamber having one end thereof fixed to the pinion gear and the other end passing through the bore of the outlet.



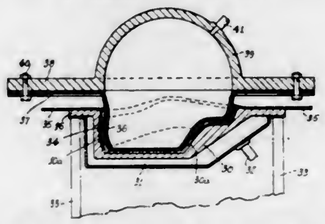
2,450,487
TIRE CHAIN
Elmer Schaber, Cold Spring, Ky.
Application April 12, 1945, Serial No. 587,940
3 Claims. (Cl. 152—242)

3. In a tire chain a cross chain attachment comprising an end cross chain link of triangular formation having two long limbs and a shorter limb, and an attaching helix of a diameter to engage around said end link and a link of a side chain, said helix being formed with extended ends which are out of engagement with either



link, but which give the helix an overall length greater than that of the shorter limb of the cross chain end link, for the purpose described.

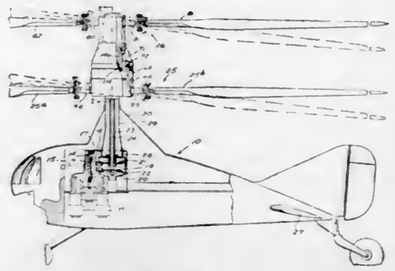
2,450,488
TWO-SPEED MOTOR DRIVE FOR LOOM LETOFFS
Robert S. Schedin, Worcester, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application June 30, 1945, Serial No. 602,433
16 Claims. (Cl. 139—110)



1. In a letoff mechanism for a loom having a warp beam rotatable to supply warp which extends over a whip roll mounted to move forwardly and rearwardly when the tension of the warp increases and decreases, respectively, an electric motor running continuously during loom operation and having a rotor operatively connected to the beam and causing the latter to turn in a direction to supply warp when the rotor is turning, field coil means for the rotor, electric means controlled by the whip roll and normally operative when the whip roll is in a rearward position to cause said field means to be relatively strong and cooperate with said rotor to turn the warp beam at a rate too slow to supply the warp required for the weaving operation, and said electric means effective when the whip roll moves forwardly to a given position to cause said field means to be relatively weak and cooperate with said rotor to turn the warp beam at an increased rate of speed to supply more warp than that required for the weaving operation.

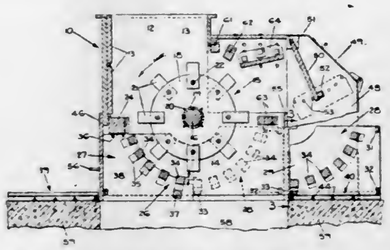
2,450,489
LETOFF FOR LOOMS
Victor F. Sepavich and Clarence R. Kronoff, Worcester, Mass., assignors to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts
Application July 26, 1946, Serial No. 686,294
50 Claims. (Cl. 139—110)

1. In a loom having a warp beam supplying warp which passes over a whip roll and the tension of which varies during loom operation, a normally idle electric motor, driving connections between the motor and the beam causing the latter to turn in a direction to reduce warp tension when the motor is running, a controller operatively related to part of the warp independently of the whip roll and responsive to changes in warp tension and having a contact which is closed when the warp tension reaches a given maximum, and electric means controlled by the contact causing the motor to run when said contact is closed.



2,450,490
METHOD AND APPARATUS FOR MOLDING SHOE UPPERS
Barney Shinberg and Hymen Shrager, Westerly, R. I.
Application September 15, 1947, Serial No. 774,164
6 Claims. (Cl. 12—97)

2. A device for forming shoe uppers comprising in combination a female die member having a shoe-shaped cavity, means for heating said die member, a hollow flexible last-shaped saddle as a male die member insertable into said cavity, and means to force the walls of said male die member against a shoe-upper blank being worked on between the dies.

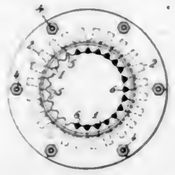


2,450,491
HELICOPTER
Nicholas N. Solovioff and Nelson G. Kling, Great Neck, N. Y., assignors to Airex Manufacturing Company, Inc., Long Island City, N. Y., a corporation of New York
Application May 3, 1943, Serial No. 485,410
17 Claims. (Cl. 244—17)

1. In rotor construction for a helicopter, in combination, a support, rotatable driving means carried by said support, a gimbal ring pivotally secured to said driving means, a housing pivotally secured to said ring, the pivotal axes of said housing and said ring being at right angles, a rotor

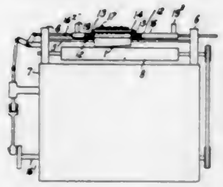
blade rockably mounted on said housing, and a control mechanism connected to said gimbal ring and to said rotor blade for rocking said blade when said housing pivots about its axis.

2,450,492
REMOVABLE SCREEN STRUCTURE FOR ROTARY BEATER MILLS
Robert W. Stevenson, Columbus, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company, a corporation of Ohio
Application May 20, 1944, Serial No. 536,544
8 Claims. (Cl. 241—89)



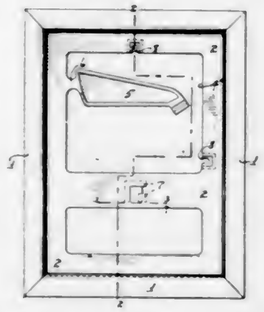
8. A rack adapted to carry cross screen bars of a crusher screen having rectangular end bearing portions including a pair of spaced end plates, means permanently interconnecting said end plates, said end plates each having a plurality of rectangular openings formed therein substantially upon the arc of a circle, the openings in each end plate aligning with corresponding openings in the other end plate for receiving the rectangular end bearing portions of cross section bars whereby the cross screen bars carried by said rack are removable therefrom by endwise movement transverse of said end plates.

2,450,493
TURBINE ROTOR AND ITS METHOD OF MANUFACTURE
René Strub, La Chaux-de-Fonds, Switzerland
Application September 26, 1944, Serial No. 555,800
In Switzerland February 25, 1944
5 Claims. (Cl. 253—39)



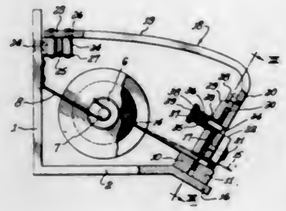
2. A built-up turbo-machine rotor including at least one blade carrier member and an annular blade assembly for each such carrier member consisting of a plurality of separate blades joined to one another by welds bonded to the roots of said blades only, each of said assemblies being ma-

chined on its inner circumference to fit closely on the periphery of the carrier with which it is



associated and joined to that carrier by welding overlying the interblade welds.

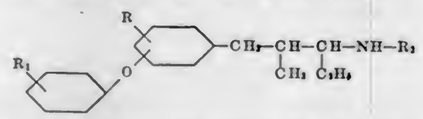
2,450,494
INKING APPARATUS FOR PRINTING MACHINES
William Gibson Thomlinson, Glasgow, Scotland
Application September 10, 1946, Serial No. 695,973
In Great Britain September 18, 1945
4 Claims. (Cl. 101—348)



1. In a printing machine having at least one main inking roller disposed widthwise of the machine, ink distributing mechanism comprising at least one auxiliary roller adapted to make line contact with said main inking roller, means to tilt said auxiliary roller relatively to the surface of said main inking roller so that only one end of said auxiliary roller remains in contact with said main inking roller, means to move the tilted auxiliary roller in steps widthwise of the machine, and means to reverse the direction of movement of said auxiliary roller when its travel in one direction has been completed.

2,450,495
EASEL
Henry Ullmann, New York, N. Y.
Application October 10, 1946, Serial No. 702,542
1 Claim. (Cl. 248—35)

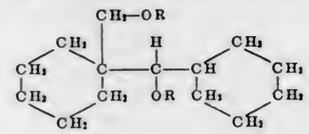
An easel made of molded material and consisting of a marginal frame and a depressed back wall having an opening, the margins of the opening being formed with slots located at right angles to the other and formed in hanger receiving areas projected rearwardly of the major plane of the back wall, the back wall also carrying an outwardly projected easel head receiving member having two openings, one at right angles to the other, and with overhanging walls at each opening, in combination with an easel support having a winged head adapted to enter either of said openings for support of the easel from either one of two positions.



2,450,496
DISPENSER FOR ROLLED SHEET MATERIAL
Arlie E. Whiteley, Los Angeles, Calif., assignor of one-half to Joseph John Capitan, East Los Angeles, Calif.
Application February 18, 1946, Serial No. 648,361
4 Claims. (Cl. 242—55.4)

1. In a dispenser for rolled sheet material including means for supporting a roll of said material and having a slotted guideway across which the end of said material issuing from said roll may be drawn, the combination of: a carriage mounted for movement along said guideway, said carriage having formed therein a slot aligned with the slot in said guideway; an apertured cutter in said carriage slot; a pivot on said carriage intersecting said slot and passing through the aperture in said cutter to pivotally mount said cutter in said slot; and stop means in said slot disposed on opposite sides of said cutter to limit the extent of pivotal movement of said cutter.

2,450,497
PHENOXYPHENYL PROPYL AMINES
Robert Biedermann, Basel, Switzerland, assignor to J. R. Geigy A.-G., Basel, Switzerland, a Swiss firm
No Drawing. Application May 7, 1946, Serial No. 667,999. In Switzerland May 8, 1945
4 Claims. (Cl. 260—570.8)

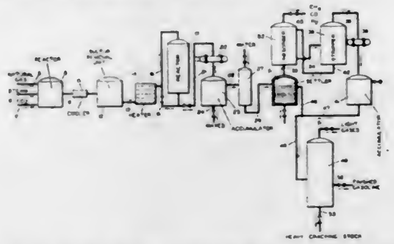


1. An araliphatic amine of the formula

wherein R represents a member selected from the group consisting of hydrogen and methoxy, R_1 represents a member selected from the group consisting of hydrogen, methyl and methoxy, and R_2 represents a member selected from the group consisting of methyl and ethyl.

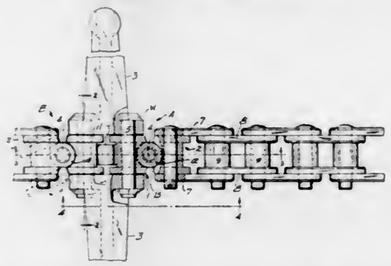
2,450,498
ETHERS OF 1-METHYLOLCYCLOHEXYL-CYCLOHEXYL-CARBINOL
Joseph E. Bludworth, Corpus Christi, Tex., and Donald P. Easter, Washington, D. C., assignors to Celanese Corporation of America, a corporation of Delaware
No Drawing. Original application January 22, 1944, Serial No. 519,352, now Patent No. 2,410,007, dated October 29, 1946. Divided and this application July 18, 1946, Serial No. 684,542
2 Claims. (Cl. 260—611)

1. Compounds of the following general formula:



wherein R is a member of the group consisting of alkyl, and monocyclic aryl radicals.

2,450,499
CIRCUIT MAKER AND BREAKER
John T. L. Brown, Short Hills, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application September 21, 1945, Serial No. 617,864
2 Claims. (Cl. 200—90)



1. A sealed reed contact device having a compound reed constructed of two reeds commonly secured at one end and having natural periods of vibration in the ratio of two to one.

2,450,500
SYNTHESIS OF HYDROCARBONS
Alfred Clark, Bartlesville, Okla., assignor to Phillips Petroleum Company, a corporation of Delaware
Application September 5, 1945, Serial No. 614,578
7 Claims. (Cl. 260—449.6)

6. A process for the synthesis of normally liquid hydrocarbons which comprises passing a gaseous mixture comprising hydrogen and carbon monoxide through an elongated reaction zone of between about ¾ inch and about 3 inches in cross-section under reaction conditions in the presence of a series of hydrocarbon synthesis catalysts selected from the group consisting of cobalt, cobalt-thoria, nickel-thoria, iron, and sintered iron and selected and arranged in separate zones across the line of gas flow in the order corresponding with the ascending order of temperature at which said selected catalysts inherently exhibit optimum activity in the synthesis of said hydrocarbons, maintaining progressively increasing temperatures along the line of gas flow through said reaction zone substantially corresponding to said temperatures of optimum activity for each catalyst by utilizing heat of reaction generated along said line of flow, maintaining thermal conditions within said reaction zone intermediate adiabatic and isothermal, withdrawing an effluent containing said hydrocarbons from said reaction zone, and recovering said hydrocarbons.

2,450,501
CONVEYER CHAIN
John L. Clarkson, Nashville, Ill.
Application April 4, 1945, Serial No. 586,559
7 Claims. (Cl. 198—176)

1. In a conveyor chain universal joint structure, two units arranged end to end, each comprising a pair of elements pivotally connected to swivel in one plane, adjacent elements of the two units being spaced apart to receive a sprocket tooth between them, a pair of members extending along the outer sides of and pivotally connected to the adjacent ends of said spaced elements to swivel transversely of said plane and forming the sole connection between said units, at least one of said members comprising a conveyor flight having an arm extending outwardly from the chain.

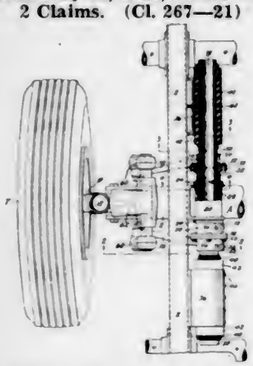
2,450,502
NONHIDE CUTTING FLESHING TOOL
Charles W. Culdice, Wentworth, Wis.
Application November 6, 1946, Serial No. 708,150
1 Claim. (Cl. 69—20)

A hand tool for fleshing pelts, comprising a block having a cut out center portion to form a substantially V-shaped frame, the rear edge of said frame being curved to form hand holds at each outer end of said frame, means secured to said legs for the bracing thereof, a wire passing through the legs of the frame and the bracing means thereon, one end of the wire being threaded, and a threaded nut engaging the threaded end of the wire for tightening purposes.

2,450,503
METHOD OF FORMING PLASTIC COATING COMPOSITIONS ON SURFACES
Folsom E. Drummond, Westfield, N. J., assignor to Chemical Developments Corporation, Dayton, Ohio, a corporation of Ohio
No Drawing. Original application March 11, 1941, Serial No. 382,776. Divided and this application March 8, 1947, Serial No. 733,429
4 Claims. (Cl. 117—106)

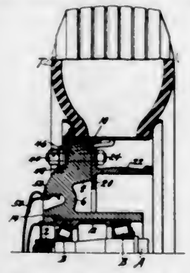
1. A method of providing a surface with a tough resinous coating comprising atomizing styrene, atomizing stannic chloride, intimately mixing the styrene and stannic chloride mists obtained, depositing the mixed spray on the article to be coated, and allowing it to air dry.

2,450,504
SCREW DRIVER HAVING REMOVABLE RATCHET GRIP
Ernest G. Farson, Xenia, Ohio
Application October 17, 1944, Serial No. 559,018
1 Claim. (Cl. 145—61)



In a screwdriver having a handle and a shank projecting from one end of the handle, a flat plate secured on the opposite end of the handle and having a plurality of angularly spaced apart lugs upstanding from the side thereof opposite the handle, and a hollow cap fitted over the plate attached end of the handle and having an end wall provided on its inner surface with a plurality of angularly spaced apart, beveled ratchet teeth engageable with said plate lugs to restrain said cap against rotation in one direction relative to said handle.

2,450,505
DRY-CLEANING EMULSION
John R. Fisher, Jr., Dayton, Ohio, assignor to The Commonwealth Engineering Company of Ohio, Dayton, Ohio, a corporation of Ohio
No Drawing. Application May 31, 1946, Serial No. 673,605
2 Claims. (Cl. 252—161)



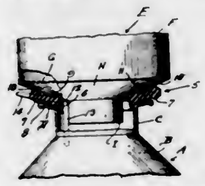
2. A dry-cleaning emulsion consisting of 50 parts by volume of carbon tetrachloride; 50 parts by volume of water; 5 parts by volume of a water-soluble emulsifying agent; and 5 parts by volume of benzylated lauryl alcohol.

2,450,506
VEHICLE SUSPENSION
Howard A. Flogaus, Wallingford, Pa., assignor to A C F-Brill Motors Company, New York, N. Y., a corporation of Delaware
Application July 27, 1943, Serial No. 496,278
2 Claims. (Cl. 267—21)

1. The combination with a vehicle frame and supporting axle, a bearing bracket secured to the vehicle frame, a cylindrical member mounted in said bearing bracket for rotational movement relative thereto, coupling means fixed on said cylindrical member and acting as thrust collars preventing endwise movement of the cylindrical member relative to said bearing bracket, support brackets secured to the vehicle frame fore and aft of said bearing bracket, resilient units secured to said support brackets and each including cylindrical means disposed substantially in alignment with said first named cylindrical member, radius arms connected to said cylindrical means and also connected to said coupling means and supporting axle to resiliently support the vehicle through torsional shear action of said resilient units.

2,450,507
VEHICLE WHEEL
Howard A. Flogaus, Wallingford, Pa., assignor to A C F-Brill Motors Company, New York, N. Y., a corporation of Delaware
Application July 27, 1943, Serial No. 496,279
6 Claims. (Cl. 301—6)

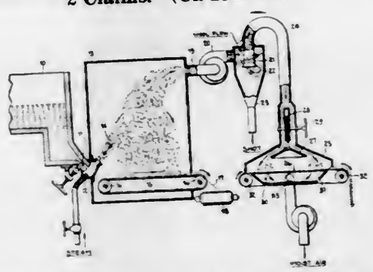
1. In a one piece wheel, a hub, a rim, spaced lugs projecting outwardly from said rim and adapted to directly receive a demountable tire retaining rim and hold the same in spaced relation to said rim, and a substantially imperforate plate joining said hub and rim, said hub, rim, plate, and the spaced outwardly projecting lugs being formed of a light weight material having a specific gravity of less than one-half that of iron and a thermal conductivity of more than three times that of iron.



2,450,508
TIN PLATE TREATMENT
Charles E. Glock, Baltimore, Md., assignor to Crown Cork & Seal Company, Inc., Baltimore, Md., a corporation of New York
No Drawing. Original application September 12, 1945, Serial No. 615,916. Divided and this application March 29, 1948, Serial No. 17,809
2 Claims. (Cl. 204—28)

1. In the method of treating a continuous strip of tin plate in a line wherein the tin coating is electrolytically deposited and then flow brightened, the steps of treating such bright finished tin plate to render the same resistant to the action of food acids and sulphur stains comprising subjecting the surface of the flow brightened tin plate to a light rubbing action which does not deteriorate the flow brightened finish, then subjecting the brightened tin plate to an aqueous acid electrolytic bath in which the tin plate is the cathode for from about three to about ten seconds, the bath being maintained at a temperature between about 170° F. and 200° F. and the current density at the cathode being about ten amperes per square foot to about 100 amperes per square foot, the bath consisting essentially of about 0.25% to 5.0% chromic acid and not more than about 0.01% SO_4 radical.

2,450,509
TIN PLATE TREATMENT
Charles E. Glock, Baltimore, Md., assignor to Crown Cork & Seal Company, Inc., Baltimore, Md., a corporation of New York
No Drawing. Application September 12, 1945, Serial No. 615,916
2 Claims. (Cl. 204—28)

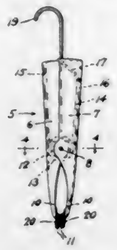


1. In the method of treating a continuous strip of tin plate in a line wherein the tin coating is electrolytically deposited and then flow brightened, the steps of treating such bright finished tin plate to render the same resistant to the action of food acids and sulphur stains comprising subjecting the surface of the flow brightened tin plate to a light rubbing action which does not deteriorate the flow brightened finish, then subjecting the brightened tin plate to an aqueous alkaline electrolytic bath in which the tin plate is the cathode for from about three to about ten seconds, the bath being maintained at a temperature between about 170° F. and 200° F. and the current density at the cathode being about ten amperes per square foot to about 100 amperes per square foot, the bath consisting essentially of about .3% to 2.0% sodium dichromate and about 1.5% to 6% trisodium phosphate.

2,450,510
MILK CAN STRAINER ACCOMMODATING ATTACHMENT
Peter P. Hanson, Pocahontas, Iowa
Application January 7, 1946, Serial No. 639,627
2 Claims. (Cl. 210—155)

1. A rubber gasket ring adapted to be interposed between a conventional type milk strainer and an associated milk can and comprising a ring having on its inner peripheral edge a depending endless lip adapted to telescope into the interior of the milk can neck, the under side of said ring, adjacent the outer peripheral edge of the ring, being provided with a V-shaped rib adapted to fit down tight against the outer marginal edge of the usual bead on the flange of the milk can neck, the upper surface of said ring being provided with an inner annular rib and a radially spaced complemental outer V-shaped upstanding marginal rib, said ribs being spaced apart to provide a channelway therebetween and said ribs being adapted to seat a portion of the strainer while retaining a predetermined area thereof away from contact with said ring.

2,450,511
APPARATUS FOR DIVERTING MINERAL WOOL FROM BLOW ROOMS
Harold R. Harner, Ralph L. Lindemuth, and Alton L. Jones, Joplin, Mo., assignors to The Eagle-Picher Company, Cincinnati, Ohio, a corporation of Ohio
Application January 24, 1945, Serial No. 574,412
2 Claims. (Cl. 154—27)

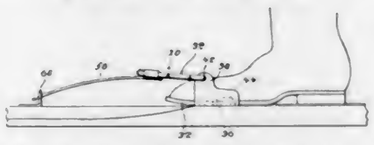


1. In combination with a mineral wool blow room, an apparatus connected to an elevated point in one of the walls of said room, said apparatus comprising suction means for exhausting a portion of the wool contents of the blow room into the apparatus, pneumatic centrifugal means for purifying the wool of shot, pipe means for delivering the so purified wool to a conveyor, distributing means at the delivery end of said pipe for distributing the wool uniformly on the said conveyor, a foraminous conveyor positioned below said distributing means adapted to receive wool deposited thereon by the distributing means and to form a continuous strip of wool and suction means arranged on the under side of said conveyor to suck continuously the air from the stream of wool being deposited on the upper conveyor surface through the conveyor belt whereby to speed strip formation.

2,450,512
GARMENT HANGER
William F. Helwig, West Allis, Wis.
Application January 23, 1946, Serial No. 642,913
1 Claim. (Cl. 223—96)

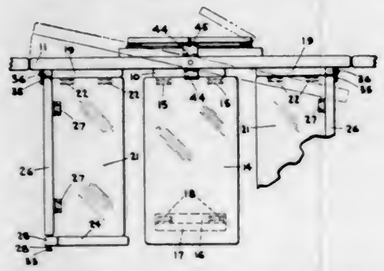
A trouser hanger comprising, opposed substantially U-shape body members having inturned upper ends of different lengths, a spacer between certain portions of the body members, a pivotal pin passing through aligned apertures in the body members and spacer and retaining the same together, substantially U-shape arms formed on the body members below the pivotal pin thereof, jaws secured to the lower ends of said arms in opposed relation to one another, padding secured

to the inner opposed surfaces of the jaws, a coil spring having its convolutions loosely surrounding the periphery of the spacer with one end thereof extending through a hole in the longer inturned end of the adjacent body member and



its opposed end bearing against the inner surface of the other body member, and a hook formed on the outer end of that end of the coil spring extending through the aforesaid hole in the inturned end of the body member.

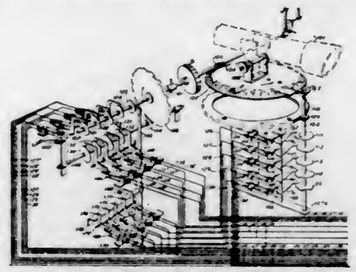
2,450,513
SOREL CEMENT
Dean S. Hubbell, Sharpsburg, Pa., assignor to H. H. Robertson Company, Pittsburgh, Pa., a corporation of Pennsylvania
No Drawing. Application June 29, 1945, Serial No. 602,398
3 Claims. (Cl. 106—106)



1. A cementitious material possessing superior water resistance and strength comprising a magnesium oxychloride cement containing a finely divided cupreous powder, the major portion of whose particles are of a size of the order of a few microns, said cupreous powder comprising essentially metallic copper particles having protective cuprous oxide films thereon and a substantial proportion of cuprous oxide, said cupreous powder being present in an amount substantially less than the amount of the cement.

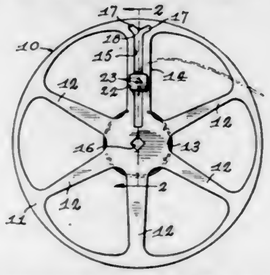
2,450,514
SKI BINDING
Karl G. Humlegard, Washington, D. C.
Application July 27, 1945, Serial No. 607,391
2 Claims. (Cl. 280—11.35)

1. In a ski, the combination of a pair of toe irons adjustably secured to the face of the ski for receiving a shoe sole and each having an upright side flange and a base plate, said flanges having pivot apertures with axes converging in a rearwardly direction of the ski, a plurality of upstanding spaced pins secured to each base plate and adapted to fit within cooperative openings of a shoe sole to positively retain the same against slippage relative to the base plate, a wire member for releasably retaining said shoe sole against said pins and said base plates, said wire member including a substantially U-shaped bight portion, arm elements diverging therefrom rearwardly of the ski, supporting portions extending from said arm elements parallel to said toe iron flanges, pivot portions extending at right angles from said supporting portions and rotatably mounted in said pivot apertures and shoe sole engaging portions extending from said pivot portions in a plane parallel to said supporting portions and adapted to engage the shoe sole to retain the same interlocked with said upstanding pins, a substantially T-shaped means having its aligned transverse cross arms curved around said bight portion and its central leg terminating in a semi-cylindrical groove directed away from the face of the ski, a substantially U-shaped spring wire element for yieldingly rotating the wire member, said spring wire element having its bight portion located in said semi-cylindrical groove and its legs passing under the arms of said T-shaped means and said bight portion, a bracket secured to said ski and having an aperture for receiving and anchoring the terminal portions of the legs of said spring.



2,450,515
FOLDING BREAKFAST NOOK
Opees V. Kendall, Elkhart, Ind.
Application July 16, 1946, Serial No. 683,896
5 Claims. (Cl. 155—123)

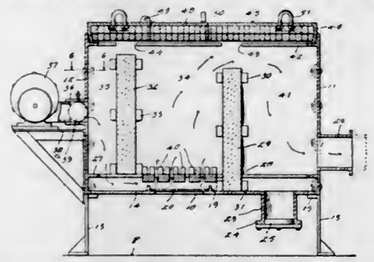
5. A piece of furniture hingedly connected with a partition or the like and having a leg pivotally attached to it, said leg being adapted to swing by gravity in and out of furniture supporting position, when the piece of furniture is moved in or out of operative position, wherein the piece of furniture is a table and a spring clip on the partition adapted to engage and hold the table top in folded position, a bench seat pivotally connected with the partition, a bench back hingedly fastened to the seat and a bench leg fastened to the free end of the seat by hinges and extending upwardly to form a back end, the partition being supported pivotally about a vertical axis.



2,450,516
TELEMETRIC DATA TRANSMISSION SYSTEM
Fullerton S. Kinkead, deceased, late of New York, N. Y., by Rita Smith Kinkead, administratrix, Trudeau, N. Y., and Walter A. Phelps, Madison, and Edward M. Smith, Montclair, N. J., and Fred J. Singer, Rockville Centre, N. Y., and Lawrence E. Melhuish, Glen Ridge, N. J., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application January 11, 1944, Serial No. 517,824
7 Claims. (Cl. 177—351)

2. In a data transmission system, a transmission circuit, five separate independent alternating current conducting channels in said circuit corresponding to five elements of a permutation code, means connected to said circuit for translating any numeral in one place in a multidigit number into alternating current signal elements in accordance with combinations in said five-element code requiring for transmission changes in the conditions of four of said channels only while

said fifth channel remains unchanged in one of two possible conditions and means for translating combined digits in two other places in said number into single code combinations requiring changes in the conditions of all of said five channels.

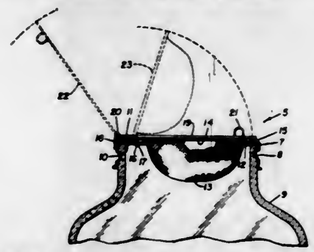


2,450,517
MOTION-PICTURE FILM REEL
Aubrey Koppel, Montreal, Quebec, Canada
Application January 10, 1946, Serial No. 640,262
7 Claims. (Cl. 242—70)

1. A film reel comprising side flanges and a core, a radially disposed slot in each flange having a bifurcated outer extremity, a stay in marginal engagement with each slot, cross members joining the stays, the whole slidable in the slots and film clamping means pivotally attached to the cross members and means to open and close the film clamping means.

2,450,518
AIR HEATER FOR CASTINGS
Alexander M. Lister, Philadelphia, Pa.
Application March 18, 1944, Serial No. 527,066
5 Claims. (Cl. 263—19)

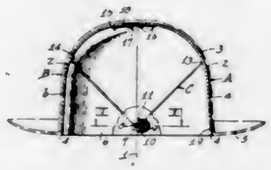
1. An air heating furnace of the character stated, comprising a rectangular structure having side, end and bottom walls and a removable top wall closing the top of the structure, means for introducing air through one end wall, means for carrying off air from the structure at the other end wall, a flange encircling the interior of the structure adjacent to the bottom wall and carried by the end and side walls, said flange in the side wall portions having oppositely positioned breaks therein, a pair of transversely extending fire resistant walls within the structure, one of said walls being adjacent to the air outlet and extending downwardly through the said breaks in the flange and resting upon the bottom wall, the other one of the transverse walls being supported upon the opposite side wall portions of the flange adjacent the end wall having the air admission means therein, the space between said transverse walls forming a fire box, a grate



structure supported in spaced relation with the bottom wall in the lower part of said fire box, and said transverse walls being maintained for vertical sliding movement to facilitate removal through the top of the structure when the top wall is removed.

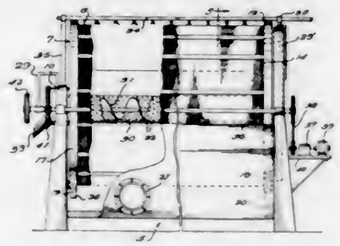
2,450,519
BELT CONNECTOR
Julius A. Luther, Cincinnati, Ohio
Application March 24, 1944, Serial No. 527,888
1 Claim. (Cl. 24—31)

A belt connector, as an article of manufacture, consisting of a pair of cylindrical close coiled spring elements, separably coupled by several coils at the terminal of one element of reduced cylindrical dimension forming a stud for a threading engagement into an end of the second element, the coils of the stud having an outside diameter greater than the inside diameter of the coils of the second element cooperating therewith for a coupling union, and the belt joining end of each element, respectively having an end convolution of eccentric form to extend beyond the circumference of the adjoining convolutions for a self-initiating and impinging engagement upon the belt in effecting the union by relative rotative and advancing movements of the belt and connector element.



2,450,520
STRAINER CAP
Gerald W. Maddux, Huntington, W. Va.
Application December 6, 1946, Serial No. 714,418
1 Claim. (Cl. 210—155)

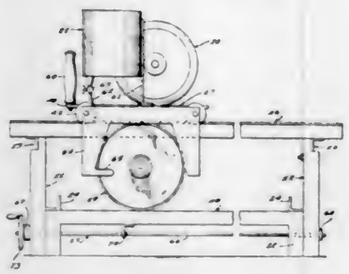
A strainer cap comprising in combination, an annular cap member adapted for positioning on



a receptacle and including a circular opening, a substantially semi-spherical screen positioned in said opening, a wire rod secured at the edge of said screen and constituting a marginal rim, a U-shaped finger piece formed medially the length of said rod, the end portions of said rod forming a pair of hinge pintles and being rotatably attached to said cap member, a cover also hinged to said member, said cover being registrable with said screen, and a handle provided on said cover.

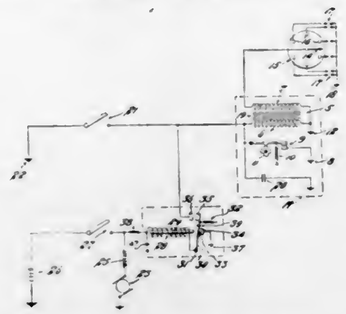
2,450,521
ADJUSTABLE HAT FORM
August Moebes, Vallejo, Calif.
Application April 2, 1946, Serial No. 658,991
4 Claims. (Cl. 223—84)

4. An adjustable hat form adapted for use in cleaning hats of different sizes and having the general configuration of a hat crown; the form comprising two sections abuttable together along a medial vertical plane; the form sections having smooth exterior surfaces and being made for insertion into the crown of a hat to prevent the latter from folding inwardly under pressure of a brush or the like used in cleaning the outer surface of the crown; a rod pivotally securing the form sections together adjacent to the bottoms of the form sections; the latter being arranged to have limited separation with respect to each other on the rod; a spring coiled around the rod and having its opposite ends bearing against the inner surfaces of the form sections intermediate the heights of the latter; the spring being arranged for urging the form sections to move away from each other and snugly bear against opposing portions of the hat crown; and means limiting the separation of the tops of the form sections relative to one another.



2,450,522
LIQUID CLARIFIER
James P. North, Green Bay, Wis.
Application July 3, 1946, Serial No. 681,315
2 Claims. (Cl. 210—199)

1. In a liquid clarifier, a drum comprising a foraminous body having longitudinal radially disposed vanes on the inside thereof, an imperforate disk closing one end of the body and having a central cylindrical discharge neck rigid therewith, an annulus at the other end of the body, said disk and said annulus being concentric with the axis of and of a diameter greater than said body, and tie bolts connecting said disk and said annulus and disposed about said body, in combination with rollers engaging the peripheries of the disk and the annulus to rotatably support the drum, a driven shaft journaled at one side of the drum, and a chain gearing between said shaft and said neck.

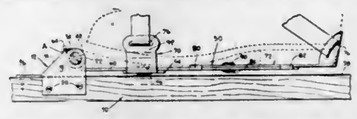


2. In a liquid clarifier, a drum comprising a foraminous body having longitudinal radially disposed vanes on the inside thereof, an imperforate disk closing one end of the body and having a central cylindrical discharge neck rigid therewith, an annulus at the other end of the body, said disk and said annulus being concentric with the axis of and of a diameter greater than said body, and tie bolts connecting said disk and said annulus and disposed about said body, in combination with rollers engaging the peripheries of the disk and the annulus to rotatably support the drum, a driven shaft journaled at one side of the drum, a chain gearing between said shaft and said neck, a tank carrying said rollers and within which the lower half of said tank revolves, said tank having a bearing at one end in which said neck is journaled, a stationary perforated trough supported axially of the drum and communicating at one end with said neck, a rotatable conveyor screw in said trough having a shaft projecting outwardly through said neck, and a chain gearing between said drive shaft and the projecting end of the shaft of said conveyor screw.

2,450,523
PORTABLE TILE CUTTER
Charles F. Parker, Culver City, Calif.
Application April 18, 1947, Serial No. 742,411
2 Claims. (Cl. 125—14)

1. A portable tile cutting machine comprising a rigid table of light weight material; a trackway above and substantially parallel to said table; means adjustably supporting said trackway from said table; manually operable adjusting means operatively associated with said supporting means to vary the distance between said trackway and said table; a carriage having wheels supported on said trackway; a bracket adjustably secured to a depending carriage portion; a shaft journalled on said bracket; a motor mounted on said carriage; a belt drive between said motor and said shaft; means adjustably connecting said shaft carrying brackets to said depending platform portions whereby said shaft may be moved to adjust the tension of said shaft driving belt; and a cutting disc fixed on one end portion of said shaft.

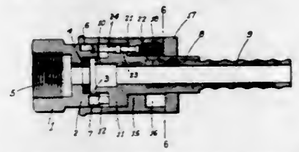
2,450,524
STARTING AND IGNITION SYSTEM
Charles W. Root, Sidney, N. Y., assignor to Bendix Aviation Corporation, New York, N. Y., a corporation of Delaware
Application June 8, 1944, Serial No. 539,335
11 Claims. (Cl. 123—179)



1. In an ignition system for an internal combustion engine, a magneto generator having an ignition coil comprising a primary winding, a circuit breaker connected across said winding, means for periodically opening said circuit breaker, a source of electrical energy, a motor, a solenoid comprising an induction coil, means including a switch connecting said motor and one end of said induction coil to said source, an armature movable by said solenoid when the latter is energized by said source, a pair of contacts movable with said armature, means connecting said contacts with the other end of said induction coil, a stationary contact connected to ground and adapted to be engaged by one of said movable contacts, resilient means for normally holding said last-named contacts in engagement to close a circuit containing said induction coil and said source, a second stationary contact engageable by the other of said movable contacts when said armature is electromagnetically attracted by said solenoid, and means for connecting said second stationary contact to the ungrounded end of said primary winding.

2,450,525
PREPARATION OF MACARONI PRODUCTS
René Samson, Montreal, Quebec, Canada
No Drawing. Application August 4, 1945, Serial No. 609,015
In Canada July 13, 1943
1 Claim. (Cl. 99—85)

In a process for manufacturing macaroni, spaghetti and the like uncooked alimentary pastes, for the purpose of controlling the cooking time of said pastes, the step of adding to the semolina flour used in such manufacture an aqueous solution of a colloid from the group consisting of pectin, algin and gelatin, the percentage of solid colloid to the semolina flour being comprised between 1% to 5%.

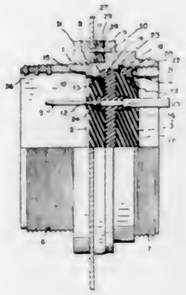


2,450,526
SKI BINDING
John Henry Schleder, Los Angeles, Calif.
Application July 31, 1944, Serial No. 547,369
1 Claim. (Cl. 280—11.35)

A ski binding comprising: anchorage means adapted to be secured to the body of a ski, and providing an ear extending upwardly from each side of the ski; a forwardly extending bracing part extending from substantially the top of said ears to the ski body; a spindle extending between and removably secured in ears in spaced relation to said ski body; bearing elements positioned on said spindle and abutting the inwardly facing surfaces of said ears; one of said bearing elements having a cylindrical bearing surface and a peripheral flange of greater diameter than said bearing surface and provided with a plurality of openings; a foot plate having the toe end formed to provide a cylindrical housing mounted on and guided for swinging movement by said bearing elements and inwardly facing surface of one of

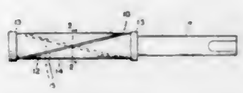
said ears and the side of the peripheral flange on one of said bearing elements; a coiled spring surrounding said spindle and within the cylindrical housing, one end of said spring engaging in and bearing against said housing and the other end of said spring engaging with bearing element having a peripheral flange; a removable pin adapted to be placed in said openings and engaged by the wall thereof; and an abutment formed on said anchorage means and acting to hold said peripheral flange when said spring has been placed under a desired tension, said bracing part tending to deflect and prevent snow from packing underneath said foot plate.

2,450,527
SEMIAUTOMATIC COUPLING
Vernon C. Smith, Stockton, and Paul E. Bohn, Angels Camp, Calif., assignors to P. & V. Quicklocking Co., Stockton, Calif., a corporation of California
Application October 27, 1945, Serial No. 624,966
5 Claims. (Cl. 285—177)



1. In a coupling which includes male and female members, a sleeve included with and turnable on the female member, means between the sleeve and male member and functioning upon relative rotation of the sleeve from a predetermined position to engage and hold the members in coupled connection subsequent to an initial engagement of the members with each other, and a spring tending to so rotate the sleeve; means to hold the sleeve against movement from such position and so that the spring is loaded, and means functioning upon such initial engagement of the members to release the holding means.

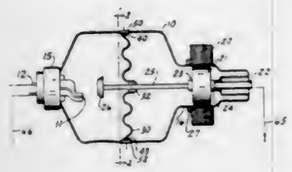
2,450,528
ELECTRICAL CONNECTOR
Edward A. Sprigg, Toledo, Ohio, assignor to H. H. Buggie & Company, Toledo, Ohio, a corporation of Ohio
Application December 18, 1944, Serial No. 568,720
7 Claims. (Cl. 174—77)



1. An electrical connector comprising a shell, a body within said shell having a hole extending

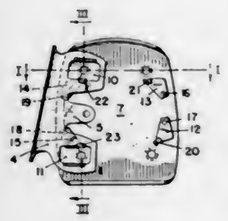
therethrough longitudinally of said shell, a sealing device within said shell comprising a pressure plate and a yieldable sealing member bonded to said plate, said sealing member having a body portion at one side of the plate and an annular flange portion encircling said plate and terminating in an annular enlargement, an elec-

trical contact extending within the hole in said body and through said pressure plate and sealing member and bonded around its periphery to said sealing member, and means within said shell exerting pressure upon said enlargement to hold said sealing member against said body and to displace said sealing member into tight engagement with said shell.



2,450,529
METHOD OF MAKING ELECTRICAL SOCKET CONNECTIONS
Edward A. Sprigg, Toledo, Ohio, assignor to H. H. Buggie & Company, Toledo, Ohio, a corporation of Ohio
Application January 22, 1945, Serial No. 573,853
2 Claims. (Cl. 29—155.55)

2. The method of making a spring metal electrical connector socket comprising forming a bore in the socket having a diameter somewhat greater than the external diameter of the contact pin to be engaged in the socket, cutting opposite sides of the socket to form slots extending in planes diagonally disposed with respect to each other, and reducing the internal diameter of the bore by twisting the slotted portion of the socket beyond the elastic limit of the metal to set the metal to said reduced diameter.

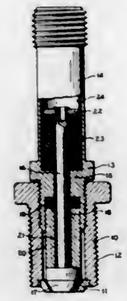


2,450,530
X-RAY RECTIFYING MECHANISM
David Sussin, South Fort Mitchell, Ky., assignor to The Kelley-Koett Manufacturing Company, Covington, Ky., a corporation of Ohio
Application March 21, 1945, Serial No. 583,949
14 Claims. (Cl. 250—101)

1. An X-ray tube comprising a high vacuum container, a filament therein, means for effecting controlled heating of said filament, a target, mechanical rectifying means for the high voltage current comprising movable contractors mounted within said container, and means operable from

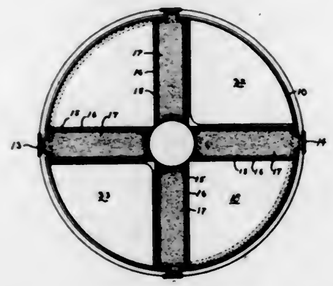
the outside of said container for causing rectifying movement of said rectifying means.

2,450,531
SKI BINDING
Frank Georg Tappé, Oslo, Norway
Application October 15, 1945, Serial No. 622,401
In Norway May 3, 1944
Section 1, Public Law 690, August 8, 1946
Patent expires May 3, 1964
1 Claim. (Cl. 280—11.35)



A ski binding, comprising angularly shaped side irons adapted to rest with one leg on the top of the ski or on a mounting plate attached thereto, and a cover plate adapted to rest on top of the side irons and to lock the same to the top of the ski or the mounting plate by means of screws adapted to pass through the said elements and into the ski, means attached to the under-side of the cover plate adapted to engage the side irons and adjustably attach the same to the cover plate, said means consisting in hook formed springs adapted to grip over the edge of the side iron.

2,450,532
INSULATING MEANS AND METHOD OF MAKING THE SAME
Tullio Tognola, Sidney, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Original application July 9, 1940, Serial No. 344,506. Divided and this application March 30, 1942, Serial No. 436,831
7 Claims. (Cl. 174—209)

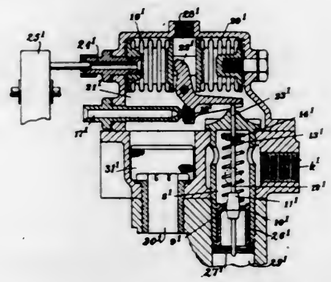


1. The method of making electrical insulators which includes the steps of mixing powdered electrical insulating material, such as ceramic material, and metallic powder in a dry state, dampening said powdered mixture, separately placing said mixture and a quantity of dampened

insulating powder in different portions of a mold, compressing the contents of said mold, and bak-

ing the contents of said mold until the same is dried.

2,450,533
ADSORPTION APPARATUS
Edmund M. Velten, Dayton, Ohio, assignor to Chemical Developments Corporation, Dayton, Ohio, a corporation of Ohio
Application December 4, 1944, Serial No. 566,625
In Canada August 7, 1943
2 Claims. (Cl. 183—4.3)

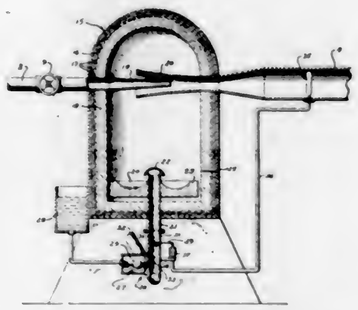


2. In an adsorber a cylindrical body or casing, a closed cylindrical member of relatively smaller diameter concentrically disposed within said casing, four equidistantly spaced beds extending radially from the outer periphery of said cylindrical member of smaller diameter to the inner periphery of said casing, a distributing plate forming the bottom support for said beds, said plate having two diametrically opposite apertures permitting flow of fluids therethrough, a distributing plate resting adjacent the top portion of said beds, said plate having two diametrically opposite apertures thereon for the flow of fluids therethrough, inlet and outlet connections on opposite ends of said adsorber adapted to cooperate with said distributing plates for the flow of fluids through said beds, the apertures in said first mentioned distributing plate and the apertures in said second mentioned distributing plate being contraposed, whereby fluids passing through the apertures of one of said distributing plates are caused to flow through said beds before passing through the apertures of the other distributing plate.

2,450,534
EMULSION PRINTING INKS
Andries Voet, New York, N. Y., assignor, by mesne assignments, to J. M. Huber Corporation, New York, N. Y., a corporation of New Jersey
No Drawing. Application August 4, 1945, Serial No. 609,014
13 Claims. (Cl. 106—28)

1. A printing ink comprising a stable dispersion of coloring matter consisting substantially of vehicle-insoluble pigment in a vehicle composed essentially of water emulsified in water-immiscible ink vehicle liquid with a long-chain nonaromatic amine containing a linear hydrocarbon chain of at least 15 carbon atoms and having at least 18 carbon atoms attached to a nitrogen atom through carbon bonds, said ink being of the water-in-oil emulsion type and having a yield value and a rate of flow substantially as good as those of an ink composed of the same amounts and kinds of coloring matter and water-immiscible ink vehicle liquid only.

2,450,535
MEANS FOR AUTOMATICALLY CONTROLLING THE SUPPLY OF LIQUID FUEL TO A PRIME MOVER
Ernest Ansley Watson, Gibbet Hill, Coventry, and Richard Joseph Ifield, Ealing, London, England, assignors to Joseph Lucas Limited, Birmingham, England
Application February 7, 1944, Serial No. 521,470
In Great Britain December 16, 1942
3 Claims. (Cl. 158—36.3)

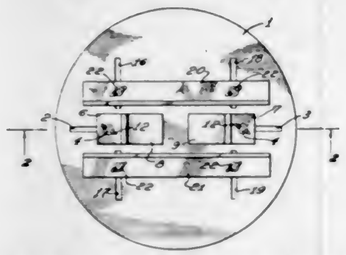


1. Means for automatically controlling the supply of liquid fuel from a pump to a prime mover having associated with it a blower for supplying the air required for combustion of the fuel, comprising the combination of a chamber through which the liquid fuel can flow, from the pump to the prime mover, an annulus slidably mounted in the chamber, a tapered plug arranged in the chamber coaxially with the annulus and forming with the latter a variable orifice for controlling the flow of fuel through the chamber, the annulus and plug being such that their relative positions and consequently the area of the orifice are dependent on the difference of fluid pressure at the opposite sides of the orifice, an axially movable stem on which the plug is provided, a loading spring associated with both the annulus and plug, a lever adapted to be moved by and to impart movement to the stem, means for actuating the lever in response to blower-air pressure, and means operable by the lever for controlling the flow of fuel to the said chamber.

2,450,536
ANIMAL TRAP
Samuel Albert Whitbread, Sydney, New South Wales, Australia, assignor to Anthony Louison, Sydney, New South Wales, Australia
Application March 20, 1944, Serial No. 527,228
In Australia May 18, 1943
6 Claims. (Cl. 43—92)

1. In an animal trap of the character described and including a trap base, openable and closable jaws mounted thereon, and a pad hinge-leaf pivotally mounted relative to said base: a catch assembly comprising an upstanding part of said base which is disposed within the space bounded by the jaws of the trap when in open position and which has an upright slot therein, a catch which is pivotally connected by one end to said hingle-leaf and whereof the free end is adapted to obstruct a trap jaw while projecting through said slot and in contact with the said upstanding part at the upper end of said slot, and means interposed between said upstanding part and the aforesaid one end of said catch and arranged under and in substantial alinement with said catch, said means constituting a limit of movement for said catch and being engageable with the latter while the catch is still in said slot, whereby said free end is constrained to remain within said slot for any position of said catch.

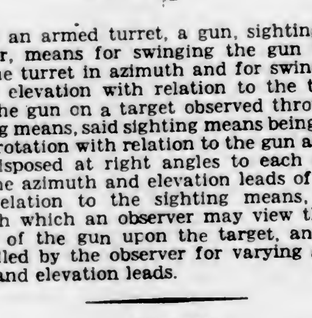
2,450,537
APPARATUS FOR EXTINGUISHING FIRES
Hilding V. Williamson, Chicago, Ill., assignor to Cardox Corporation, Chicago, Ill., a corporation of Illinois
Application August 17, 1945, Serial No. 611,009
11 Claims. (Cl. 169—11)



7. A heater for elevating the temperature of carbon dioxide being delivered through a conduit from a carbon dioxide container to a place of use, said heater comprising a shell having insulated walls, an aspirator jet therein including an inlet nozzle and an outlet Venturi for connection into the conduit with the nozzle disposed to receive carbon dioxide from the container, a duct extending into the interior of said shell, and means for delivering a combustible fuel to said duct for combustion inside the shell.

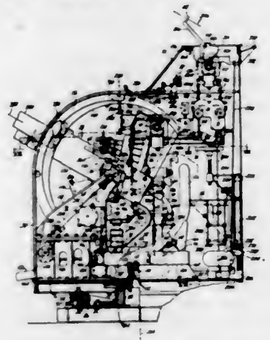
2,450,538
FOLDING SKI
John Paul Beaudin, Montreal, Quebec, Canada
Application October 19, 1946, Serial No. 704,517
6 Claims. (Cl. 280—11.13)

2. A folding ski comprising separable front and rear ski sections adapted to be slidably moved into and out of interlocking engagement, a hinge member including a hinge plate rigidly secured to one ski section and a guide plate having one end hingedly connected to said hinge plate, said remaining ski section being slidably connected to said guide plate, and adjustment means adapted to slide said last mentioned ski section into and out of interlocking engagement with the other ski section.



2,450,539
DOLLY WHEEL PLATE
Joseph L. Brock, Arcadia, Calif.
Application July 22, 1947, Serial No. 763,290
2 Claims. (Cl. 188—32)

1. A wheel clamp including a circular base having a pair of longitudinal diametrically aligned perforations therein and two pairs of parallel longitudinal perforations perpendicular to the aforenamed perforations and symmetrically positioned intermediate in the center of the base and the periphery thereof, a pair of wheel blocks having perforations at the outer ends thereof, bolts seated in said diametrically aligned perforations and extending through the perforations of the blocks for the purpose of clamping the blocks in adjusted position on the base, a pair of angle bars having perforations therethrough for registration with said sets of perpendicular perforations, and bolts seated in the latter and extending through the perforations of said bars to lock the bars in properly adjusted position relative to the wheel blocks.



2,450,540
BOMB RACK MAGAZINE WITH RELEASE MECHANISM
Joseph C. Cantley, Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application May 31, 1944, Serial No. 538,108
9 Claims. (Cl. 89—1.5)

1. An aircraft flare magazine comprising means for supporting a plurality of flares in superposed relation, means urging said supporting means into inoperative positions, latches for holding said supporting means in operative positions, a latch release shaft, means carried by said shaft for causing successive release of said latches in response to successive turning movements of said shaft, means for operating said shaft, and means carried by said shaft for maintaining said latches

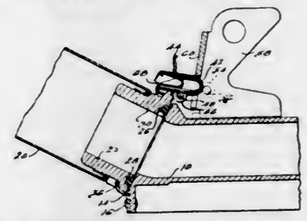
in inoperative positions until said shaft has returned to an initial position.

2,450,541
ARMED TURRET
Ernest E. Chase, Ernest S. Nokes, and Frank E. Stratton, Beverly, and William V. Goodhue, Ipswich, Mass., assignors to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application March 27, 1945, Serial No. 585,150
8 Claims. (Cl. 89—41)

1. In an armed turret, a gun, sighting means therefor, means for swinging the gun together with the turret in azimuth and for swinging the gun in elevation with relation to the turret to train the gun on a target observed through said sighting means, said sighting means being mounted for rotation with relation to the gun about two axes disposed at right angles to each other to vary the azimuth and elevation leads of the gun with relation to the sighting means, a sight through which an observer may view the effect of fire of the gun upon the target, and means controlled by the observer for varying said azimuth and elevation leads.

2,450,542
HAIR CURLER
Elizabeth Eppich, Cleveland, Ohio
Application January 29, 1946, Serial No. 644,050
6 Claims. (Cl. 132—40)

3. A hair dressing device comprising an elongated body having an outer surface about which hair may be curled, a hair retaining arm disposed wholly outside said body surface, means at one end of the body pivotally mounting the arm at one end for swinging movement in a plane disposed wholly outside of said outer surface, the other end of said arm being free, the arm being swingable to and from a hair retaining position

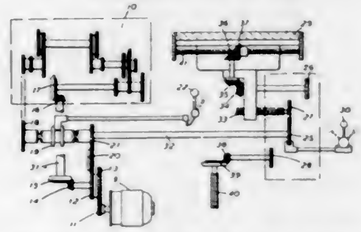


in which the arm parallels the body in closely overlying relation thereto but is disposed wholly outside said body surface, and said mounting means being movable on the body to carry the arm about the body while keeping the arm in hair retaining position.

2,450,543
HERBICIDAL COMPOSITION
Albert L. Flenner, Wilmington, Del., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
No Drawing. Application March 22, 1945, Serial No. 584,251
3 Claims. (Cl. 167—45)

3. A composition of matter, useful as a plant regulant herbicide, consisting predominantly of 5 to 25 parts by weight of 2,4-dichlorophenoxyacetic acid, 2 to 10 parts by weight of a dispersing agent, and the balance a mutual solvent for the 2,4-dichlorophenoxyacetic acid and the dispersing agent consisting of a mixture of cyclohexanone and hydrogenated naphtha.

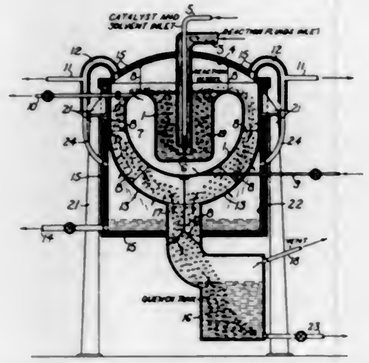
2,450,544
BAG COUPLING
Charles F. Foley, Bloomington, Ill., assignor to Eureka Williams Corporation, a corporation of Michigan
Application November 27, 1945, Serial No. 631,051
6 Claims. (Cl. 285—173)



1. In a bag coupling for a suction cleaner in which the cleaner is provided with an outlet and a face surrounding the outlet, a hollow coupling member having a gasket around the opening therethrough and which gasket is arranged to be seated on said face, said cleaner having a clip positioned below said outlet and a pivoted latch member having a sloping forward face positioned above said outlet, said coupling member having a seat arranged for cooperation with said clip, said clip being cooperable with said seat for locating one side of said coupling member relative to said outlet whereby said coupling member is rockable on said clip, said coupling member having a shoulder aligned with said forward face and arranged to be engaged and held by said pivoted latch when said coupling member is rocked on said clip to position said gasket in sealing relationship with said face, and a release by means of which pressure may be applied to said pivoted latch for disengaging the same from said shoulder.

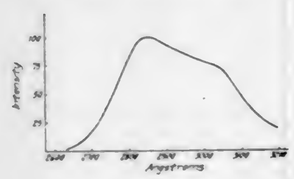
2,450,545
BATON
Harry K. Foster, Pittsburgh, Pa.
Application September 12, 1946, Serial No. 696,455
9 Claims. (Cl. 84—477)

1. A baton provided with a straight twirling pin extending at right angles to and in the plane of its longitudinal center.



2,450,546
MILLING MACHINE CONTROL GEAR
Jack Frye, Broomfield, Abbotts Langley, England
Application August 13, 1945, Serial No. 610,575
In Great Britain December 3, 1943
Section 1, Public Law 690, August 8, 1946
Patent expires December 3, 1963
13 Claims. (Cl. 90—21)

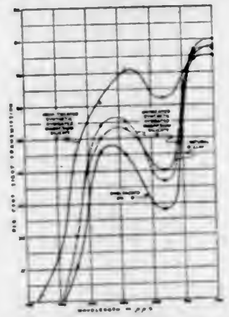
1. Milling machine driving and control gear comprising a driving motor for the milling spindle, a reversing switch for selectively controlling the direction of running of said motor, a second electric motor for adjusting the work table of the machine, a shaft adapted to be driven by said motor at high or low speed according to the setting of a control member, means for selectively coupling said shaft to driving means for raising and lowering the work table, or traversing the work table laterally, or moving the work table to and fro parallel to the milling spindle, and a common control switch for both of said motors having a neutral position in which both motors are at rest, two extreme lateral positions in which the spindle motor and the second motor run in opposite directions to traverse the table in opposite directions, and two other lateral positions intermediate between the neutral position and the extreme lateral positions in which the second motor does not run but the spindle motor runs, so that traverse of the work is stopped before the milling cutter ceases to rotate.



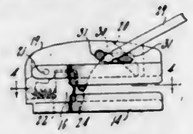
2,450,547
CONTINUOUS PROCESS FOR MAKING SOLID POLYMER
Peter J. Gaylor, Union County, N. J.
Original application December 8, 1941, Serial No. 422,137. Divided and this application May 6, 1944, Serial No. 534,445
4 Claims. (Cl. 260—93)

1. In the continuous process for producing a dispersed solid polymer, the particles of which tend to coalesce during removal from the reactor, said polymer being obtained by polymerizing a polymerizable raw material in liquid phase at low temperature ranging from 0° C. to —100° C., with an active halide catalyst of the Friedel Crafts type and forming a discrete dispersion of solid polymer in liquid, the improvement comprising

continuously screening said polymer immediately after reaction while it is still at low temperature, to separate it from the liquid.



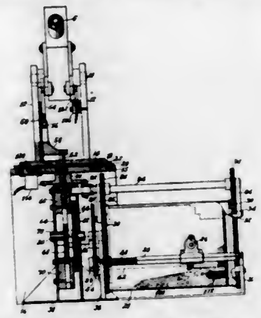
2,450,548
ERYTHEMAL PHOSPHOR
Jacob H. Gisolf, Ferdinand A. Kröger, and Jan Bakker, Eindhoven, Netherlands, assignors to General Electric Company, Inc., Schenectady, N. Y.
Application February 26, 1943, Serial No. 477,327
In the Netherlands June 16, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires June 16, 1961
4 Claims. (Cl. 176—122)



4. An ultraviolet generator embodying a source of short-wave ultraviolet radiation and a fluorescent layer comprising cerium fluoride in which the cerium is present in trivalent form and characterized by resulting radiation in the erythemal ultraviolet when excited by the short-wave ultraviolet radiation.

2,450,549
DECOLORIZING VEGETABLE OILS WITH FERRIC SALTS AND SILICATES
Alexander Greentree, Paulsboro, N. J., assignor, by mesne assignments, to Lyle Caldwell, Los Angeles, Calif.
Application November 24, 1944, Serial No. 564,977
4 Claims. (Cl. 260—428)

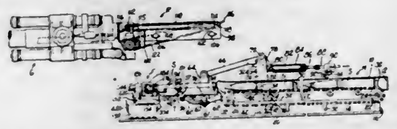
2. In a method of decolorizing vegetable oil, the step which comprises contacting such an oil with a decolorizing composition prepared by treating particles of hydrated magnesium silicate adsorbent material with a water-soluble ferric salt in aqueous solution to cause said ferric salt to become intimately associated with the particles of said material and then drying the treated material, said composition containing from about 0.5% to about 10% of iron on a dry weight basis.



2,450,550
LOCKING SLIDER FOR SLIDE FASTENERS
John B. Griffin, Oakville, and Albert W. Hagan, Stratford, Conn., assignors to United States Rubber Company, New York, N. Y., a corporation of New Jersey
Application July 26, 1945, Serial No. 607,240
5 Claims. (Cl. 24—205.14)

1. A locking slider for engaging and disengaging the elements of separable fasteners, comprising a body having top and bottom wings, a pair of spaced ribs integral with said top wing and extending substantially the length thereof, said ribs forming a channel therebetween which is open at its top, a locking arm pivoted on said body and positioned in said channel, a locking projection on said arm adapted to engage the fastener elements, resilient means acting upon said arm for urging said projection into engagement with said elements, a pull tab, said ribs having laterally aligned elongated slots therein which are encompassed by said ribs for retaining one end of said pull tab on said slider, said end of said pull tab being slidably and pivotally mounted in said slots and adapted to exert a camming action on said locking arm to disengage said locking projection from said elements and to actuate said slider.

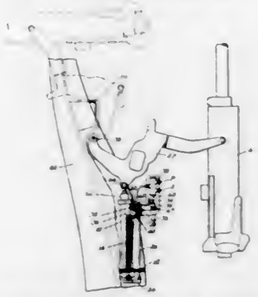
2,450,551
FIRE CONTROL MECHANISM FOR GUNS
Joseph Harrington, Jr., Wenham, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application July 18, 1944, Serial No. 545,465
3 Claims. (Cl. 89—134)



1. In combination, a gun, means mounting said gun for movement in azimuth and elevation, a photoelectric cell, a light source therefor, means operative in response to movement of the gun into a predetermined position for varying the intensity of light from the source to the photoelectric cell and operative in response to movement of the gun into another predetermined position for increasingly varying the intensity of light from the source to the photoelectric cell, means controlled by said cell in response to the variation of light thereto for preventing firing of the gun, and means controlled by said cell in response to an increased variation of intensity of light thereto for locking the gun against movement in certain directions.

2,450,552
CONTROLLING POLYMERIZATION OF POLYHYDRIC ALCOHOL ESTERS OF ALPHA-OLEFINIC DICARBOXYLIC ACIDS WITH ETHYLENIC MONOMERS
Everett C. Hurdis, Passaic, N. J., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application December 30, 1944, Serial No. 570,764
5 Claims. (Cl. 260—45.3)

1. In a method of controlling the oil phase gelling and polymerization of a polymerizable mix comprising a liquid polyhydric alcohol ester of an alpha-olefinic dicarboxylic acid, and a liquid monomeric unsaturated polymerizable compound in which the unsaturation is due to a single terminal ethylenic group which is attached to a negative radical, and in which the said ester is soluble and with which ester it is copolymerizable in the presence of a peroxy polymerization catalyst, said catalyst also being present, that improvement which consists in the step of adding a small but effective amount of a promoter of gelation which is a polyamino compound selected from the class consisting of ethylene polyamines and propylene polyamines, each containing at least one terminal primary amino group, and the N-ylidene derivatives of the foregoing polyamines obtained from their reaction with aldehydes.

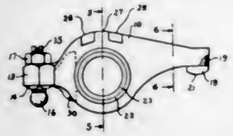


2,450,553
FUSE SETTING MECHANISM FOR GUNS
Bernhardt Jorgensen, Marblehead, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application June 18, 1943, Serial No. 491,353
11 Claims. (Cl. 89—6.5)

4. In combination, means for feeding shells in tandem fuse-setting means positioned to receive the nose of the leading shell and arranged to set

the fuse of the shell while the shell is held motionless, said fuse-setting means including means arranged to be engaged by the nose of the leading shell for interrupting the operation of the feeding means.

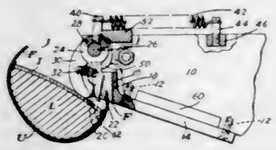
2,450,554
INSTRUMENT POSITIONING DEVICE
Jacob C. Jorgensen, Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application September 20, 1944, Serial No. 555,023
8 Claims. (Cl. 89—41)



3. In combination with a gun mounted to swing upon a horizontal pivot into and away from a stowed or an operative position, a device arranged to move the gun about its pivot, said device comprising a support, a fluid pressure motor resiliently mounted with respect to said support, a power actuated portion of said motor being connected to said gun, valve means arranged to control the passage of fluid to and from said fluid pressure motor to effect the movement of the gun with power, and means operated by an initial bodily movement of the motor and gun to actuate the valve thereby extending the initial movement of the gun by said power movement, said latter means having stop means for closing said valve to limit the extent of the power movement.

2,450,555
EXTRACTION OF RUTIN
Harold Freeman Koones, Clifton, N. J., assignor to S. B. Penick & Company, New York, N. Y., a corporation of Delaware
No Drawing. Application May 20, 1947, Serial No. 749,355
5 Claims. (Cl. 260—210)

1. An improvement in the production of rutin from plant materials containing it which comprises treating the crude material with water in the presence of a water-soluble borate whereby a portion of the crude material including the rutin is dissolved and adding enough water-soluble borate to bring the pH of the solution up to from about 7.0 to about 10.0, removing impurities from the solution in the pH range from about 10.0 to about 5.0, and adjusting the pH of the purified solution to a pH range of from about 4.0 to about 1.0 whereupon purified rutin crystallizes from the solution.

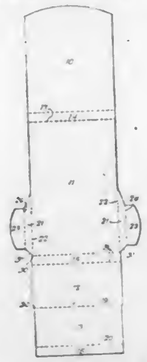


2,450,556
ENGINE ROCKER ARM
James M. Leake, Monroe, Mich.
Application February 19, 1945, Serial No. 578,657
2 Claims. (Cl. 74—519)

1. An engine rocker arm comprising a sheet metal arm member, said arm member comprising spaced side walls, a partial cylindrical wall portion at one end of said arm member, a hollow partial prism wall portion at the other end of said arm member and an upper wall integral with said side walls, said partial cylindrical wall portion and said hollow partial prism wall portion at the upper edges thereof; a hub intermediate the ends of said arm member; a fixed contacting bearing secured in said partial cylindrical wall por-

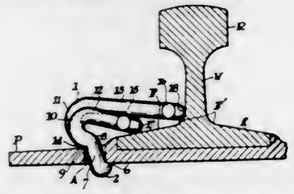
tion; an internally threaded member secured in said partial prism wall portion; an adjustable contacting bearing provided with a threaded stem portion adjustably secured in said internally threaded member, said internally threaded member secured in said partial prism portion intermediate said upper wall and said adjustable contacting bearing; and a hollow member extending from said hub to an aperture in said upper wall.

2,450,557
LASTING DEVICE
Lloyd G. Miller, Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application May 17, 1946, Serial No. 670,505
16 Claims. (Cl. 12—9)



1. A device for use in lasting a shoe having, in combination, a gripper comprising a pair of jaws, means for closing the jaws on the lasting margin of the upper of a shoe, and a fixed wiper positioned adjacent to the gripper for laying the lasting margin of the upper against the shoe bottom as the shoe is moved away from the gripper to tension the upper by pulling it out of the gripper.

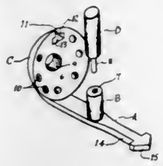
2,450,558
SINGLE BLANK CONTAINER FOR PAPER SHEETS
Oscar H. Ogren, Rockford, Ill.
Application September 20, 1944, Serial No. 554,901
10 Claims. (Cl. 229—16)



1. A container of the kind described formed from a single piece of sheet material without necessity for gumming of any portions and comprising a back, narrow side and bottom portions adapted to be folded forwardly from the side and bottom edges of said back to provide side and bottom walls for a pocket on the lower front portion of said back, the side portions having their lower edges inclined upwardly relative to the bottom of the back wall, the bottom portion being of greater transverse width than the side portions and adapted to cover the inclined lower edges of the side portions, a lower end portion integral with the bottom portion adapted to be folded upwardly from the outer edge of said narrow bottom portion, said lower end portion be-

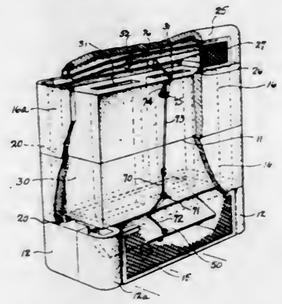
ing adapted to be folded upon itself to provide a double thickness front wall for the pocket adapted to receive between its walls side edge flaps on the side walls for retaining the side, bottom, and front walls of said pocket in assembled

relationship, and side edge flaps on the outer edges of said narrow side portions and adapted to be folded inwardly and entered between the walls of the double thickness front wall of said pocket.



2,450,559
RAILROAD RAIL CLAMP
Louis R. Parsons, Macomb, Ill., assignor of one-fifth to W. W. Holland, Macomb, Ill.
Application August 4, 1947, Serial No. 765,880
5 Claims. (Cl. 238—349)

1. A railroad rail fastener comprising a unitary member formed from a length of stock that is centrally bent upon itself in U-shape to provide a tang including the U-bend and arms extending therefrom, said tang being adapted for insertion in an aperture in a tie plate, the U-bend including a portion for hooking under the tie plate at the bottom of the aperture, the arms including bends forming spring loops and corresponding bearing portions for engaging the top wall of the aperture, said arms extending freely from said spring loop bends toward the rail at angles in the neighborhood of right angles relative to the tang and being of a length to resiliently and frictionally engage the rail to exert a multiple pressure thereon.



2,450,560
HAIR CURLER
Dorothy B. Redward and Carl J. Peterson, Seattle, Wash.
Application June 30, 1947, Serial No. 758,158
2 Claims. (Cl. 132—40)

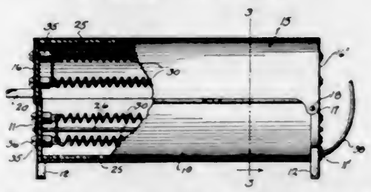
1. A device for forming curls of hair on the head, comprising, a flexible band, a cylinder mounted upon the band at right angles therewith for receiving and retaining coils of hair thereon, a cap provided with a concave face mounted on one end of the band and normally at right angles therewith in spaced relation from the cylinder for binding coils of hair in position around the cylinder, said cap having a socket centrally therethrough for disposal around the

top of the cylinder in slidable position, said cap having a notch in the rim thereof opposite the band for receiving and latching the outer end of the band for maintaining the cap in closed position over the hair until the curl is set.

2,450,561
HEATING PLANT
Seymon Ria, Seattle, Wash.
Application October 1, 1946, Serial No. 700,439
4 Claims. (Cl. 219—38)

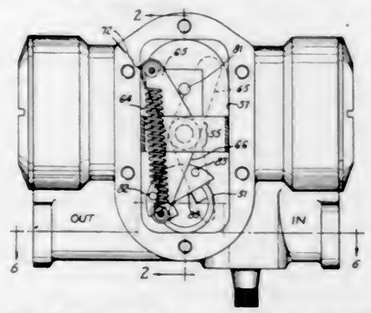
1. A heating plant of the character described comprising a heat insulated housing forming a stack-like enclosure having an air inlet at its lower end and an outlet at its upper end and through which an air stream may be caused to flow, a body of heat-absorbing material supported in said housing and extending from its lower end substantially to the height thereof, and so related to the housing walls as to provide vertical air passageways between the body surfaces and the housing walls for direct upflow of air from the inlet to said outlet, means for electrically heating said body of material, doors arranged within the housing to tightly close said passageways at upper and lower ends of said body of heat-absorbing material and thermostatically controlled means for actuating the doors between open and closed positions.

2,450,562
COVERING STRIP FOR ROOFS AND SIDINGS
William B. Robinson, Sayville, and George E. Swenson, Hastings on Hudson, N. Y.; Jessie C. Robinson, executrix of said William B. Robinson, deceased, assignor to Maxime C. Fidao and George Link, Jr., as trustees
Application February 1, 1946, Serial No. 644,768
12 Claims. (Cl. 108—13)



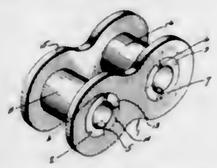
1. A covering strip for roofs and sidings, comprising a plurality of diverging elongated rigid

members having their upper edges bevelled and in contact, longitudinally extending bevelled



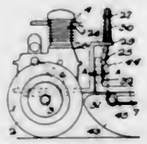
members between said elongated members and spaced from each other.

2,450,563
ROASTER
Anton F. Rommel, Tacoma, Wash.
Application January 12, 1946, Serial No. 640,812
2 Claims. (Cl. 219—19)



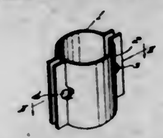
1. A roaster of the character described comprising a cylindrical, heat insulated housing with closure at its opposite ends and made up of upper and lower semi-cylindrical sections, hingedly joined at their ends to permit the upper section to be moved between closed and open positions, spaced rods extended between the end walls of the lower section for the support thereon of an article to be roasted substantially in the longitudinal center of the housing, a plurality of resistance elements extending lengthwise of the housing parallel with and at equally spaced intervals about the center line of the housing and spaced inwardly from the housing walls, and means supporting said resistance elements from the end walls of the housing and whereby the elements of the upper section will move therewith in its movements between open and closed positions.

2,450,564
FLUID OPERATED MOTOR WITH PISTON ACTUATED DISTRIBUTING VALVE AND MANUALLY ACTUATED PARKING VALVE
Columbus R. Sacchini, Willoughby, Ohio, assignor to The Marquette Metal Products Company, Cleveland, Ohio, a corporation of Ohio
Application October 2, 1944, Serial No. 556,853
9 Claims. (Cl. 121—164)



1. In a fluid operated motor of the type having a reciprocatable piston means, a rotatable valve means for controlling the operation of the piston means, a snap action toggle mechanism including spring-connected coaxially pivoted toggle arms operatively interconnecting said valve means and said piston for driving said valve means with alternate rotary motion upon reciprocation of said piston, one of the toggle arms acting against circumferentially spaced abutments on the rotary valve means to turn the latter, said one toggle arm and the valve being brought respectively to arrested zero moment arm positions solely by mutual contact.

2,450,565
TRANSMISSION CHAIN LINK
Richard L. Saifyrd, Hartford, Conn., assignor to The Whitney Chain & Mfg. Co., Hartford, Conn., a corporation of Connecticut
Application June 25, 1946, Serial No. 679,156
3 Claims. (Cl. 74—250)



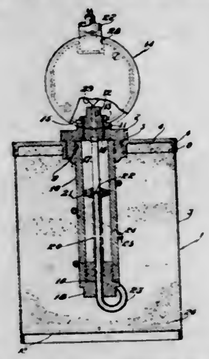
1. A transmission chain link comprising a pair of link plates having bushing openings adjacent their ends, each opening being of circular outline interrupted by two radially inwardly directed ears located less than 180° apart and equally spaced on each side of that point of a bushing opening which is nearest to the companion bushing opening in the same link plate, and a pair of sheet stock bushings curled to cylindrical form to fit said openings, and dovetail recesses in the ends of the bushings adapted to register with the said ears and to locate the meeting edges of the curled bushings substantially midway between the said ears, the recess entrances being narrower than the said ears and the relative hardness of the bushings and ears being such that the material of the ears will swell and interlock with the recesses when the bushings are forced into the plate openings.

2,450,566
MOTOR SLED
Martin Schmid, Lucerne, Switzerland
Application August 19, 1942, Serial No. 455,371
In Switzerland July 24, 1941
4 Claims. (Cl. 180—6)

1. A motor driven sled, comprising, in combination, a front sled member, a coupling plate on the rear of the sled, a separate motor chassis mounted behind the sled, a coupling plate on the motor chassis, coupling means associated with the coupling plates of the sled and chassis and cooperating to effect coupling the sled and the motor chassis, and a rotatable coupling plate rotatably secured to the sled coupling plate and secured to the motor chassis-coupling plate by spring members.

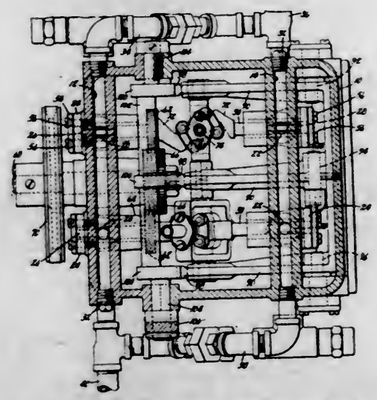
2,450,567
FLASK
Jacob D. Schwartz, Pittsburgh, Pa.
Application November 19, 1946, Serial No. 710,935
2 Claims. (Cl. 22—97)

2. A flask for casting metal, comprising a hollow tubular body for holding investment material therein, formed of two or more sections joined loosely together in axial planes of said tubular body, the joined ends of said sections terminating in outwardly extending flanges and joining means extending through said flanges joining said sections loosely together whereby the sections may be separated with respect to each other to increase the diameter of the flask and thereby accommodate expansion of the contained investment material.



2,450,568
SHIRT HOLD-DOWN DEVICE
Frank R. Sinopoli, San Diego, Calif.
Application November 25, 1946, Serial No. 712,079
8 Claims. (Cl. 2—323)

1. The combination with overlapping portions of a shirt and trousers of a U-shaped hook member adapted to be placed intermediate the overlapping portions of said shirt, a button connecting said overlapping portions, said hook engageable with the thread connecting said button to the innermost overlapping portion of said shirt adjacent the upper edge of said trousers, a strap in connection with said hook member, a second hook member having a U-shaped offset portion in connection with said strap adapted to extend around the edge of the outermost overlapping portion of said shirt, a trouser button, said second-mentioned hook member provided with a hook portion integral with said U-shaped offset portion adapted to be positioned at the front side of the overlapping portions of said shirt and engage said trouser button at the inner side of said trousers substantially below the upper edge thereof.

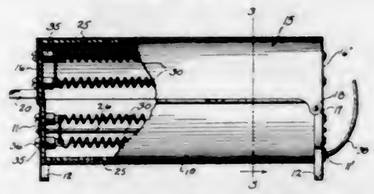


2,450,569
FIRE EXTINGUISHER
Norman J. Thompson, Newton, Mass., assignor to Factory Mutual Research Corporation, Boston, Mass., a corporation of Massachusetts
Application June 28, 1946, Serial No. 680,261
2 Claims. (Cl. 169—28)

1. A fire extinguisher comprising a frangible container, a fire-extinguishing agent within the container, an explosive resistant casing formed with an opening and disposed within the agent, a flexible explosive cord wound exteriorly about and supported by the casing and comprising an extension through the opening into said casing,

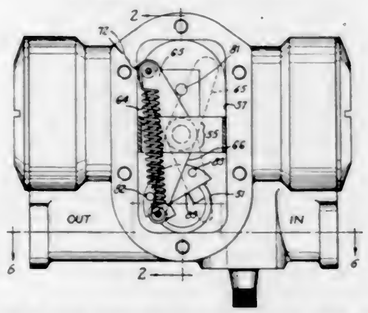
a detonator within the casing and contigous to said extension responsive to the passage of electric current for detonating the cord, the fragments of the detonator being retained within the casing on detonation.

2,450,570
VARIABLE DISPLACEMENT PUMP
Laurence E. Topham, Wenham, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application October 2, 1943, Serial No. 504,755
3 Claims. (Cl. 103—38)



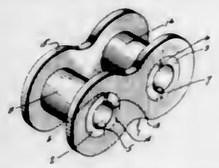
1. A pump comprising a pump cylinder, fluid passages extending from the side walls of the cylinder, a crank shaft, a piston carried at the end of the crank shaft and being positioned in the cylinder between the fluid passages, the piston having an open-ended chamber extending longitudinally of the pump cylinder and an elongated valve port extending through the side wall of the chamber, means for continuously rotating the crank shaft and piston, a crank on the crank shaft, means operable from the crank itself to effect reciprocation of the shaft and piston whereby the valve port is successively brought into alinement with the fluid passages during reciprocatory and rotary movements of the piston and means associated with the crank for varying the length of stroke of the piston.

members having their upper edges bevelled and in contact, longitudinally extending bevelled



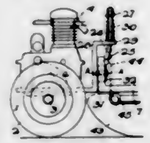
members between said elongated members and spaced from each other.

2,450,563
ROASTER
Anton F. Rommel, Tacoma, Wash.
Application January 12, 1946, Serial No. 640,812
2 Claims. (Cl. 219—19)



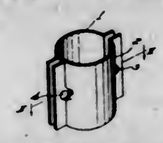
1. A roaster of the character described comprising a cylindrical, heat insulated housing with closure at its opposite ends and made up of upper and lower semi-cylindrical sections, hingedly joined at their ends to permit the upper section to be moved between closed and open positions, spaced rods extended between the end walls of the lower section for the support thereon of an article to be roasted substantially in the longitudinal center of the housing, a plurality of resistance elements extending lengthwise of the housing parallel with and at equally spaced intervals about the center line of the housing and spaced inwardly from the housing walls, and means supporting said resistance elements from the end walls of the housing and whereby the elements of the upper section will move therewith in its movements between open and closed positions.

2,450,564
FLUID OPERATED MOTOR WITH PISTON ACTUATED DISTRIBUTING VALVE AND MANUALLY ACTUATED PARKING VALVE
Columbus R. Sacchini, Willoughby, Ohio, assignor to The Marquette Metal Products Company, Cleveland, Ohio, a corporation of Ohio
Application October 2, 1944, Serial No. 556,853
9 Claims. (Cl. 121—164)



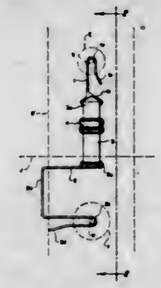
1. In a fluid operated motor of the type having a reciprocatable piston means, a rotatable valve means for controlling the operation of the piston means, a snap action toggle mechanism including spring-connected coaxially pivoted toggle arms operatively interconnecting said valve means and said piston for driving said valve means with alternate rotary motion upon reciprocation of said piston, one of the toggle arms acting against circumferentially spaced abutments on the rotary valve means to turn the latter, said one toggle arm and the valve being brought respectively to arrested zero moment arm positions solely by mutual contact.

2,450,565
TRANSMISSION CHAIN LINK
Richard L. Salfyrd, Hartford, Conn., assignor to The Whitney Chain & Mfg. Co., Hartford, Conn., a corporation of Connecticut
Application June 25, 1946, Serial No. 679,156
3 Claims. (Cl. 74—250)



1. A transmission chain link comprising a pair of link plates having bushing openings adjacent their ends, each opening being of circular outline interrupted by two radially inwardly directed ears located less than 180° apart and equally spaced on each side of that point of a bushing opening which is nearest to the companion bushing opening in the same link plate, and a pair of sheet stock bushings curled to cylindrical form to fit said openings, and dovetail recesses in the ends of the bushings adapted to register with the said ears and to locate the meeting edges of the curled bushings substantially midway between the said ears, the recess entrances being narrower than the said ears and the relative hardness of the bushings and ears being such that the material of the ears will swell and interlock with the recesses when the bushings are forced into the plate openings.

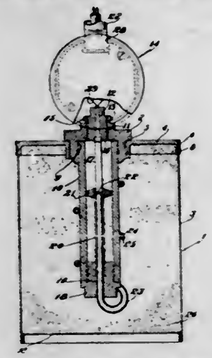
2,450,566
MOTOR SLED
Martin Schmid, Lucerne, Switzerland
Application August 19, 1942, Serial No. 455,371
In Switzerland July 24, 1941
4 Claims. (Cl. 180—6)



1. A motor driven sled, comprising, in combination, a front sled member, a coupling plate on the rear of the sled, a separate motor chassis mounted behind the sled, a coupling plate on the motor chassis, coupling means associated with the coupling plates of the sled and chassis and cooperating to effect coupling the sled and the motor chassis, and a rotatable coupling plate rotatably secured to the sled coupling plate and secured to the motor chassis-coupling plate by spring members.

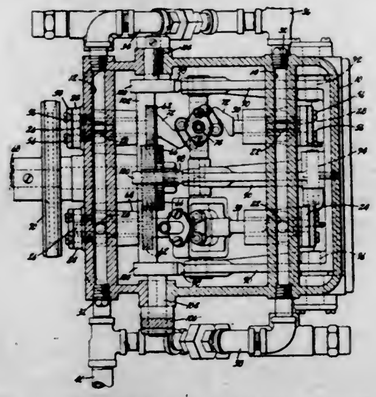
2,450,567
FLASK
Jacob D. Schwartz, Pittsburgh, Pa.
Application November 19, 1946, Serial No. 710,935
2 Claims. (Cl. 22—97)

2. A flask for casting metal, comprising a hollow tubular body for holding investment material therein, formed of two or more sections joined loosely together in axial planes of said tubular body, the joined ends of said sections terminating in outwardly extending flanges and joining means extending through said flanges joining said sections loosely together whereby the sections may be separated with respect to each other to increase the diameter of the flask and thereby accommodate expansion of the contained investment material.



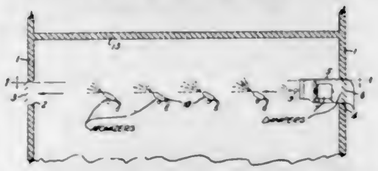
2,450,568
SHIRT HOLD-DOWN DEVICE
Frank R. Sinopoli, San Diego, Calif.
Application November 25, 1946, Serial No. 712,079
8 Claims. (Cl. 2—323)

1. The combination with overlapping portions of a shirt and trousers of a U-shaped hook member adapted to be placed intermediate the overlapping portions of said shirt, a button connecting said overlapping portions, said hook engageable with the thread connecting said button to the innermost overlapping portion of said shirt adjacent the upper edge of said trousers, a strap in connection with said hook member, a second hook member having a U-shaped offset portion in connection with said strap adapted to extend around the edge of the outermost overlapping portion of said shirt, a trouser button, said second-mentioned hook member provided with a hook portion integral with said U-shaped offset portion adapted to be positioned at the front side of the overlapping portions of said shirt and engage said trouser button at the inner side of said trousers substantially below the upper edge thereof.



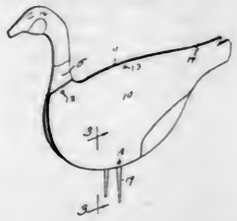
2,450,569
FIRE EXTINGUISHER
Norman J. Thompson, Newton, Mass., assignor to Factory Mutual Research Corporation, Boston, Mass., a corporation of Massachusetts
Application June 28, 1946, Serial No. 680,261
2 Claims. (Cl. 169—28)

1. A fire extinguisher comprising a frangible container, a fire-extinguishing agent within the container, an explosive resistant casing formed with an opening and disposed within the agent, a flexible explosive cord wound exteriorly about and supported by the casing and comprising an extension through the opening into said casing,



a detonator within the casing and contigous to said extension responsive to the passage of electric current for detonating the cord, the fragments of the detonator being retained within the casing on detonation.

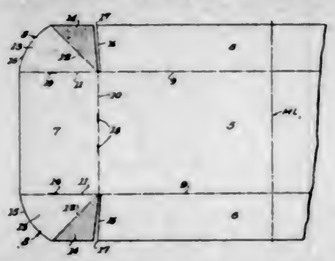
2,450,570
VARIABLE DISPLACEMENT PUMP
Laurence E. Topham, Wenham, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application October 2, 1943, Serial No. 504,755
3 Claims. (Cl. 103—38)



1. A pump comprising a pump cylinder, fluid passages extending from the side walls of the cylinder, a crank shaft, a piston carried at the end of the crank shaft and being positioned in the cylinder between the fluid passages, the piston having an open-ended chamber extending longitudinally of the pump cylinder and an elongated valve port extending through the side wall of the chamber, means for continuously rotating the crank shaft and piston, a crank on the crank shaft, means operable from the crank itself to effect reciprocation of the shaft and piston whereby the valve port is successively brought into alinement with the fluid passages during reciprocatory and rotary movements of the piston and means associated with the crank for varying the length of stroke of the piston.

2,450,571
DUCTLESS SYSTEM
Agnew H. Bahnson, Jr., Winston-Salem, N. C.
Application April 21, 1945, Serial No. 589,519
2 Claims. (Cl. 98—30)

1. A system for ventilating and humidifying the atmosphere in a closed space, said space having opposed vertical walls, means in one of said walls immediately above the working zone in said space for introducing a current of air in a horizontal direction toward the opposite wall, means in the opposite wall at the same level for discharging air from said space and means at said level intermediate said walls for atomizing water into said space.

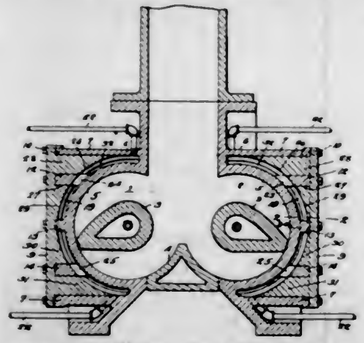


2,450,572
DECOY
Virgil Ballard, Caldwell, Idaho
Application March 5, 1946, Serial No. 652,067
1 Claim. (Cl. 43—3)

A decoy consisting of two flexible body members, united along the back thereof by means of rivets, one of said rivets passing through the neck portion of the decoy, a head having a neck attached to said neck supporting rivet, said head and neck being adapted to swing downwardly between the body members to a concealed position, legs pivoted to said body members on the adjacent sides thereof, adapted to be swung upwardly toward a concealed position when not in use, and a brace hinged on one leg member and adapted to be moved to a position against the other body member when the lower portion of said body members are in a spread position.

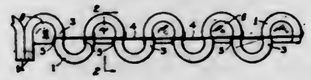
2,450,573
FOLDING BOX
Earl Barber, Los Angeles, Calif., assignor to Angelus Paper Box Company, Los Angeles, Calif., a corporation of California
Application May 13, 1946, Serial No. 669,395
5 Claims. (Cl. 229—41)

5. A blank for a foldable carton comprising a bottom, sides and ends integrally connected to the bottom along fold lines, a tab integrally connected to each side of each end, an oblique fold in each tab adapting the tabs to be double folded and dividing each tab in triangular portions, adhesive means on one triangular portion of each tab for connection to a related portion of the sides, and slits formed in the fold lines between the bottom and the ends and between the ends and the tabs thereon, the end outer corners of each side projecting in an angular direction toward



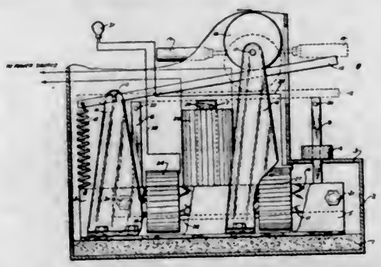
each end to extend beyond the fold line defining the end and bottom to normally extend into the slits to lock the carton in both folded and unfolded condition.

2,450,574
DRAFT OPERATED ANGLING MECHANISM FOR DISK HARROWS
John T. Bibb, San Luis Rey, Calif.
Application March 31, 1945, Serial No. 585,857
6 Claims. (Cl. 55—83)



1. A harrow having front and rear harrow trucks connected together so that the angular relationship between the trucks may be varied, a tongue mounted for up and down swinging movement upon the front truck, a drawbar operatively connected to the tongue and means connecting the drawbar to the rear truck whereby on adjusting the vertical position of the tongue the angular relationship between the trucks may be varied.

2,450,575
MEANS FOR WORKING RUBBER
Stewart Bolling, Cleveland, Ohio
Application July 13, 1945, Serial No. 604,746
2 Claims. (Cl. 18—2)



1. A machine of the class described including a working cylinder having an arcuate wall, a box like extension on and extending outwardly from said wall, the extension including parallel upper and lower walls and parallel side walls, said upper and lower walls and side walls having flush outer edges, spaced longitudinal ribs, defining longitudinal channels, on the cylinder wall disposed parallel to, and having their outer edges flush with the outer edges of, the upper and lower walls of the extension, there being a passage at one end of each rib providing communication between adjacent channels, each passage being oppositely disposed relative to the next adjacent passage, spaced arcuate fins on the cylinder wall extending transversely across each channel, a cover plate removably connected to the outer edges of the upper and lower walls and side walls of the extension, said plate having an arcuate inner surface spaced from, and concentric with, the cylinder wall, the plate having longitudinal slots wherein the longitudinal ribs are received, and transverse arcuate fins on the inner surface of the plate disposed alternately to the fins of the cylinder wall.

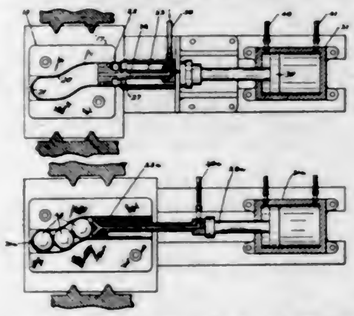
2,450,576
BELTING
Harry Brammer, Leeds, England
Application July 18, 1944, Serial No. 545,476
In Great Britain July 16, 1943
9 Claims. (Cl. 74—236)

1. Power transmission belting comprising a plurality of hollow semi-cylindrical portions of flexible sheet material arranged side by side with their axes parallel to form a strip, said portions presenting successions of convex surfaces of said semi-cylindrical portions on two opposite sides of said strip, alined openings in the end edges of said semi-cylindrical portions, and fastening means seated in said openings, said fastening means each comprising a rectilinear portion extending longitudinally of said strip through walls of at least two contiguous semi-cylindrical portions.

2,450,577
ELECTRICAL COIL TESTER
Anthony G. Brown, Lakewood, Ohio, assignor, by mesne assignments, to Jack & Heints Precision Industries, Inc., Cleveland, Ohio, a corporation of Delaware
Application March 22, 1944, Serial No. 527,530
1 Claim. (Cl. 175—183)

A coil tester comprising a laminated iron core having a central exciting leg and a pair of end legs forming a divided magnetic circuit, a stationary upright and a laminated armature pivoted thereto adjacent one of said end legs, spring means biasing said armature out of engagement with all of said legs manually operable cam means bearing upon said armature between said end legs for moving said armature into engagement with all of said legs to establish iron paths for said magnetic circuits, an exciting coil on said central leg for producing an alternating flux in said magnetic circuits, a pair of balance coils on said end legs connected in opposition, the cores of the coils being substantially in the form of a capital "E" whereby said armature is adapted to engage the cores of all three legs to close the magnetic circuit and a neon lamp connected in series with the coils which are connected in opposition with said balance coils, said balance coils being unbalanced only to such an extent that the difference in the voltages thereof is less than the ignition voltage of said lamp so that upon energization of said exciting coil ignition of said lamp is prevented in the absence of a short circuited turn in a coil to be tested and cause the ignition of said lamp when said test coil contains at least one short circuited turn.

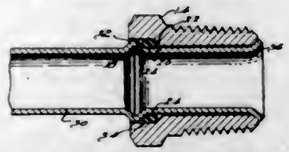
2,450,578
PREPARATION OF AQUEOUS DISPERSIONS OF SYNTHETIC RUBBERS
Charles F. Brown, Bethany, W. Va., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application January 29, 1947, Serial No. 725,171
20 Claims. (Cl. 260—23.7)



1. The method of preparing an aqueous dispersion of synthetic rubber selected from the group consisting of polymers of butadienes-1,3 selected from the group consisting of butadiene-1,3, methyl-2-butadiene-1,3, chloro-2-butadiene-1,3, piperylene, and 2,3-dimethyl-butadiene-1,3, and copolymers of such butadienes-1,3 with up to 70% by weight of the copolymer of compounds which contain a single $CH_2{=}C<$ group and are copolymerizable therewith, which comprises mixing with such synthetic rubber a heat-reaction product, at a temperature in the range of between about 180° C. and 300° C., of a mix containing rosin, an alkanolamine, an alkylene glycol and a dimerized acid of a vegetable drying oil, and also a hydrophilic colloidal dispersing agent selected from the group consisting of soaps, proteins, solubilized casein and colloidal clay, and adding water until an inversion of phase takes place.

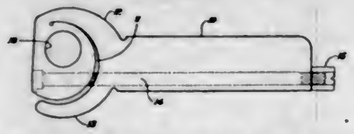
2,450,579
PREPARATION OF AQUEOUS DISPERSIONS OF SYNTHETIC RUBBERS
Charles F. Brown, Bethany, W. Va., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application January 29, 1947, Serial No. 725,172
16 Claims. (Cl. 260—23.5)

1. The method of preparing an aqueous dispersion of synthetic resin selected from the group consisting of polyisobutylene, and copolymers of isobutylene with up to 15% by weight of the copolymer of a conjugated diene selected from the group consisting of butadiene-1,3 and isoprene, which comprises mixing with such synthetic resin a heat-reaction product, at a temperature in the range of between about 180° C. and 300° C., of a mix containing rosin, an alkanolamine, an alkylene glycol and a dimerized acid of a vegetable drying oil, and also mixing with the synthetic resin a hydrophilic colloidal dispersing agent selected from the group consisting of soaps, pro-



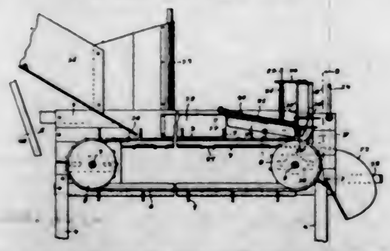
teins, solubilized casein and colloidal clay, and adding water until an inversion of phase takes place.

2,450,580
TUBE BENDER
John E. Conzelman, Jr., San Diego, Calif., assignor to Solar Aircraft Company, San Diego, Calif., a corporation of California
Application March 24, 1945, Serial No. 584,507
2 Claims. (Cl. 153—48)



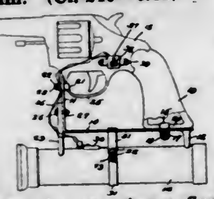
1. Apparatus for bending a tubular member having a closed end, said apparatus comprising: a die defining a tubular hole of the desired configuration into which the closed end of said member is insertable; piston means adapted to seal within said member in sliding relation therewith; means for supporting said piston in stationary relation within the entrance of said hole in said die; means for applying fluid under pressure from an external source within said tubular member between the closed end thereof and said piston means, whereby said fluid under pressure develops a force against the closed end of said member urging the member longitudinally into the hole of said die while simultaneously urging the sidewall of the tubular member against the die; means for advancing said piston means into said die with said tubular member; and means insertable in said tube for transmitting longitudinal force mechanically from said piston means to the closed end of said member.

2,450,581
SWIVEL CONNECTION
Norman M. Couty, Detroit, Mich., assignor, by mesne assignments, to The Flex-O-Tube Company, Chicago, Ill., a corporation of Illinois
Application March 28, 1945, Serial No. 585,215
3 Claims. (Cl. 285—97.5)



1. A swivel coupling of the character described comprising a pair of swivelly related concentric tubular members the inner of said tubular members being formed from tubular stock and having the wall thereof spaced from its end deformed into an annular radially outwardly projecting rib, the outer of said tubular members being formed with a counterbore the inner end of which is formed with a wall surface converging toward the inner of the tubular members, the counterbore being of a depth to overlap the rib and afford a substantially enclosed chamber between the rib and said inner converging wall of the counterbore, said rib being formed at its inner side to converge with respect to the wall of the counterbore, and a sealing gasket of smaller cross-sectional area than the chamber within said counterbore and permitting relatively easing swivelling of the members, said gasket being of resilient pliability and deflectable by opposite axial pressure differentials to move into wedging relationship with the respective converging surfaces at the ends of the chamber.

2,450,582
SPRING TYPE TOOLHOLDER
Lyof Martin Coyle, Babakin, Western Australia, Australia
Application April 20, 1945, Serial No. 589,351
In Australia December 10, 1943
Section 1, Public Law 690, August 8, 1946.
Patent expires December 10, 1963
4 Claims. (Cl. 29—97.5)



1. A tool holder of the spring type comprising in combination a head portion formed therewith and having an opening therein, said holder having a curved slot formed therein that commences near the forward end of said head portion and extending in substantially a semi-circular form to above and forward of the opening formed therein whereby said head portion will be resiliently connected to said holder, a mounting extending through the opening within said head portion and frictionally held to the latter, a cheek for holding the cutting tool forming a part of said mounting and extended so as to engage against a fixed part of said holder as well as said resiliently connected head portion and means for holding the cutting tool in said frictionally held mounting.

2,450,583
SEED POTATO CUTTER, INCLUDING AN ENDLESS CONVEYER FEEDING TO A STATIONARY CUTTER
Alva H. Crozier, Cheyenne, Wyo.
Application February 14, 1946, Serial No. 647,452
2 Claims. (Cl. 146—163)

1. A seed potato cutter comprising the combination of a supporting structure, a horizontally arranged trough on said structure and having a discharge end, an endless conveyor on said structure and having a flight operating in said trough and provided with a plurality of split pusher elements, a hopper for feeding potatoes onto the conveyor for engagement by said split pusher elements, a control gate carried by said hopper, flexible guide plates secured to the supporting structure within the trough, spring means between the guide plates and the supporting structure for yieldably converging the ends of the guide plates toward each other and adjacent the endless conveyor for directing potatoes from the hopper onto the conveyor, a cutting mechanism, means carried by the supporting structure for maintaining said cutting mechanism above and adjacent the endless conveyor and adjacent the discharge end of the trough and within the latter whereby potatoes carried by said conveyor are forced by the split pusher elements through said cutting mechanism for severing the potatoes into a plurality of parts, said cutting mechanism including a plurality of vertically and horizontally arranged and relatively spaced blades having cutting edges facing the potatoes moved by the conveyor, said vertically arranged blade being straddled by said split pusher elements as the same move past said blade, and means above the endless conveyor for guiding the potatoes carried by the conveyor into engagement with the cutting edges of the blades.

2,450,584
FLASHLIGHT ATTACHMENT FOR SMALL ARMS
Lysander H. Dodge, Huntington Beach, Calif.
Application April 16, 1947, Serial No. 741,764
1 Claim. (Cl. 240—6.41)

In an attachment for securing a flashlight to a gun, an L-shaped frame having an upwardly extended forward end, a clamp for securing the upwardly extended forward end to the trigger guard of the gun and the other end of the frame being secured to the stock of the gun, a separable band secured to the L-shaped frame intermediate the ends of the frame, said band being secured to the flashlight, a forward supporting member adjustably mounted on said upwardly extended end of the frame, said forward member having an arcuate shaped edge engaging the curved edge of the flashlight, a supporting member at the rear end of the frame engaging the flashlight, said supporting members holding the flashlight against lateral movement when the gun is aimed, a switch on said gun, and electrical connections between said switch and the flashlight whereby the flashlight may be operated illuminating the target at which the gun is pointed.

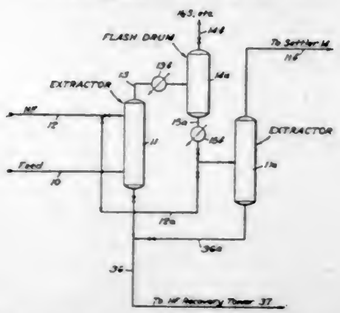
2,450,585
SULFONATION PROCESS
Edmond L. d'Ouville, Chicago, Ill., and Donald E. Burney, Hammond, Ind., assignors to Standard Oil Company, Chicago, Ill., a corporation of Indiana
No Drawing. Application May 27, 1943, Serial No. 488,702
4 Claims. (Cl. 260—505)

1. The process of sulfonating a mixture of alkyl aromatic hydrocarbons which yields both preferentially water-soluble and preferentially oil-soluble alkyl aromatic sulfonic acids upon nonselective sulfonation, which comprises contacting said mixture with at least 20 volume percent, based on said mixture, of sulfuric acid having an initial strength between about 88 and about 98 weight percent of sulfuric acid at a temperature between about 50° F. and about 150° F. for a period of at least one hour to effect substantial preferential sulfonation of alkyl aromatic hydrocarbons whose sulfonic acids are preferentially water-soluble, separating preferentially water-soluble alkyl aromatic sulfonic acids from the sulfonation reaction mixture, separating residual alkyl aromatic hydrocarbons from the sulfonation reaction mixture, and sulfonating said residual alkyl aromatic hydrocarbons with fuming sulfuric acid to produce preferentially oil-soluble alkyl aromatic sulfonic acids.

2,450,586
PROCESS FOR SACCHARIFYING PLANT MATERIALS
John W. Dunning and Elbert C. Lathrop, Peoria, Ill., assignors to the United States of America as represented by the Secretary of Agriculture
No Drawing. Application October 31, 1944, Serial No. 561,248
7 Claims. (Cl. 127—37)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a process for the saccharification of plant material, the steps which include the progressive degradation of its cellulosic content in a plurality of successive stages which comprise treating said material with 1 to 6 percent sulfuric acid at a temperature of from 100° to 121° C. whereby pentosans are converted to pentoses and furfural and the cellulose is mildly degraded, drying the residue containing entrained sulfuric acid free of pentoses to further degrade the cellulose molecules, mixing the dried residue with 0.15 to 0.55 part of about 80 to 87 percent sulfuric acid at a temperature below substantially 40° C. whereby a free-flowing powder is obtained which upon hydrolysis will yield about 60 percent dextrose, subjecting said powder to mechanical mastication so as to develop continuously-changing directional pressures above substantially 100 pounds per square inch for a period not in excess of 10 minutes and at a temperature not in excess of substantially 45° C. to convert it into a stiff plastic mass whereby the molecules are still further degraded, said mastication being arrested at a point just short of the formation of substantial amounts of dextrose.

2,450,587
POULTRY BIT
Theodore M. Elgersma, Fresno, Calif., assignor of one-half to Alta May Elgersma, Fresno, Calif.
Application April 18, 1945, Serial No. 588,901
1 Claim. (Cl. 119—97)

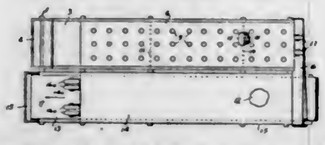


A bit for poultry comprising a wire member having substantially the form of a hollow square

including a bottom bar, side bars and a top bar, said bottom bar being adapted for insertion trans-

versely under the upper beak of the poultry and with the top bar extending transversely above the beak, inwardly projecting tongues on the side bars adapted to enter the nostrils of the beak, and an eye formed at the upper end of one of said side bars adapted for receiving one end of the top bar, said end of the top bar being bendable alongside said eye to prevent retraction of the top bar from the eye.

2,450,588
DESULFURIZATION OF OILS
Bernard L. Evering, Chicago, Ill., Arthur P. Lien, Hammond, Ind., and James M. Page, Jr., Chicago, Ill., assignors to Standard Oil Company, Chicago, Ill., a corporation of Indiana
Application May 19, 1945, Serial No. 594,610
4 Claims. (Cl. 196—31)

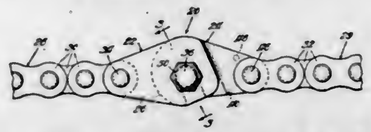


1. The method of selectively desulfurizing a non-viscous aromatic-containing hydrocarbon oil comprising contacting said oil with a solvent consisting of liquid anhydrous hydrogen fluoride at a temperature within the range of about 300° F. to about 400° F., flashing off any hydrocarbon gases and hydrogen sulfide resulting from the conversion of sulfur compounds in said oil, cooling the flashed mixture of hydrocarbons and hydrogen fluoride to a temperature of from about 0° F. to about 212° F., contacting the cooled mixture with additional liquid anhydrous hydrogen fluoride while maintaining a pressure sufficient to maintain the solvent and hydrocarbon oil in the liquid phase, permitting the mixture of said oil and liquid hydrogen fluoride to stratify into an aromatic-containing raffinate phase substantially free of sulfur and a sulfur-containing extract phase, separating said phases and removing the hydrogen fluoride from said phases.

2,450,589
TOP-STIFFENING TIE BAR FOR OPEN-TOP TRUCKS
Joseph M. Falk and Charles T. Falk, Kansas City, Mo.
Application May 28, 1945, Serial No. 596,134
2 Claims. (Cl. 296—40)

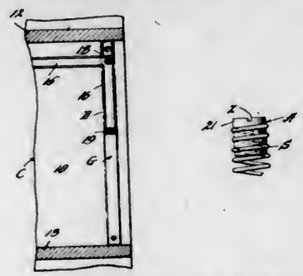
1. The combination in an open-top truck, of an opposite pair of upright posts at the sides of the truck, provided at their inner sides with upwardly-facing shoulders, and an arch resting on said shoulders and abutting endwise against said posts, the arch at each end having a longitudinal channel in its under side, and provided in the side walls of the channel with opposite inverted arcuate slots, a lever having a head within and pivoted to the side walls of the channel axially of the opposite slots, a U-shaped clip fitting around the outer edge and the sides of the respective post and longitudinally of and against the opposite sides of the arch, and a cross-pin extending through said clip, said slots and through the head of the lever eccentrically of the pivotal point thereof; said lever being adapted to be swung from a pendent position upward until wholly with said channel, and in such movement cause the cross-pin to move in said slots and pull the clip inward to clamp the post and arch firmly together and said cross-pin to attain a position in said slots past center as respects the pivotal point of said lever.

2,450,590
FRUIT DRIER
Frank C. Gullo, Cupertino, Calif.
Application February 18, 1946, Serial No. 648,214
1 Claim. (Cl. 34—66)



A machine for drying fruit comprising, a pair of side by side parallel tunnels, one tunnel having a bottom wall, a vertically adjustable top wall, a battery of infra-red lamps depending from said top wall and having a conveyor in its bottom to carry fruit therethrough, the other being a cooling tunnel having top, side and bottom walls with a conveyor on its bottom wall to carry fruit in the opposite direction to the movement of the fruit in the first tunnel, blowers arranged at the discharge end of each tunnel to blow air therethrough in the direction opposite to the movement of the fruit, and means operative to transfer the fruit from the discharge end of the first tunnel to the receiving end of the second tunnel, said means comprising a transversely arranged belt disposed below the level of one belt and overlying the other belt and gradually assuming a laterally inclined position as it passes from one belt to the other.

2,450,591
DENTAL IMPRESSION ACCESSORY
Roy E. Hawkinson, Bloomfield Hills, Mich.
Application May 29, 1946, Serial No. 672,971
7 Claims. (Cl. 32—63)

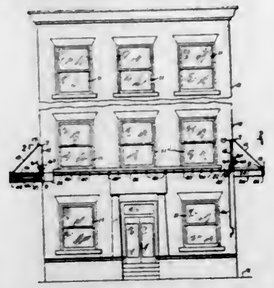


1. A dental matrix comprising a relatively thin plate adapted to be formed to the contour of a tooth or any portion thereof, an upstanding rib rigidly secured thereto, a transversely extending head portion at the upper end of said rib, said rib mounted at an angle of less than 90° to the plane of said plate whereby to prevent said head from contacting the gum portion surrounding said tooth.

2,450,592
STAMPED CHAIN CONNECTOR
Robert J. Howison, Detroit, Mich., assignor to Morse Chain Company, Ithaca, N. Y., a corporation of New York
Application November 30, 1942, Serial No. 467,314
4 Claims. (Cl. 74—258)

1. A laminated connector comprising yoke and hook mating parts each formed of a plurality of blanks, means releasably retaining said yoke and hook parts together, means substantially eliminating articulation between said yoke and hook parts, said means comprising a bar through the laminations on said hook part and retained in said position, and bar engaging recesses in the laminations of said yoke, the arrangement being such that the bar engages said recesses when the yoke and hook means are together, the yoke and hook means having means attaching each of them to devices to be connected.

2,450,593
DISAPPEARING DOOR STRUCTURE
William T. Hormes, Catonsville, Md.
Application August 25, 1944, Serial No. 551,168
4 Claims. (Cl. 20—19)

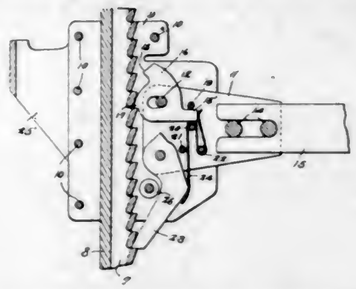


1. In a door structure for a cabinet having an open front, a door for covering said front, guide tracks supported one at each side of said cabinet, spaced upper and lower guide members projecting laterally from each of the side edges of said door and normally engaging the guide tracks, a fixed abutment adjacent to each guide track, a helical counterbalancing spring located one on each side of said open front, the lower end of each spring resting upon its respective fixed abutment with the upper end of each spring located in the path of movement of a laterally projecting guide member as the door is moved to closed position so that when contacted by the lower guide members as the door is moved to closed position the weight of the door will compress the springs, and a body at said upper end of each spring, means whereby said bodies may be adjusted axially with respect to said springs, said bodies adapted to be engaged by the lower laterally projecting guide members for varying the extent of reactive compressibility of the springs for counter-balancing purposes, so that any inherent difference in the counterbalancing resiliency of the respective springs may be equalized.

2,450,594
ORGANO-SILOXANES AND METHODS OF PREPARING THEM
James Franklin Hyde, Corning, N. Y., assignor to Corning Glass Works, Corning, N. Y., a corporation of New York
No Drawing. Application January 15, 1944, Serial No. 518,371
2 Claims. (Cl. 260—46.5)

1. A copolymeric organo-siloxane comprising organo-silicon units which correspond to the formulae $CH_3SiO_{3/2}$ and $RSiO_{3/2}$ respectively, where R is an alkyl radical having from twelve to eighteen carbon atoms, said units being joined together by the oxygen atoms of said units.

2,450,595
FIRE NET FOR BUILDINGS
Alex Jones, Lyman, S. C.
Application April 21, 1947, Serial No. 742,893
7 Claims. (Cl. 227—45)



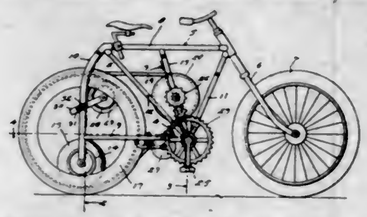
1. A fire escape apparatus for a building comprising an outwardly projecting beam adjacent each corner of the building, a pair of spaced supporting means extending from one beam to the other, a housing adjacent one beam, a net slidably mounted at spaced intervals along its side edges on said supporting means and said net being adapted to be moved backwardly into folds within the housing, one end of the net being secured to the beam adjacent the housing, a pair of cables having one end secured to the free end of the net, a motor driven shaft associated with the beam remote from the housing, an electric motor for driving said shaft, said shaft having a pair of drums thereon to which the other ends of said cables attached to the free end of the net are attached, whereby when the motor is energized the cables will be wound around the drums to withdraw the net from the housing and extend it along the two spaced supports and into which net persons occupying floors above the net may jump.

2,450,596
REVERSIBLE RACK AND PAWL JACK
Achille Kais, Detroit, Mich.
Application July 13, 1944, Serial No. 544,677
1 Claim. (Cl. 254—111)

A lifting jack comprising a rack bar, a housing mounted for movement longitudinally of the rack bar, an operating head pivotally mounted within the housing, a pivot pin on which the operating head is mounted, said pivot pin being disposed eccentrically of the rocking head, a sliding pawl mounted on the head and having an elongated opening in which said pivot pin is located, said sliding pawl having a tail piece, spaced pins on the rocking head between which the tail piece moves and is held against pivotal movement, a

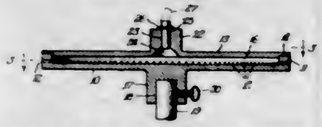
lifting pawl mounted on the rocking head and adapted to engage the teeth of the rack bar lifting the housing upon downward pivotal movement of

the rocking head, means for urging the pawls towards the rack bar, and a lever for rocking the operating head, whereby said pawls are alternately operated.



2,450,597
EARTHWORM DISGORGING DEVICE
John B. Karnowski, Detroit, Mich.
Application January 12, 1944, Serial No. 517,971
13 Claims. (Cl. 47—1.3)

1. The combination with an electrode, of an insulating element encompassing a portion of said electrode, a movable casing extending over the uninsulated portion of said electrode and movable over said insulating element to expose the uninsulated portion of said electrode, and a spring surrounding said electrode and disposed between said element and casing for urging said casing over the uninsulated portion of said electrode.

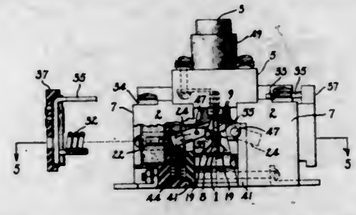


2,450,598
BICYCLE
Cornelius W. Kerr, Panama City, Fla.
Application December 20, 1944, Serial No. 569,060
2 Claims. (Cl. 280—261)

1. A drive mechanism for bicycles comprising a wheel having a circumferential external groove, a manually operated propulsion unit including a belt disposed over the wheel and in the groove, said wheel having a circumferential inner groove upper and lower wheels engaging the inner groove of the wheel to prevent displacement of

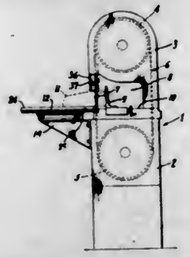
the latter, a frame for supporting the wheels and the propulsion means.

2,450,599
SPRAYER FOR DEHYDRATING APPARATUS
Stella A. Kloda, Chicago, Ill.
Application June 30, 1945, Serial No. 602,524
1 Claim. (Cl. 299—63)



An apparatus for dehydrating liquids, comprising a tray having an annular upstanding flange with circumferentially disposed openings therethrough and integrally formed on the outer periphery of said tray, a closure for said tray seated upon said flange and cooperating with the tray to form a chamber in open communication with the openings in said flange, a shoulder on the periphery of the closure abutting the inside of said flange, means to detachably affix the closure to said flange, an upstanding projection formed integral with said closure having an annular central opening therein, said opening terminating in an inverted cone in open communication with the chamber, a pipe slidably inserted into the annular central opening in the upstanding projection, a collar formed on said annular pipe adapted to rest on the upstanding projection, said pipe terminating substantially at the base of the inverted cone and being adapted to remain stationary while the cover rotates and to be removably inserted into the annular central opening of the upstanding projection, and means to rotate the tray and cover independently from the pipe and collar for discharging liquid from the tray by centrifugal force.

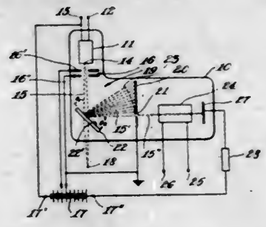
2,450,600
OVERLOAD PROTECTIVE DEVICE
Clarence W. Kuhn, Wauwatosa, Wis., assignor to Cutler-Hammer, Inc., Milwaukee, Wis., a corporation of Delaware
Application May 9, 1945, Serial No. 592,846
6 Claims. (Cl. 200—124)



6. In a circuit controller, in combination, a pivoted contact blade biased to rotate in one direction toward a given extreme position, a stationary contact having spreadable spring contact parts for yieldingly engaging said blade on opposite sides upon biased movement thereof into said extreme position, said spring contact parts having stationary stops associated therewith for limiting to a very narrow range play thereof under shock when said blade is disposed therebetween, and an overload device associated with said blade and responsive to effect movement thereof out of

engagement with said spring contact fingers, said overload device being operatively connected to said blade through the medium of a pivoted op-

erating lever, and said blade and said operating lever being balanced upon their associated pivots to render the same non-rotative under the action of shock transmitted thereto through said pivots.



2,450,601
RECIPROCATING CARRIAGE FOR ENDLESS BAND MEAT CUTTING MACHINES
William Lasar, Los Angeles, Calif.
Application February 24, 1945, Serial No. 579,618
1 Claim. (Cl. 146—88)

In a meat cutting machine, a cutter supported in a relatively fixed position, a table support formed from a single piece of rectangular sheet metal and having its opposite sides turned upwardly and downwardly to form two parallel rounded track surfaces, a movable table having wheels on the lower surface thereof adapted to ride on said track, and a pan formed from said sheet metal table by turning up the other two edges of said table support, at least one of the ends of said last two edges being shortened to provide an outlet at the shortened portion.

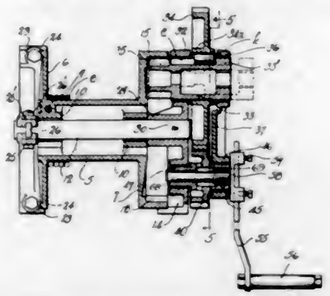
2,450,602
THERMIONIC DISCHARGE TUBE WITH ELECTRONIC VELOCITY FILTER
Andres Levialdi, Buenos Aires, Argentina, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee
Application August 17, 1944, Serial No. 549,889
11 Claims. (Cl. 315—19)

1. A thermionic discharge tube comprising an evacuated envelope containing means for generating a beam of electrons, electrode means for accelerating and directing said electron beam to a diffraction element having a substantially regular lattice structure to produce a diffracted beam of electrons dispersed in accordance with the respective velocities thereof, a diaphragm provided with an aperture and located in the path of the diffracted electron beam to produce an emergent beam of substantially monokinetic electrons the velocity of which is determined by the glancing angles of the incident beam and said monokinetic electrons with respect to the diffracting surface of said diffraction element, said accelerating electrode and said apertured diaphragm being electrically interconnected to form a substantially equipotential space including said diffraction ele-

ment, means to vary the initial velocity of said accelerated electron beam to vary the velocity of said emergent monokinetic electron beam, and a target electrode to collect the said monokinetic electron beam.

2,450,603
METHOD OF DETERMINING A SLUDGE INDEX FOR ENGINE OILS
Edmond P. Lomasney, Bayside, Long Island, N. Y., assignor, by mesne assignments, to Ralph L. Faber, Los Angeles, Calif.
No Drawing. Application February 3, 1945, Serial No. 576,159
4 Claims. (Cl. 73—64)

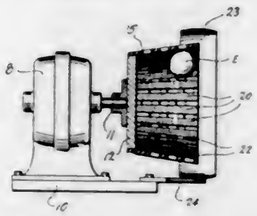
3. The method of determining detergency and/or a sludge index for oils which includes diluting a test sample of the oil with a solvent such as naphtha and centrifuging, and thereafter adding to the diluted sample water and aniline and again centrifuging and noting the amount of precipitate effected.



2,450,604
TREATMENT OF LIQUID YEAST PRODUCTS
Ben Maizel, Chicago, Ill., assignor to Vico Products Company, Chicago, Ill.
No Drawing. Application September 20, 1945, Serial No. 617,667
10 Claims. (Cl. 99—97)

10. In a method of removing undesired flavoring constituents from plasmolyzed yeast products in the liquid state, derived from brewer's yeast, the steps which comprise agitating said liquid yeast products with a normally solid higher molecular weight fatty acid partial ester of an aliphatic polyhydroxy substance, said agitation being effected at a temperature sufficiently elevated so that said ester is in a molten state, then allowing the mass to stand substantially quiescent while cooling, and then, after said ester has solidified, removing said ester with such undesired flavoring constituents as it has absorbed from the liquid yeast products.

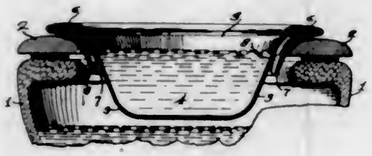
2,450,605
HOIST
Sidney S. McIntyre, Sedro-Woolley, Wash.
Application November 8, 1943, Serial No. 509,367
5 Claims. (Cl. 254—187)



1. A hoist of the character described comprising, a main frame structure including opposite end pedestals and a cross shaft mounted thereby, a cable winding drum revoluble on the cross shaft having an end flange and a driving gear on said flange coaxial of the shaft, an extension frame

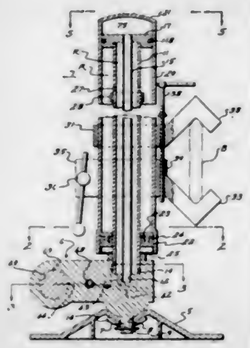
member removably fixed to the end pedestal that is adjacent said driving gear and spaced outwardly therefrom, a second gear wheel located between said extension frame member and its supporting pedestal, having hub portions at its opposite sides revolubly mounted in the pedestal and extension frame, a gear pinion integral with the hub portion of the said second gear wheel in driving mesh with the first mentioned gear wheel, a plurality of pinion gears of different diameter

located between the extension frame and its supporting pedestal, and having hub portions at opposite sides revoluble in bearings in the extension frame and supporting pedestal; said pinion gears being in driving mesh with the said second gear wheel and said second gear wheel and said plurality of pinion gears each having hub portions exposed through the bearings in the extension frame and a hand crank selectively applicable to any of said portions for the transmission of power to the cable drum.



2,450,606
EGG CLEANER
Edward T. Molitor, Seattle, Wash.
Application July 23, 1945, Serial No. 606,512
2 Claims. (Cl. 51—73)

1. An egg cleaner comprising a hollow frustroconical body of resilient flexible material, open at its larger end and having a wall closing its smaller end, a motor having its driving shaft fixed to the said closing wall coaxially of the body and pieces of abrasive material applied to the inside surface of said body and there being openings through the body wall not covered by said pieces of material.

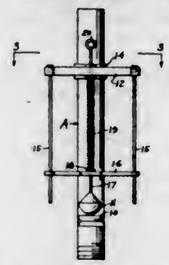


2,450,607
SITZ BATH
Sheffield F. Oliver, Auburn, Calif.
Application February 11, 1946, Serial No. 646,915
3 Claims. (Cl. 4—6)

1. A sitz bath comprising a basin arranged to sit within an opening in a toilet seat; and a ring having an annular depending flange arranged to be seated within said opening and having spaced means for supporting said basin with the rim

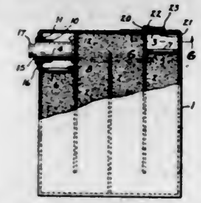
thereof in annular spaced relation with said flange.

2,450,608
HYDRAULIC BUMPER JACK
Herbert E. Page, Alhambra, Calif.
Application December 5, 1944, Serial No. 566,664
4 Claims. (Cl. 254—93)



1. In a hydraulic bumper jack, a body carrying an upright cylinder, a piston secured to the top end portion of said cylinder, an outer cylinder slidably mounted on the first-named cylinder for axial movement relative thereto and forming with the first-named cylinder a fluid reservoir, the outer cylinder having an end wall defining with the piston a pressure chamber, pressure-generating means in the body, valve-controlled means providing communication between the reservoir and pressure-generating means, second valve-controlled means providing communication between the pressure-generating means and the pressure chamber, third valve-controlled means for releasing fluid from the pressure chamber to the reservoir, and bumper-engaging means slidably adjustably mounted on the outer cylinder.

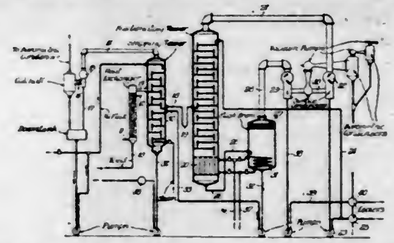
2,450,609
SPRING TYPE GUIDE FOR COMMODE TANKS
Louis E. Phelps, Shreveport, La.
Application September 13, 1945, Serial No. 616,009
2 Claims. (Cl. 4—57)



1. A guide of the kind described, comprising a head, a clamping bracket fastening the head to an overflow pipe within a flush tank, guide rods depending from the head, a saddle piece slidable on the rods, a flush valve having a stem slidable

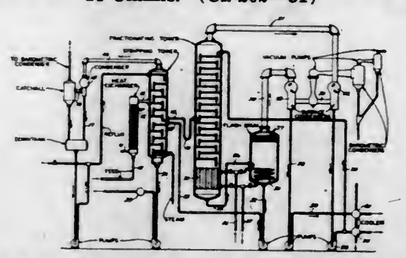
through the head and adjustably connected to the saddle piece for directing the valve to its seat,

and a tensioning spring interposed between the head and saddle piece for action on the latter.



2,450,610
AIR FILTER
Edwin G. Pierce, Cleveland, Ohio
Application January 8, 1944, Serial No. 517,491
1 Claim. (Cl. 128—147)

Apparatus of the class described comprising a rectangularly-shaped canister having an inlet port adjacent one end thereof and an opening adjacent the other end, a plurality of baffles arranged in staggered relation to provide a circuitous channel for receiving an air-purifying material and with one of said baffles being arranged to form a wall opposite said opening, a tubular mouthpiece mounted in said opening to form a close sliding fit, the inner end of which mouthpiece engages said wall to seal its inner orifice when the mouthpiece is forced inwardly into engagement with said wall, means for maintaining said air-purifying material in spaced relation to said mouthpiece and said mouthpiece being of sufficient length to extend through said opening with its outer end arranged in proximity to the outer surface of said canister and being movable outwardly from said wall to provide an outlet passage therethrough for the purified air from said canister.

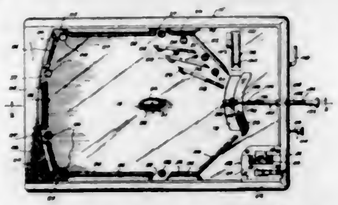


2,450,611
DISTILLATION APPARATUS FOR TREATING FATTY ACID CONTAINING STOCK
Ralph H. Potts, La Grange, Ill., assignor to Armour and Company, Chicago, Ill., a corporation of Illinois
Continuation of application Serial No. 424,434, December 26, 1941, which is a division of application Serial No. 298,722, October 9, 1939. This application February 10, 1945, Serial No. 577,246
11 Claims. (Cl. 202—154)

1. In apparatus of the class set forth, a tube heater through which fresh charging stock may be passed, a stripping and fractionating tower, means for passing the stock from said tube heater into said tower, a second fractionating tower, a flash drum, means for returning bottoms from said flash drum to an intermediate portion of said first tower, means for introducing steam into said first tower, communicating pipes between said first and second tower permitting stock to

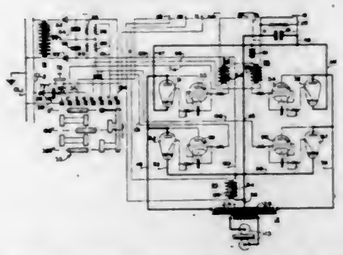
flow by pressure difference from said first tower into said second tower, and communicating pipes between said second tower and said flash drum permitting stock to flow from said second tower into said flash drum by pressure difference.

2,450,612
DISTILLATION OF FATTY ACID STOCK BY FRACTIONATION AND FLASH STEPS
Ralph H. Potts, La Grange, Ill., assignor to Armour and Company, Chicago, Ill., a corporation of Illinois
Application December 16, 1941, Serial No. 424,434, which is a division of application Serial No. 298,722, October 9, 1939. Divided and this application February 10, 1945, Serial No. 577,247
13 Claims. (Cl. 202—51)



4. A method of obtaining fatty acids of improved color and odor from fatty acid stock containing unwanted components having higher and lower boiling temperature ranges than said fatty acids by two successive stages of treatment, comprising continuously fractionating the fatty acid stock with the application of heat and under reduced pressure to remove the lowest of the lower boiling components, and thereafter continuously distilling the fatty acids from which said lowest boiling components have been removed so as to vaporize the fatty acids at a temperature lower than that to which fatty acids were heated during the fractionation, to remove the fatty acids from the higher boiling components.

2,450,613
MECHANICAL POOL TABLE
Felix Radinsky, Olympia, Wash.
Application July 19, 1944, Serial No. 545,583
2 Claims. (Cl. 273—11)

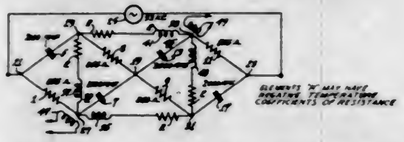


1. In a mechanical pool table, the combination of a bed inclined from the horizontal, an arcuate gate arranged at the lower end of the bed for passing balls therethrough, means arranged within said gate for supporting a ball thereon in a ball impelling position, pivotally mounted

elevating means for moving a ball from a position beneath the bed to a position from which it will be conveyed by gravity from the elevating means directly onto said supporting means, means for yieldably urging said supporting means into a position for preventing a ball from

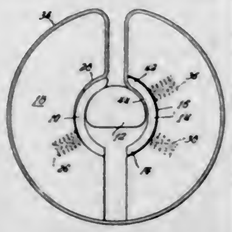
rolling thereupon from the bed, means for moving said supporting means along said arcuate gate thereby to spot the ball on the bed, and a ball impelling means movable independently of the ball supporting means behind the ball in the spotted position thereof and aimed in an intended line of travel of the ball.

2,450,614
WELDING SYSTEM
Robert L. Ringer, Jr., Warren, and Clyde E. Smith, Port Homer, Ohio, assignors to The Taylor-Winfield Corporation, Warren, Ohio, a corporation of Ohio
Application December 4, 1942, Serial No. 467,854
22 Claims. (Cl. 219—4)



1. An electrical system comprising a capacitor, means comprising a controllable rectifier to charge said capacitor, an inductive load circuit, means to discharge said capacitor through said circuit, means operative upon actuation of said means to discharge to control said rectifier in such manner that the output thereof is interrupted, and means operative in response to the reversal of polarity in said circuit to re-establish conduction in said rectifier.

2,450,615
METHOD OF REDUCING SCALD DEVELOPMENT ON FRUIT
Harold A. Schomer, Cedar Lane, Md., assignor to the United States of America as represented by the Secretary of Agriculture
No Drawing. Application July 19, 1946, Serial No. 684,913
11 Claims. (Cl. 99—156)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

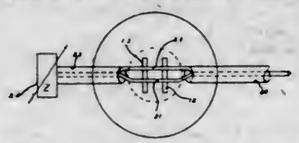


1. The method of reducing the development of scald on fruit during cold storage comprising maintaining the fruit in contact with a plant hormone during the storage period.

2,450,616
ELECTRICAL NETWORKS FOR PHASE SHIFTERS
Stuart W. Seeley, Roslyn Heights, N. Y., assignor to Radio Corporation of America, a corporation of Delaware
Application August 5, 1944, Serial No. 548,183
8 Claims. (Cl. 172—238)

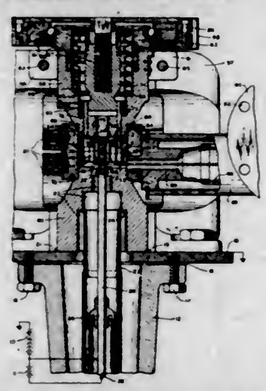
1. An electrical network for converting a single phase current to a quadrature phase current consisting of four resistive elements and four reactive elements of similar sign, said elements being connected in a symmetrical arrangement to form two Wheatstone bridges in which the reactive elements are in opposite arms, a series connection between said Wheatstone bridges whereby said single phase current may be applied to the input arms of said bridges in series, and four terminals connected to the output arms of said bridges for deriving therefrom said quadrature phase currents.

2,450,617
BUFFING DRUM
Joseph Leigh Smith, Glen Ellyn, Ill.
Application January 25, 1946, Serial No. 643,300
10 Claims. (Cl. 51—194)



1. A buffing drum comprising a cylinder, an arbor mounted axially on one side of said cylinder, a transverse passageway diametrically through said cylinder, a cylindrical chamber axially positioned in said cylinder, a pair of shoes each in the shape of a cylindrical segment and one positioned adjacent the chamber wall on one side of the passageway and the other positioned adjacent the chamber wall on the other side of the passageway, and a semi-cylindrical locking element axially positioned in the chamber and having its outer surface engageable with the inner surface of the shoes.

2,450,618
INDICATING DEVICE
Louis D. Smullin, Arlington, and Jerome B. Wiesner, Boston, Mass., assignors, by mesne assignments, to the United States of America
Application May 18, 1944, Serial No. 536,212
2 Claims. (Cl. 250—158)

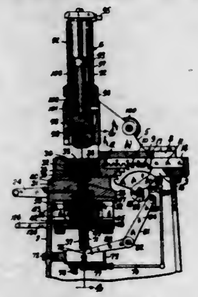


1. A cathode ray tube having an electron gun, a pair of deflecting plates adapted to have a periodic sweep voltage applied thereto and a fluorescent screen, said tube also including means impressing a beam deflecting force perpendicular

to the beam deflecting force of said plates, said means comprising an open two-wire transmission line disposed within said cathode ray tube, said

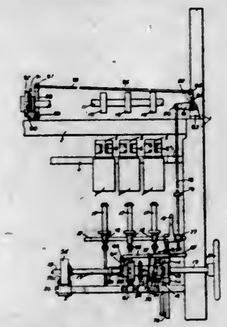
line lying in a plane normal to the tube axis and adapted to have flowing therein high frequency currents.

2,450,619
TUNABLE MAGNETRON
Simon Sonkin, New York, N. Y., assignor to the United States of America as represented by the Secretary of War
Application October 19, 1945, Serial No. 623,424
7 Claim. (Cl. 250—27.5)



1. An ultra-high frequency magnetron including an anode, a pole piece mounted in spaced relationship with respect to said anode, a plurality of metallic members mounted within said pole piece, mechanically instrumentalities for lowering said members from their normal positions within said pole piece into positions producting varying degrees of coupling between said members and said anode to vary the operating frequency of said anode, said pole piece having a well for housing said instrumentalities.

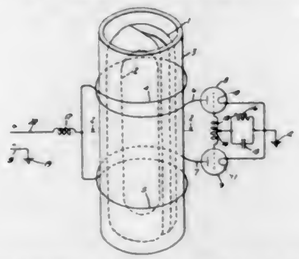
2,450,620
LOCKET
Gunther E. Speicher, Washington, D. C.
Application May 10, 1945, Serial No. 592,983
3 Claims. (Cl. 63—18)



1. A device of the character described comprising similar contoured component parts made of a transparent material having circular cavities formed in the inner medial portions thereof, a conical socket formed in one of said cavities, a jewel having the conical portion thereof seated in said socket, the bottom of said second cavity contacting the face of said jewel thereby retaining said jewel in said socket and means for fastening said parts together as a unit.

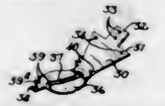
2,450,621
FORGING MACHINE
Wade H. Wineman, Michigan City, Ind., assignor to Joy Manufacturing Company, a corporation of Pennsylvania
Application April 11, 1944, Serial No. 530,509
27 Claims. (Cl. 76—5)

24. In a forging machine, in combination, die means, a rotatable work holder having a connection to which an article to be forged is adapted to be coupled for holding the article in forging position with respect to said die means, means for rotating said holder with respect to the forged article while the latter remains stationary as regards rotation with respect to said die means for at least partially uncoupling said holder-connection from the article while the article remains supported by the holder, and means for moving said work holder axially relative to said die means to release the forged article from the latter.



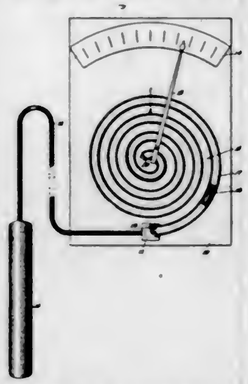
2,450,622
CENTRIFUGAL SPINNING, TWISTING, AND ANALOGOUS MACHINE
Frank Wright, Haworth, England, assignor to Prince-Smith & Stells Limited, Keighley, England, a British company
Application December 13, 1946, Serial No. 716,118
In Great Britain December 17, 1945
8 Claims. (Cl. 57—34)

1. An electrically driven centrifugal spinning, twisting or analogous machine, including delivery



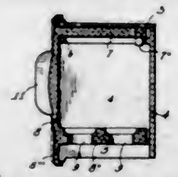
means to deliver yarn to a series of rotary yarn holders, a vertically reciprocable front carriage, an actuating shaft for said front carriage, a series of bobbins supported by said front carriage to receive yarn from said yarn holders, electromechanical control mechanism in circuit with an electric power supply, said control mechanism being common to said yarn delivery means and said front carriage and being operable in the event of a breakage of the electric power circuit, retaining means normally holding said front carriage in its lowermost position, said retaining means being releasable by said control mechanism, and a motor connected to said actuating shaft to elevate said front carriage when released from said retaining means to cause the bobbins to be inserted into said yarn holders whereby the unwinding of the filament spun therein is automatically initiated.

2,450,623
HIGH-FREQUENCY INDUCTION HEATING SYSTEM
Harold W. Anderson, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Application October 20, 1944, Serial No. 559,531
3 Claims. (Cl. 219—47)



1. High frequency heating apparatus comprising two helical induction heating coils wound in the same direction, means supporting said coils in end-to-end adjacent relation, electric discharge device oscillation generator means connected to the inner adjacent ends of said coils, a connection electrically connecting together the outer ends of said coils thereby to form a high frequency oscillation circuit including said generator means and said coils in series with one another for the flow of high frequency current therethrough whereby said coils produce cumulative magnetic fields and an electric field having its greatest density adjacent the inner ends of said coils for the heating of an article inserted into said coils, a choke coil, and connections for supplying direct current to said generator means through said choke coil.

2,450,624
ARCH STEEL SHANK
Frank Aquilino, New York, N. Y.
Application April 22, 1946, Serial No. 663,849
3 Claims. (Cl. 36—76)

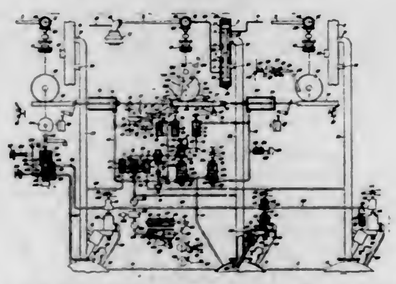


3. A reinforcement member for the shank of a shoe comprising a plate portion, an integral tongue extending from one end of said plate and being bowed to conform to the shape of the shank, a reinforce rib formed centrally of said tongue and extending into said plate portion, said plate portion being substantially as wide as said tongue and constituting a lateral support member for attachment to the sole of a shoe at the heel portion thereof, means for attaching said member to the sole of a shoe with the tongue underlying said shank portion including side and end prongs cooperating to prevent displacement of said member and said tongue being substantially oval in shape to provide lateral support at the arch portion of the shoe.

2,450,625
FLUID-PRESSURE-RESPONSIVE ELEMENT
John W. Beecher, Waterbury, Conn., assignor to The Bristol Company, Waterbury, Conn., a corporation of Connecticut
Application November 30, 1944, Serial No. 565,962
6 Claims. (Cl. 73—418)

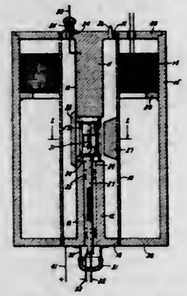
5. A Bourdon spring comprising a curved tubular member of non-circular cross-section, and a further tubular member having its principal portion surrounded thereby and displaced therefrom to provide a sealed chamber therebetween, said further tubular member being closed at one extremity and protruding at the opposite extremity beyond an extremity of the first-named tubular member and open to the atmosphere.

2,450,626
TOOTHBRUSH HOLDER
David Bellock, New York, N. Y.
Application March 21, 1945, Serial No. 583,997
2 Claims. (Cl. 312—112.5)



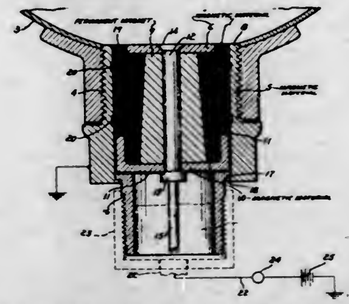
1. A toothbrush holder comprising a casing having side walls, a rear wall, and a top wall, the casing being of integral construction, and the top wall having a centrally located depending thickened area formed with a horizontal guide aperture the walls of which afford supporting means, a toothbrush carrier having a front wall carrying near its top a slide bar entering the said aperture of the casing and supported by the walls of the said horizontal guide aperture, said front wall also being provided near its base with a tray apertured for the reception of toothbrushes, said tray being projected rearwardly of the front wall, the tray and slide bar being integral with the front wall, said slide bar slidingly engaging the top wall of the casing in the movement of the carrier relatively to the casing.

2,450,627
MANUFACTURE OF TETRABASIC ACIDS
Herman S. Bloch, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware
No Drawing. Application March 23, 1945, Serial No. 584,505
13 Claims. (Cl. 260—514)



1. A process for manufacturing a tetrabasic acid which comprises heating at a temperature of from about 100 to about 350° C. in the presence of an aqueous alkaline reagent the adduct of a dienophilic dibasic acidic compound and a cyclic polyolefinic hydrocarbon containing isolated unsaturation and at least some conjugated unsaturation, and acidifying the polymer product formed in the said seating step to form said tetrabasic acid.

2,450,628
CIRCUIT BREAKER OPERATING SYSTEM
Alexander C. Boisseau, Lansdowne, Benjamin S. Beall, Upper Darby, Edward J. Frank, Springfield, and Roger W. Lowery, Aldan, Pa., assignors to General Electric Company, a corporation of New York
Application November 30, 1944, Serial No. 565,834
9 Claims. (Cl. 200—81.4)



1. In a multipole circuit breaker having serially connected interrupting and isolating contacts for each pole thereof, means including a first fluid motor for each pair of interrupting contacts, a source of fluid under pressure, means including a conduit for each pole of said circuit breaker for connecting said source with each of said fluid motors to open said interrupting contacts, a second fluid motor for opening said isolating contacts, means including a valve for controlling the supply of fluid between said source and said second fluid motor, fluid operated means for operating said valve, fluid conducting means connected to said fluid operated means and having a separate connection to atmosphere for each of said conduits, and separate means associated with each conduit and responsive to a predetermined fluid pressure therein for shutting off the separate connection to atmosphere for the associated conduit and for establishing a connection between the associated conduit and said fluid operated means.

2,450,629
ULTRA HIGH FREQUENCY MAGNETRON GENERATOR
Ralph J. Bondley, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Application March 14, 1944, Serial No. 526,432
6 Claims. (Cl. 250—27.5)

1. An ultra high frequency generator comprising a section of concentric transmission line having a tubular outer conductor and a centrally disposed inner conductor, spaced conductive means connected between said conductors forming therewith a cavity resonator, said inner conductor comprising a pair of magnetic members having ends within said resonator in spaced relation and of opposite magnetic polarity, a thermally emissive cathode disposed between said ends, an anode disposed between said cathode and said outer conductor comprising a conductive member connected to said outer conductor and a conductive segment connected between said ends, said segment being spaced diametrically across said cathode from said conductive member, means connected to said generator whereby an electron discharge may be established between said anode and cathode, and means forming a part of said generator and including said magnetic members for rotating the electrons of said discharge to excite said cavity resonator and produce traveling electromagnetic waves on said line, the wave length of said waves being determined by the spacing between said conductive means.

2,450,630
SIGNAL PLUG FOR ENGINE FAILURE WARNING SYSTEMS
Edmund W. Bourne, Jr., Utica, N. Y.
Application August 1, 1947, Serial No. 765,363
3 Claims. (Cl. 200—52)

1. A signal plug for an engine failure warning system comprising a screw shell for engagement in a crank case drain opening or the like, said

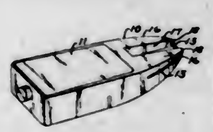
screw shell being of magnetic material, a permanent magnet mounted in fixed relation in said screw shell and electrically insulated therefrom, an electrode disc at the inner end of said permanent magnet separated from the screw shell by a magnetic gap, the outer end of said permanent magnet being electrically insulated from but in magnetically coupled relation with said magnetic screw shell and a terminal at the outer end of said screw shell electrically connected with said electrode at the inner end of said permanent magnet and including a terminal pin extending inwardly through said permanent magnet to said electrode, a magnetic head at the outer end of said permanent magnet and providing the magnetic coupling between the outer end of the permanent magnet and the screw shell, said terminal pin being riveted to hold said electrode to the inner end of the permanent magnet and said magnetic head to the outer end of the same and said riveted pin having a terminal extension at the outer end of the same for connection with an external warning or signal circuit.

2,450,631
GARMENT
Ernest Buchler, Sunnyside, Long Island, N. Y., assignor to Arkay Infants Wear, Inc., New York, N. Y., a corporation of New York
Application April 2, 1948, Serial No. 18,641
6 Claims. (Cl. 2—80)

1. In an infant's garment, a relatively wide waistband composed of front and rear parts joined along their sides and being made from one-directionally expansible material, such as knitted fabric, a skirt portion depending from the lower edge of the waistband and being composed of front and rear parts joined along their sides and having leg portions provided with tubular leg collars, said leg portions terminating at their lower ends in overlapping crotch flaps provided with fastening means for holding the flaps in their overlapping, closed position, a moisture-proof lining composed of front and rear parts provided at the interior of the skirt portion, the upper edges of the lining parts being secured to the lower edge of the waistband, the sides of the lining being jointly united with the sides of the skirt material, and the lower edges of the lining parts being joined with the upper edges of the leg collars and of the flaps.

2,450,632
PRODUCTION OF NITRILES
Hamilton P. Caldwell, Jr., and Harold D. Chapman, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application January 16, 1946, Serial No. 641,640
12 Claims. (Cl. 260—465)

1. A process for the production of aromatic nitriles, which comprises contacting an aromatic hydrocarbon containing at least seven and up to eleven, inclusive, carbon atoms per molecule, and having at least one nuclear hydrogen replaced by a univalent, aliphatic, non-acetylenic hydrocarbon radical, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 850° F. and about 1250° F., in the presence of a catalyst comprising a molybdenum oxide.



2,450,633
COMPOUNDED OIL
James O. Clayton, Berkeley, Calif., assignor to California Research Corporation, San Francisco, Calif., a corporation of Delaware
No Drawing. Application October 31, 1944, Serial No. 561,317
6 Claims. (Cl. 252—33.2)

4. A petroleum lubricating oil comprising a major proportion of a petroleum oil of lubricating viscosity, about 0.1 to 5% by weight based on finished oil of an oil-soluble alkaline earth metal high molecular weight aliphatic type alkaryl sulfonate and about 0.1 to 2% by weight based on finished oil of an oil-soluble zinc dithiocarbamate.

2,450,634
PRODUCTION OF THIODIHYDRACRYLIC ACIDS
Russell T. Dean, Stamford, and Edwin O. Hook, Darien, Conn., assignors to American Cyanamid Company, New York, N. Y., a corporation of Maine
No Drawing. Application August 29, 1942, Serial No. 456,712
3 Claims. (Cl. 260—537)

1. The process of preparing β,β'-thiodipropionic acid which comprises reacting at atmospheric pressures acrylic acid in aqueous solution with sodium sulfide under alkaline conditions and in the absence of stabilizing agents and treating the reaction product with sulfuric acid to liberate the free thiodipropionic acid.

2,450,635
SANITARY DENTAL FLOSS HOLDER
Joseph E. Dembenski, Nanticoke, Pa.
Application February 23, 1946, Serial No. 649,497
6 Claims. (Cl. 132—92.1)

1. A dental floss dispenser comprising a casing having a chamber defined by a front wall, a rear wall, side walls, a bottom wall and a top wall having an opening, a cover detachably closing said opening, two spaced lugs projecting forwardly from said front wall and having aligned transverse orifices at their front end and orifices in their sides opening into said chamber through said front wall, a rotatable shaft extending longitudinally in said chamber and journalled in said front and rear walls and projecting through said rear wall, a knob on said shaft exteriorly of said rear wall for turning said shaft, new dental floss wound on a portion of said shaft adjacent one end thereof and used dental floss wound on said shaft adjacent the other end thereof, means for guiding a web of said floss between said new and used portions through said orifices and across said space between said lugs, and means for guiding the rewinding of said floss back on the used floss portion of said shaft so as to evenly wind the used floss on said used floss portion of the shaft.

2,450,636
PRODUCTION OF NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application January 31, 1946, Serial No. 644,658
9 Claims. (Cl. 260—465)

1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting a cycloparaffinic hydrocarbon selected from the group consisting of dimethyl cyclohexane, methyl cyclohexane, and methyl decalin, with ammonia, in vapor phase, at temperatures falling within the range varying between about 925° F. and about 1075° F., in the presence of a catalyst comprising a molybdenum oxide.

2,450,637
PRODUCTION OF NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application February 1, 1946, Serial No. 645,012
12 Claims. (Cl. 260—465.3)

1. A process for the production of nitriles having at least two carbon atoms, which comprises reacting an olefinic hydrocarbon containing up to about ten carbon atoms, with ammonia, in vapor phase, at temperatures varying between about 850° F. and about 1075° F., in the presence of a molybdenum oxide.

2,450,638
PRODUCTION OF NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application February 1, 1946, Serial No. 645,013
12 Claims. (Cl. 260—465.3)

1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting a paraffinic hydrocarbon containing at least two and up to about ten carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 925° F. and about 1075° F., in the presence of a catalyst comprising a molybdenum oxide.

2,450,639
PRODUCTION OF AROMATIC NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application February 20, 1946, Serial No. 649,118
11 Claims. (Cl. 260—465)

1. A process for the production of aromatic nitriles, which comprises contacting an aromatic hydrocarbon having at least one nuclear hydrogen replaced by a univalent, aliphatic, non-acetylenic hydrocarbon radical, and containing at least seven and up to eleven, inclusive, carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 850° F. and about 1250° F., in the presence of a catalyst comprising a vanadium oxide.

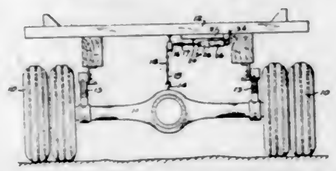
2,450,640
PRODUCTION OF NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application March 9, 1946, Serial No. 653,435
9 Claims. (Cl. 260—465)

1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting a cycloparaffinic hydrocarbon selected from the group consisting of dimethyl cyclohexane, methyl cyclohexane, methyl cyclopentane, and methyl decalin, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 925° F. and about 1075° F., in the presence of a catalyst comprising a vanadium oxide.

2,450,641
PRODUCTION OF NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application May 24, 1946, Serial No. 672,154
12 Claims. (Cl. 260—465.3)

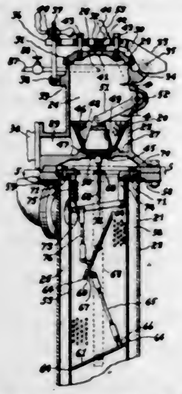
1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting a paraffinic hydrocarbon containing at least two and up to about ten carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 925° F. and about 1075° F., in the presence of a catalyst comprising a vanadium oxide.

2,450,642
PRODUCTION OF NITRILES
William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application May 24, 1946, Serial No. 672,155
9 Claims. (Cl. 260—465.3)



1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting an olefinic hydrocarbon containing up to about ten carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 850° F. and about 1075° F., in the presence of a catalyst comprising a vanadium oxide.

2,450,643
SHOE MACHINE
Anton E. Diessel, St. Louis, Mo., assignor to International Shoe Company, St. Louis, Mo., a corporation of Delaware
Application October 29, 1945, Serial No. 625,287
7 Claims. (Cl. 12—1)

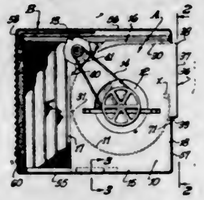


1. In a machine for forming closed slip-last uppers having a box toe insert formed and adhered by the application of heat, comprising a base, a forepart-forming member insertable in the forepart of the upper and conforming to the inner contour thereof and having a longitudinal recess extending to the toe end of said member, a heating element removably insertable in said recess in said forming member, means for exerting a stretching force on said upper when mounted on said forming member to conform the upper thereto and to set said box toe insert, a wiping device movable across the toe section of the upper adjacent to the toe portion of said forepart-forming member, and mechanical means for moving said wiping device vertically in respect of forepart-forming member.

2,450,644
MAXIMUM LOAD INDICATING GAUGE
Jack D. Donaldson, Tacoma, Wash.
Application December 9, 1946, Serial No. 714,966
5 Claims. (Cl. 265—42)

2. In an apparatus of the class described comprising a supporting structure, a frame supported from said structure by spring means and adapted to carry a load; in combination with a tension means mounted on said frame; a cable secured to said supporting structure and to said tension means and passing vertically upward from said supporting means to said frame, whereby variations in the load applied to said frame will cause said tension means to move; a container; a flexible sleeve extension to said container, said sleeve extension being secured to and moved by the movements of said tension means; a fluid filling said container and said sleeve; and means to indicate the liquid displaced from said container by the load applied to said frame.

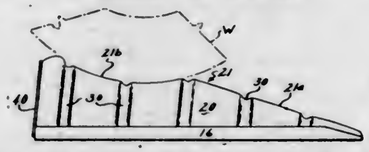
2,450,645
METHOD OF FREEZING FOOD
Frank B. Doyle, Phillipsburg, N. J., assignor to Ingersoll-Rand Company, New York, N. Y., a corporation of New Jersey
Original application October 28, 1943, Serial No. 507,993. Divided and this application November 15, 1944, Serial No. 563,595
3 Claims. (Cl. 99—192)



1. The method of processing food in two zones which comprises subjecting the food to a blanching medium in one zone, utilizing such blanching medium for expelling air from said one zone, next subjecting the food in said one zone to a vacuum, maintaining a vacuum in the other zone, interconnecting the zones, transferring the food to said other zone, cutting-off communication between the zones, and continuing subjecting the food to a vacuum for freezing the food.

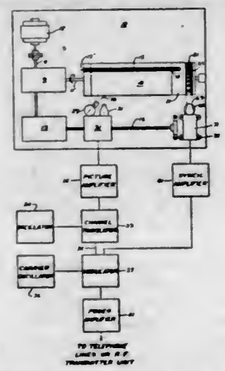
2,450,646
METHOD OF MAKING METHYL HYDROXY-ISOPROPYL KETONE
Robert R. Dreisbach and George Beal Heusted, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich., a corporation of Delaware
No Drawing. Application September 15, 1941, Serial No. 410,894
3 Claims. (Cl. 260—594)

1. In a method of making methyl beta-hydroxy-isopropyl ketone, the steps which consist in heating to a reaction temperature between 75° and 85° C. for not more than 2 hours a mixture comprising methyl ethyl ketone, an aqueous formaldehyde solution of at least 30 per cent concentration, sodium hydroxide, and sodium carbonate, which mixture contains betwen 0.0015 and 0.008 chemical equivalent of alkali and between 0.2 and 0.7 molecular equivalent of formaldehyde per mole of methyl ethyl ketone and between 0.5 and 1.5 chemical equivalent of the sodium carbonate per mole of sodium hydroxide, and thereafter treating the mixture with sufficient acid to neutralize the alkali and separating the methyl beta-hydroxy-isopropyl ketone product.



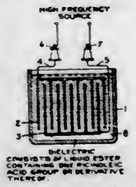
2,450,647
BLOWER
Bryant Essick, Los Angeles, Calif.
Application January 16, 1945, Serial No. 572,997
10 Claims. (Cl. 230—117)

7. A blower including spaced substantially rectangular side plates, a curved body, having ends, joined between the side plates and forming a rotor chamber with an outlet opening between said ends, a rotor in the chamber, and a motor



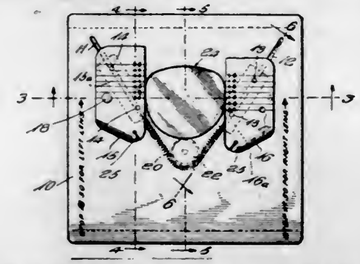
for driving the rotor mounted at the exterior of the chamber.

2,450,648
VEHICLE LIFT
Joseph Felzer, Los Angeles, Calif.
Application December 22, 1945, Serial No. 636,906
2 Claims. (Cl. 254—88)



1. A drive-on type vehicle lift comprising a base member having a bottom wall and upright side walls, a U-shaped body having side walls secured between the side walls of the base and having a top wall inclining from the front end of the base to a point substantially midway between its ends and thence curving downwardly, upwardly and downwardly, a door swingably mounted on the rear end of the base in position to close the rear end of the body, and a leaf spring latch secured to the door and having a curved free end resiliently engageable under the rear end of the body top wall.

2,450,649
FACSIMILE SYNCHRONIZING SYSTEM
William G. H. Finch, Newtown, Conn.
Application February 16, 1944, Serial No. 522,601
10 Claims. (Cl. 178—69.5)

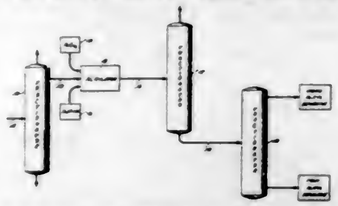


1. In a facsimile system, a transmitter, said transmitter comprising means for scanning a line of an image and generating corresponding picture currents and means operable during the scanning of said image line to generate a synchronizing signal having a characteristic varying linearly with the proportion of said image line scanned.

2,450,650
ELECTRIC CAPACITOR
Ralph G. Flowers and Leola Wills Flowers, Pittsfield, Mass., assignors to General Electric Company, a corporation of New York
Application December 13, 1945, Serial No. 634,699
1 Claim. (Cl. 175—41)

An electric capacitor comprising the combination of a container, spaced cooperating armatures therein, and a dielectric material consisting of ethylene glycol monomethyl ether acetyl ricinoleate.

2,450,651
LENS MARKING GAUGE
Carl W. Focht, South Williamsport, Pa., assignor of one-half to The Valley National Bank of Phoenix, Phoenix, Ariz., a National Banking Association
Application May 10, 1945, Serial No. 593,001
2 Claims. (Cl. 33—174)

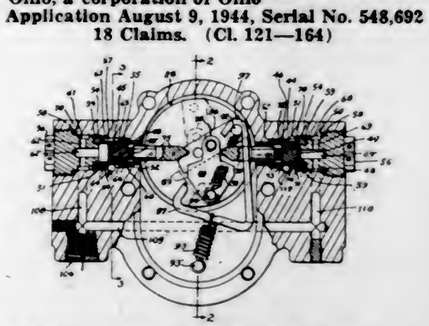


1. In a lens marking gauge, a base, blocks movably mounted thereon having approximately parallel edges and graduations on their surfaces near the said edges, means for guiding the blocks divergently during their movement toward the upper edge of the base, means for selectively holding either of the blocks in a predetermined position while the other is movable with relation to it, a flexible band having a looped portion between the said blocks and having its ends connected to said blocks whereby the band may partially embrace the edges of a lens interposed between the blocks, and means for exerting a pull on the blocks against the action of pressure tending to move the blocks toward the upper edge of the base.

2,450,652
ALKYL BENZENES
Alfred W. Francis, Woodbury, and Carleton H. Schlesman, Camden, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
Application July 20, 1944, Serial No. 545,885
10 Claims. (Cl. 260—671)

1. The process of obtaining alkyl benzenes substantially free of non-aromatic hydrocarbons

from a petroleum oil comprising a substantial amount of benzene and a substantial amount of non-aromatic hydrocarbons wherein the boiling points of the benzene and the non-aromatic hydrocarbons are so close together that they cannot be separated feasibly by conventional fractional distillation, which process comprises distilling the oil to prepare a fraction boiling below about 90°



C., subjecting the fraction to selective alkylation with a single normally gaseous olefin in the presence of aluminum chloride so as to alkylate only the benzene, and then fractionally distilling the mixture formed by said alkylation step to produce a fraction reduced in benzene content boiling below 90° C. and a fraction boiling above 90° C. which consists of alkyl benzenes substantially free of non-aromatic hydrocarbons.

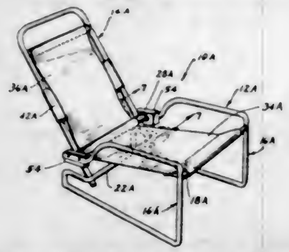
2,450,653

RECIPROCATING EXPANSIBLE CHAMBER WINDSHIELD WIPER MOTOR WITH SHAFT OPERATED SNAP ACTION DISTRIBUTING VALVE PLUNGERS

John H. Galley, Los Angeles, Calif., and Leroy J. Carey, Cleveland, Ohio, assignors to The Marquette Metal Products Company, Cleveland, Ohio, a corporation of Ohio

Application August 9, 1944, Serial No. 548,692
18 Claims. (Cl. 121—164)

8. The combination with a fluid motor having a piston and cylinder assembly, a pair of reciprocatable valves for controlling the operation of the piston, a single push rod arranged for operating both said valves and formed with spaced shoulders, a cam between said shoulders arranged for movement to and through a dead center position with a snap action, and means driven by said piston for moving said cam, of means for holding said cam against one of said shoulders substantially until the dead center position is reached.



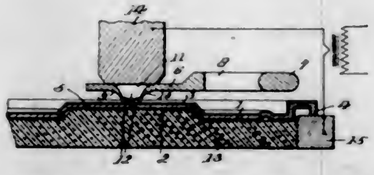
12. A fluid operated motor comprising a cylinder, a piston reciprocatable within said cylinder, a snap action mechanism driven by said piston, a push rod actuated by said snap action mechanism, and valve means including a pair of reciprocating valve plungers and cooperating valve sleeves in which the plungers are moved alternately in one direction by said push rod and in the other direction by fluid pressure force for controlling the flow of fluid to said cylinder.

2,450,654

AUTOMATIC ADJUSTABLE CHAIR

Harold Gleitsman, New Rochelle, and Daniel Hoenig, St. Albans, N. Y.; said Hoenig assignor to said Gleitsman

Application August 17, 1945, Serial No. 611,048
16 Claims. (Cl. 155—119)



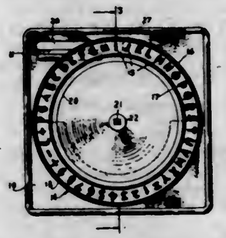
16. An automatically adjustable chair comprising a seat frame having laterally spaced parts provided with horizontal grooves therein at the rear portions thereof, said grooves extending longitudinally of said parts, respectively, and having convexly curved lower edges, a back frame having portions at a lower part thereof slidably and pivotally engaging said parts of the seat frame in said grooves on said edges, means anchored at the front thereof to the forward part of said seat frame, extending rearwardly from said forward part and connected to a lower part of said back frame and movable therewith in the sliding and pivotal movements thereof on said seat frame, and fulcrum means on said seat frame on which said back frame has a pivotal engagement below said connecting means, said back frame being movable toward the forward ends of said grooves by the force of the weight of the user of the chair applied downwardly on said connecting means when seated on the chair, the rear movement of said back frame being releasably opposed by said convexly curved edges of said grooves.

2,450,655

METHOD OF SPOT WELDING METAL KEYS TO METAL CAN ENDS

Norman H. Goldsworthy, Chicago, Ill., assignor to Continental Can Company, Inc., New York, N. Y., a corporation of New York

Application November 16, 1944, Serial No. 563,705
2 Claims. (Cl. 219—10)



1. The method of spot welding a metal key to a sheet metal container end having a metal core and a protective coating of lacquer on its inner face, the core of metal of the container end being bare at the edge thereof, piercing the end of the key so as to provide an opening surrounded by a torn ragged edge projecting from the face of the key, assembling the parts to be joined so that the ragged edge contacts with the outer face of the can end inwardly from the edge thereof, contacting the key with one of the electrodes of a welding unit and contacting the bare edge of the metal core at a point distant from the key with the other electrode of the welding unit, passing a welding current from one electrode to the other through the key and metal core so as to avoid disturbance of the lacquer on the inner face of the container end and simultaneously applying a follow-up pressure to the electrode contacting with the key whereby the ragged projecting edge is progressively fused with the metal core of the container end.

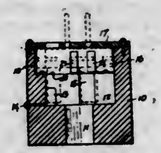
2,450,656

PRINTING APPLIANCE

John Pinkney Gowland, Woking, England

Application August 19, 1946, Serial No. 691,577
In Great Britain May 4, 1945
3 Claims. (Cl. 101—3)

1. A hand printing appliance comprising a baseplate having a printing aperture formed therein of size sufficient to receive at a time only a single one of the hereinafter mentioned printing characters and having a portion forming a window extending from said aperture to permit characters printed one after another in a line through said aperture on to a surface underlying said baseplate to be viewed through said window, an embossable printing disc rotatably and detachably mounted at its centre on said baseplate and having a peripheral marginal portion overlying said printing aperture and an adjacent part of said window, at least said marginal portion of said disc being transparent to render said part of said window visible through said disc, said marginal portion bearing an annular row of embossed printing characters which overlies said printing aperture and said characters of which appear in negative relief on the under face of said disc adjacent said baseplate and in positive intaglio in the upper face of said disc, an inking pad on said baseplate beneath said row of printing characters, said disc being supported on said baseplate with said row of characters normally out of contact with the underlying surface of said baseplate, and at least said marginal portion of said disc possessing sufficient inherent resiliency to permit depression of a selected printing character thereon through said printing aperture into position for printing and to automatically return said character to normal inoperative position after depression.



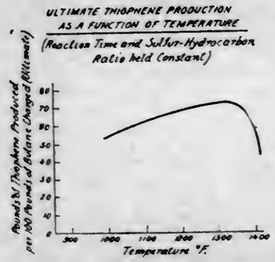
2,450,657

ELECTRIC PLUG

Max M. Guernsey, Stellacoom, Wash.

Application May 13, 1947, Serial No. 747,613
4 Claims. (Cl. 173—361)

4. An electric plug, comprising a plug body; a chamber in the end thereof; a plurality of fixed plates mounted in said chamber, to which a plurality of wires are secured; an invertible insert member in said chamber; means to limit the position of said insert member in said chamber; a plurality of contact prongs extending from the upper and lower sides of said insert member; a plurality of side plates centrally mounted on the sides of said insert member, certain of said side plates being electrically connected to said prongs,



said side plates being adapted to contact said fixed plates, whereby the relative contact between said fixed plates and the side plates, and the exposed prongs, are changed when the said insert member is inverted.

2,450,658

PRODUCTION OF THIOPHENE

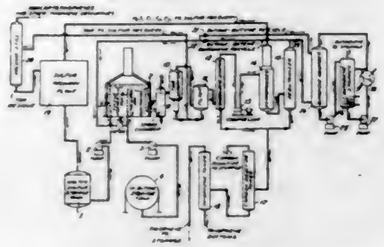
Rowland C. Hansford and Herbert E. Rasmussen, Woodbury, N. J., and Claude G. Myers, Bryn Mawr, Pa., and Alexander N. Sachanen, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York

Application September 28, 1944, Serial No. 556,150
20 Claims. (Cl. 260—329)

1. A process for producing thiophene, which comprises separately preheating sulfur and hydrocarbon material selected from the group consisting of normal butane, normal butenes and butadienes, to temperatures such that combining said sulfur and said hydrocarbon material will give a reaction mixture having a temperature varying between 850° F. and about 1400° F., mixing the preheated sulfur and the preheated hydrocarbon material, reacting said preheated sulfur with said preheated hydrocarbon material at temperatures varying between 850° F. and about 1400° F. for a period of time of not more than about one second to yield a thiophene-containing mixture, and reducing the temperature of said thiophene-containing mixture to less than 850° F.

2,450,659

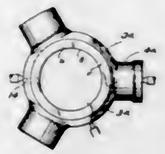
SULFUR AND HYDROCARBON REACTIONS AND PRODUCTS



Rowland C. Hansford, Herbert E. Rasmussen, and Alexander N. Sachanen, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York

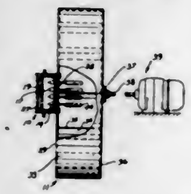
Application August 27, 1946, Serial No. 693,176
In Great Britain November 29, 1945
15 Claims. (Cl. 260—329)

1. The process for producing valuable organic compounds from normal C_4-hydrocarbons, which comprises separately preheating sulfur and a



C_4-hydrocarbon selected from the group consisting of normal butane, normal butenes, and butadienes, to temperatures such that combining said sulfur and said hydrocarbon will give a reaction mixture having a temperature varying between 850° F. and about 1400° F.; mixing the preheated sulfur and the preheated hydrocarbon; reacting said preheated sulfur with said preheated hydrocarbon at a reaction temperature varying between about 850° F. and about 1400° F. to yield a mixture containing said organic compounds; and immediately reducing the temperature of the mixture containing said organic compounds to a temperature of less than 850° F.

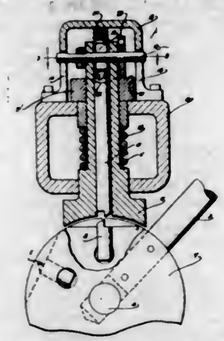
12. The tar obtained by the process which comprises separately preheating sulfur and a C_4-hy-



drocarbon selected from the group consisting of normal butane, normal butenes, and butadienes, to temperatures such that combining said sulfur and said hydrocarbon will give a reaction mixture having a temperature varying between about 850° F. and about 1400° F.; mixing the preheated sulfur and the preheated hydrocarbon; reacting said preheated sulfur with said preheated hydrocarbon at a reaction temperature varying between 850° F. and about 1400° F. to yield a mixture containing said tar; immediately reducing the temperature of the mixture containing said tar to a temperature of less than 850° F.; and separating the tar from said mixture.

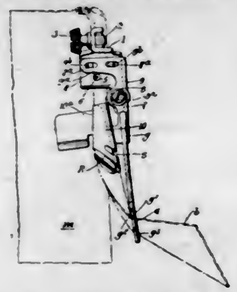
2,450,660
METHOD OF FORMING PROPELLER HUBS
Gordon W. Hardy, Euclid, Ohio, assignor to The Marquette Metal Products Company, Cleveland, Ohio, a corporation of Ohio
Application November 15, 1945, Serial No. 628,771
6 Claims. (Cl. 29—156.8)

6. In a method of forming a propeller hub adapted to support three blades, the procedure comprises starting with a generally flat forged steel blank with three equally spaced arm portions and a connecting central body portion, boring a generally spherical cavity in the central portion and centrally of the blank so that the spherical limits of the cavity terminate between the side walls of the blank, and additionally through-boring and turning the blank around the spherical cavity and on each side of the blank to form inturned concentric flanges for mounting the finished hub, mounting the blank on a rotary support, centeringly engaging the inner limits of the flanges and, while so mounted, forming six equally angularly spaced centering sockets all of which are coaxial with the arm portions and which are diametrally aligned in pairs across the center point of the spherical cavity, three of the centering sockets entering the cavity at spherical surface portions thereof, mounting the blank successively in three positions for rotation about coacting pairs of centering sockets and, in each position, turning one of the arm portions of the blank generally cylindrically and an adjacent one third portion of the connecting portion spherically, axially boring the arms at their outer ends to receive the blades, heat treating the hub thus formed to harden it, reforming and flush-pin-gaging the centering sockets which intercept the outer spherical surface with reference to the spherical surface of the cavity, and finally surface finishing the spherical and cylindrical external surfaces while using the centering sockets and the blade receiving bores of the arms for rotarily supporting the hub.



2,450,661
CONFECTIONERY COATING APPARATUS
John George Herrmann, Baldwin, N. Y., assignor to Conveyor and Machinery Manufacturers, Inc., New York, N. Y., a corporation of New York
Application June 4, 1948, Serial No. 31,195
14 Claims. (Cl. 107—1)

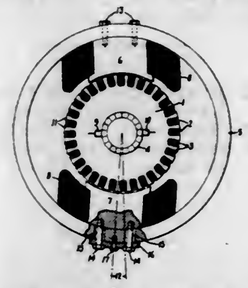
14. In an apparatus for covering, with a coating of solid particles, a group of confections and the like, a movable container for the coating material, a support on the container for mounting the confections within the container, and means for moving said container and said group of confections as a unit, whereby the coating material will be deposited upon the confections.



2,450,662
IMPACT TESTING MACHINE
Richard U. Hofmann, Rye, N. Y., assignor, by mesne assignments, to The Baldwin Locomotive Works, a corporation of Pennsylvania
Application February 26, 1945, Serial No. 579,804
4 Claims. (Cl. 73—101)

1. A comb'ned pendulum release and brake mechanism for a pendulum impact testing machine of the type having a brake surface and a latching element comprising, in combination, a latch bolt element adapted to engage the latching element to hold the pendulum in a raised position and to be released to allow the pendulum to move through its impact stroke, a brake shoe element adapted to engage the brake surface to bring the pendulum to rest after a testing operation, mechanism for effecting a predetermined sequence of operation of said elements, means for operating said mechanism, said latch bolt and brake shoe elements being arranged substantially concentric to each other and extending away from said brake surface, and the sequence

mechanism being disposed at the outer end of said concentrically arranged elements.



2,450,663
BINDING ATTACHMENT FOR SEWING MACHINES
Theodore J. Horwath, Newark, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a corporation of New Jersey
Application December 27, 1945, Serial No. 637,328
4 Claims. (Cl. 112—137)

1. In a binding attachment for sewing machines having a supporting member adapted to be secured to the presser-bar of the machine, a binder-supporting arm mounted on said member and adjustable laterally thereof, and a binder-head carried by said supporting arm and provided with a plurality of binding-receiving openings; the improvement which comprises the provision of a plate-supporting member having one end secured upon said supporting arm and its opposite end off-set laterally, a plate pivotally secured to the off-set portion of said plate-supporting member and provided on opposite sides of the pivot with binding guiding slots of different lengths, one of said slots being of arcuate form, said plate being adapted to be turned relative to its supporting member selectively to align said slots with the respective binding-receiving openings in said binder-head to guide binding strips thereto.

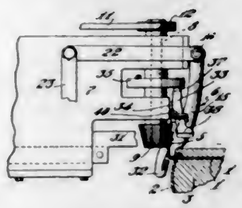
2,450,664
DYNAMOELECTRIC MACHINE
Ray D. Jones, Fort Wayne, Ind., assignor to General Electric Company, a corporation of New York
Application October 18, 1946, Serial No. 704,233
7 Claims. (Cl. 171—252)

1. A commutating dynamoelectric machine including a rotatable armature member provided with a commutator and having a core of magnetic material and winding slots therein with a winding in said slots, and a stationary field member having salient pole pieces of magnetic material arranged with the center lines of adjacent pole pieces of opposite polarity spaced substantially one-half armature slot pitch different from

180 electrical degrees apart, said pole pieces being arranged to provide normal excitation to said machine and to induce substantially equal and opposite alternating current components of voltage in said armature whereby commutator ripple caused by said slots passing said pole pieces is reduced.

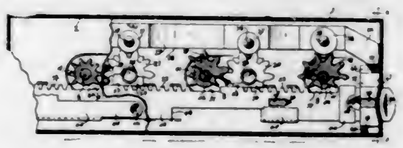
2,450,665
CONCAVE HYDROPLANE HULL
William B. Jutte, Los Angeles, Calif.
Application January 8, 1945, Serial No. 571,808
5 Claims. (Cl. 115—11)

1. A watercraft having a double concave hull of which one extends substantially from the stem to the stern of said craft with a downwardly facing concavity which decreases in height in a direction from the stem towards the stern, the other of said concave hulls being housed in and arranged under the bows of said first hull and extending from the stem to and terminating substantially amidship, the vertical sides of said other hull becoming increasingly concave in a direction aft from the bow.



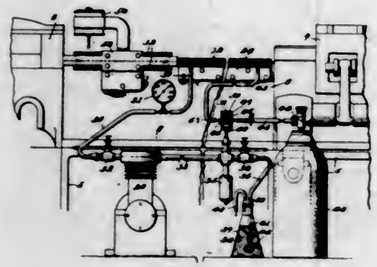
2,450,666
FOOTWEAR AND METHOD OF MAKING IT
Jacob S. Kamborian, West Newton, Mass.
Application March 18, 1944, Serial No. 527,101
4 Claims. (Cl. 12—142)

1. That method of making shoes which comprises as steps providing an upper and a sock lining, turning the margin of the sock lining downwardly and disposing it in contact with the inner surface of the lower margin of the upper, and uniting said margins by stitches to form a rib, providing a welt strip, sewing one margin of the welt strip against the outer surface of



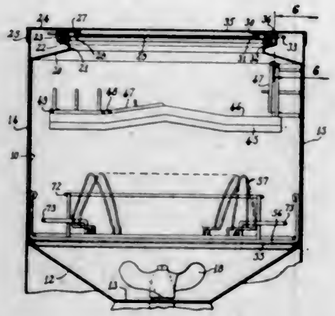
the lower margin of the upper by stitches which pass through the rib, introducing a last into the upper, filling the cavity defined by the sock lining and rib, thereby to provide a level bottom surface, turning the free margin of the welt strip outwardly so that its under surface is substantially in the plane of said level bottom surface, laying an outer sole upon said level surface, and permanently uniting the outer sole and welt strip.

2,450,667
METHOD OF AND APPARATUS FOR USE IN LASTING FOOTWEAR
Jacob S. Kamborian, West Newton, Mass.
Application September 13, 1945, Serial No. 615,966
26 Claims. (Cl. 12—1)



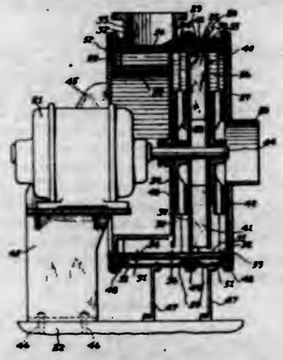
8. In a machine of the class described adapted to operate upon shoes having the lasting margin turned down away from the sole of the shoe, means for up-turning the lasting margin, said up-turning means including a plow which intermittently engages and turns up the lasting margin, means for gripping the margin so turned up by the plow, said gripping means including a roller and a drive shaft for said roller, means for wiping the lasting margin in over the bottom surface of the sole, a hammer for intermittently impacting the wiped-in margin against the sole, a pivotally mounted member carrying the plow at one end and the hammer at the other end, and means carried by said shaft for actuating said member to cause the plow and hammer to act alternately upon the margin.

2,450,668
CALCULATOR
Elmer G. Kesling, Bloomfield, Mo.
Application May 22, 1944, Serial No. 536,842
13 Claims. (Cl. 235—74)



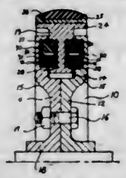
1. A calculating mechanism comprising a plurality of operative dials, means co-acting between said dials for effecting accumulation, a single spring operated detent mounted for resiliently holding all of said dials, a reset bar mounted for longitudinal movements for returning said dials to zero position as required, and means co-acting between said reset bar and said detent for releasing said dials during said resetting movement.

2,450,669
APPARATUS FOR DEOXIDIZING METAL SHEET EDGE PORTIONS
Alfred L. Kronquest, Syracuse, N. Y., assignor to Continental Can Company, Inc., New York, N. Y., a corporation of New York
Application August 18, 1942, Serial No. 455,240
7 Claims. (Cl. 134—64)



3. In apparatus of the character described metal sheet supporting ways, means for feeding sheets along said ways, means forming an elongated chamber paralleling said ways at one side and having a longitudinal slot through which sheet edge portions may project into and travel along in and through said chamber to be cleansed therein, means for wetting edge portions of the sheets which are to pass through said chamber, and means for directing hydrogen chloride gas into said chamber for deoxidizing sheet edge portions passing therethrough.

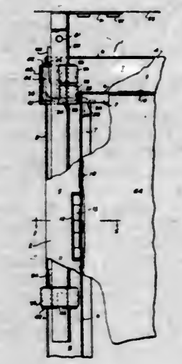
2,450,670
MULTIPLE CLOSURE FOR DISHWASHING MACHINES
Lawrence A. Loeb, New Haven, Conn.
Application February 22, 1944, Serial No. 523,440
4 Claims. (Cl. 220—29)



1. A dish washing machine comprising a tank and a hinged cover for the tank, said cover comprising a pair of frame members of open rectangular form and a panel of transparent material clamped between said members at its edges and closing the opening within said members, said members being L-shaped in cross section and each having a depending flange, the flange of the upper being disposed in parallel spaced relation to the flange of the lower, and sealing strips between said flanges.

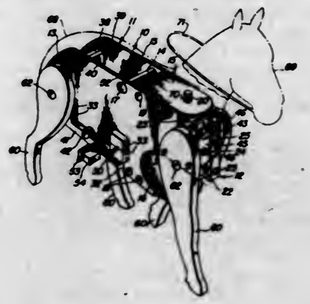
2,450,671
CASING FOR PUMPS
Isidor R. Loss, Rowayton, Conn., assignor to Ingersoll-Rand Company, New York, N. Y., a corporation of New Jersey
Application December 19, 1946, Serial No. 717,240
2 Claims. (Cl. 230—130)

1. A casing for pumps, comprising hollow casing sections arranged in end-to-end fashion, covers for the ends of the casing, a diaphragm having its marginal portion lying between the opposed ends of the casing sections to divide the interior of the casing into pumping chambers, sealing members to encircle the covers and the diaphragm and having portions covering the marginal portions of the side surfaces of the diaphragm and the covers to seat against the ends of the casing sections, and adjustable means for pressing the ends of the casing sections in sealing engagement with the sealing members.



2,450,672
RESILIENT WHEEL
James Matthew MacLean, Vancouver, British Columbia, Canada
Application June 23, 1942, Serial No. 448,122
5 Claims. (Cl. 152—41)

1. A resilient connection between two parts disposed and movable in substantially parallel planes and having circular recesses therein normally in axial alinement, comprising a cup rotatably mounted in one recess, a disc freely positioned on the bottom of the cup, and a shock-absorbing element extending into the recess of one part and into the cup against its disc within the recess of the other part.



2,450,673
DOOR FRAME
Ronald R. Magaw, Canton, and Karl H. Miller, North Canton, Ohio, assignors to Diebold, Incorporated, Canton, Ohio, a corporation of Ohio
Application September 16, 1944, Serial No. 554,442
9 Claims. (Cl. 189—36)

1. In a knock-down, sheet metal door frame having side and top jamb members of channel shape, a connection construction for the corner joint abutting edges of the members including, tubular clip means at the top of each side jamb member, tubular clip means at each end of the top jamb member, said tubular clip means each having spaced flat portions permanently secured

to the jamb member channel flanges within the channel, the clip means at each corner joint being tubularly aligned, and a tubular socket member telescoped within and interlocked with said aligned clip means.

2,450,674
MECHANICAL WALKING ANIMAL
Frank A. Manfredi, Gary, Ind.
Application March 18, 1946, Serial No. 655,172
12 Claims. (Cl. 280—1.17)

1. A mechanical walking animal comprising in combination, a hollow body, a forward shaft, an intermediate shaft and a rear shaft, said shafts being rotatably journalled in the sides of said body and protruding therefrom, an axially off-set portion medially the length of each of said shafts defining an inner crank, a pitman connecting said cranks, an outer crank at each of the protruding ends of said shafts, legs movably connected to said body and formed in the inner surfaces thereof with recessed slots, the outer cranks on said forward and rear shafts slidably and rotatably engaging said slots, foot

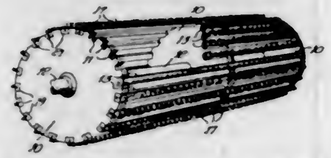
pedals on the outer cranks of said intermediate shaft, and steering means associated with the forward of said legs.

2,450,675
PRODUCTION OF NITRILES
Milton M. Marisic, Northfield, Ill., and William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application August 29, 1946, Serial No. 693,810
9 Claims. (Cl. 260—465.3)

1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting an olefinic hydrocarbon containing up to about ten carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 850° F. and about 1075° F., in the presence of catalytic oxides obtained by treating a heteropoly compound containing an acid anhydride molecule selected from the group consisting of MoO_3, WO_3, and V_2O_5, at a temperature and for a period of time sufficient to decompose said heteropoly compound.

2,450,676
PRODUCTION OF NITRILES
Milton M. Marisic, Northfield, Ill., and William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application August 29, 1946, Serial No. 693,811
9 Claims. (Cl. 260—465.3)

1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting a paraffinic hydrocarbon containing at least two and up to about ten carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 925° F. and about 1075° F., in the presence of catalytic oxides obtained by treating a heteropoly compound containing an acid anhydride molecule selected from the group consisting of MoO_3, WO_3, and V_2O_5, at a temperature and for a period of time sufficient to decompose said heteropoly compound.



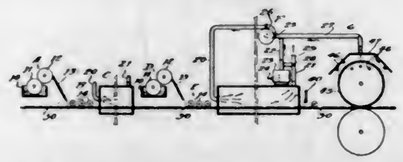
2,450,677
PRODUCTION OF AROMATIC NITRILES
Milton M. Marisic, Northfield, Ill., and William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application October 29, 1946, Serial No. 706,516
11 Claims. (Cl. 260—465)

1. A process for the production of aromatic nitriles, which comprises contacting an aromatic hydrocarbon having at least one nuclear hydrogen replaced by a univalent, aliphatic, non-acetylenic hydrocarbon radical, and containing at least seven and up to eleven, inclusive, carbon atoms per molecule, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 850° F. and about 1250° F., in the presence of catalytic oxides obtained by treating a heteropoly compound containing an acid anhydride molecule selected from the group consisting of MoO_3, WO_3, and V_2O_5, at a temperature and for a period of time sufficient to decompose said heteropoly compound.

2,450,678
PRODUCTION OF NITRILES
Milton M. Marisic, Northfield, Ill., and William I. Denton, Woodbury, and Richard B. Bishop, Haddonfield, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
No Drawing. Application March 26, 1947, Serial No. 737,425
6 Claims. (Cl. 260—465)

1. A process for the production of nitriles having at least two carbon atoms per molecule, which comprises contacting a cycloparaffinic hydrocarbon selected from the group consisting of methyl cyclohexane, dimethyl cyclohexane, and methyl decalin, with ammonia, in gaseous phase, at temperatures falling within the range varying between about 925° F. and about 1075° F., in the presence of catalytic oxides obtained by treating a heteropoly compound containing the acid anhydride molecule MoO_3, at a temperature and for a period of time sufficient to decompose said heteropoly compound.

2,450,679
GIN BRUSH
Earl C. May, Dallas, Tex.
Application May 3, 1946, Serial No. 666,874
2 Claims. (Cl. 19—60)



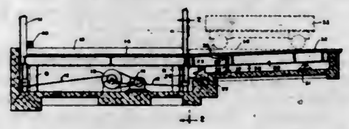
2. In a rotary gin brush having spaced apart heads, each provided with circumferentially spaced recesses in its perimeter, channels lying in said recesses and having inwardly turned, confronting flanges, defining an elongated housing of substantially rectangular cross-section, a tongue protruding from each end of each channel, brush sticks slidably disposed in said channels, said tongue being turned upwardly against the ends of said brush stick to hold the latter in co-axial relationship therewith.

2,450,680
GAS BURNER
Ervin H. Mueller, Grosse Pointe, Mich.
Application July 10, 1944, Serial No. 544,214
6 Claims. (Cl. 158—116)

1. A gas burner comprising a body having a fuel supply chamber for an inner burner section and a fuel supply chamber for an outer burner section which extends circumferentially around the inner burner chamber with a space therebetween, an outer cap in the form of a ring disposed over the outer burner chamber, an inner cap disposed over the inner chamber, the caps and the burner body having contacting surfaces some of which are grooved to provide burner ports leading from the respective fuel chambers, means for securing the inner cap to the body and means underlying the inner cap and having spaced elements extending across the space between the inner and outer burner sections and connecting with the outer cap for holding the outer cap on the body.

2,450,681
APPARATUS FOR COATING FIBER INSULATION BOARD
Carl G. Muench, Glenview, Ill., assignor to The Celotex Corporation, Chicago, Ill., a corporation of Delaware
Application October 4, 1943, Serial No. 504,849
1 Claim. (Cl. 91—55)

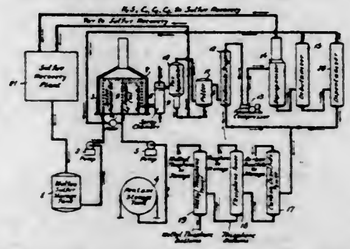
In an apparatus for applying a surface finish on fiber insulation board the combination comprising means for applying a fluid coating over the surface of a sheet of fiber insulation board, means for drying said fluid coating, means for applying a second fluid coating over the surface of the first fluid coating, means for drying such second fluid coating, means for supplying moisture to the surface of said second coating and heated ironing means for smoothing and ironing said surface coating applied to the fiber insulation board and a conveyor in operative relation with respect to said various means for conveying the fiber insulation board being treated successively through the said plurality of means operating thereon.



2,450,682
POLYMERS OF AN UNSATURATED ALKYD RESIN AND AN UNSATURATED HALOGENATED COMPOUND AND METHOD OF PRODUCING SAME
Birger W. Nordlander, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
No Drawing. Application April 30, 1946, Serial No. 666,203
10 Claims. (Cl. 260—45.4)

1. A product comprising an interpolymer of a diallyl ester of a nuclearly chlorinated phthalic acid and an unsaturated alkyd resin, the allyl residues of the diallyl ester being unsubstituted, and the two ingredients comprising the interpolymer being compatible and copolymerizable.

2,450,683
REFINING OF SUGAR
Ernest E. Pittman, Elizabethtown, Ky.
No Drawing. Application December 12, 1945, Serial No. 634,618
10 Claims. (Cl. 127—46)



1. A process for refining sucrose solutions containing, as impurities, organic acids, which process comprises dispersing in a sucrose solution a refining agent comprising finely divided particles of conjointly prefused lime and clay, the quantity of lime present being greater than that required to neutralize the organic acids present, heating the dispersion to a temperature between about 175° F. and 205° F., whereby to form reaction products by reaction between the lime and the organic acids without appreciable inversion of sucrose to glucose, and separating said reaction products with the particles of the refining agent.

2,450,684
LOADING PLATFORM
William H. Rambo, Portland, Oreg.
Application July 16, 1945, Serial No. 605,354
7 Claims. (Cl. 214—126)

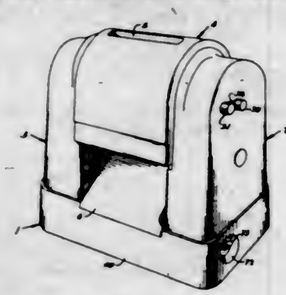
1. In an elevator loading apparatus, the combination comprising an elevator having a floor including a pair of spaced apart vehicle tracks thereupon, a loading platform provided adjacent said elevator including a pair of spaced apart vehicle tracks thereupon, said loading platform being pivotally mounted at the end remote from said elevator, a collapsible bracket means connected to the end of said loading platform adjacent said elevator, said bracket means in the operative position supporting said loading platform in a substantially horizontal position, said bracket means in the collapsed condition permitting downward movement of the end of said loading platform adjacent said elevator to a lower limit position, an operating lever operatively connected to said bracket means, means secured to said elevator in one direction for causing collapse of said bracket means, means for arresting movement of said elevator in said one direction in a position corresponding with the lowered position of said loading platform whereby a vehicle supported on the tracks of said loading platform is permitted to roll therefrom onto said tracks on said elevator, and means on said elevator operatively engaging with said lever upon movement of said elevator in the opposite direction for restoring said bracket means to the operative position and said loading platform to the horizontal condition.

2,450,685
PRODUCTION OF ALKYL DERIVATIVES OF THIOPHENE
Herbert E. Rasmussen and Rowland C. Hansford, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
Application September 29, 1944, Serial No. 556,438
20 Claims. (Cl. 260—329)

1. A process for producing methyl thiophene, which comprises separately preheating sulfur and hydrocarbon material selected from the group consisting of pentanes, pentenes and pentadienes,

having at least four carbon atoms in a straight chain, to temperatures such that combining said sulfur and said hydrocarbon material will give a reaction mixture having a temperature varying between 850° F. and about 1300° F., mixing the preheated sulfur and the preheated hydrocarbon material, reacting said preheated sulfur with said preheated hydrocarbon material at temperatures varying between 850° F. and about 1300° F. for a period of time of not more than about one second to yield a methyl thiophene-containing mixture, and reducing the temperature of said methyl thiophene-containing mixture to less than 850° F.

2,450,686
PRODUCTION OF METHYL THIOPHENE
Herbert E. Rasmussen and Rowland C. Hansford, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
Application June 27, 1945, Serial No. 601,759
11 Claims. (Cl. 260—329)



1. A process for producing methyl thiophene, which comprises separately preheating sulfur and a hydrocarbon selected from the group consisting of pentanes, pentenes, and pentadienes, having at least four carbon atoms in a straight chain, to temperatures such that combining said sulfur and said hydrocarbon will give a reaction mixture having a temperature varying between about 850° F. and about 1300° F.; mixing the preheated sulfur and the preheated hydrocarbon; reacting said preheated sulfur with said preheated hydrocarbon at a reaction temperature varying between 850° F. and about 1300° F., to a produce a methyl thiophene-containing mixture; and reducing the temperature of said methyl thiophene-containing mixture to less than 850° F.

2,450,687
PRODUCTION OF DIMETHYL AND ETHYL THIOPHENES
Herbert E. Rasmussen and Rowland C. Hansford, Woodbury, N. J., assignors to Socony-Vacuum Oil Company, Incorporated, a corporation of New York
Original application June 27, 1945, Serial No. 601,759. Divided and this application August 17, 1946, Serial No. 691,372
11 Claims. (Cl. 260—329)

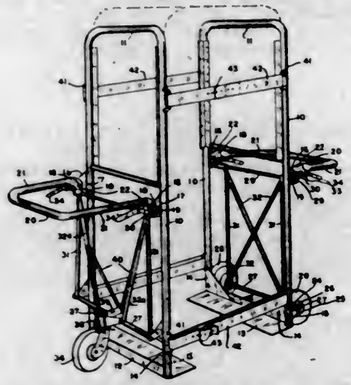
1. A process for producing dimethyl thiophene and ethyl thiophene, which comprises separately preheating sulfur and a hydrocarbon selected from the group consisting of hexanes, hexenes, and hexadienes, having at least four carbon atoms in a straight chain, to temperatures such that combining said sulfur and said hydrocarbon will give a reaction mixture having a temperature varying between about 850° F. and about 1300° F.; mixing the preheated sulfur and the preheated hydrocarbon; reacting said preheated sulfur with said preheated hydrocarbon at a reaction temperature varying between 850° F. and about 1300° F. to produce a dimethyl thiophene and ethyl thiophene-containing mixture; and reducing the temperature of said dimethyl thiophene and ethyl thiophene-containing mixture to less than 850° F.

2,450,688
MEAT TENDERIZING MACHINE
Grant M. Richard, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a corporation of New Jersey
Application October 11, 1944, Serial No. 558,138
7 Claims. (Cl. 17—26)

1. In a device for tenderizing meat, in combination, a cast unitary housing comprising a pair of hollow tower portions forming the ends, said tower portions being joined by a low front wall and a higher rear wall, ledges on the opposed faces of said towers extending downwardly from the top of the rear wall to the top of the front wall, a removable tray carried on said ledges, a motor in the space between said walls and under said tray mounted on a hinge allowing it to

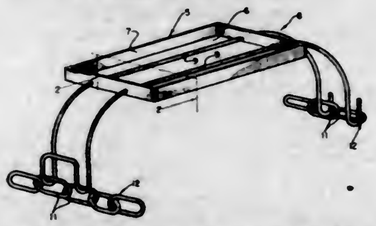
swing from an operating position within said housing to an accessible position exterior of said housing, bearings in said towers, a pair of knife-carrying arbors in the space between said towers carried by said bearings, and drive means between said arbors and said motor including gears in one of said towers and a belt from the motor to a pulley in the other of said towers.

2,450,689
SUPPORT FOR HAMMOCKS
Paul Richmond, Pontiac, Mich.
Application June 26, 1946, Serial No. 679,437
1 Claim. (Cl. 5—129)



A hammock support comprising a frame including a pair of elongated side members having intermediate straight ground engaging portions and terminal risers inclining upwardly therefrom at an obtuse angle and provided with obtuse angled terminals adapted to be secured together side by side in pairs, and removable slip on keepers for securing said pairs of terminals together comprising tubular sockets fitting at one end over said pairs of terminals and having the other ends thereof longitudinally slotted to form tongues for attaching the hammock thereto.

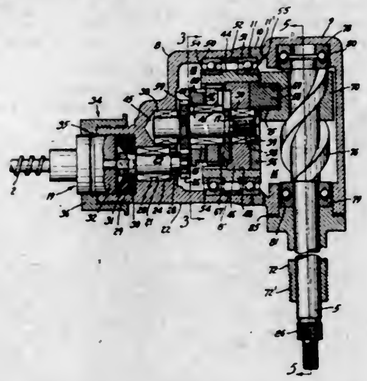
2,450,690
TRUCK FOR HANDLING ELECTRIC REFRIGERATORS AND THE LIKE
Jack B. Robins, Colorado Springs, Colo., assignor to Aircraft Mechanics Inc., Colorado Springs, Colo., a corporation of Colorado
Application December 17, 1946, Serial No. 716,725
3 Claims. (Cl. 280—44)



1. A truck comprising an elongated frame closed at the top and open at the bottom, a load supporting plate connecting the lower ends and projecting laterally therefrom, an axle positioned near the bottom of the frame, at least one wheel carried by the axle, means connecting the axle

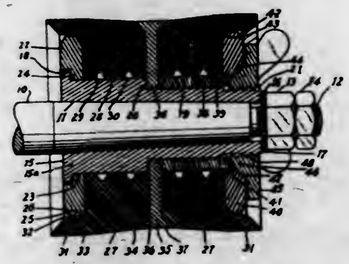
with the frame to permit it to move a limited distance in the direction of the frame, a handle pivoted to the frame at a point above the axle, a pusher frame connected at its lower end with the axle, the upper end of the pusher frame having a transverse bar, means constraining the bar to move in an arcuate path substantially con-

centric with the pivot handle, means comprising a portion of the handle for moving the bar in a downward direction, means for holding the bar in its lowermost position, and means comprising a lever pivoted to the handle for engaging the bar to move it from its lowermost to a higher position.



2,450,691
NONSKID DEVICE
Clyde E. Russell, Massillon, Ohio
Application June 5, 1947, Serial No. 752,621
3 Claims. (Cl. 152—225)

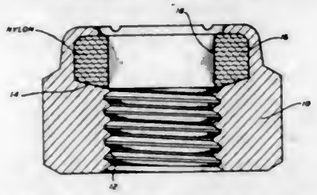
3. An anti-skid device for vehicle wheels, comprising a traction cleat, chains on opposite sides of the wheel, an attaching member for the cleat in the form of a single length of wire rod bent into substantially U-shape, and having opposed parallel portions thereof trained through openings in the cleat, the extremities of said parallel portions being bent upwardly through links of the chains on both sides of the tire.



2,450,692
MOTION CONVERTER MECHANISM
Columbus R. Sacchini, Euclid, and Lorain N. Vandervoort, Cleveland, Ohio, assignors to The Marquette Metal Products Company, Cleveland, Ohio, a corporation of Ohio
Application March 22, 1943, Serial No. 479,972
2 Claims. (Cl. 74—70)

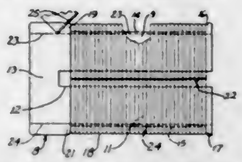
2. In a motion converter mechanism comprising a housing, a continuously rotating driving member, an eccentric crank pin driven by the driving member, a crosshead in the housing driven by said crank pin with a to and fro motion, an output shaft having a high pitch helical drive thread connection with the crosshead operative to oscillate the shaft, a bearing member for the

shaft on the housing, and means connecting the bearing member to the housing and extending inside the housing and slidably engaging the crosshead in a manner to prevent rotation thereof about the axis of the output shaft.



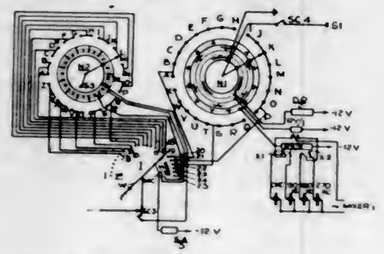
2,450,693
PISTON ASSEMBLY AND RING
William G. Sanders, Houston, Tex.; Edna Sanders executrix of said William G. Sanders, deceased
Application October 29, 1945, Serial No. 625,183
7 Claims. (Cl. 309—23)

5. A piston comprising in combination with a piston rod, a piston body removably mounted on said rod, locking means carried by the piston rod for locking said body on said piston rod, the outside diameter of said body being greater than that of said locking means, said body having an annular flange at one end thereof, a piston assembly mounted on said body comprising a plurality of separable elements including a pair of resilient sealing members, a reinforcing plate between said sealing members, said reinforcing plate having peripheral flanges tapering outwardly from the opposite faces of said plate, a pair of end plates enclosing said resilient sealing members and said reinforcing plate therebetween, each of said sealing members having a peripheral lip extending over and concentric with the edge of the adjacent end plate and having a peripherally scarfed surface on the heel thereof complementing the adjacent tapered surface of the flange on the reinforcing plate, and a clamping member mounted on the opposite end of said body and



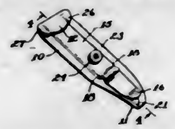
adapted to compressively clamp said piston assembly against said annular flange, said piston assembly and the separable elements thereof all being removable from said body without removal of said locking means from said piston rod.

2,450,694
SELF-LOCKING NUT
John A. Sauer, Elizabeth, N. J., assignor to Elastic Stop Nut Corporation of America, Union, N. J., a corporation of New Jersey
Application January 21, 1944, Serial No. 519,135
5 Claims. (Cl. 151—7)



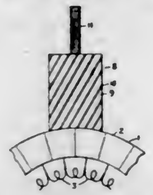
1. A threaded fastening device comprising means providing a threaded portion for engagement with a threaded element having a complementary thread, means providing a recess in said device for locking material and a body of locking material comprising a synthetic linear superpolymer of a diamine and a dibasic acid in said recess, said body including a portion projecting laterally relative to the axis of said threaded portion past the root diameter of the thread thereof to provide a surface located to be traversed and engaged by said complementary thread to cause displacement of said locking material due to the impression of a thread therein by said complementary thread when said device and element are threaded together, said body of locking material being substantially confined between the walls of said recess and the thread of the element causing said displacement, whereby to create and maintain compressive pressure within said body of locking material to cause the same to grip said complementary thread due to said pressure.

2,450,695
PROCESS FOR MAKING YARN ARTICLES
Anne Siefert, Chicago, and Jalmer M. Laiho, Skokie, Ill.
Application September 4, 1945, Serial No. 614,120
2 Claims. (Cl. 112—262)



2. The process for making yarn articles, which comprises taking a U-shaped form having two similar substantially parallel arms which are joined together at one end by a yoke portion, winding a plurality of layers of turns of yarn so that each turn goes around both of said arms, stitching all of said layers of turns of yarn to each other on a line running through the center of the space between said arms, taking other similar forms which are wound with yarn and stitched and sewing the stitching of each to one or more points on the stitching of the others in some preconceived arrangement, severing each of the turns of yarn by cutting along the outer edges of the two arms of each form thereby to form cylindrical shapes of tufted yarn which are joined together, removing each of the forms regardless of the degree of complication of the arrangement by pulling them longitudinally from the stitching so the tufted yarn passes out between the open ends of the arms of the form, and finally joining any other desired points on the lines of stitching or attaching accessory trimmings by sewing to the lines of stitching of the tufted yarn.

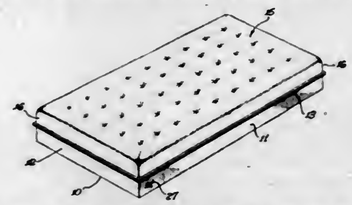
2,450,696
APPARATUS FOR TUNING VARIABLE ELECTRICAL OSCILLATORS
Luis Charles Stenning, London, England, assignor to The General Electric Company Limited, London, England
Application February 12, 1946, Serial No. 647,004
In Great Britain January 22, 1945
Section 1, Public Law 690, August 8, 1946
Patent expires January 22, 1965
11 Claims. (Cl. 250—36)



1. Apparatus for tuning a variable electrical oscillator including driving means capable of varying continuously in the same direction the frequency of the oscillator, means for generating alternatively a first set of standard frequencies spaced at minor intervals, to one of which the variable oscillator has to be tuned, and a second set of standard frequencies spaced at major intervals, an automatic selector switch including a wiper, a plurality of studs and electrically actuable wiper moving means, means responsive to coincidences between the frequency of the variable oscillator and said standard frequencies for applying to the automatic selector switch, on the occasion of each such coincidence, a pulse serving to move its wiper one step, changeover means associated with the automatic selector switch for causing the second set of standard frequencies to be replaced by the first set when the wiper reaches a predetermined stud of the automatic selector switch, means for varying at the will of an operator the number of steps that the wiper must take under the control of the coincidences before it reaches the said predetermined stud, and stopping means adapted to be associated at the will of the operator with different studs of the automatic selector switch and serving to put the driving means out of action when the wiper reaches the stud with which the stopping means are associated, wherein the said stopping means are associated with positioning means adapted to set the frequency of the variable oscillator at the will of the operator either to a value f_m+D or to a value f_m-D, where f_m is a frequency determined by the stud of the automatic selector switch with which the stopping means is associated and D is substantially a constant independent of f_m, and comprising a plurality of heterodyning oscillators each adapted effectively to vary at the will of the operator the said frequency f_m each by a different amount and the appropriate one of which is arranged to be automatically selected by the stopping means.

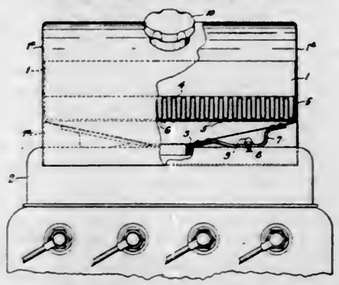
2,450,697
POCKETKNIFE
Austin F. Teigen, Moorhead, Minn.
Application July 15, 1947, Serial No. 760,984
5 Claims. (Cl. 30—155)

1. A knife comprising an elongated bottom plate having its front end turned obliquely downward and having its rear end folded upwardly and inwardly to provide an overlying lug; an elongated top plate lying longitudinally upon said bottom plate and having its front end turned obliquely upward into forwardly diverging relation with said downwardly turned front end of said bottom plate, the rear end of said top plate being disposed under said overlying lug; a blade interposed between said top and bottom plates and secured to said top plate, the front end of said blade being disposed between the forwardly diverging front ends of said top and bottom plates; and a pivot connecting said top plate with said bottom plate, said pivot being located between the ends of said top and bottom plates in a position to allow reversal of said top plate to a position in which the front end of said blade will underlie said lug and said upwardly directed front end of said top plate will overlie said lug.



2,450,698
BRUSH FOR DYNAMOELECTRIC MACHINES
Charles A. Thomas, Fort Wayne, Ind., assignor to General Electric Company, a corporation of New York
Application June 26, 1947, Serial No. 757,080
3 Claims. (Cl. 171—228)

1. A brush for dynamoelectric machines having a plurality of segments of conductive material, and a plurality of layers of rectifying material interspaced between said segments for passing current through said brush in only one direction whereby the short-circuit current under said brush is limited.



2,450,699
AIR MATTRESS CONSTRUCTION
Harry O. Veach, Los Angeles, Calif.
Application August 26, 1946, Serial No. 693,053
3 Claims. (Cl. 5—348)

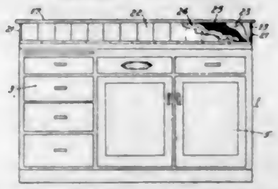
3. A pneumatic mattress having a self-sustaining bottom capable of being supported by its end portions, comprising: a relatively rigid, self-sustaining bottom; a top portion composed of a pliant, impervious sheet material having downwardly extending sides, means for connecting the lower marginal edges of said downwardly extending, pliant sides to marginal edges of said bottom to form an air-tight seal therebetween, said connecting means being located appreciably below the level of the major portion of said top, said top

and bottom portions cooperating to form an air-tight chamber; inlet means carried by one of said portions for supplying and retaining air in said chamber with the pliant top in spaced relation to the rigid bottom and above marginal edges of such bottom; and a plurality of spaced, non-elastic but pliant connectors attached to the inner surfaces of the bottom and the pliant top.

2,450,700
OIL REFILLING DEVICE
Cecil Gordon Vokes and Arthur Henry Fowler, Guildford, England, assignors to Vokes Limited, Guildford, Surrey, England
Application August 2, 1944, Serial No. 547,749
In Great Britain June 15, 1943
3 Claims. (Cl. 184—105)

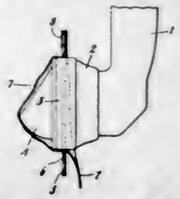
1. A lubricating means for supplying oil to an engine to build up the volume of engine-carried oil to a desired quantity, including a container to receive a build-up oil charge, means for connecting the container to the engine to cause the heat developed in the engine to heat the charge in the container, a communication between the container and engine for oil passage, and a filter in the container of a character to prevent filter passage of the conventional viscous oil delivered and afford such filter-passage following the heating of the oil in the container.

2,450,701
VIBRATION DAMPENER
Nils Erik Wahlberg and Floyd F. Kishline, Kenosha, Wis., assignors to Nash-Kelvinator Corporation, Kenosha, Wis., a corporation of Maryland
Application July 11, 1941, Serial No. 401,982
13 Claims. (Cl. 74—574)



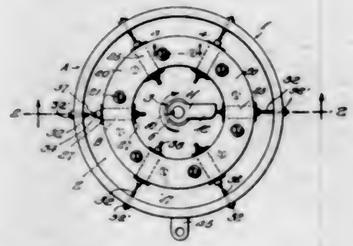
1. A vibration dampener comprising a flanged hub member having an outside diameter and an

inertia member having an internal diameter and a flat face, said diameters and the flat faces of said flange and inertia member being joined together by a deformable insulating sleeve, said in-



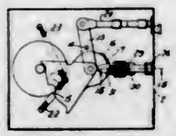
sulating sleeve being stressed by forces applied axially of the axis of rotation of said dampener, and securing means holding said members together and exerting said forces.

2,450,702
KITCHEN CABINET
Garland E. Watts, El Cerrito, Calif.
Application February 3, 1945, Serial No. 575,966
2 Claims. (Cl. 4—187)



1. As an article of manufacture, a unitary preformed kitchen cabinet or the like including a pair of side walls, a back wall, a drainboard, a sink supported at the edge of said drainboard, said drainboard being positioned above said side walls, a drainboard panel foundation extending upwardly from the rear edge of the drainboard and the sink, a layer of tile covering said drainboard, a vertical layer of tile covering the drainboard foundation, and a top covering extending over the upper edges of the drainboard panel foundation and the vertical layer of tile to impart stability thereto, the parts being constructed and arranged so that the tiled cabinet is formed as a complete unit prior to being installed.

2,450,703
SANITARY SHIELD FOR TELEPHONE TRANSMITTERS
Ivan Vernon Welsbrod, Douglaston, N. Y., assignor to Alexander A. Sackey, New York, N. Y.
Application October 12, 1946, Serial No. 703,086
6 Claims. (Cl. 179—185)

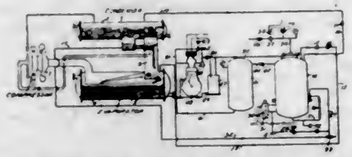


1. A sanitary shield for the mouthpiece of a voice transmitter, comprising a thin sheet of tissue paper of a size to completely extend across the open end of such a mouthpiece and to encase a portion of the outer lateral wall thereof; and an apertured support member, formed of a sheet of relatively stiff material, associated with said pliable sheet, the aperture in the support member being of a size to snugly receive the open end of the mouthpiece of a voice transmitter when the same is so encased by said pliable sheet and to firmly maintain the latter in position on said mouthpiece.

2,450,704
DISTRIBUTOR MECHANISM
Armond Williams, East Haven, and Otto E. Meyer, Sr., North Haven, Conn.
Application November 30, 1944, Serial No. 565,974
8 Claims. (Cl. 200—27)

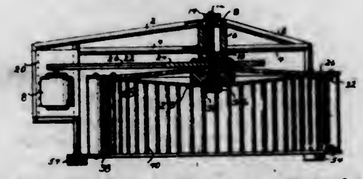
1. A distributor mechanism for use in an ignition system for an internal combustion engine, comprising a pair of axially aligned normally spaced contacts, one being movable and the other stationary, a recoil mechanism in connection with the movable contact, said mechanism embodying a dual spring construction including aligned springs successively coacting with each other and with said movable contact in both directions of its movement to effect substantial instantaneous engagement and disengagement of the contacts, a rotary cam, and means for rotating said cam.

2,450,705
SWITCH MECHANISM
Floyd C. Williams, St. Louis County, Mo., assignor to Frank Adam Electric Company, St. Louis, Mo., a corporation of Missouri
Application September 7, 1944, Serial No. 552,996
2 Claims. (Cl. 200—50)



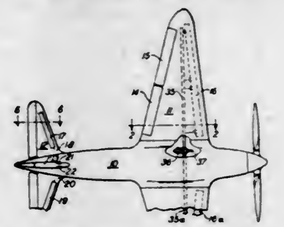
1. An interlock for an enclosure having a door for housing an operating apparatus having an operating handle movable to active and inactive positions, comprising a control member pivoted to move with said handle, a locking member for said handle pivoted independently of said control member, means connecting said members whereby pivotal movement of one causes pivotal movement of the other, means engageable by said door when closed operating to shift the pivot of said locking member to move the same to unlocking position, a door latch self-biased to latching position, means adapted to bias said latch to unlatching position, and means connected with said locking member operating to overcome the latter bias of said latch when said handle is in active position.

2,450,706
METHYLATION OF METHYL 6-HYDROXY-DEHYDROABIETATE
Harold H. Zeiss, Fairlawn-Radburn, N. J., assignor to Ridbo Laboratories, Inc., Paterson, N. J., a corporation of New Jersey
No Drawing. Application June 14, 1946, Serial No. 676,868
5 Claims. (Cl. 260—97)



1. A process for methylating methyl 6-hydroxydehydroabietate which comprises reacting methyl-6-hydroxydehydroabietate with dimethyl sulfate in an aqueous alcoholic solution of an alkali metal hydroxide.

2,450,707
PURGING SYSTEM FOR REFRIGERATING SYSTEMS
Joseph R. Zwicki, East Orange, N. J., assignor to Worthington Pump and Machinery Corporation, Harrison, N. J., a corporation of Delaware
Application June 6, 1945, Serial No. 597,849
19 Claims. (Cl. 62—115)

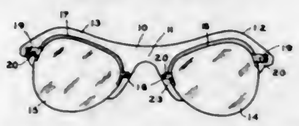


1. The method of purging a closed refrigeration system containing a volatile refrigerant and including a condenser and an evaporator, of polluting agents such as air, water and oil which comprises taking from the condenser uncondensed refrigerant and water vapor mixed with noncondensible gases and subjecting the mixture to a temperature lower than the temperature in the condenser, which lower temperature is produced by evaporation of refrigerant at a lower pressure so as to condense the greater quantity of condensible vapors in the mixture, collecting the residual mixture of noncondensibles and condensible vapor not condensed by said first condensing action, taking off a part of the collected mixture when its pressure reaches a predetermined degree, compressing the taken off part of the mixture, separating oil from the compressed mixture, subjecting the remaining compressed mixture to condensing temperature sufficiently low to condense practically all of the condensible vapors in the mixture, separating the condensed water vapor from the condensed refrigerant vapor, and returning the condensed refrigerant vapor as liquid to the system.

2,450,708
CENTRIFUGAL FAN
Paul Anderson, San Antonio, Tex.
Application December 23, 1946, Serial No. 717,871
2 Claims. (Cl. 230—117)

1. In a centrifugal fan, a plurality of spaced parallel vertically-disposed legs supported on a horizontal surface, a first plurality of horizontally-disposed radial frame arms secured to the upper ends of said legs, a vertically-disposed cylindrical housing supported by the other ends of said frame arms, a shaft rotatably mounted in said housing, a circular plate positioned below said frame arms and secured to said shaft, a convex baffle plate arranged below said circular plate and secured to the latter, a plurality of spaced parallel vertically-disposed blades each having its upper end secured to said circular plate, a ring spaced below said circular plate and secured to the lower ends of said blades, a horizontally-disposed pulley interposed between said circular plate and said frame arms, a vertically-disposed bracket secured to one of said legs, a drive motor carried by said bracket, and belt means operatively connecting said pulley to said motor.

2,450,709
AIRCRAFT CONTROL
Ward W. Beman, Glendale, Calif., assignor to Lockheed Aircraft Corporation, Burbank, Calif.
Application February 22, 1943, Serial No. 476,715
1 Claim. (Cl. 244—75)

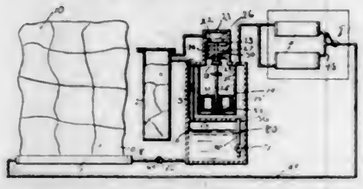


In an airplane designed for speeds involving high Mach numbers at which compressibility effects are encountered, the combination with a main wing and a stabilizer, of a baffle located in the lower forward portion of said main wing in the region where shock waves form when speeds are attained at which compressibility effects are encountered, a baffle located in the upper forward portion of said stabilizer, and means for simultaneously extending the baffles in said main wing and stabilizer to maintain the coefficient of lift of said main wing and to maintain the effective stabilizing down-load of said stabilizer when speeds are attained at which compressibility effects are encountered, whereby to maintain the positive pitching moment of the airplane.

2,450,710
PROCESS FOR OBTAINING AN ANTIANEMIA VITAMIN PRODUCT
Orson D. Bird and Stephen B. Binkley, Detroit, Mich., assignors to Parke, Davis & Company, Detroit, Mich., a corporation of Michigan
No Drawing. Application October 4, 1943, Serial No. 504,954
5 Claims. (Cl. 195—2)

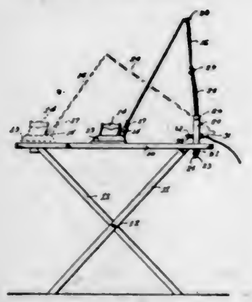
1. In a process for obtaining an anti-anemia vitamin product, the step which comprises enzymatically digesting a product of the class consisting of tissues from plant sources containing a conjugated vitamin product having anti-anemia potency for chicks and aqueous extracts of said tissues containing said conjugated vitamin product with a material of the class consisting of kidney, liver, intestines and extracts thereof containing an enzyme capable of liberating an unconjugated acid anti-anemia product.

2,450,711
SEMIRIMLESS SPECTACLE MOUNTING
Samuel E. Bouchard, Brighton, N. Y., assignor to Bausch & Lomb Optical Company, Rochester, N. Y., a corporation of New York
Application June 4, 1945, Serial No. 597,422
3 Claims. (Cl. 88—41)



1. A semi-rimless ophthalmic mounting comprising a pair of spaced lenses, resilient metallic mounting means extending along the upper edges of the lenses, said mounting means having nasal and temporal portions extending along the sides of the lenses, means for holding the lenses on the mounting means comprising lens engaging means secured to said portions and engaging notches formed in the temporal and nasal edges of the lenses, the resilience of the mounting means serving to hold the lens engaging means in engagement with the lenses, a non-metallic frame having portions extending along said mounting means and overlying the mounting means and the edges of the lenses, a bridge connecting said portions, said frame portions being slightly resilient and wider than the combined thicknesses of the lenses and the metallic mounting means, and retaining means for securing the mounting means to said frame, said retaining means comprising plates secured, respectively, to the temporal and nasal portions of the mounting means and retaining elements fastening said plates to portions of said frame.

2,450,712
MULTIPLE RETICLE COLLIMATING GUN SIGHT
Leo H. Brown, Glenville, Conn.
Application May 5, 1944, Serial No. 534,285
7 Claims. (Cl. 88—1)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. A gun sight comprising means forming a plurality of partially transparent concave mirror surfaces all facing in the same direction, with their principal axes substantially parallel and their principal focal points located in a common plane perpendicular to said axes, said surfaces being arranged side by side in contiguous superposed horizontal rows without interstices therebetween, there being a light reflecting reticle fixed at the focal point of each respective surface, said mirror surfaces, in cooperation with the respective reticles, acting to establish a plurality of reticle images at infinity uniformly distributed over said area, whereby the eye sees an image of a reticle for all positions thereof over said surfaces.

2,450,713
REFRIGERATING SYSTEM USING DRY ICE AND INCLUDING A SECONDARY HEAT EXCHANGE CIRCUIT
Rex L. Brunsing, San Francisco, Calif.
Application July 13, 1946, Serial No. 683,511
12 Claims. (Cl. 62—91.5)

8. In a refrigerating system of the character described, a vertically disposed chamber having vertical side walls, a top, and a bottom, a horizontal partition dividing said chamber into an upper compartment and a lower compartment, an inlet in said upper compartment for admitting a liquid refrigerant into the same, a discharge outlet in said lower compartment for discharge of a liquid refrigerant therefrom, a valved passageway communicating between said upper compartment and said lower compartment for passing liquid from the upper one to the lower one, a cylindrical wall depending from said top, a cylindrical float vertically reciprocable within said wall upon rising and falling of the float as the liquid level rises and falls, said wall having drain holes formed therein spaced from the upper end thereof and being imperforate above said holes for providing a gas trap between the uppermost of such drain holes and said top, a gas pressure line communicating with said lower compartment and a vent for establishing communication between said upper compartment and its lower one, valve means actuatable by said float upon rising and upon falling to predetermined limits for opening and closing said vent.

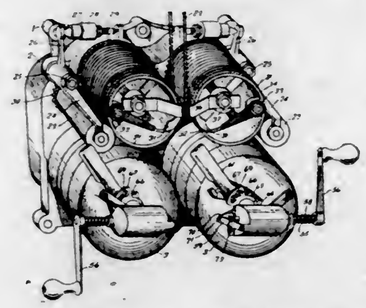
2,450,714
IRONING CORD HOLDER
Garrett E. Campbell, Modesto, Calif.
Application May 3, 1945, Serial No. 591,736
1 Claim. (Cl. 248—51)

In a support for an ironing cord, an upright having a side lug halfway up its length, means for securing said upright to an ironing board, an upwardly extending stiff rod pivotally secured to the upper end of said upright, means on said rod for securing said cord longitudinally thereto, said means including a plurality of helical coils formed in said rod one of said coils situated at each end and one intermediary thereof, a helical spring normally biasing said rod toward upright position, the ends of said spring being secured respectively to said lug and the lowermost of said coils and stop means on said lug precluding the pivotal movement of said rod beyond substantially vertical position in the direction of bias of said spring.

2,450,715
MILK SAMPLER
Willard S. Campbell, Chicago, Ill., assignor to M & C Conveyors, Inc., Chicago, Ill., a corporation of Illinois
Application June 15, 1946, Serial No. 677,068
2 Claims. (Cl. 73—424)

1. A milk sampler valve comprising a stationary body member having a milk inlet, a milk outlet of smaller diameter than said milk inlet substantially opposite from said sampling outlet, a sampling outlet and an air inlet, a rotatable member mounted within said stationary member, said rotatable member having a passage and a tube of smaller diameter than said passage and substantially transverse to said passage, and means for drawing a continuous flow of milk through said sampler valve from a source of milk to be sampled, said passage of said rotatable body member adapted to permit the continuous flow of milk from said milk inlet through said passage and said milk outlet when said rotatable member is in one position, said rotatable member manually rotatable to another position, said passage adapted upon said rotation to permit the flow of milk from said passage through said sampling outlet and said tube adapted to permit the continuous flow of milk from said milk inlet through said tube and said milk outlet.

2,450,716
KITCHEN UTENSIL
Charles Yardley Chittick, Waban, Mass.
Application December 16, 1944, Serial No. 568,437
1 Claim. (Cl. 294—1)



A kitchen utensil for lifting food comprising two parts, one part comprising a curved grill-like frame having a straight blunt edge, said frame curving upwardly from said edge sharply enough to permit positioning in a cooking pan to receive food by rolling said food thereon without lifting, a first handle curved in the opposite direction from said frame and connected to the side of said frame opposite said blunt edge, the other part comprising a second handle having hooks adapted to be detachably connected to said blunt edge after food has been rolled on said frame.

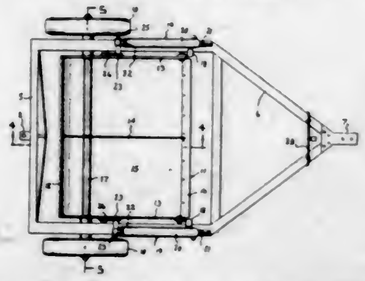
2,450,717
METHOD OF RECOVERING DEXTRINS FROM STILLAGE SIRUP
Harold W. Coles, Rochester, N. Y., assignor to Joseph E. Seagram & Sons, Inc., Shively, Ky., a corporation of Indiana
No Drawing. Application July 27, 1944, Serial No. 546,939
3 Claims. (Cl. 127—34)

2. A method of recovering dextrins from stillage syrup comprising: dialyzing syrup thru a membrane to remove some of its impurities; mixing the dialyzed syrup with a quantity of hydrochloric acid ranging approximately from 1 to 5% by volume of the moisture content of the syrup; and mixing the acidified syrup with sufficient alcohol to place remaining impurities in solution and to precipitate the dextrins.

2,450,718
HOIST
Victor L. Darnell, Centerville, Ohio, assignor to The Master Electric Company, Dayton, Ohio, a corporation of Ohio
Application August 20, 1942, Serial No. 455,421
12 Claims. (Cl. 214—95)

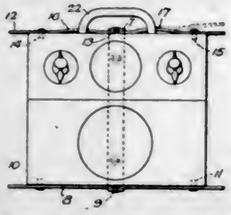
1. A hoist apparatus wherein dual independently operable winding drums control a hoist cable common thereto the ends of which are wound upon the respective drums and having a medial bight therein to receive a work load are driven by electromotive means in unison in either direction to raise and lower the work load and differentially to rotate the work load while suspended in said bight, electrically operated power means for the drums, an electrical energizing circuit for said electro-motive means, a manual actuating device for driving the drums independently of the electromotive means, an automatic brake mechanism for arresting and holding the winding drums and suspended load in adjusted position, electromagnetic means for temporarily maintaining the brake mechanism in ineffective condition during operation of the electromotive drive means, and permitting automatic reengagement of the brake mechanism upon interruption of the electric current supply through said circuit, and a manual control device for maintaining the brake mechanism in ineffective condition independently of the electromagnetic means during operation of the manual actuating device for the drums, the brake mechanism being automatically reengageable upon release of the manual control device, the construction and arrangement being such that upon failure of either the electric power supply or of the operator while manually actuating the drums, the brake mechanism is automatically engaged to prevent retrograde motion of the winding drums and suspended work load.

2,450,719
HORSE COLLAR
Lee Y. Davis, Atlanta, Ga.
Application March 7, 1947, Serial No. 733,099
2 Claims. (Cl. 54—18)



2. In a horse collar, a hame, a pneumatic tube placed on the rear face thereof, flexible means for surrounding said tube and said hame, with its free edges on the front face of said hame, a cover plate releasably attached to the front face of said hame, and companion means on said hame and said cover plate for frictionally engaging the free edges of said flexible means, said companion means comprising a rib and a recess.

2,450,720
FROTH FLOTATION OF SILICIOUS GANGUE FROM AN ALKALINE MAGNETIC IRON ORE PULP WITH AN AMINE
Fred D. De Vaney, Hibbing, Minn., assignor to Erie Mining Company, Hibbing, Minn., a corporation of Minnesota
No Drawing. Application December 30, 1943, Serial No. 516,288
3 Claims. (Cl. 209—166)

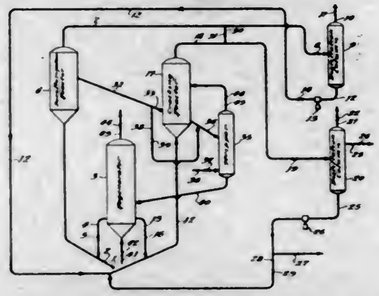


1. Process of beneficiating a ferruginous chert whose oxidic iron content is largely magnetite which chert has been finely subdivided to a particle size of the order of minus 100 mesh or finer, which comprises adding to an aqueous pulp of the chert an agent of the group consisting of alkaline-acting alkali metal compounds, ammonium hydroxide and ammonium carbonate in amount sufficient to make said pulp at least as alkaline as pH 8, and subjecting the alkaline pulp to cationic froth flotation treatment using a frother and as cationic collector a water-soluble form of an aliphatic amine whose aliphatic radical corresponds in length to that of a fatty acid of coconut oil, whereby to obtain a silicious froth product poor in magnetite and an underflow concentrate containing most of the magnetite.

2,450,721
WHEELED SCOOPING DEVICE
Walter H. Ditzler, Columbus, Nebr.
Application December 10, 1946, Serial No. 715,279
5 Claims. (Cl. 37—129)

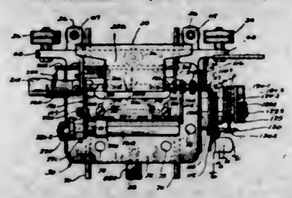
1. A scooping device of the character described comprising a frame having means to facilitate coupling of the same to the draw bar of a tractor, a transverse axle carried by and extending across the frame and having ends projecting outwardly beyond the sides of said frame, supporting wheels journaled on the projecting ends of the axle, a scoop pivoted above the bottom and near the back thereof on the axle and within the frame for movement between a substantial vertical rearwardly and upwardly swung dumping position and a forwardly inclined forwardly and downwardly swung scooping position, and power means for swinging said scoop to dumping position, said scoop including a substantially segmento-cylindrical back wall and spaced substantially parallel side and intermediate partition walls rigidly joined to said back wall, and a tube extending through and rigidly joined to said side and partition walls, said axle being extended through and freely fitted in said tube.

2,450,722
BRACKET
Miles Drije, Berwyn, Ill.
Application November 3, 1945, Serial No. 626,515
1 Claim. (Cl. 248—300)



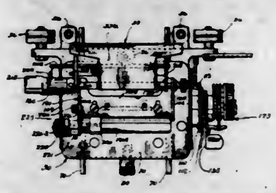
In combination, a cabinet provided with a pair of apertures in two opposite walls, one aperture of each of said pairs of apertures being axially aligned with one aperture of said other pair, a bracket comprising a pair of bars parallel to each other, a pair of studs rigid with each of said bars, the opposite studs of each pair projecting towards each other in axial alignment and spaced to coincide with the lateral spacing between said apertures, one of said bars being resilient, whereby either pair of studs may be positioned in either pair of apertures in order to secure said cabinet to said bracket in either upright or upside down relationship.

2,450,723
BED RAIL BLANK
William R. Elrad, University Heights, Ohio
Application May 8, 1944, Serial No. 534,555
1 Claim. (Cl. 29—190)



A sheet metal blank for a bedstead bracket consisting of an elongate plane body having top, bottom and end edges, said body having a pair of spaced transverse fold lines extending completely across the blank intermediate said end edges, and said body having a hook-defining portion partially blanked therefrom, said hooked-defining portion having its inner side edge integrally connected to the body and defined by a fold line disposed between said transverse fold lines and terminating spaced from the top and bottom edges of the blank, and said hook defining portion having its opposite outer free side edge terminating between one of said pair of transverse fold lines and one of the end edges of said blank, said blank being adapted to be bent into substantially U-form to provide a pair of spaced side walls and an end wall for engaging the end and side walls of a bedstead rail, and with said hook defining portion being bent outwardly from the end wall at substantially right angles thereof for engagement with a hook receiving portion of a bed end part.

2,450,724
CONVERSION OF SULFUR CONTAINING HYDROCARBONS
Henry W. Grote, Downers Grove, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a corporation of Delaware
Application December 28, 1946, Serial No. 718,930
4 Claims. (Cl. 196—50)



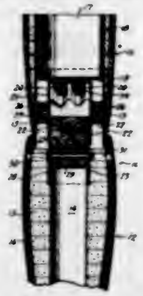
1. A combination desulfurization - cracking process which comprises supplying solid cracking catalyst and a sulfur-containing hydrocarbon to a desulfurization zone at a temperature and pressure and for a time sufficient to effect at least a partial desulfurization of said hydrocarbon, supplying desulfurized hydrocarbon and another portion of the solid cracking catalyst to a cracking zone maintained at cracking conditions; withdrawing catalyst from said desulfurization zone and introducing said withdrawn catalyst into said cracking zone, withdrawing catalyst from said cracking zone and subjecting the latter catalyst to stripping and regeneration, and supplying one portion of regenerated catalyst to desulfurization zone and another portion to the cracking zone as aforesaid.

2,450,725
EMBOSSING MACHINE CARRIAGE
John H. Gruver, East Cleveland, Ohio, assignor to Addressograph-Multigraph Corporation, Wilmington, Del., a corporation of Delaware
Application November 16, 1946, Serial No. 710,269
19 Claims. (Cl. 197—6.6)

7. In a machine of the character described wherein a work supporting cross slide is mounted on a longitudinally movable character spacing carriage for transverse line spacing movement, spring means urging said cross slide to a predetermined initial position and opposing line spacing movement thereof to other line spacing positions, a line spacing shaft rotatably mounted on said carriage and operatively connected to said cross slide for imparting line spacing movements thereto, means operable through an advancing stroke to actuate said shaft through a line spacing movement and then to release the same for reverse movement, a plurality of locating ratchet wheels fixed to said shaft for rotation therewith, said locating ratchet wheels being respectively formed with differently spaced ratchet teeth thereon, and a normally engaged locating pawl adapted for selective alignment with said locating ratchet wheels and operable to terminate such reverse movement of said shaft in such a manner as to dispose said cross slide in a new line space position determined by the tooth spacing of the aligned ratchet wheel.

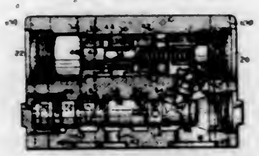
2,450,726
MARGIN STOP MECHANISM FOR EMBOSSING MACHINE CARRIAGES
John H. Gruver, East Cleveland, Ohio, assignor to Addressograph-Multigraph Corporation, Wilmington, Del., a corporation of Delaware
Original application November 16, 1946, Serial No. 710,269. Divided and this application April 9, 1947, Serial No. 740,305
8 Claims. (Cl. 197—6.6)

1. In a machine of the character described wherein a carriage and a cross slide mounted for transverse movement on the carriage are utilized to effect character spacing and line spacing movement of a printing plate, clamping jaws mounted on said cross slide for movement between an operating position and a loading position, and a shiftable stop member supported upon said cross slide adjacent to the location of said jaws when said jaws are disposed in said loading position, said stop member having a plurality of abutment surfaces formed thereon in different positions and adapted to be set by shifting of said stop member for selective engagement by the end of a printing plate as such printing plate is loaded into said jaws to thereby determine the endwise marginal relationship of such printing plate with respect to said jaws.



2,450,727
METHOD OF RESILIENTLY MOUNTING A ROLL ON A SHAFT
Fred L. Haushalter, Pontiac, Mich.
Application January 22, 1946, Serial No. 642,684
4 Claims. (Cl. 29—148.4)

1. A method of making a roll comprising binding one end of a resilient tube on a hollow support, binding the other end on a member projecting through the support and tube, forcibly protruding the member farther from the support to elongate the tube and reduce its diameter, tele-

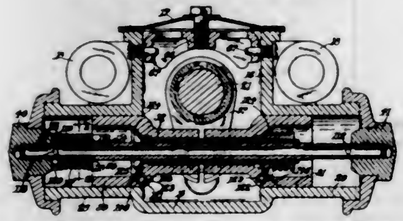


scoping a second resilient tube over the first tube, retracting the member to allow the first tube to expand in diameter to grip the second tube, trimming the first tube to cause its end to be flush with the end of the second tube, and pressing a shaft axially through such mounted first tube until it projects beyond the opposite ends of the tubes, whereby a shaft suitable for mounting in bearings is drivingly connected to the second tube through the intermediacy of the first tube.

2,450,728
LINKAGE FOR ARTIFICIAL LEGS
Glenn G. Havens, San Diego, Calif., assignor to Consolidated Vultee Aircraft Corporation, San Diego, Calif., a corporation of Delaware
Application July 26, 1947, Serial No. 763,924
13 Claims. (Cl. 3—2)

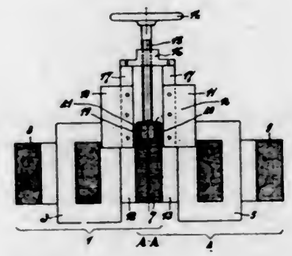
4. A linkage for joining one portion of an artificial leg to another portion, said one portion having an end thereof penetrating into the other portion, mounting elements secured to both sides of said one portion where it penetrates into said other portion, mounting elements secured to the interior of said other portion contiguous to the mounting elements on said one portion and discs of resilient material interposed between said pairs of opposed mounting elements and bonded thereto to form connector means adapted to secure said one portion of said leg to said other portion.

2,450,729
POWER TRANSMISSION
Kenneth R. Herman, Franklin, Mich., assignor to Vickers Incorporated, Detroit, Mich., a corporation of Michigan
Application December 21, 1945, Serial No. 636,322
7 Claims. (Cl. 60—52)



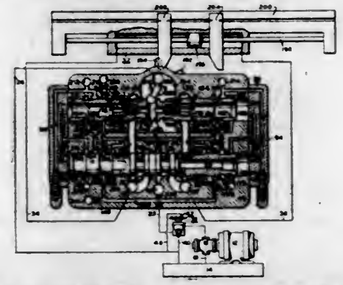
1. A self-contained hydraulic control panel for providing rapid traverse and feed strokes in a hydraulic power transmission, the panel comprising in combination a body having external connections for pressure supply and exhaust and two external motor connections, a reverse valve in the body effective to selectively establish forward and reverse flow paths between the pressure and exhaust connections and the motor connections, and having a substantial range of travel during which flow in one of the paths is adjustably restrictable, a compensating valve also in the body and connected to control flow between the reverse valve and one of the connections, and means for operating the compensating valve in response to the pressure ahead of and beyond the restrictable part of the reverse valve to maintain a substantially constant pressure drop therethrough.

2,450,730
POST AND INSULATOR FOR ELECTRIC FENCES
Guy Hord, Marion, Ohio
Application December 8, 1947, Serial No. 790,315
1 Claim. (Cl. 174—45)



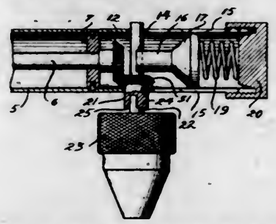
In a fencing apparatus, a rod, an insulating block, a bore in said block having enlargements at each end thereof, an eye bolt in said bore having the enlarged end in one of said recesses and engaging said rod, a threaded plate in the other of said recesses and engaging said bolt, whereby said block may be locked to said rod by manipulation of said block rotatively about said eye bolt, a plate secured to said rod at a position spaced from the lower end thereof for thrusting said rod in the ground by application of a force thereon, and a flat plate having a slot interposed between said rod and said block, the eye of said bolt extending partially through said slot and bearing on opposite sides of said slot.

2,450,731
SHOCK ABSORBER
Ernest William Johnson, Birmingham, England, assignor to Vandervell Products Limited, London, England, a British company
Application March 19, 1946, Serial No. 655,434
In Great Britain March 12, 1945
Section 1, Public Law 690, August 8, 1946
Patent expires March 12, 1965
9 Claims. (Cl. 188—88)



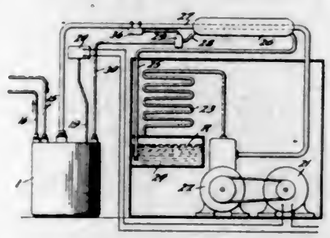
1. In a double-acting shock absorber in which fluid friction is employed for damping, the combination of two main fluid containers at the opposite ends of the shock absorber, a piston reciprocable in said main fluid containers, a hollow metering rod, a casing lying outside the piston and main fluid containers and having an internal wall with fluid-receiving compartments one on each side of the wall, means for connecting said compartments respectively one to each of the main fluid containers, which wall has a perforation through it through which the metering rod reaches so that the opposed surfaces of the perforation and metering rod provide between them a restricted passage connecting the said fluid-receiving compartments, through which passage the fluid is forced by the said piston, and the interior of which metering rod constitutes a by-pass for the said restricted passage, which hollow metering rod is formed with lateral conduits extending through its wall from the interior to the exterior of said rod, and two valves cooperating with said lateral conduits whereby the travel of the fluid through the by-pass to relieve the pressure set up by the flow of fluid through the said restricted passage in both directions is controlled, which valves are appropriated one to each direction of travel of the fluid through the said restricted passage and are both operated by the pressure of the fluid.

2,450,732
MOVABLE MAGNETIC SHUNT TRANSFORMER
Hendrik Abraham Wijnand Klinkhamer, Eindhoven, Netherlands, assignor, by mesne assignments, to Hartford National Bank and Trust Company, Hartford, Conn., as trustee
Application May 3, 1946, Serial No. 666,950
In the Netherlands September 17, 1942
Section 1, Public Law 690, August 8, 1946
Patent expires September 17, 1962
3 Claims. (Cl. 171—119)



1. A transformer which is controllable by means of movable magnetic shunts comprising two shell transformers in Scott's arrangement, in which the transformer cores are united to form a five-leg core having an unwound middle core and two unwound outer cores, movable magnetic shunts being provided solely in the two windows adjoining the middle core in a direction normal to the lamellation of the core, and a clamping device securing said shunts to said transformer in a vibration-free manner, said clamping device comprising two wedge-shaped members bearing on said shunts, a cuneiform pressing member between said wedge-shaped members, and means to position said cuneiform pressing member between said shunts to clamp said shunts to said transformer.

2,450,733
POWER TRANSMISSION
Albert M. Lane, Kingston V. Kirkpatrick, and Robert A. Erskine, Detroit, Mich., assignors to Vickers Incorporated, Detroit, Mich., a corporation of Michigan
Application December 21, 1945, Serial No. 636,339
19 Claims. (Cl. 60—52)

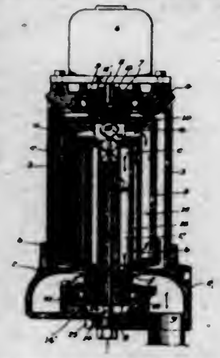


1. In a hydraulic power transmission system having a pump and a fluid motor and supply and return connections for the motor, the combination of a first shiftable valve element, means thereon for controlling the cut-off of return fluid from the motor, a second shiftable valve element, means thereon for controlling the reversal of the supply and return connections to the motor, means operated by the motor for shifting the first element at a controlled speed to an intermediate position, means for shifting the first element rapidly through the remainder of its stroke, means controlled by the first element for initiating a rapid movement of the second element to an intermediate position, and means for causing the shifting of the second element through the remainder of its stroke to take place at a controlled speed.

2,450,734
SCREW DRIVER
Joseph Majeski, Jr., Porter, Ind.
Application August 29, 1946, Serial No. 693,735
3 Claims. (Cl. 74—417)

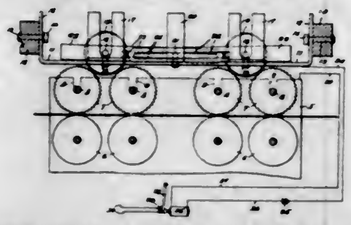
3. A tool of the class described comprising a shaft housing, a shaft journalled longitudinally therein, said shaft being rotated from one end, longitudinal slots formed in the end of the housing remote from said one and, a transverse shaft journalled in the housing and removable therefrom by way of the slots, said transverse shaft being adapted to be equipped with a tool, means operatively connecting said transverse shaft with said longitudinal shaft, a removable bearing in the housing for the transverse shaft, spring means in the housing maintaining the bearing in engagement with the transverse shaft and supporting the transverse shaft in operative position, a cap threaded on said remote end of the housing and retaining the spring means in assembled relation in the housing.

2,450,735
APPARATUS FOR REFRIGERATION OF LIQUORS
Hylton B. Millet, New Orleans, La.
Application September 3, 1947, Serial No. 771,891
15 Claims. (Cl. 62—7)



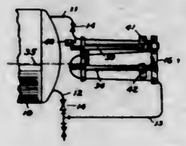
1. In a cooler for liquids, the combination of an outer closed container adapted to receive a refrigerant, means to feed liquid refrigerant thereto, an inner expansion, accumulator, and separator chamber disposed in said container, said chamber being adapted to have a layer of oil on the bottom thereof, means for delivering refrigerant from said outer chamber to said expansion and accumulator chamber, a coil for liquid to be cooled surrounding said accumulator and expansion chamber, a suction pick-up conduit disposed in said expansion and accumulator chamber and extending to a point adjacent the bottom of said inner chamber, suction means for withdrawing gaseous refrigerant carrying entrained oil from the pick-up conduit, means for maintaining a predetermined temperature in any liquid refrigerant fed into said outer container, and means located outside of said outer container for controlling the liquid refrigerating means and arranged to maintain a substantially constant liquid refrigerating level in said outer liquid refrigerant container when the cooler is in use.

2,450,736
BRUSH HOLDER
Charles Howard Pierce, Kalamazoo, Mich.
Application June 10, 1946, Serial No. 675,701
9 Claims. (Cl. 248—112)



6. A holder for brushes and the like comprising a hanger, and a jaw member formed of a length of wire folded and conformed to provide a hanger embracing loop with arms terminating in individual springable hanger engaging members, said wire extended from said individual hanger engaging members to provide springable arms, the arms terminating in brush receiving jaws.

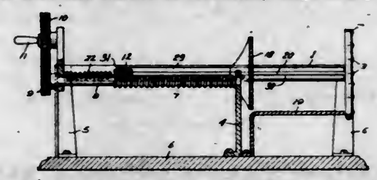
2,450,737
OIL CENTRIFUGE WITH PLURAL CONCENTRIC SEPARATING ZONES
Bennett C. Rundquist, Cleveland, Ohio, assignor to The National Acme Company, Cleveland, Ohio, a corporation of Ohio
Application February 12, 1943, Serial No. 475,639
20 Claims. (Cl. 233—31)



1. A centrifuge comprising a housing-supported casing, a bowl supported in said casing for rotation and having ball-supported tapered spindles, a motor supported by the casing at the top of the bowl for rotating said bowl, said bowl comprising a plurality of cylinder-formed chambers therein, said chambers having communicating ports so located as to pass the fluid from the center of the bowl to the outer chamber and from thence toward the center of rotation through adjacent chambers and throughout the length of all the chambers, the bowl having centrally thereof an inlet at its bottom and also an outlet at its bottom communicating with the innermost chamber.

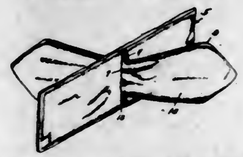
2,450,738
ROLLER CLEARER STOP MOTION
Marshall E. Russell, Concord, N. C.
Application April 2, 1946, Serial No. 659,087
2 Claims. (Cl. 19—167)

1. The combination with stop motion mechanism of textile drawing frames including a pair of upper and lower draw rolls, one roll of each pair of draw rolls being movable vertically, of a stop motion control mechanism including an attachment frame mounted above the draw rolls adjacent thereto, vertically movable cleaning rolls having shafts mounted within the attachment frame normally contacting with the upper draw roll of each pair of draw rolls removing material therefrom, contact arms having openings adjacent to one of the respective ends thereof in which the shafts of the cleaning rolls are disposed, an electric control circuit connected with the stop motion control mechanism including the attachment frame, contact arms and upper draw rolls, said contact arms having elongated openings, screws extending through the elongated openings and attachment frame pivotally mounting the inner ends of said contact arms on the attachment frame, the free ends of the arms being movable into contact with upper draw rolls upon upward movement of the rolls, completing a circuit operating said stop motion mechanism.



2,450,739
LEVEL RESPONSIVE CONTROL DEVICE
Harold Augustus Schlieder, Erie, Pa., assignor to Northern Equipment Company, Erie, Pa., a corporation of Pennsylvania
Application January 15, 1945, Serial No. 572,957
11 Claims. (Cl. 122—451.1)

8. The combination with a steam generator, a pair of control devices, and mechanism controlled by the control devices, of means for actuating the control devices at pre-determined high and low water levels in the generator, despite wide variations in steam pressure within the generator, said means comprising a tube connected to the steam space of the generator above the high water level point and below the low water level point, the tube being formed to provide three straight horizontally extending portions disposed at different elevations, the top portion being disposed above the high level, the middle portion being disposed at the high level, and the bottom portion at the low level whereby during level fluctuations between the high and low levels the top and middle portion will be filled with steam and the bottom portion with water, means associated with the top and middle portions operable by differential thermal conditions in said portions whereby one of said control devices will be actuated when the middle portion is substantially filled with water at high level, said means being ineffective to actuate said control device due to steam pressure variations resulting in equal thermal change in both said portions, a second means associated with the middle and bottom tube portions operable to actuate the second control device at low level when the bottom portion is drained of water, and said second means being ineffective to actuate the second control device due to steam pressure variations when the bottom tube portion is filled with water.

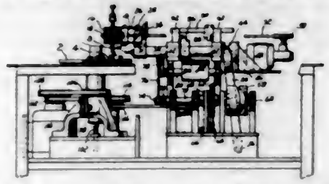


2,450,740
POTATO SLICER HAVING A STATIONARY WIRE GRID AND A RECIPROCATING PLUNGER
William H. Schmitt, Grand Rapids, Mich.
Application November 18, 1946, Serial No. 710,584
1 Claim. (Cl. 146—169)

A device of the character described comprising a substantially rectangular horizontally extending frame having a channel formed in the inner face of each of the longer sides thereof, a vertically extending cutter affixed at one end of the frame, an interrupted rib formed in each of the channels and forming upper and lower portions in each of said channels, a longitudinally extending threaded shaft pivotally and centrally disposed in said frame, a half-nut normally engaging the shaft, an operating handle for the shaft, outwardly extending arms carried by the half-nut, a roller pivotally mounted at the outer end of each arm and normally disposed in the lower portions of the channels, a pusher having an arm at each side thereof, a link interconnecting each of the pusher arms with an arm carried by the half-nut, springs interconnecting the half-nut arms and the frame to normally urge the pusher

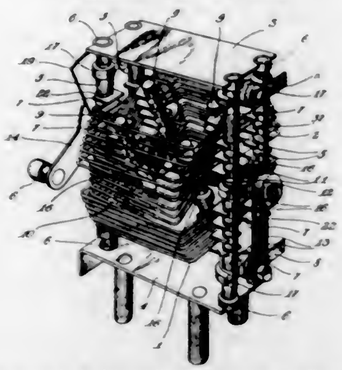
away from the cutter, a spring for automatically moving the rollers from the lower portions of the channels to the upper portions thereof through the interrupted ribs when said pusher is adjacent the cutter and gravity-operated means for returning the rollers to the lower portions of the channels when the pusher has been removed away from the cutter by the springs interconnecting the half-nut arms and the frame.

2,450,741
MADE-UP BOW TIE
Adolph Schreter, Baltimore, Md.
Application February 24, 1947, Serial No. 730,315
2 Claims. (Cl. 2—151)



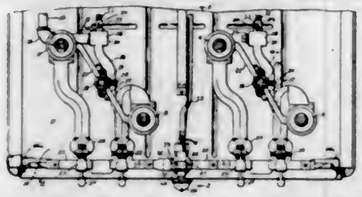
1. A made-up bow tie comprising in combination a pair of cloth wing elements, one of the wing elements having pointed ends, the other wing element having substantially square ends and having a central slot extending transversely thereof in which the wing member having pointed ends is extended, one end thereof overlying a portion of the front surface of the section having the square ends between the slot and one end thereof, the opposite end of the section having the pointed ends overlying the rear surface of the section having the square ends between the slot and opposite end thereof, and a knot-forming strip of material wrapped around the wing elements at the central portion thereof concealing the slot and providing a bow tie.

2,450,742
LAPPING OR POLISHING
Clarence C. Stevens, Forestville, Conn., assignor to General Motors Corporation, Detroit, Mich., a corporation of Delaware
Application November 6, 1943, Serial No. 509,196
7 Claims. (Cl. 51—123)



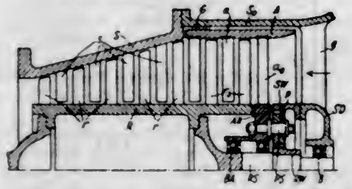
2. In apparatus of the character indicated, a wheel having a flat lapping surface, means for rotating the wheel on its axis, a shaft adjacent to the lapping surface and parallel thereto, a spindle supported by the shaft at a right angle thereto, the spindle and its support having means to hold a work piece in yielding pressure contact with the lapping surface, means for rotating the

spindle on its axis, and means operable during rotation of the spindle for causing a relative rocking



movement between the shaft and the lapping surface on a fixed axis parallel to the lapping surface and extending across it substantially radially.

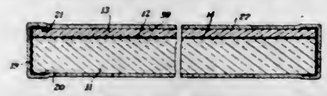
2,450,743
VARIOMETER WITH AIR DIELECTRIC
Jacob Marinus Unk, Eindhoven, Netherlands, assignor, by mesne assignments, to Hartford National Bank and Trust Company, Hartford, Conn., as trustee
Application May 1, 1946, Serial No. 666,271
In the Netherlands July 15, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires July 15, 1961
5 Claims. (Cl. 171—119)



1. A variable inductance of the variometer type comprising an inner and an outer coil, the convolutions of each coil being formed substantially to outline a rectangle with equal lengths between the end portions and with widths between the side portions of progressively varying dimensions in progressively adjacent convolutions, so the side portions of the convolutions lie on the outlining planar locus of a cylinder, the dimensions of the inner coil being sufficiently smaller than the dimensions of the larger coil to permit free rotary movement of the inner coil relative to the outer coil, the convolutions of each coil being separated from each other solely by air as a dielectric and the rigidity of the respective convolutions being sufficient to maintain the cylindrical shape of the two coils, means for supporting the outer coil and consisting of elongated ceramic members disposed substantially perpendicular to the planes of the convolutions, means securing the end portions of each convolution on its outer edges to said ceramic members, elongated ceramic supporting members for the inner coil similarly disposed substantially perpendicular to the planes of the convolutions, and means securing the end portions of each convolution on its inner edges to the ceramic supporting members, means for supporting the ceramic supports for the outer coil, means on those outer coil ceramic supports constituting a bearing at each end of the outer coil, and shaft ends secured to the ceramic supports of the inner coil and fitting in the bearings supported on the outer ceramic supports, and serving to support the inner coil for rotation in those bearings.

2,450,744
GAS SUPPLY MANIFOLD ASSEMBLY FOR GAS RANGES
Grover F. Whitehead, Rockford, Ill., assignor to Geo. D. Roper Corporation, Rockford, Ill., a corporation of Illinois
Application June 10, 1942, Serial No. 446,488
11 Claims. (Cl. 126—39)

1. A gas stove comprising in combination with a cooking top and burners therefor having mixing tubes, two T-shaped manifolds for supplying gas to said burners suitably supported under the cooking top in a substantially horizontal plane, the cross-portions of the T's being disposed in longitudinal alignment and with their end portions overlapping and adjustably connected for free passage of gas from one manifold to the other, gas discharge cocks on said cross-portions detachably connected with the mixing tubes of said cooking top burners, and a combination lighter and burner support of spider form and having a central body portion mounted by said central body portion on the leg portion of each of said manifolds, each including a pilot burner in the central body portion supplied with gas from the associated leg portion, each lighter and burner support having arms extending from the central body portion serving to support the burners associated therewith at a predetermined elevation with reference to the cooking top.

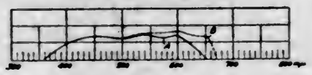


2,450,745
AXIAL FLOW COMPRESSOR
Karl Baumann, Mere, Knutsford, England, assignor to Metropolitan-Vickers Electrical Company Limited, London, England, a company of Great Britain
Application April 6, 1944, Serial No. 529,802
In Great Britain November 12, 1942
Section 1, Public Law 690, August 8, 1946
Patent expires November 12, 1962
8 Claims. (Cl. 230—114)

1. A multi-stage axial-flow compressor comprising a stationary casing carrying a row of blades and having an inlet at one end for the admission of fluid, a main rotor housed within the casing and carrying a row of blades for co-

operating with the stationary blades to increase the pressure of fluid admitted at the inlet end of the casing, an auxiliary rotor housed within the casing at the inlet thereof at which fluid is admitted and carrying a row of blades positioned in advance of said row of blades on the main rotor, and differential mechanism comprising two sun wheels and a planet wheel intermeshing with said sun wheels whereof one sun wheel is attached to, for rotation with, the main rotor, while the planet wheel is rotatably mounted on the auxiliary rotor, and means for restraining the other sun wheel against rotation.

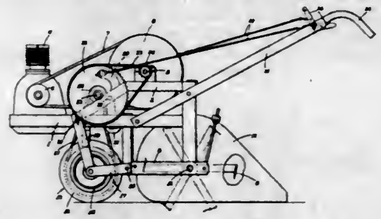
2,450,746
SAFELIGHT FILTER
Lester E. Bliss, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey
Application April 4, 1946, Serial No. 659,569
2 Claims. (Cl. 88—109)



2. A safelight filter comprising, a base member of rigid transparent material, a dyed gelatin layer on one surface of said base member, a layer of opaque lacquer completely covering all edges of said base member and said layer to afford an edge light-lock for said filter, and a clear gel-lacquer coating completely encasing said base member and said layers.

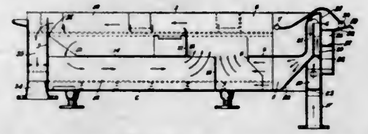
2,450,747
PHOTOGRAPHIC EMULSION CONTAINING NITRANILINE SULFONIC ACIDS
Burt H. Carroll, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey
No Drawing. Application February 7, 1946, Serial No. 646,205. In Great Britain February 9, 1945
4 Claims. (Cl. 95—7)

1. A light sensitive silver halide emulsion layer diffusely containing a nitraniline selected from the group consisting of at least one of the sulphonic acids of o-nitraniline and p-nitraniline and their water-soluble salts, which does not sensitize the emulsion and for all practical purposes has no deleterious action on the emulsion but has a light absorption maximum lying between 350 and 400 millimicrons.



2,450,748
PHOTOGRAPHIC SILVER HALIDE EMULSION SUPERSENSITIZED WITH A C-ACYLOXY QUINOLINE BASE
Burt H. Carroll and John Spence, Rochester, N. Y., assignors to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey
Application April 20, 1946, Serial No. 663,762
9 Claims. (Cl. 95—7)

A = 3,3'- diethyl-9- methylselenacarbocyanine bromide
B = 3,3'- diethyl-9 methylselenacarbocyanine bromide plus 6- acetoxyquinoline



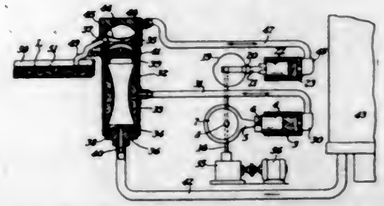
1. A photographic silver halide emulsion selected from the group consisting of silver chlorobromide, silver bromide and silver bromiodide emulsions spectrally sensitized with a sensitizing cyanine dye containing, as a supersensitizer, a quinoline base containing an acyloxy group attached to a carbon atom of the quinoline base.

2,450,749
GARDEN TRACTOR
Donald H. Clark, Stockton, Calif.
Application October 9, 1944, Serial No. 557,867
5 Claims. (Cl. 180—17)

3. A tractor comprising a frame and a ground engaging supporting and propelling means, such latter means including a supporting wheel unit which consists of a pair of wheels, means for suspending said wheels from the frame and for rotation relative thereto, a tire on each wheel, the wheels being relatively closely spaced apart and adjacent side walls of the tires sloping divergently in the direction of their ground engaging tread to form a channel defined by said sloping side walls, a rotatable cross shaft journaled on the frame in substantial parallelism with the axis of the wheel unit, a pulley on the shaft in substantial alinement with said channel, an endless friction type drive belt encompassing the pulley and channel and operable to be brought into frictional driving relation with the diverging walls of the channel, and means on the tractor to drive the shaft.

2,450,750
SPINNING BATH TANK
Robert Hème de Lacotte and Eugène Colombu, Paris, France, assignors to Comptoir Des Textiles Artificiels, a corporation of France
Application June 2, 1947, Serial No. 751,950
In France May 22, 1945
Section 1, Public Law 690, August 8, 1946
Patent expires May 22, 1965
6 Claims. (Cl. 18—8)

1. A spinning bath tank comprising a horizontal partition dividing the rear portion of said tank into an upper rear compartment and a lower rear compartment communicating at their forward ends, spinnerettes disposed in said upper rear compartment, means to supply fresh spinning bath to said lower rear compartment, a second horizontal partition disposed at approximately the same level as the first-named horizontal partition dividing said tank into an upper forward compartment and a lower forward compartment, said second horizontal partition having an opening at its forward end whereby said upper and lower forward compartments communicate with each other, a vertical partition



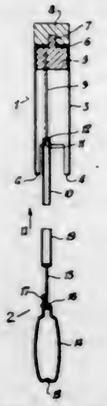
cooperating with said second horizontal partition and spaced forwardly of said upper rear compartment, said vertical partition terminating at its top below the path of travel of the filaments extruded from said spinnerettes, and a second vertical partition separating the two lower compartments, said second vertical partition being spaced from said second horizontal partition to provide an outlet therebetween.

2,450,751

CONSTANT FLOW PUMP

Calvin A. Elwood, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey

Application March 7, 1946, Serial No. 652,508
8 Claims. (Cl. 103—44)



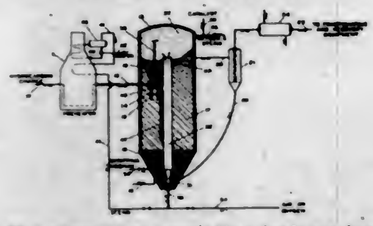
1. A hydraulically driven pump, comprising, in combination, a flexible suction chamber, a hollow pulsating chamber carrying the suction chamber, inlet and outlet means leading to and from the flexible suction chamber, a flow chamber at the outlet end communicating with the outlet means of the suction chamber, a delivery pipe leading from the flow chamber, a flexible wall in the flow chamber, pistons and cylinders for moving a pulsating fluid to and from the pulsating chamber to exert pressure upon the flexible suction chamber and to and from the flow chamber to exert pressure on the flexible wall in the flow chamber, and means for correlating the respective strokes of the pistons to deliver a constant even flow of fluid through the delivery pipe.

2,450,752

CURLER

Joseph Keith O'Moore Farrell, London, England

Application January 18, 1946, Serial No. 641,996
In Great Britain January 29, 1945
9 Claims. (Cl. 132—34)



4. A curler comprising a cylindrical tube, said tube being cut away at one end to form open jaws, a member rotatably mounted in the other end of said tube, said rotatable member carrying a spigot projecting from the tube, a knob fixed to said spigot whereby said member can be rotated, a rod eccentrically mounted in the rotatable member and extending through the cylindrical tube, a tubular member slidable along the rod, a clip comprising a pin, a clamping member and means for maintaining said pin and said clamp in co-operative gripping relationship and a tube fixed to the end of said pin adapted to engage the tube carried by the rod in the cylindrical tube to detachably connect the tube and clip.

2,450,753

APPARATUS AND PROCESS FOR HYDROCARBON CONVERSION

Jesse A. Guyer, Bartlesville, Okla., assignor to Phillips Petroleum Company, a corporation of Delaware

Application August 29, 1947, Serial No. 771,331
11 Claims. (Cl. 196—52)

3. The process of converting hydrocarbon oils which comprises introducing the vapors thereof into a constricted area of a tubular passageway connecting an elongated reaction zone with an elongated regeneration zone, drawing hydrocarbon conversion catalyst and regeneration effluent gases from said regeneration zone into said reaction zone through said passageway with said hydrocarbon vapor, thoroughly mixing said vapors with said regeneration gases and said catalyst, separating in the reaction zone said catalyst from a mixture of conversion products and said regeneration effluent gases, separating said mixture into fixed gases and hydrocarbon fractions, regenerating said catalyst by passing it in fluid suspension through a regeneration zone, introducing an oxidizing regeneration gas into said regeneration ozone, oxidizing and removing carbonaceous deposits from said catalyst, and drawing said regenerated catalyst and regeneration effluent gases at regeneration temperatures into said reaction zone with said hydrocarbon vapors.

2,450,754

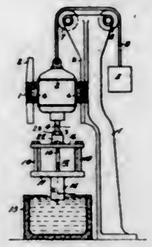
PROCESS FOR PREPARING ENOL ACETATES OF ALPHA-DIKETONES

Hugh J. Hagemeyer, Jr., Kingsport, Tenn., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey

No Drawing. Application October 24, 1946, Serial No. 705,479
7 Claims. (Cl. 260—491)

1. A process for preparing enol acetates comprising condensing, in the presence of an acid catalyst, isopropenyl acetate with a compound selected from the group consisting of the α-diketones represented by the following general formula:

$$R{-}CH_2{-}\overset{O}{\overset{\|}{C}}{-}\overset{O}{\overset{\|}{C}}{-}R_1$$



wherein R represents a member selected from the group consisting of a hydrogen atom and an alkyl group containing from 1 to 3 carbon atoms, and R_1 represents a member selected from the group consisting of a primary alkyl group containing from 1 to 4 carbon atoms and an isopropyl group.

2,450,755

METHOD OF CENTRIFUGAL CASTING

Arthur K. Higgins, Waukesha, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a corporation of Delaware

Application June 10, 1944, Serial No. 539,636
6 Claims. (Cl. 22—200.5)

1. A method of introducing molten metal into a mold having a spout projecting therefrom and communicating with an interior cavity which comprises providing a body of molten metal, establishing a superposed relation of the mold relative to the body of molten- metal with the lower end of the spout extending beneath the surface of said metal, and causing the molten metal entering the lower end of said spout to rotate therein with sufficient speed to move upward therethrough and into the mold cavity substantially entirely through the effect of said rotation of the molten metal and in sufficient quantity to fill the cavity to the extent required to form the article to be molded.

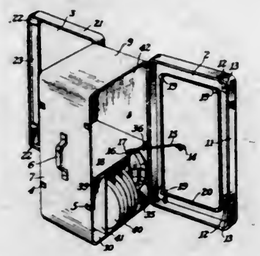
2,450,756

AIR-BLOWN ASPHALT AND CATALYTIC PREPARATION THEREOF

Arnold John Holberg, El Dorado, Ark., assignor to Lion Oil Company, a corporation of Delaware

No Drawing. Application April 30, 1945, Serial No. 591,235
8 Claims. (Cl. 196—74)

1. A process for producing blown asphalts which comprises air-blowing a high molecular weight petroleum hydrocarbon in the presence of a phosphorus catalyst which is stable at the temperature required in the process said catalyst being selected from a group consisting of phosphorus pentoxide, stable phosphorus sulfides and red phosphorus.



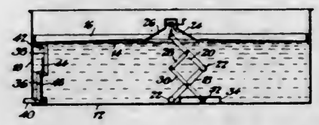
7. An air-blown asphalt produced by air-blowing a high molecular weight hydrocarbon in the presence of a phosphorus catalyst selected from a group consisting of phosphorus pentoxide, stable phosphorus sulphides and red phosphorus, said air-blown asphalt in its final form containing the phosphorus catalyst and being characterized by relatively low susceptibility to temperature change and by relatively high viscosity at elevated temperatures as compared with asphalts produced by an air-blowing process carried out under the same conditions but not including the use of said phosphorus catalyst.

2,450,757

COMBINED CARRYING CASE AND PROJECTION UNIT

Miller R. Hutchison, Jr., Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey

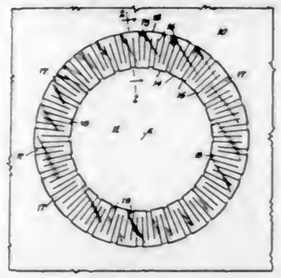
Application March 27, 1945, Serial No. 585,067
6 Claims. (Cl. 88—24)



1. A photographic projection unit, comprising in combination, a carrying case including top, bottom and side walls, end walls hingedly attached to the carrying case forming a pair of oppositely disposed doors, means for holding the doors open and in substantially parallel relationship, a roller screen attached to one door near an outer edge thereof, and a fastening device attached to an outer edge of the opposite door, and means carried by the roll screen for attaching an edge of the screen to the fastening device to stretch the screen taut across the carrying case and opened doors.

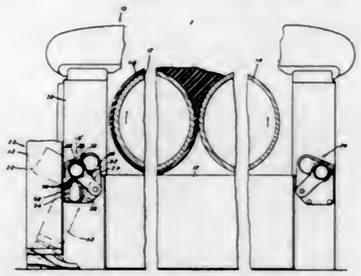
2,450,758

FLOATING ROOF TANK AND PIPING THEREFOR



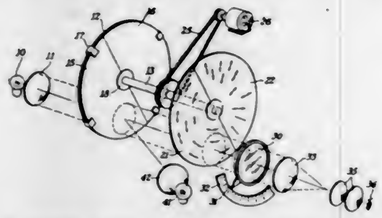
Wilbur G. Laird, Pleasantville, N. Y.

Application June 15, 1944, Serial No. 540,503
6 Claims. (Cl. 220—26)



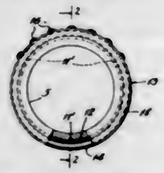
1. In a liquid storage apparatus including a tank, an improved piping arrangement therefor comprising a vertically-foldable zig-zag swivel-jointed pipe line vertically mounted in said tank, said line comprising an even number of rigid pipe sections of substantially equal length interconnected by swivel joints and connected to a fixed outlet pipe from said tank by a swivel joint, a plurality of interconnected rigid links pivotally connected end to end and to the midpoints of each pipe section, a terminal link of said plurality of links pivoted at its mid-point to the pipe section connected to the outlet pipe and having a free end held in horizontal straight line sliding engagement with a portion of said tank near said fixed outlet pipe, the other terminal link being about one half the length of a pipe section and having one end pivoted to a pipe section, said links being connected with each other and with said pipe sections in a parallelogram arranged so as to control the folding and unfolding action of said sections.

2,450,759
DISPLAY DEVICE
Wilson Stuart Leech, Chappaqua, N. Y.
Application January 4, 1947, Serial No. 720,185
2 Claims. (Cl. 41—10)



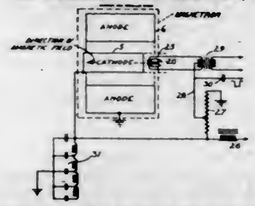
1. A display device which comprises a sheet of material, a series of spaced circumferential cuts formed in the sheet, a second series of spaced circumferential cuts disposed within the first series, the cuts of the second series being staggered with respect to those of the first, and a series of radial cuts of equal length extending from the ends of each circumferential cut in one series toward the series of circumferential cuts in the other series.

2,450,760
SAFETY DEVICE FOR RUBBER MILLS
Joseph E. Lodge, Baltimore, Md., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application November 19, 1946, Serial No. 710,785
5 Claims. (Cl. 18—2)



3. In a rubber mill including a pair of mill rolls mounted at the same predetermined level, said level being such that the centerlines of the rolls are above the knees of an operator of the mill and means including an electric motor for rotating the rolls in inrunning directions, a safety device which comprises a pair of arms pivotally mounted at opposite ends of one of the mill rolls, a bar carried by the free ends of the arms, means for normally supporting the bar in a position in front of and slightly above the normal paths of movement of the knees of an operator so that the bar is struck when the operator crouches to tug himself free from the mill, said rod-supporting means serving to permit the bar to be moved upwardly and toward the last-mentioned roll when struck, a limit switch for stopping the electric motor, and an actuator movable by the bar for actuating the limit switch when the bar is moved upwardly and toward the last-mentioned roll, said bar-supporting means serving to normally hold the bar sufficiently far from the last-mentioned roll to permit a batch of material to be moved between the last-mentioned roll and the bar without contact therewith from a position below the mill rolls.

2,450,761
FLICKER PHOTOMETERS, PARTICULARLY FOR MEASURING THE CONTRAST OF A LENS
Stephen M. MacNeille, Oak Ridge, Tenn., assignor to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey
Application June 9, 1945, Serial No. 598,451
11 Claims. (Cl. 88—14)



1. A flicker photometer comprising means including a light source for forming a beam of light involving a factor to be measured, means for alternating the intensity of said beam, two polarizing filters alternately positionable in the beam with their vibration axes mutually at right angles when in the beam, means for alternately and synchronously with the alternation of the intensity produced by the beam forming means, positioning the two filters in the alternating beam, a plane polarizing filter mounted for rotary adjustment in the beam and coacting with said two polarizing filters to vary the ratio of the alternating intensities of the beam transmitted by said two filters, means for detecting flicker when the intensities are different and means for indicating the adjustment of the plane polarizing filter.

2,450,762
RING
Clinton E. Marshall, Bronx, N. Y.
Application June 20, 1945, Serial No. 600,465
8 Claims. (Cl. 63—15)

1. In a wedding ring structure, an inner circumferentially continuous main ring member, an outer circumferential continuous characterized ring member and interengaging means on said members for retaining the same against accidental displacement while permitting forcible separation one from the other, said last named means comprising a groove portion on the main ring member inwardly of side edges thereof, and circumferentially spaced yieldable portions on the other member within side edges thereof adapted to enter the groove portion of the main ring member.

2,450,763
ULTRA HIGH FREQUENCY GENERATOR VACUUM TUBE AND CATHODE STRUCTURE THEREFOR
John W. McNall, East Orange, N. J., assignor, by mesne assignments, to the United States of America as represented by the Secretary of the Navy
Application July 3, 1943, Serial No. 493,444
18 Claims. (Cl. 250—36)

7. A circuit for producing intermittent pulses of ultra-high-frequency oscillations including a magnetron tube having an annular multicavity anode and a compound cathode comprising a secondarily emissive cathode and a relatively small thermionic auxiliary emitter, means for preventing thermionic emission of said emitter from exciting said tube in the absence of a trigger pulse applied to said circuit, a reactive pulse-forming network adapted to discharge upon initiation of oscillations in said tube by emission from said auxiliary emitter with the formation of a substantially rectangular electrical pulse, means including a source of high voltage for impressing a relatively high potential between said cathode and said anode and for charging said reactive pulse-forming network, and current limiting means connected in series with said source of high voltage adapted to permit the discharge of said network as aforesaid and to reduce the said voltage between said anode and said cathode at the end of such discharge to a value low enough to interrupt oscillations of said tube.

2,450,764
ISOMERIZATION OF HYDROCARBONS AND IMPROVED CATALYSTS THEREFOR
Charles O. Meyers, Bartlesville, Okla., assignor to Phillips Petroleum Company, a corporation of Delaware
No Drawing. Application January 1, 1944, Serial No. 516,708
27 Claims. (Cl. 260—683.4)

1. A process for the conversion of normal butane to isobutane which comprises passing a gaseous stream containing normal butane and catalyst-activating amounts of hydrogen chloride through a bed of solid anhydrous aluminum chloride at isomerization conditions of temperature and pressure whereby isobutane is produced and aluminum chloride vapors are incorporated in said stream, and passing the resulting stream through a bed of activated wood charcoal prepared as described below, at isomerization conditions of temperature and pressure whereby aluminum chloride from said stream becomes incorporated in said bed and further amounts of isobutane are produced, said charcoal having been prepared by heating activated wood charcoal to a temperature of at least about 1500° F., and then incorporating water therewith in a controlled amount up to about five weight per cent by passage of superheated steam therethrough immediately prior to passage therethrough of the aforesaid stream containing aluminum chloride vapors.

15. A catalyst useful in effecting organic conversions prepared by subjecting an adsorbent carbonaceous material to elevated temperatures under conditions such that substantially no water may be removed by heating to higher temperatures, contacting thus-dried material with water under conditions to provide said material with a small but substantial and controlled content of water below about 5 weight per cent, and incorporating with the thus-hydrated material catalytically effective amounts of an anhydrous Friedel-Crafts type metal halide.

2,450,765
CYCLOHEXYLCARBINYL THIOCYANO ESTERS
Rupert C. Morris, Berkeley, Alva V. Snider, Richmond, and Paul H. Williams, Berkeley, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware
No Drawing. Application July 7, 1944, Serial No. 543,959
9 Claims. (Cl. 167—30)

3. The 1-alkyl cyclohexylcarbinyl esters of the thiocyano-substituted aliphatic acids.

2,450,766
ALUMINUM OXIDE COMPOSITIONS
Alan C. Nixon and Orris L. Davis, Berkeley, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware
No Drawing. Application May 26, 1947, Serial No. 750,642
3 Claims. (Cl. 252—436)

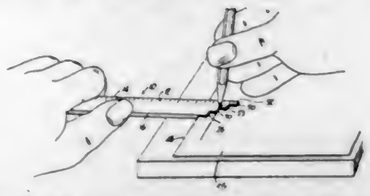
1. An aluminum oxide which has been sulfamic treated for a period of time sufficient to give a product which after calcining at 300° C. to 600° C. contains less than 0.2% sodium.

2,450,767
VAT DYEING OF ALKALI-SENSITIVE FIBERS, INCLUDING AN ACID REDUCTION OF THE VAT DYE IMPREGNATED FIBERS
George K. Piotica, Medford, Mass., assignor to Allied Chemical & Dye Corporation, New York, N. Y., a corporation of New York
No Drawing. Application March 30, 1944, Serial No. 528,742
12 Claims. (Cl. 8—36)

1. A method of dyeing organic textile fibers sensitive to alkalies, with a vat dyestuff which is reducible under acid conditions, which comprises impregnating a mass of the fibers with the vat dyestuff in unreduced form, reducing the vat dyestuff in contact with the fiber in an acid medium having an acidity of less than pH 1, and then oxidizing the reduced vat dyestuff on the fiber to the unreduced form.

2,450,768
NONSKID ATTACHMENT FOR SHOES
Harold M. Pulver, Douglass, Kans., assignor of fifty per cent to Robert Bradshaw, Wichita, Kans.
Application December 20, 1946, Serial No. 717,476
3 Claims. (Cl. 36—7.6)

3. A non-skid safety attachment for shoes, comprising a side frame of U-shaped form, said frame being formed of rigid wire with loops



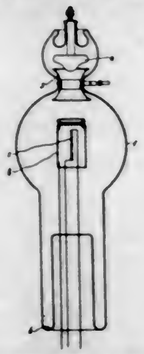
formed at the rear, sides and free end of the same, a wire side bar hinged to each end of the frame and loops thereof, each side bar having loop eyes thereon, transverse non-skid elements connecting said side bars to each other to provide a safety non-skid tread under the sole of the shoe, a non-skid tread chain connected with the sides of the frame and the rear part thereof to provide a non-skid tread for the heel of the shoe, and means for attaching the side frame to the shoe of the wearer.

2,450,769

PATTERN GRADING RULER

Benjamin Rothblum, New York, N. Y.

Application January 17, 1944, Serial No. 518,554
7 Claims. (Cl. 33—42)



5. A grading ruler comprising a substantially straight-edged, flat-faced member, the member being graduated along one of its faces in units of a system of measurement, the member at one end being indented at a plurality of different positions, each of the indentations having an accompanying ridge so that the ridges are spaced at the same intervals as the indentations, the indentations being positioned to form a plurality of steps at equal intervals each equivalent to the extent of one of the units of measurement, and the graduations of the member then following seriatim along the flat face and away from the location of the indentations and the ridges.

2,450,770

HIGH-VOLTAGE RECTIFYING TUBE

Marcus Jan Snijders, Eindhoven, Netherlands, assignor to Hartford National Bank and Trust Company, Hartford, Conn., as trustee

Application January 11, 1947, Serial No. 721,647
In the Netherlands November 14, 1945
Section 1, Public Law 690, August 8, 1946
3 Claims. (Cl. 250—27.5)

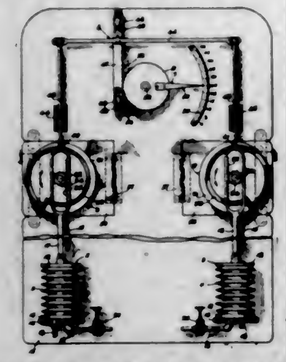
2. A high-voltage rectifying tube, comprising a sealed envelope containing an atmosphere of mercury vapour, and a cathode of tungsten-thorium wire carbonized to an extent within about 30% of its cross-sectional area.

2,450,771

PLASTIC SULFUR VULCANIZING AGENT, METHOD FOR ITS UTILIZATION AND VULCANIZABLE COMPOSITIONS CONTAINING THE SAME

William E. Vaughan, Berkeley, and Benjamin Barnett, San Francisco, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware

No Drawing. Application March 6, 1944, Serial No. 525,306
11 Claims. (Cl. 260—79)



7. A vulcanizable composition comprising a vulcanizable organic plastic substance containing unsaturated carbon to carbon bonds and a vulcanizing agent which is a stable plastic sulfur composition produced by subjecting a mixture comprising a compound selected from the group consisting of hydrocarbons and partially halogenated hydrocarbons, oxygen and a compound selected from the group consisting of hydrogen sulfide and mercaptans to the action of an elevated temperature above 250° C. and below that temperature at which spontaneous combustion of the mixture occurs.

2,450,772

MEASURING APPARATUS RESPONSIVE TO VARIABLE CONDITIONS

John E. Watkins, Maywood, Ill.

Application February 14, 1945, Serial No. 577,862
5 Claims. (Cl. 73—407)

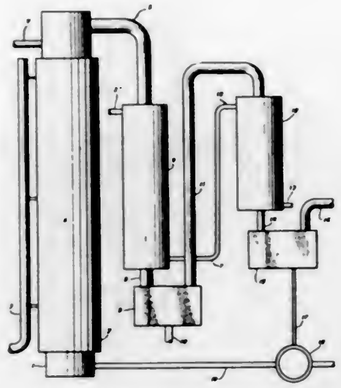
2. Apparatus for indicating the value of a pressure condition having a predetermined relationship to two independently variable pressure conditions comprising, in combination, a pair of pressure responsive devices adapted to respond independently to variations in the respective variable pressure conditions, each of said devices including an element movable in accordance with the variations in the pressure condition to which it is responsive, indicating means including an elongated pointer pivoted adjacent one end to sweep over a graduated scale, a linkage connecting said elements with said pointer including a shiftable member having a rack and pinion connection with the pointer, a lever pivoted intermediate its ends on said member, a cam follower connected with each end of said lever, a pair of rotatably supported cams positioned for coaction with said followers, and rack and pinion means connecting said elements with said cams whereby the cams are rotated in response to the movements of said elements, said cams being shaped so that said pointer is positioned relative to said scale in accordance with the value of the pressure condition having a predetermined relationship to said independently variable pressure conditions.

2,450,773

DYEING OF WOOL WITH INDIGO DYESTUFFS

Edward Weber, Winchester, Mass., assignor to Allied Chemical & Dye Corporation, New York, N. Y., a corporation of New York

No Drawing. Application March 30, 1944, Serial No. 528,772
5 Claims. (Cl. 8—36)



1. In the dyeing of wool with an indigo by treating the wool with a dye liquor comprising an indigo in the leuco form, sodium hydrosulfite and ammonium hydroxide, the improvement which comprises exhausting the dye liquor by adding thereto an alkali-metal salt selected from the group consisting of the neutral alkali-metal sulfates and the alkali-metal chlorides.

2,450,774

METHOD FOR THE EVAPORATION AND CONCENTRATION OF LIQUIDS

George G. Zahm, Buffalo, N. Y., assignor to Hurd Corporation, New York, N. Y., a corporation of Delaware

Application August 12, 1943, Serial No. 498,360
3 Claims. (Cl. 99—205)

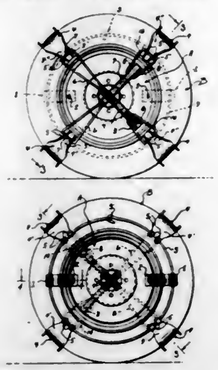
1. The method of concentrating liquid food products such as fruit juices, beverages, extracts and infusions, which method comprises rapidly flowing the liquid food product in a thin film over a heat exchange surface under high vacuum and thereby separating said liquid food product into a concentrate portion and a vapor portion containing volatile flavor producing ingredients, passing said vapor portion directly into a first condenser without breaking the vacuum and thereby initially reducing the water content of the vapor portion without materially condensing the flavor-producing constituents, passing the residual vapors directly into a surface condenser without breaking the vacuum and thereby finally condensing substantially all of the residual vapors to form a concentrated liquid fraction containing the flavor producing constituents, and reintroducing said liquid fraction into the concentrate portion thereby restoring to such concentrate portion the flavor producing ingredients originally therein present.

2,450,775

METHOD OF CONCENTRATING HIGHLY COLLOIDAL FOOD PRODUCTS

George G. Zahm, Buffalo, N. Y., assignor to Hurd Corporation, New York, N. Y., a corporation of Delaware

No Drawing. Application July 20, 1945, Serial No. 606,267
4 Claims. (Cl. 99—210)



1. The process of concentrating eggs in the liquid phase which comprises breaking and thoroughly mixing whole fresh eggs to form a substantially uniform liquid, and passing such liquid vertically through an evacuated chamber at a relatively high rate of speed and in a relatively thin continuous film while subjecting it to mechanically applied pressure.

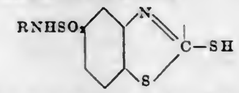
2,450,776

TRACTION SHOE ATTACHMENT FOR WHEELS

Charles J. Achenbach, Manitowoc, Wis.

Application January 16, 1948, Serial No. 2,686
1 Claim. (Cl. 152—228)

In a wheel having a pneumatic tire mounted thereon a pair of traction shoes fitted over the tire having depending stirrup ends secured to the wheel, a cinch bar for the pair of shoes, comprising a wire strand folded upon itself to form a link at one end and a pair of pivot toes at the other end, a latch lever pivotally mounted upon the toes, and a wire link pivoted to the latch lever, the ends of the cinch bar being adapted to frictionally confine the tractor shoes upon a tire.



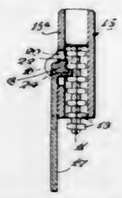
2,450,777

SULFAMYL-2-MERCAPTOBENZOTHIAZOLES

Charles F. H. Allen, Rochester, N. Y., and Alan Bell, Knoxville, Tenn., assignors to Eastman Kodak Company, Rochester, N. Y., a corporation of New Jersey

No Drawing. Application April 20, 1944, Serial No. 531,979
1 Claim. (Cl. 260—306)

A 5-arylsulfamyl-2-mercapto-benzothiazole, having the structural formula

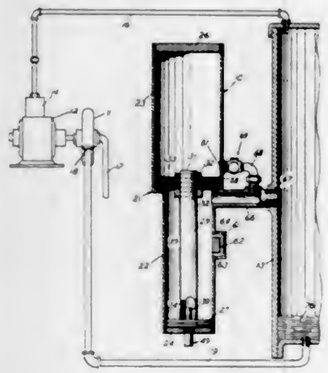


in which R is a substituted phenyl group selected from the class consisting of 4-chlorophenyl, 4-acetaminophenyl, 4-aminophenyl, 2-hydroxyphenyl, and 2-hydroxy-4-methylphenyl.

2,450,778
SOLDER
Henri M. Boonen, Houma, La., assignor of one-half to Thomas J. Melancon, Houma, La.
No Drawing. Application February 11, 1946, Serial No. 646,957
1 Claim. (Cl. 75—134)

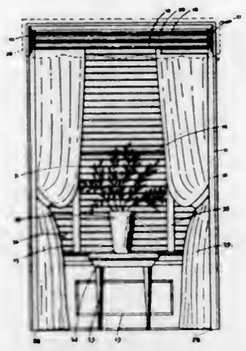
A solder for aluminum and kindred metals consisting only of the following ingredients in substantially the proportions stated: manganese 20%; aluminum (pure) 20%; magnesium 15%; copper 5%; bismuth (metallic) 5%; zinc 20%; and tin 15%.

2,450,779
SLIDE FASTENER
Lawrence Brozek, Jackson Heights, N. Y., assignor to Waldes Koh-I-Noor, Inc., Long Island City, N. Y., a corporation of New York
Application October 28, 1944, Serial No. 560,849
6 Claims. (Cl. 24—205.14)



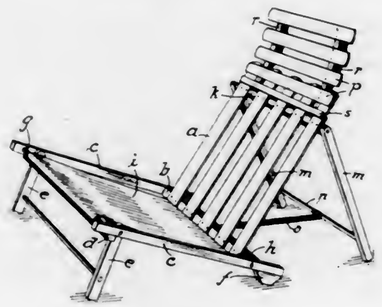
1. A locking slider for slide fasteners comprising a slider for engaging and disengaging the fastener elements, a tab hingedly secured to the upper wing of the slider, the upper wing having a slot therethrough and the tab carrying an angular part providing a pin-lock assembly adapted to be projected through the slot into the slider body upon movement of the tab from raised to locking position, said assembly comprising a leading control pin and a rearward locking pin, said pins being spaced a distance which is slightly greater than the width of the fastener elements, the locking pin having length such that it is adapted in its locking position to project a substantial distance into the space between any two fastener elements disposed in the slider, the control pin being shorter than the locking pin by an amount enabling it, upon engaging a fastener element disposed in obstructing relation to its movement into the slider body, to displace and clear said element and allow the locking pin to move into the space between said element and the next following element.

2,450,780
ELECTRODE MOUNTING MEANS FOR MERCURY SWITCHES AND RELAYS
Herbert E. Bucklen, III, Elkhart, Ind., assignor to Durakool, Inc., Elkhart, Ind., a corporation of Indiana
Application February 15, 1946, Serial No. 647,867
8 Claims. (Cl. 200—152)



1. In a mercury switch or relay, the combination of a tubular metal casing for containing a body of mercury, a metal sleeve having a radially outwardly extending flange at one end, an electrode embedded in insulated gas-tight relation in a glass bead fused in said sleeve and adapted to be supported by said sleeve to extend inwardly of one end of said casing, an internal annular shoulder adjacent said one end of said casing providing a seat for the radial flange of said sleeve, and an annular resilient sealing member disposed about said sleeve between the flange thereof and said one end of said casing, said resilient sealing member being adapted to be held under compression against the flange of said sleeve in sealing engagement therewith and with the inner surface of said casing adjacent said one end by turning in thereof into engagement with said resilient sealing member, and said glass bead serving to prevent substantial transmission of heat from said electrode to said resilient sealing member developed by the making and breaking of contact of the body of mercury in said casing with said electrode.

2,450,781
AIR PRESSURE WATER SYSTEM
Swan Oscar Carlson, Paton, Iowa
Application January 19, 1946, Serial No. 642,335
5 Claims. (Cl. 230—52)

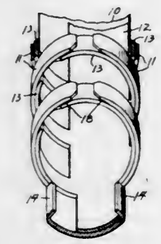


1. In an air pressure water supply system including a pressure tank, an air feed device for said tank comprising a cylinder formed with a pair of coaxial cylinder portions of different diameters, and open at their inner ends, a pair of pistons for said two cylinder portions, a hollow rod connected between said two pistons with its ends open to the outer ends of said two cylinder portions, a first fluid conduit connected with said cylinder between said two pistons and with said pressure tank, a second fluid conduit connected between said first conduit and one of said cylinder portions, a check valve in said second conduit providing for a fluid flow from said one cylinder portion to said first conduit, a second check valve in the end of said rod which is open to the second one of said cylinder portions, providing for a fluid flow into said rod, an air admission check valve in the outer end of said second cylinder portion, and a by-pass conduit having opposite ends thereof open to said second cylinder portion at axially spaced positions thereon, with said pistons being movable together in response to pressure changes in said pressure tank.

2,450,782
BLINDLIKE SHADE
Angelo Cascia, Bronx, N. Y.
Application November 23, 1944, Serial No. 564,780
19 Claims. (Cl. 160—120)

2. A transparent shade disposable over a window and provided with vertical stripes to simulate tapes of a Venetian blind, and with narrow horizontal stripes to simulate the edge faces of Venetian blind slats; the part of the intermediate shade away from the stripes being clearly transparent.

2,450,783
COMBINATION HEADREST AND BACKREST IN A BEACH OR LAWN CHAIR
Henry Hill Collins, Bryn Mawr, Pa.
Application June 6, 1945, Serial No. 597,867
6 Claims. (Cl. 155—173)

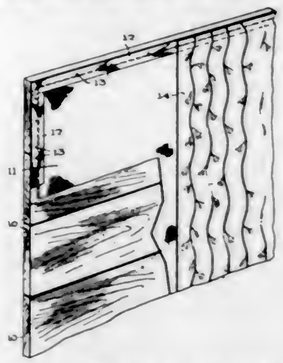


1. A chair comprising a back-rest the back-rest comprising upwardly extending spaced-apart slats, and a separate head-rest; the head-rest comprising side members and a pair of cross-bars extending between and on opposite sides of the side members, the head rest being adapted to engage the back-rest by positioning the cross-bars on opposite sides of the back-rest slats and sliding the head-rest downward, stop means on the back-rest and the head-rest for limiting the downward movement of the head-rest and means above the cross-bar adapted to engage the back-rest slats.

2,450,784
RESOLUTION OF N-FORMYLISOPROPYLIDENEPENICILLAMINE
Walter Mark Duffin, Dartford, and Samuel Wilkinson, Beckenham, England, assignors to Therapeutic Research Corporation of Great Britain Limited, London, England, a corporation of Great Britain
No Drawing. Application June 9, 1945, Serial No. 598,652. In Great Britain June 19, 1944
6 Claims. (Cl. 260—534)

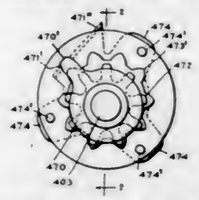
1. A method of preparting optically active penicillamine which comprises formylating dl-isopropylidenepenicillamine to produce N-formyl-isopropylidenepenicillamine, reacting this substance with an optically active alkaloid which forms the optical isomers of N-formyl-isopropylidenepenicillamine crystalline compounds of different solubility, fractionally crystallizing these compounds from a solution to effect resolution and treating at least one of the crystalline compounds so obtained with a hydrolyzing agent to produce an optically active penicillamine.

2,450,785
BINDING
Charles Edward Emmer, Chicago, Ill., assignor to General Binding Corporation, Chicago, Ill., a corporation of Illinois
Application June 16, 1944, Serial No. 540,601
7 Claims. (Cl. 129—1)



7. A binding comprising telescoped members, one of said members having an elongated backbone, and a plurality of spaced rings arranged transversely thereon, said rings having gaps therein; the other member having an elongated backbone engaged with the first backbone and having a plurality of spaced rings arranged in registry with the first rings, said second rings having gaps therein substantially equal to the gaps in said first rings, the rings of the respective members being adapted to close said gaps upon relative movement of said members in one direction and to register said gaps upon relative rotation of said members in another direction.

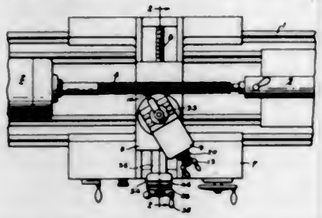
2,450,786
WALL COVERING AND METHOD OF APPLYING SAME
Albert G. Ferguson, Houston, Tex., assignor to American Associated Companies, Inc., Atlanta, Ga., a corporation of Georgia
Application August 15, 1944, Serial No. 549,587
1 Claim. (Cl. 20—4)



A paper covered board wall consisting of boards having as a group an uneven, discontinuous surface, a plurality of plies of substantially smooth, sized cotton linters attached to and covering said boards, said sized covering plies possessing rigidity

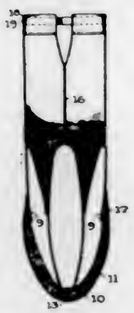
to prevent them entering depressions or openings in the surface formed by said boards, and wall

paper adhesively attached to the surface of said covering plies of cotton linters.



2,450,787
CRAWL CARRY MECHANISM
Howard M. Fleming, West Orange, N. J., assignor to Monroe Calculating Machine Company, Orange, N. J., a corporation of Delaware
Application January 9, 1947, Serial No. 721,004
4 Claims. (Cl. 235—136)

1. In a register having a series of totalizer wheel gears, and differentially movable actuators therefor; crawl tens transfer devices between said gears comprising actuator gears, a hub upon which the related actuator gear is rotatably mounted, said hub having an eccentric, a floating gear constituted by a totalizer wheel gear rotatably mounted upon said eccentric and meshing with said actuator gear, the number of teeth of the actuator gear and the totalizer wheel gear having a ratio of nine to ten, and coupling means between the totalizer wheel gear of lower order and the hub of the eccentric related to the totalizer wheel gear of next higher order.

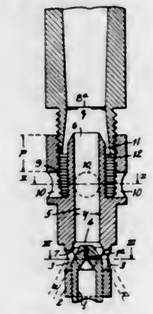


2,450,788
LATHE ATTACHMENT
Theodore Foster, Sidney, Ohio, assignor to The Monarch Machine Tool Company, Sidney, Ohio, a corporation of Ohio
Application March 10, 1945, Serial No. 581,976
8 Claims. (Cl. 82—24)

1. In combination, a cross-slide, a compound pivotally mounted on said cross-slide, means manually operable in one direction for moving a cutting tool toward a workpiece in fine adjustment mounted upon said compound, means for moving said cross-slide and compound together comprising a manually operable means rotatable in either direction, an indicating dial, a clutch for connecting said manually operable means to said indicating dial, actuating means mounted on said indicating means, a plurality of locking members rotatably mounted with respect to said actuating means and adapted to be driven thereby when

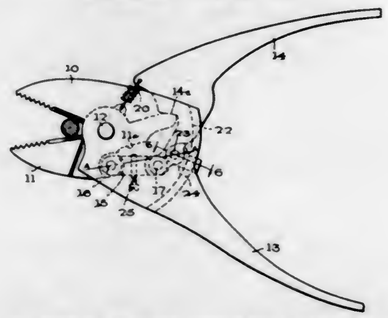
said clutch has connected said actuating means to said indicating dial, and means adapted to stop the rotation of said shaft and the movement of said cross-slide and compound by engaging with at least one of said locking members.

2,450,789
SANITARY GARMENT
Jacob G. Frieman, Tiffin, Ohio
Application July 5, 1945, Serial No. 603,327
2 Claims. (Cl. 128—284)



1. A sanitary pantie garment comprising a front and back portion and having an opening centrally thereof at the crotch, and a pocket attached to the exterior of the crotch over the opening along a line parallel to but spaced from the edge of the opening to form a flat rim overlying the pocket, whereby when the garment is being worn stress at the waist line thereof opposing the stress at the leg openings tends to hold the rim away from the contents of the pocket, the opposing edges of the pocket material being gathered at the center portion only previous to attachment to thereby form a bulge enlargement of the pocket centrally of the crotch when attached.

2,450,790
GAS BURNER
Albert Horace Greaves, London, England, assignor of forty per cent to Ronald Victor Short, Haxby, England
Application May 27, 1943, Serial No. 488,720
In Great Britain June 16, 1942
4 Claims. (Cl. 158—118)



1. A gas burner comprising in combination an air-gas mixing tube having a conical outer end and having a bore provided with an inwardly tapering throat and provided with air inlet openings through the wall of the bore which open to the interior of the tube immediately beneath the throat, the throat dividing the bore of the

tube into two parts of different diameters, a gas jet fitted into the part of the air-gas mixing tube bore of larger diameter so as to be co-axial with the tube and terminating at its outlet adjacent the throat of the air-gas mixing tube and intermediate the larger and smaller bore-parts, the outer surface of the gas jet at its said extremity being also of tapering frusto-conical shape so that an axially inclined annular space is provided between the jet and the throat, the width of said annular space being not less than one-sixth and not more than one-third of the diameter of the portion of the bore immediately thereabove an internally threaded sleeve carried by the first tube and arranged in concentric spaced relation with the outer conical end thereof and provided with

air admission holes at its inner end, a second mixing tube having its inner end in threaded engagement with the threaded portion of the sleeve and having a bore and a Venturi throat in the bore, the throat of the venturi being arranged slightly beyond the outer end of the first tube while the inner part of the venturi surrounds the conical end of the first tube in spaced relation to provide a second inclined annular space which produces an ejector effect by which additional air may be drawn through the air admission holes into the air-gas mixture which issues from the said outlet end of the first mixing tube, and the distance between the upper edges of the holes in the sleeve and the outer extremity of the first mixing tube being not less than the internal diameter of the throat of the venturi.

2,450,791
PLIERS WITH LINK CONNECTED HANDLE AND JAW
Arthur H. Hagen, Globe, Ariz.
Application September 17, 1945, Serial No. 616,788
8 Claims. (Cl. 81—46)

1. In a pair of pliers comprising pivotally connected jaws and a handle for each jaw, a connecting link pivotally secured at its opposite ends to one of said jaws and its handle, an abutment pivotally associated with said handle, a stop on the other handle engageable by said abutment, said first mentioned handle being rotatable on the pivot of said abutment when the latter is in engagement with said stop to move the pivotal connection between said handle and connecting link toward a line intersecting the pivotal connection between said link and its jaw and the pivotal center of said abutment, and means for adjustably limiting the movement of said pivotal connection between said connecting link and handle toward said line.

2,450,792
ABRADING ELEMENT
Elisha W. Hall, Scituate, Mass.
Application March 14, 1945, Serial No. 582,622
8 Claims. (Cl. 51—193)

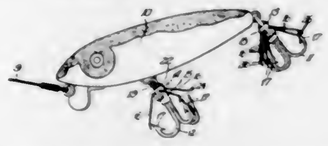
1. An abrading element comprising a ring-like disk including two distinct strips of abrading material, each being wound to present a plurality of plies, and a folded strip between and connecting the two groups of plies and having its fold at the inner circumference, all of said strips having annular edges presented at the outer circumference of the disk and constituting the working surface.

2,450,793
ABRADING ELEMENT
Elisha W. Hall, Scituate, Mass.
Application March 14, 1945, Serial No. 582,623
4 Claims. (Cl. 51—193)

1. In an abrading element, the combination of two bands, each comprising a plurality of plies, and a relatively narrow band of sheet material extending lengthwise of and overlapping adjacent margins of the first two bands and folded along a line lengthwise of said bands.

2,450,794
ELECTRODEPOSITION OF TIN
Elmer F. Harris, Birmingham, Ala., assignor, by mesne assignments, to Carnegie-Illinois Steel Corporation, a corporation of New Jersey
No Drawing. Application October 5, 1945, Serial No. 620,639
7 Claims. (Cl. 204—54)

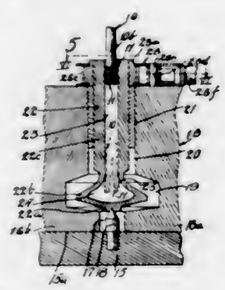
1. The method of electrodepositing tin which comprises providing a tin anode in an electrolyte, making the article upon which the tin is to be deposited the cathode in such electrolyte, the electrolyte consisting of an aqueous solution of the following ingredients:



Tin——grams per liter——	10–60
Phenol sulphonic acid——do——	35–110
Dihydroxy diphenyl sulphone——do——	1–9
Monobutyl phenylphenol sodium monosulphonate parts by million by weight——	5–2000

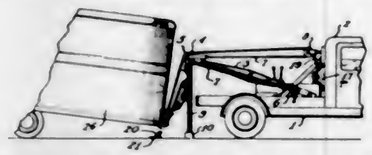
and passing an electric current between the anode and cathode having a current density of at least 20 amperes per square foot of cathode surface in the electrolyte.

2,450,795
ELECTRODEPOSITION OF TIN
Elmer F. Harris, Birmingham, Ala., assignor, by mesne assignments, to Carnegie-Illinois Steel Corporation, a corporation of New Jersey
No Drawing. Application October 5, 1945, Serial No. 620,640
7 Claims. (Cl. 204—54)



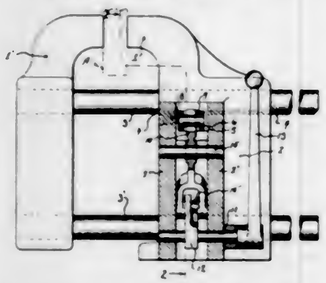
1. An electrolyte for deposition of tin consisting of an aqueous solution of 10 to 60 grams per liter of tin, an acid of the group consisting of phenol sulphonic acid, sulphuric acid, fluosilicic acid, benzene sulphonic acid, cresol sulphonic acid, chlorobenzene sulphonic acid, and nitrobenzene sulphonic acid, the range of acid being 35 to 110 grams per liter for phenol sulphonic acid and the molecular equivalent for the other acids, 1 to 9 grams per liter of dihydroxy diphenyl sulphone, and 0.02 to 50 parts per million by weight of diphenyl-para-phenylene-diamine.

2,450,796
WEED GUARD FOR FISHHOOKS
Harold M. Heimark, Oak Park, Ill.
Application June 13, 1947, Serial No. 754,487
5 Claims. (Cl. 43—38)



1. A weed guard for use with a multiple fishhook, comprising a clamp having a tongue thereon and having loops formed therein, and resilient fingers secured to said loops, said clamp being made of soft metal so that said guard can be removably secured to a hook by placing said tongue through the eye of said hook and forming the clamp about the shank of said hook, said fingers being made of spring wire and positioned adjacent the points of said hook.

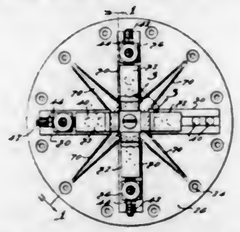
2,450,797
APPARATUS FOR REMOVAL OF ANNULAR SCRATCHES
August H. Heinrich, Euclid, Ohio, assignor to Thompson Products, Inc., a corporation of Ohio
Application March 17, 1944, Serial No. 526,996
2 Claims. (Cl. 29—76)



1. Apparatus for file finishing a hollow poppet valve which comprises a holder for rotatably supporting a hollow valve blank in vertical position, a reciprocal file carriage, a file carried thereby having a plurality of resilient fingers, each of which has a bulbous end substantially covered with file teeth and a device for rotating said valve blank in said holder.

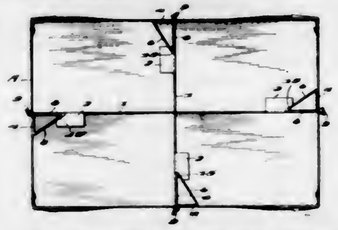
2,450,798
WRECKING TRUCK BOOM SUPPORT
Arthur F. Heinss, Cincinnati, Ohio
Application November 5, 1946, Serial No. 707,952
4 Claims. (Cl. 214—86)

1. In combination with the body of an automobile vehicle of the wrecker type having a boom the peak of which extends beyond the body, an auxiliary support for the peak of the boom comprising a frame the peak of which is attached to the peak of the boom and the base of which is supported on the ground when in operative position, a block and tackle hoist having one block attached to the frame and the other block adapted to be attached to a load, the line of the tackle running to a winch on the body of the vehicle, so that in raising the load at least a portion of the weight of the same will be borne by the frame, and spacing bars attached to the frame and blocking the tendency of the load to ride against the frame.



2,450,799
CAM-TEETH ACTUATED VISE
Hugo Helbig, Racine, Wis.
Application June 23, 1947, Serial No. 756,524
2 Claims. (Cl. 81—26)

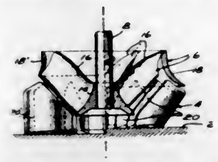
1. A vise comprising a fixed jaw and a movable jaw, a guide rod carried by the movable jaw, slidable in the fixed jaw, angular teeth formed in the lower face of the guide rod, a bolt positioned at a right angle to the guide rod slidable in the fixed jaw body, teeth upon the end of the said bolt for selective engagement with the teeth of the guide bar, an actuating arm mounted upon the fixed jaw body and a toggle link connection between the actuating arm and bolt.



2,450,800
DIAPHRAGM CHUCK
George Hohwart and Ernest F. Hohwart, Detroit, Mich., assignors to N. A. Woodworth Company, Ferndale, Mich., a corporation of Michigan
Application July 13, 1946, Serial No. 683,459
5 Claims. (Cl. 279—46)

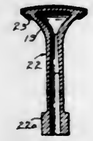
5. In a diaphragm chuck, in combination, a diaphragm arranged in a general plane of thickness perpendicular to the axis of said chuck and provided with a central, axial opening therein, a plurality of jaw devices mounted on the axially outer face of said diaphragm in approximately equally angularly spaced relation with respect to each other about the axis of said chuck, said diaphragm

having a radially directed corrugation therein between each adjacent pair of said jaw devices and extending from said central opening radially outwardly therefrom, whereby to increase the flexibility of said diaphragm in an axial direction at its center.



2,450,801
COMPOSITE PARTITIONING AND SPACING ELEMENT AND COMBINATION THEREOF WITH A CONTAINER
Joseph G. Huye, New Orleans, La.; Charlotte Huye and Merle Huye, legatees, by judgment of possession, of said Joseph G. Huye, deceased, assignors to Huye Space Saving Box System, Inc., New Orleans, La.
Application March 19, 1945, Serial No. 583,425
6 Claims. (Cl. 229—15)

1. A composite partitioning and spacing element having end portions divided by scored lines into a plurality of panels and foldable along said scored lines to constitute a vertically extending tubular spacing or supporting post at each end portion of said element, in combination with means respectively integral with said element and respectively movable to planes perpendicular to the plane of the partitioning portion of said element to respectively overlie portions of the faces of panels of the respective spacing or supporting posts to maintain the same in erected condition.

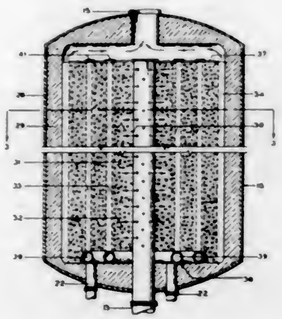


2,450,802
MIXER
John Johnson, deceased, late of Morristown, N. J., by Ethel H. Johnson, executrix, Morristown, N. J., assignor to John E. Johnson, Morristown, N. J.
Application November 15, 1944, Serial No. 563,500
3 Claims. (Cl. 259—96)

1. In a mixer, the combination with a rotor having liquid circulating blades the discharge edges of which are inclined to the axis of rotation of said rotor, of stator blades having inclined receiving edges which are parallel to and immediately adjacent to the path of travel of said rotor blade discharge edges and the greater part of which are located substantially within the coaxially projected perimeter of said path of travel, the coaxial overlap of the rotor and stator blades

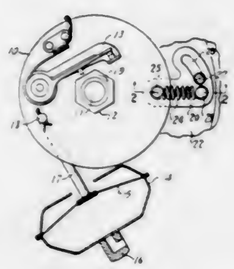
being such that at least 30 percent of the active liquid circulating part of the rotor is surrounded by the stator and a flow directing shroud being carried by the rotor blades.

2,450,803
METHOD OF MAKING SHEATHED VALVES
Paul P. Johnson, Willoughby, Ohio, assignor to Thompson Products, Inc., a corporation of Ohio
Original application January 24, 1942, Serial No. 428,135. Divided and this application February 14, 1944, Serial No. 522,260
4 Claims. (Cl. 29—156.7)



2. The method of making a poppet valve having a head clad with heat and corrosion-resistant metal which comprises brazing a cap of heat and corrosion-resistant metal to the end face of a solid cylindrical metal billet, forging the billet to provide a cup-shaped hollow blank having an enlarged headed end covered with said cap, forging the resulting hollow cup-shaped blank into poppet valve body form with a hollow head portion covered with the cap metal and an elongated hollow stem portion depending from the head portion, and puddling heat and corrosion-resistant metal around the head portion to integrally unite the periphery of the cap metal with the body metal.

2,450,804
CATALYST CHAMBER CONSTRUCTION
John W. Loy, McLean, Va., assignor to Phillips Petroleum Company, a corporation of Delaware
Application December 9, 1943, Serial No. 513,593
5 Claims. (Cl. 23—288)



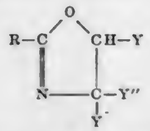
1. Catalytic apparatus for the conversion of fluids comprising a catalyst chamber, a plurality of foraminate concentric partitions in said chamber adapted to permit the arrangement of a plurality of concentric annular catalyst beds extending longitudinally within said chamber and spaced from each other and from the walls of the chamber, a perforate inlet conduit extending along the longitudinal axis within said chamber and coaxial with said concentric catalyst beds, means for introducing fluid to be converted into said inlet conduit whereby said fluid flows through the perforation therein and thence through each of said concentric catalyst beds transversely to the longitudinal axis thereof and into the space between the outermost catalyst bed and the chamber wall, means for introducing a fluid medium directly into the spaces between catalyst beds at a plurality of points spaced along the longitudinal axis of said spaces whereby said medium becomes ad-

mixed with fluid flowing transversely through said beds, means for regulating the flow of said fluid medium into said spaces whereby the temperature, pressure drop and contact time may be

regulated in each of said catalyst beds, and means for recovering converted fluid admixed with said fluid medium from the space surrounding the outermost catalyst bed.

2,450,805
ADJUSTABLE TIMING CONTROL
Marion Mallory, Detroit, Mich.
Application April 1, 1948, Serial No. 18,454
4 Claims. (Cl. 200—31)

3. In an internal combustion engine having a timer, a first member arcuately movable a limited distance with respect to a second member, connections from the members to the timer to advance the spark by the movement of the first member towards one limit and to retard the spark by movement of the member towards its other limit, means tending, with a force varied by changes in the operation of the engine, to turn the first member in one direction, and a tension spring tending to hold the first member at one limit of its travel against said force, pins in the two members in axial alinement when the first member is at the limit towards which the spring moves it, an arm mounted on the pin in the second member, and means to fix the arm in adjusted position about its pivot pin, one end of the spring being attached to the pin on the first member and the other being attached to the free end of the arm.



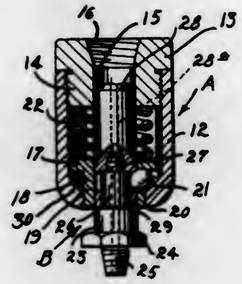
2,450,806
RUST PREVENTIVE CHROMIUM COMPOUNDS AND COMPOSITIONS CONTAINING THEM
Paul R. McCarthy, Allison Park, Pa., assignor to Gulf Research & Development Company, Pittsburgh, Pa., a corporation of Delaware
No Drawing. Application December 7, 1945, Serial No. 633,557
9 Claims. (Cl. 106—14)

2. A composition of matter adapted to prevent the corrosion of metal surfaces comprising about 25 to about 75 per cent by weight of the water-insoluble product obtained by heating 2-oleyl-4-methyl-4-hydroxymethyl-2-oxazoline with chromium trioxide at a temperature within the range of about 300° to about 500° F. and about 75 to about 25 per cent by weight of a light naphtha solvent.

8. A composition of matter adapted to prevent the corrosion of metal surfaces consisting of a light naphtha solvent, a water-insoluble soap and the water-insoluble product obtained by heating 2-oleyl-4-methyl-4-hydroxymethyl-2-oxazoline with chromium trioxide at a temperature within the range of about 300° to about 500° F.

2,450,807
RUST PREVENTIVE CHROMIUM COMPOUNDS AND COMPOSITIONS CONTAINING THEM
Paul R. McCarthy, Allison Park, Pa., assignor to Gulf Research & Development Company, Pittsburgh, Pa., a corporation of Delaware
No Drawing. Application July 16, 1946, Serial No. 683,991
15 Claims. (Cl. 106—14)

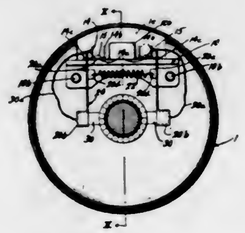
1. A chromium-containing product obtained by heating an oxazoline compound having the general formula



wherein R represents the hydrocarbon residue of an acid selected from the group consisting of higher fatty acids, naphthenic acids, and acids derived from the liquid phase partial oxidation of petroleum products, Y and Y' each represents a substituent selected from the group consisting of hydrogen and lower alkyl groups, and Y'' represents a substituent selected from the class consisting of hydrogen, lower alkyl groups, and lower hydroxyalkyl groups, with chromium trioxide at a temperature between about 100° C. and about 250° C.

8. A composition of matter adapted to prevent corrosion of metal surfaces, said composition consisting of from about 25 to about 75 per cent by weight of the product defined by claim 1 and from about 75 to about 25 per cent by weight of a petroleum distillate solvent for said product.

2,450,808
COUPLER FOR AIR LINES
Robert Theodore McElhose, Oakmont, Pa.
Application January 25, 1946, Serial No. 643,264
4 Claims. (Cl. 285—169)

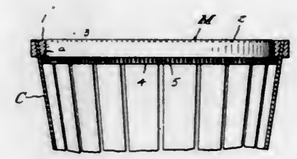


1. A female coupler unit for use in association with a coupler construction of the class described comprising a cylindrical shell, a fitting including a centrally apertured plug closing one end of said shell, the opposite end of said shell

being provided with an internal tapered seat defining a cavity, and a central opening to permit insertion and removal of a coacting male coupler unit, a ball cage comprising a sleeve slidable in said central opening, said sleeve having an outstanding flange, a coiled spring in said shell resting at one end against the flange and at the opposite end against said fitting, said sleeve having friction ball openings, and a plurality of friction balls mounted in said openings, to-

gether with a male coupler unit comprising a stem projecting into said shell by way of said flanged sleeve and then into the aforementioned fitting, said stem having a portion with which said balls coact, said reduced portion constituting a shoulder, and a collar surrounding said reduced portion and resting on said shoulder, said collar coacting with said balls for projecting and retracting same at predetermined periods of operation.

2,450,809
CONDENSER AND BRUSH MOUNTING FOR DYNAMOELECTRIC MACHINES
Joseph Nader, Glen Ellyn, Ill., assignor to Nader Engineering Company, Chicago, Ill., a corporation of Illinois
Application June 2, 1947, Serial No. 751,910
10 Claims. (Cl. 171—324)

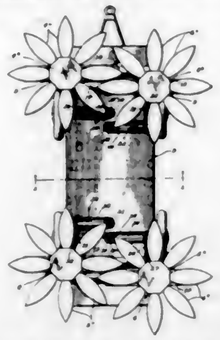


1. In a dynamoelectric machine having a frame and a commutator, a block of electrically insulating material adapted to be secured to the frame adjacent the commutator, spaced conducting means on said block for supporting a pair of brushes in cooperative relation with said commutator, a condenser integrally molded in said insulating block, and means for electrically connecting said condenser directly across said conducting means.

2,450,810
PROCESS FOR THE RECOVERY OF PROTEIN FROM PROTEINOUS MATERIALS
Anita V. Luisada Opper, New York, N. Y., and William P. ter Horst, Little Silver, N. J., assignors to Virginia Carolina Chemical Corporation, Richmond, Va., a corporation of Virginia
No Drawing. Application November 8, 1945, Serial No. 627,526
5 Claims. (Cl. 260—112)

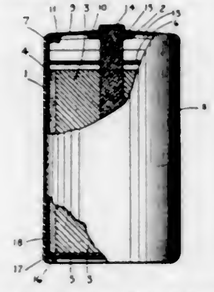
1. In the process for the recovery of protein from a naturally occurring protein containing material selected from the group consisting of soya beans and peanuts involving dissolving the protein content of such materials in aqueous alkaline solution, separating the solution from insoluble material and precipitating protein from the resulting solution by acidification, the step which consists in incorporating a water soluble urea compound selected from the group consisting of urea, thiourea and their mono substituted derivatives into the protein solution.

2,450,811
CLOSURE MEANS FOR CONTAINERS
Vernon E. Ramsey, Suffolk, Va.
Application November 21, 1944, Serial No. 564,459
1 Claim. (Cl. 217—124)



A receptacle and cover means therefor comprising a material receiving body having a circular filling opening, a rim secured within the filling opening having a straight inner face and an inwardly directed annular shoulder, a flat circular body adapted to position within said rim and having a continuing relatively wide encircling straight flange of a width materially greater than said rim and extending perpendicularly to the body, the overall diameter of the body being substantially equal to the inside diameter of the rim whereby the flange is snugly inserted in the rim and lies against the said straight inner face thereof, and a continuous transversely fluted flexible band encircling and secured to the outside of the flange adjacent to the free edge thereof, said band being of a width materially less than the width of the flange and adapted to engage against said shoulder when the flange is extended to a predetermined extent into the rim, the said band being contractible to facilitate its extension through the rim and upon expansion beneath the rim acting to press the flange against the face of the rim.

2,450,812
FRUIT PICKER
Clinton D. Ray, Mesa, Ariz.
Application November 19, 1945, Serial No. 629,400
11 Claims. (Cl. 304—9)

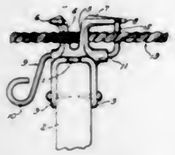


1. A staging comprising a mobile platform and a revolvable work pedestal mounted thereon and embodying a circular series of equi-distantly

spaced surface extensions adapted to be disposed among the branches of a tree and to co-act there-

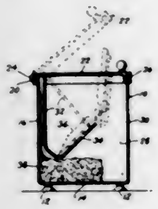
with to cause the pedestal to revolve as the staging travels alongside of the trees.

2,450,813
LEAKPROOF DRY CELL
Otto K. Reinhardt and Thomas F. Fallon, New Haven, Conn., assignors to Olin Industries, Inc.
Application July 31, 1945, Serial No. 608,030
2 Claims. (Cl. 136—133)



1. A leakproof cell comprising a zinc can forming an outer electrode, a carbon electrode arranged in the can and projecting slightly therefrom, a preformed jacket of insulating material surrounding the zinc can, the jacket being in the form of a cup with its closed end forming the cell closure, the upper edge of the zinc can being curved inwardly, the edge of the jacket being secured to the bottom of the cell adjacent its outer edge, a central circular bead in the closed end of said jacket, a contact cap arranged in the said bead and adapted to receive the end of the carbon electrode, and a second bead formed in the closed end of the jacket forming a groove between the bead and the wall of the jacket for the reception of the curved edge of the zinc can.

2,450,814
PROCESSES OF MAKING CHEESE
Zola D. Roundy and Havard L. Keil, Clarendon Hills, Ill., assignors to Armour and Company, Chicago, Ill., a corporation of Illinois
No Drawing. Application March 1, 1943, Serial No. 477,634
11 Claims. (Cl. 99—116)

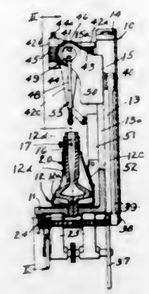


1. In a process for preparing a cheese product in which proteolytic enzymes are utilized to develop cheese body characteristics, the step of incorporating into the milk material a proteolytic enzyme substance which is potentially active but which is in an unactive state.

2,450,815
LINE ANCHOR
William O. Schultz, South Milwaukee, Wis.
Application January 20, 1947, Serial No. 723,179
5 Claims. (Cl. 24—132)

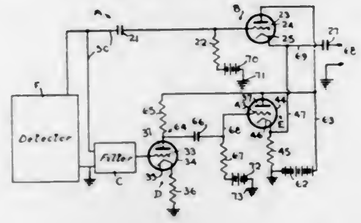
1. A line anchoring attachment comprising a base adapted for mounting on a support, a pair of relatively spaced lugs each having an extension substantially normal thereto, and a bight forming lever pivotally carried by said base for movement to a position transversely relative to and contacting the extension on one of said lugs.

2,450,816
STERILIZER
Raymon W. Snider, Cheyenne, Wyo.
Application March 9, 1944, Serial No. 525,728
1 Claim. (Cl. 21—82)



A sterilizer of the type described, comprising a container for a sterilizing medium having an open upper end, a cover hinged to said container for closing the open upper end, an article supporting shelf rigidly secured to the lower face of the cover adjacent the hinge and extending at right angles thereto and a portion extending at an acute angle thereto whereby an article placed thereon will when the cover is opened be positioned vertically with relation to said container whereby said article can be removed therefrom without contact with the shelf.

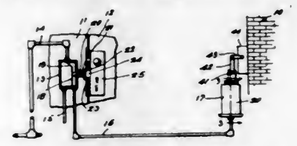
2,450,817
PROCESS FOR REMOVAL OF ANNULAR SCRATCHES IN HOLLOW POPPET VALVE STEMS
James G. Sterling, Cleveland Heights, Ohio, assignor to Thompson Products, Inc., a corporation of Ohio
Application March 6, 1944, Serial No. 525,274
7 Claims. (Cl. 29—76)



1. The method of finishing the hole-defining wall of a hollow poppet valve stem including a portion of sharply varying diameter which comprises resiliently feeding a file longitudinally along and against one side of said wall under a controlled pressure for determining the depth of cut to be taken from said wall, guiding the file on the opposite side of said wall to constrain the file

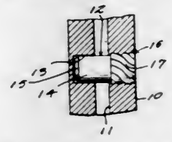
for following the hole, reciprocating the file relative to the valve for removal of metal from said

wall and allowing radial expansion of said file to cut said portion of sharply varying diameter.



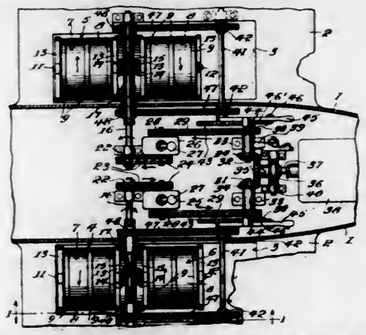
2,450,818
ELECTRONIC NOISE ELIMINATOR
Raymond K. Vermillion, St. Petersburg, Fla.
Application August 26, 1944, Serial No. 551,377
12 Claims. (Cl. 250—20)

1. In an electronic noise interference eliminator, adapted to be disposed in a radio receiving circuit to follow a detector in said circuit, means for receiving wanted signal impulses and noise interference from a detector, said means including a vacuum tube, having a cathode; high pass filter means for receiving and separating wanted signal impulses and noise signal impulses, having frequencies higher than the highest desired signal frequency, from the detector and passing frequencies above the wanted signal impulses; phase inverting stage means for receiving said frequencies and inverting the wave form, including a second vacuum tube; a biasing resistor for said last named tube and plate load resistor means across which said inverted wave form is developed, means for receiving said inverted wave form, including a third vacuum tube, having a cathode, means electrically connecting together the cathodes of said first and third named tubes so that they are at substantially the same operating potentials at all times, and an electrical resistor, common to the cathode circuits of said first and third tubes.



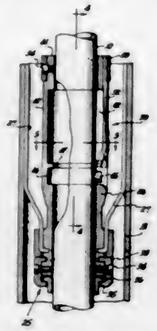
2,450,819
LOCK CONTROLLED SWITCH
Charles Michael Whelan, Altadena, Calif., assignor of one-half to Alma E. Whelan, Altadena, Calif.
Application October 2, 1944, Serial No. 556,773
10 Claims. (Cl. 200—55)

1. An apparatus for actuating a circuit breaker comprising a door, a frame supporting said door, a bolt operatively associated with said door and frame, a circuit breaker remote from said frame, fluid actuated means for selectively opening and



closing said circuit breaker and means actuated by said bolt for actuating said opening and closing means.

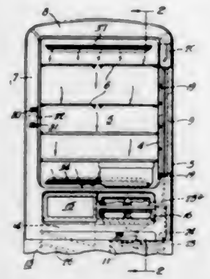
2,450,820
BEDRAIL PIN
Edward J. Wilcox, Lakewood, N. Y.
Application May 24, 1945, Serial No. 595,643
1 Claim. (Cl. 85—10)



A bed rail pin comprising a solid shank member having a smooth surface, a fluted head at one end of said shank, said shank being of a longitudinally tapered configuration converging at the adjacent end of said head, the root diameter of said fluted head being substantially equal to the diameter of the convergent end of said shank, and a bevelled edge on the opposite enlarged end of said shank.

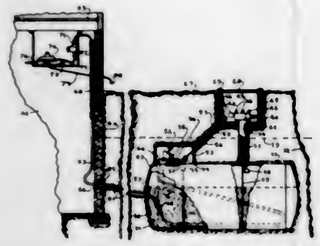
2,450,821
TILTING BALANCED DUPLEX PROPELLER
Arthur B. Zimmerman, Los Angeles, Calif.
Application August 2, 1945, Serial No. 608,505
4 Claims. (Cl. 244—12)

1. In an airship having a fuselage and wings, tubular housings positioned at the sides of the fuselage, means pivotally mounting said tubular housings on opposite sides of the fuselage at points intermediate of the lengths of the housings, sleeves having spirally positioned vanes therein providing double screw propellers positioned in the said housings, means rotatably mounting the sleeves in the housings, a motor positioned in the fuselage, means operatively connecting the sleeves to the motor for rotation of said sleeves, and means tilting the said tubular housings with the propellers therein from the interior of the fuselage.



2,450,822
LOCK DEVICE FOR WELL TOOLS
Aaron A. Baker, Coalinga, Calif., assignor to Baker Oil Tools, Inc., Vernon, Calif., a corporation of California
Application April 15, 1944, Serial No. 531,237
5 Claims. (Cl. 166—12)

1. A tool for use in a well bore and having relatively movable parts, means for controlling movement of said parts with respect to one another, including a first member having a generally horizontal slot with an opening into said slot and connected to one of said parts, a second member having a pin and connected to another of said parts, said members being movable relative to one another to position said pin in said slot to lock said parts together against relative longitudinal movement, said members also being movable relative to one another to move said pin through said opening out of said slot to unlock said parts and allow their relative longitudinal movement, said members being further movable relative to one another to locate said pin out of said slot in a position lying in the same horizontal plane as said slot, and means comprising a latch engageable with said pin when in said last-mentioned position to prevent substantial longitudinal movement between said members in order to hold said parts locked together, said last-mentioned means being constructed and arranged to confine said pin in said last-mentioned position to prevent its removal therefrom and return movement into said slot regardless of the direction of movement of said second member.

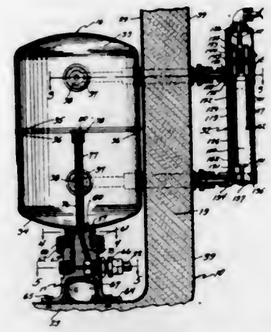


2,450,823
HUMIDITY CONTROL MEANS RESPONSIVE TO MOVEMENTS OF A REFRIGERATOR DOOR
John J. Bauman, Abington, Pa., assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa., a corporation of Pennsylvania
Application June 30, 1944, Serial No. 542,888
5 Claims. (Cl. 62—6)

1. In refrigerating apparatus comprising a refrigerated space, a door affording access to said space, means actuated by movements of the door to closed position for regulating humidity within said space, and a timing device for limiting maximum duration of operation of the regulating means between successive actuations, said device being adjustable to varying extents affording correspondingly varying time increments for continuous operation of said regulating means, and means actuated by the door in closing for adjusting said device to a predetermined normal extent for each said closing, said means being responsive to a predeterminedly short lapse of time between successive door closings to adjust said device to

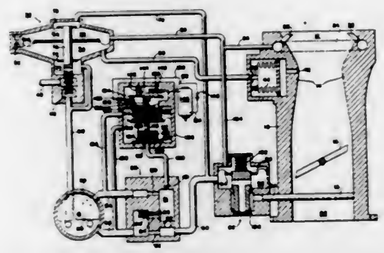
an extent exceeding said normal and affording a correspondingly extended period of continuous operation of said regulating means.

2,450,824
LIQUEFIED GAS DISPENSING APPARATUS
William C. Buttner, Winnetka, Ill., assignor to The Bastian-Blessing Co., Chicago, Ill., a corporation of Illinois
Application June 25, 1941, Serial No. 399,715
15 Claims. (Cl. 62—1)



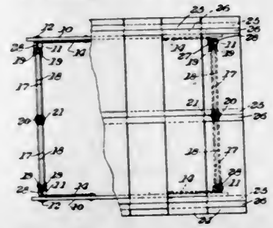
6. In a liquefied petroleum gas system having a subterranean storage tank receiving heat from the ground, a delivery conduit communicating with the tank and extending to a point of use, and comprising a dip tube for withdrawing fuel from the tank in its liquid phase, a pressure reducing regulator in contact with the tank, and a second pressure regulator reducing the gas to a usable pressure at said point of use.

2,450,825
CARBONATED WATER DISPENSER
William C. Buttner, Winnetka, and Harlow E. Allshouse, Chicago, Ill., assignors to The Bastian-Blessing Co., Chicago, Ill., a corporation of Illinois
Application January 17, 1944, Serial No. 518,528
1 Claim. (Cl. 261—115)



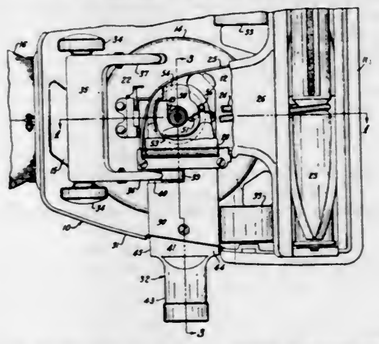
In a carbonated water dispensing device, a cabinet having a cooling chamber therein whose temperature is below 60° F., a container disposed in said chamber and connected to a source of CO_2 under pressure, a gauge glass connected to said container and disposed outside of said chamber; means for supplying the container with water under pressure including a pump, a water level responsive device disposed in said gauge glass, and a spray nozzle connected to the outlet

of the pump, said nozzle being located in said container above the maximum water level in the



container determined by said water level responsive device.

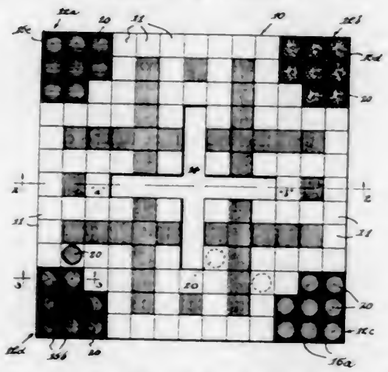
2,450,826
CONTROL APPARATUS FOR INTERNAL-COMBUSTION ENGINES
Milton E. Chandler, New Britain, Conn., assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn., a corporation of New Jersey
Application November 16, 1946, Serial No. 710,295
11 Claims. (Cl. 123—119)



1. Control apparatus for an internal combustion engine, comprising a conduit for fuel flowing to said engine, a metering orifice in said conduit, means for regulating the pressure differential across said orifice to control the rate of flow of fuel therethru, valve means connected in parallel with said orifice for controlling the relationship between said fuel pressure differential and said rate of flow, said valve means having an intermediate range of positions in which it is closed and end ranges in which it is open, ignition timing control means having a normal timing positon and an advanced timing position, electrical means for operating said ignition timing control means including switch means, said switch means having an intermediate range of positions in which said switch means operates to cause movement of said ignition timing control means to advanced position and end ranges in which said switch means operates to cause movement of said ignition timing control means to normal position, and operating means for said valve means and said switch means including a single diaphragm subject to said fuel pressure differential and effective to simultaneously move said valve means and said switch means between their respective end ranges and their respective intermediate ranges.

2,450,827
FOLDING TABLE
Martin L. Clare, Appollo, Pa.; Mabel Kuhlman Clare, executrix of said Martin L. Clare, deceased, assignor to Mabel Kuhlman Clare
Application June 29, 1944, Serial No. 542,675
4 Claims. (Cl. 311—79)

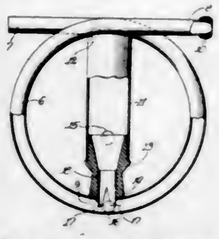
1. In a supporting structure for a removable table top, the combination of a pair of parallel side plates upon which the top is supported when the table is extended for use, a leg pivotally attached at its upper end to the inner face of each side plate and adjacent to each end of the latter and spaced therefrom to provide clearance for other parts, said leg being arranged to swing in a plane parallel to the plane of the side plate, toggle lever mechanism attached to the outer side of each leg and the inner face of the corresponding side plate and arranged when extended to lock the leg in its extended position relative to the side plate but when collapsed to permit the leg to be folded parallel to the inner face of the side plate, the folded toggle lever mechanism being received between the folded leg and the side plate, a set of oppositely disposed brackets on each pair of legs, and toggle lever mechanism connecting the brackets of the pair of legs at each end of the side plates which when extended lock the side plates and legs in their spaced and extended position and when collapsed permits the same to be brought into close relation and the legs to be folded up and contained between the side plates with the oppositely disposed brackets in overlapped relation, said last mentioned toggle mechanism when folded being contained between folded pairs of legs.



2,450,828
CONVERTER FOR SUCTION CLEANERS
Dale C. Gerber, North Canton, Ohio, assignor to The Hoover Company, North Canton, Ohio, a corporation of Ohio
Application May 12, 1943, Serial No. 486,632
8 Claims. (Cl. 15—16)

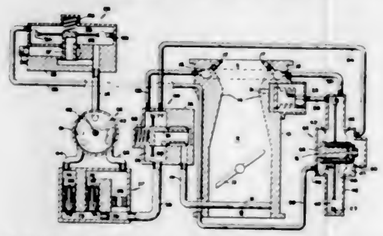
1. In a suction cleaner, a cleaner body having a nozzle, a fan chamber having a fan eye, a suc-

tion air passageway between said nozzle and fan eye, a fan in said fan chamber, a shaft extending through said fan eye into said air passageway, a motor for driving said fan and shaft, means defining a port in said air passageway adjacent said fan eye for receiving a converter element, a converter element insertable through said port into register with said fan eye, means defining a slot on said converter element passing transversely of said shaft, and a valve pivoted intermediate its ends on said converter element, said valve having one portion engageable with said shaft for moving said valve to uncover said slot, and another portion engageable with said shaft for moving said valve to close said slot and seal said nozzle from said fan chamber.



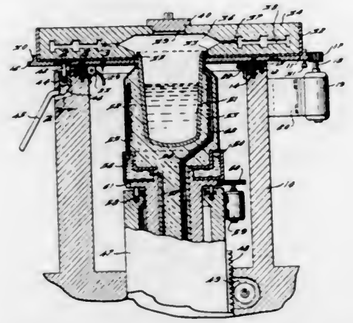
2,450,829
CHECKERED GAME BOARD
Charles Haven Hayes, Dearborn, Mich.
Application November 23, 1945, Serial No. 630,305
1 Claim. (Cl. 273—131)

A game board for use with two or more sets of several men each, each set of different colors, said game board having its surface divided into squares and having groups of several of said squares in two or more opposite corners of said board of an indicated separation from the other squares thereon, one of said squares in each of said group of squares being designated as a goal, and an elimination zone in an intermediate portion of said game board and bounded on all sides by a plurality of squares, any of said men being retired from play when required to jump a man positioned in a square adjacent said elimination zone, said squares spaced from said elimination zone by a single square being differently colored to indicate danger since men positioned in such squares may be forced to jump a man in adjacent squares and thence into said elimination zone.



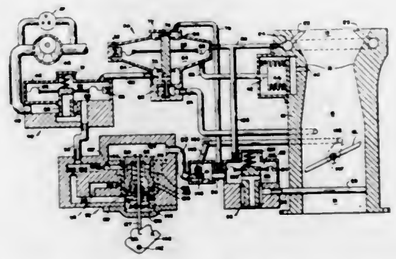
2,450,830
PEA SHOOTER
Edwin W. Helberg, Chicago, and Vernon C. Helberg, Evergreen Park, Ill.
Application September 26, 1945, Serial No. 618,658
5 Claims. (Cl. 124—12)

4. A pea shooter comprising an open ended tube coiled into a single convolution with its ends projecting in opposite directions at the top of the convolution and provided in the inner wall of the lower portion of the coil with an opening, a magazine extending diametrically within the coil and engaged at its ends therewith to frictionally hold the magazine against displacement, said magazine communicating with the interior of the coil through said opening and said magazine being



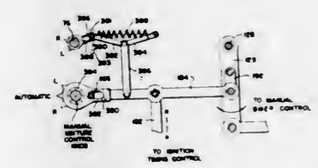
provided with an opening through a side wall thereof for the loading of missiles into the magazine.

2,450,831
CARBURETOR
Scott F. Hunt, Meriden, Conn., assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn., a corporation of New Jersey
Application August 11, 1943, Serial No. 498,151
7 Claims. (Cl. 261—41)



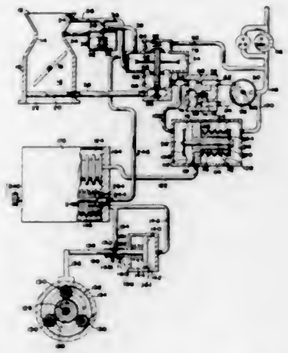
1. A fuel supply system for an internal combustion engine, comprising a first main conduit for conveying combustion air to said engine, a second main conduit for conveying fuel to said engine, first and second parallel branch conduits connected in series with said second main conduit, a mixture control valve located at a junction of said parallel branch conduits and said second main conduit, said mixture control valve being movable between a first position wherein only said first parallel branch conduit is opened to the flow of fuel and a second position wherein both of said parallel branch conduits are opened to the flow of fuel, first and second fixed metering restrictions in said first and second parallel branch conduits, respectively, means responsive to the rate of flow of air thru said first main conduit for regulating the fuel pressure differential across said restrictions to control the rate of flow of fuel therethru, said pressure differential regulating means, said restrictions and said mixture control valve cooperating when said mixture control valve is in said first position to maintain a first predetermined fuel-to-air ratio and when said mixture control valve is in said second position to maintain a second predetermined fuel-to-air ratio greater than said first ratio, first and second enrichment valves connected in parallel with said first and second restrictions, respectively, each said enrichment valve being acted upon in an opening sense by said fuel pressure differential, and first and second springs associated with said first and second enrichment valves, respectively, to bias said valves toward closed position, said first spring being stronger than said second spring, said valves and springs cooperating with said pressure differential regulating means to increase the fuel-to-air ratio above said first predetermined value at a first fuel pressure differential value when said mixture control valve is in said first position and to increase the fuel-to-air ratio above said second predetermined value at a second lower fuel pressure differential value when said mixture control valve is in said second position.

2,450,832
CENTRIFUGAL CASTING
Theodore C. Kuhlman, Detroit, Mich.
Application July 5, 1943, Serial No. 493,495
11 Claims. (Cl. 22—65)



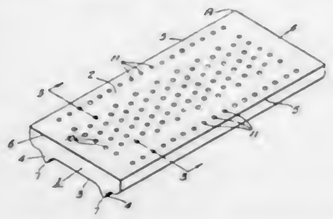
1. In a machine for centrifugally casting metal, a rotatable platform adapted to support a mold flask; a central opening in said platform; a rotatable crucible assembly including a crucible adapted to extend into said opening, and means for rotating said platform and said assembly at varying relative speeds.

2,450,833
CHARGE FORMING DEVICE
Leighton Lee, II, Meriden, Conn., assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn., a corporation of New Jersey
Application November 16, 1943, Serial No. 510,454
20 Claims. (Cl. 261—41)



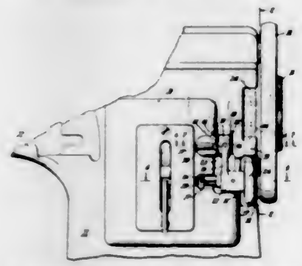
11. A fuel supply system for an internal combustion engine, including a conduit for fuel flowing toward said engine, a plurality of parallel metering restrictions in said conduit, means for controlling the fuel pressure differential across said restrictions to regulate the fuel flow therethru, a first valve for controlling the flow thru one of said restrictions in accordance with said fuel pressure differential, spring means biasing said valve to closed position, a second valve for controlling the flow thru another of said restrictions, means for varying the valve closing force of said spring means, a manual operator for said force varying means movable between a first position wherein the force of said spring means is set at a first predetermined value, and a second position wherein the force of said spring is set at a second predetermined value lower than said first value, and spring means flexibly connecting said operator and said second valve and effective to influence said second valve in an opening sense when said operator is moved to its second position.

2,450,834
CONTROL APPARATUS FOR INTERNAL-COMBUSTION ENGINES
Leighton Lee, II, West Hartford, Conn., assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn., a corporation of New Jersey
Original application November 9, 1944, Serial No. 562,715. Divided and this application December 6, 1945, Serial No. 633,168
4 Claims. (Cl. 123—117)



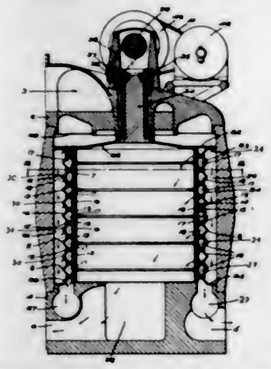
1. Control apparatus for an internal combustion engine, comprising ignition timing control means including a member movable between a first position corresponding to advanced ignition timing and a second position corresponding to retarded ignition timing, mixture control means including a member manually movable between a first position indicative of a rich fuel and air mixture and a second position indicative of a lean fuel and air mixture, a direct connection between said manually movable member and said ignition timing control member to move the latter positively toward said advanced position as said manually movable member moves to said lean position and to move said ignition timing control member positively toward said retarded position as said manually movable member is moved to said rich position, means for controlling the brake mean effective pressure of said engine including a manual control element, governor means for controlling the speed of said engine to maintain said speed at a selected value, selector means associated with said governor means for varying said selected value, said selector means being operable in all positions of said manual control element, means responsive to said selector means and to the position of said element for controlling the power output of said engine to maintain a value of brake mean effective pressure determined by the position of said element and unaffected by variations in said selected speed, and a connection between said control element and said ignition timing control member for operating said control member to advance the ignition timing when the brake mean effective pressure is in an intermediate range of values and to retard said ignition timing when said brake mean effective pressure has either a high or a low value.

2,450,835
INDICATING APPARATUS
Leighton Lee, II, Rocky Hill, Conn., assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn., a corporation of New Jersey
Application March 16, 1946, Serial No. 654,979
28 Claims. (Cl. 123—119)



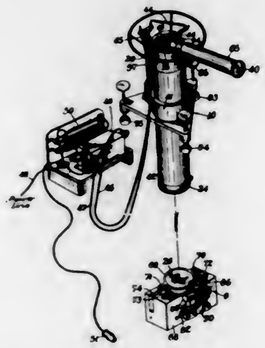
27. In a fuel supply system for an internal combustion engine, the combination of a main fuel conduit including a jet means, two chambers connected with the main fuel conduit at the respective sides of the jet means, each chamber having a movable wall and the two walls being so positioned that the pressures in the respective chambers tend to move them in opposite directions, means for connecting the two movable walls for movement in unison in response to the differential between the pressures in the two chambers, a bellows positioned between the two movable walls and movable by one of them in the collapsing direction, and a conduit connected with the interior of the bellows and adapted to transmit fluid pressure to a pressure responsive means.

2,450,836
HEARTH TILE
Sylvan N. Levy and William B. Levy, Wilmington, Del.
Application November 20, 1945, Serial No. 629,786
3 Claims. (Cl. 263—47)



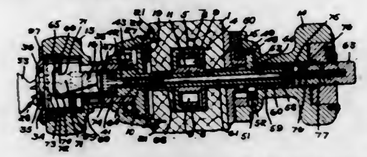
3. A hearth tile for metal treating furnaces, comprising a substantially rectangular slab of refractory material, a pair of longitudinal ribs of V-shaped cross-section projecting downwardly from the bottom surface of the slab and extending the full length thereof in substantially parallel inwardly spaced relation to the opposite longitudinal edges respectively of the slab, a multiplicity of parallel transversely extending rows of relatively staggered perforations extending completely through said slab and distributed substantially uniformly over the portion of the area of the slab lying between said ribs, and a row of perforations extending completely through the slab in the areas thereof lying between said ribs and said longitudinal edges of the slab.

2,450,837
BOBBIN WINDER FOR SEWING MACHINES
Leonard C. Marsac, Cranford, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a corporation of New Jersey
Application April 23, 1947, Serial No. 743,244
9 Claims. (Cl. 112—218)



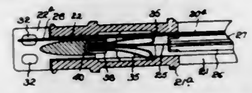
1. In a sewing machine having a bracket-arm standard and a balance wheel rotatably supported by said standard; a bobbin winder comprising a pivot-pin supported by said standard, a bobbin-winder carrier arm pivoted on said pin, a cam washer locked against rotative movement with respect to said standard, a second cam washer mounted adjacent said first cam washer and locked to rotate with the pivotal movement of said arm, and a spring arranged to force said washers together.

2,450,838
PAPER PULP SCREEN
Wilfred F. Mathewson, Weymouth, Mass.
Application January 26, 1945, Serial No. 574,769
13 Claims. (Cl. 92—35)



12. A pulp screen comprising a casing having an inlet and a screened pulp outlet, pulp-screening means within the casing comprising two opposed parallel walls separated from each other by a clearance space which is substantially coextensive with said walls and which is of sufficient size for the acceptable portion of unscreened paper pulp stock to pass therethrough but is insufficient in size for the unacceptable portion of such pulp stock to pass therethrough, one of said walls having therein a plurality of inlet pockets, all of which communicate with the clearance space, and also having therein a plurality of discharge pockets, all of which communicate with the clearance space, said inlet pockets and outlet pockets having communication with each other through said clearance space, means other than the clearance space for delivering unscreened pulp to the inlet pockets, means other than the clearance space providing communication between the discharge pockets and the screened pulp outlet, and means to give the two opposed walls a relative movement without varying the dimensions of said clearance space.

2,450,839
INTERFEROMETRIC COMPARATOR
George E. Merritt, Elmira, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application August 16, 1944, Serial No. 549,709
11 Claims. (Cl. 33—143)

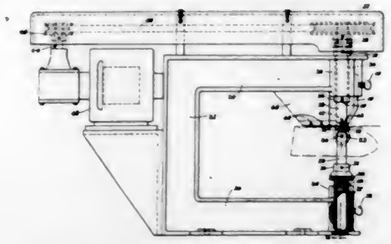


4. In an interferometric comparator a source of monochromatic light, a condensing lens forming a beam of parallel rays from said light source, a light transmitting optical flat which is slightly wedge-shaped in cross-section, arranged in the path of said beam with its emergent surface substantially normal thereto, a second optical flat located in the path of said beam spaced in substantially parallel relation to said emergent surface, said light transmitting optical flat being disposed between said light source and the second optical flat, whereby light reflected from the substantially parallel surfaces forms an interference pattern; a tilting mount for one of said flats including a pair of flexible plates rigidly affixed to the flats in alignment to form a spring hinge, gauge jaw members rigidly connected to the flats laterally with respect to the hinge, whereby introduction of an element to be gauged between said jaw members causes relative angular displacement of the flats, the axis of said hinge being slightly offset from the center line of the flats in a direction away from the gauge jaws, optical means for observing the interference pattern caused by said displacement, and means for mounting said observing means with provisions for universal adjustment with respect to the optical flats.

2,450,840
DOOR LOCK
Joseph H. Milligan, Framingham, Mass.
Application January 8, 1946, Serial No. 639,792
11 Claims. (Cl. 70—216)

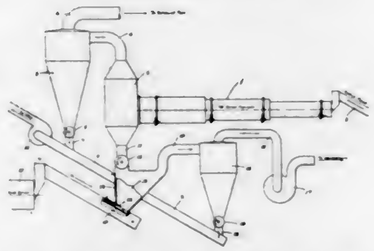
1. A door lock comprising a knob-supporting member stationarily secured to the outside of the door and projecting outwardly therefrom, an outer knob mounted on said knob-supporting member for turning movement, a lock located within the knob-supporting member and comprising a rotary member connected to the outer knob for simultaneous rotation therewith and means to lock the rotary member to the knob-supporting member, a spindle extending through the door and provided with means to withdraw the door latch as the spindle is turned, an inner knob mounted on and connected to the spindle, a normally disengaged clutch device for coupling said rotary member and thereby the outer knob to the spindle, and key-actuated means to both unlock said rotary member, and thereby the outer knob, from the knob-supporting member and to render the clutch device operative to clutch the rotary member, and thereby the outer knob, to the spindle.

2,450,841
SENSITIZED-MATERIAL HOLDER FOR PHOTOGRAPHIC CAMERAS
Milford B. Moore, Brighton, N. Y., assignor to Graflex, Inc., Rochester, N. Y., a corporation of Delaware
Application December 21, 1946, Serial No. 717,690
12 Claims. (Cl. 95—67)



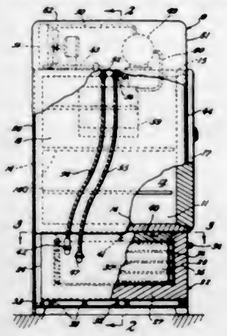
1. A separator assembly for a sensitized-material photographic holder comprising a separator plate **25** having a light valve or seal consisting of material sharply bent along a median transverse line into inverted V-shape at the upper end of said separator plate and with the two opposite depending portions of said light valve or seal extending down a short distance at the two faces of the separator plate to establish a light-seal with respect to the dark slides when the latter are in position in said holder, and with respect to the body of the holder when the dark slides are removed, said separator plate having a film receiving septum plate secured to each face thereof.

2,450,842
EDGE TRIMMING MACHINE
Forrest F. Murray, Brockton, Mass., assignor to Forrest F. Murray and Harry R. Murray, a copartnership doing business as Murray Manufacturing Co., Avon, Mass.
Application January 24, 1948, Serial No. 4,191
8 Claims. (Cl. 12—1)



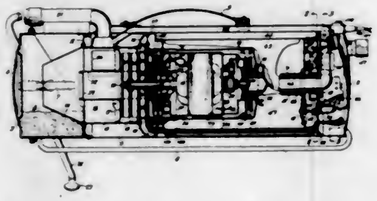
1. A machine for trimming the projecting margins of two side-by-side stitched together sheets of flexible material of a piece of work comprising

a support having a narrow edge to extend between and support the sheets adjacent the line of stitching, a pair of oppositely disposed feed rolls positioned to engage the outer faces of the work and feed the work over the support parallel to the



line of stitching, a knife mounted with its cutting edge extending transversely the line of feed, and means for rotating the feed rolls to force the margins against, and cause the edge portions thereof to be trimmed off by, the knife at a predetermined distance from the line of stitching.

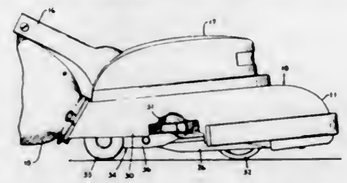
2,450,843
DEHYDRATING SYSTEM
Arthur G. Sherman, Tracy, Calif.
Application October 6, 1945, Serial No. 620,786
2 Claims. (Cl. 34—57)



1. A dehydrating mechanism for leaf crop material, comprising a substantially horizontally disposed first dehydrating cylinder, a vertically disposed wind box forming a first separating chamber, the dehydrating cylinder discharging into said wind box at right angles thereto, suction means connected with and operative to maintain a suction against the top of the wind box and providing a suction of sufficient strength to remove the leaves from the crop material but insufficient to remove the stems whereby the latter may fall by gravity toward the bottom of the wind box, a second wind box disposed below the first wind box and in vertical alinement therewith and forming a second separating chamber, means to discharge the stems from the first wind box vertically downward and into the second wind box whereby they will fall by gravity to the bottom of said second wind box, suction means connected with and operative to maintain a suction through one side of the second wind box and at right angles to material falling vertically through such wind box and providing a suction of sufficient strength to remove leaves from the falling material but insufficient to remove the stems, conveyor means at the lower end of the second wind box onto which the stems discharge, a second dehydrating chamber, the conveyor delivering into said second dehydrating chamber.

2,450,844
REFRIGERATOR PROVIDED WITH A REFRIGERATED DRAWER
Fred W. Stuart, Cincinnati, Ohio
Application December 13, 1944, Serial No. 567,979
16 Claims. (Cl. 62—116)

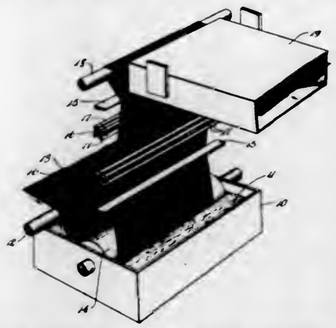
1. In a device of the class described the combination of a refrigerating unit, a sliding compartment disposed in vertical, spaced relationship with the unit, a refrigerant evaporator in the compartment, a direct refrigerant expansion means affixed to the compartment and connected to the evaporator, and refrigerant transmitting means between the unit and the evaporator for permitting sliding movement of the compartment.



2,450,845
SUCTION CLEANER
Charles G. Troxler and George P. Daiger, Canton, Ohio, assignors to The Hoover Company, North Canton, Ohio, a corporation of Ohio
Application March 23, 1944, Serial No. 527,690
8 Claims. (Cl. 183—57)

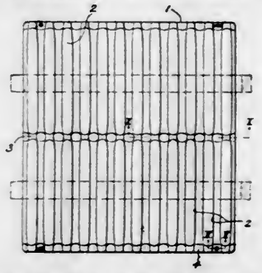
5. In a suction cleaner of the type having an initial dirt separator, a suction-creating fan unit to draw air into and through said initial separator, and a final dirt separator to receive air exhausted from said fan unit and including an air permeable filter element; a two speed motor to drive said fan unit including a rotor and a stator, said rotor being connected to said fan unit in driving relationship, means mounting said stator for rotation, locking means normally retaining said stator against rotation, coiled spring conductors connecting said stator to a source of current and positioned as to be wound by the rotation of said stator in a direction opposite to the direction of rotor rotation, said springs exerting a torque on said stator which is greater than the torque exerted thereby in the slow speed rotation of said rotor but which is less than the torque exerted thereby in the high speed rotation of said rotor, a filter-cleaning nozzle connected to said stator and movable thereby relative to said filter to remove foreign

material therefrom, first means to increase the speed of said rotor, second means to release said locking means to permit said stator and nozzle to rotate, third means to connect said nozzle to said initial dirt separator, fourth means to reduce the speed of said rotor upon said stator traveling through a predetermined arc of rotation whereby said coiled spring conductors are enabled to rotate said stator in the opposite direction toward its original starting position, and pressure-operated means controlled by the pressure in said final dirt separator to actuate said first, second and third means in the presence of a predetermined pressure in said final dirt separator.



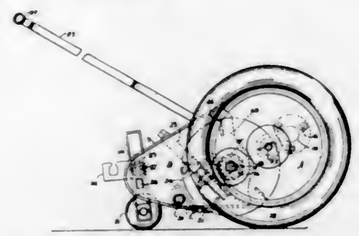
2,450,846
CONVERTER FOR SUCTION CLEANERS
Harry B. White, Canton, Ohio, assignor to The Hoover Company, North Canton, Ohio, a corporation of Ohio
Application May 12, 1943, Serial No. 486,634
6 Claims. (Cl. 15—16)

3. In a suction cleaner, a cleaner body having a nozzle, suction creating means, a suction air passageway between said nozzle and suction creating means, power means for driving said suction creating means extending into said air passageway, means forming a port in said passageway for receiving a converter element, a converter element insertable in said port into said passageway, means forming a slot in said converter element for receiving said power means, and a valve movably mounted on said converter element to enclose said power means and close said slot, and means engageable with said cleaner during insertion of said converter to move said valve to open position to receive said power means, and resilient means to close said valve to seal said nozzle from said suction creating means and connect the latter to said converter element.



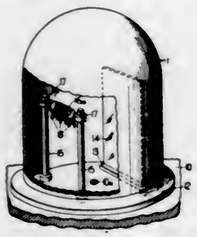
2,450,847
APPARATUS FOR TREATING RUBBER-REINFORCING CORD FABRIC
Matthew W. Wilson, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a corporation of New York
Application September 22, 1944, Serial No. 555,362
1 Claim. (Cl. 91—32)

Apparatus for treating weftless cord fabric preparatory to its incorporation in a body of rubbery material, said apparatus comprising in combination means for directing a weftless cord fabric composed of a plurality of individual cords of textile material in spaced-apart parallel relation along a predetermined path, means including a tank disposed along said path for applying adhesive liquid capable of being dried to solid form to said fabric as it progresses through said tank, guiding and tensioning means disposed generally above said tank for establishing an upwardly directed reach of the said fabric and for placing the individual cords thereof under tension in said reach, means located along said reach for removing from said fabric a portion of the applied adhesive liquid before drying thereof, without disturbing the spaced-apart parallel relation of the individual cords, said means consisting of a beater disposed along one face of said reach and another beater disposed generally above said first beater and along the opposite face of said reach, each of said beaters including a rapidly rotatable member disposed with its axis of rotation parallel to the plane of said reach and a plurality of projecting edges disposed longitudinally of the said member and adapted intermittently and vigorously to engage the tensioned cords of said fabric deflecting the said



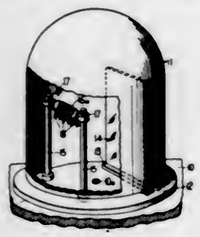
cords from their normal path and inducing vibrations therein sufficient to remove from the said fabric a portion of the said adhesive liquid from the individual cords thereof and substantially all of the said adhesive liquid from the interstices thereof, and heating means disposed further along said path and beyond the aforesaid beaters for drying the said fabric bearing the remaining adhesive liquid to produce a treated weftless cord fabric in which the individual cords possess a uniformly thin coating of solid adhesive but substantially retain their spaced-apart parallel relation.

PALLET
2,450,848
Paul M. Wisberger, Akron, Ohio, assignor to Goodyear Aircraft Corporation, Akron, Ohio, a corporation of Delaware
Application May 11, 1945, Serial No. 593,269
9 Claims. (Cl. 248—120)



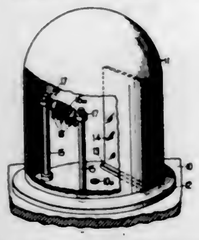
1. A pallet made of sheet material comprising two identical supporting plates being uniformly corrugated in one direction and being bent along the center transverse to said corrugations to a groove deeper than said corrugations, as well as along the edges parallel to said groove, the bottom of the groove and of said edges being in contact with each other, and detachable connecting means for holding said plates together irremovably secured to said edges.

2,450,849
LAWN MOWER
J. A. Edwin Carlson, Racine, Wis., assignor to Jacobsen Manufacturing Company, Racine, Wis.
Application July 20, 1944, Serial No. 545,761
3 Claims. (Cl. 56—249)



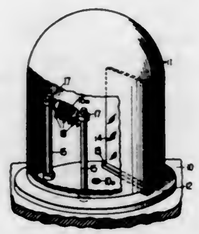
1. In a push type lawn mower, the combination of spaced end frame members having a pair of carrying wheels, rotatably mounted on the forward end thereof, a carrying member rotatably mounted on the rear ends of the frame, a pair of rearwardly extending guiding handles secured to said end frame members, a brace between the forward ends of said end members and a blade assembly secured to the rear ends thereof a distance forward therefrom and being turnably adjustably secured to the frame members, said carrying wheels having internal gears mounted on their inner sides, a blade carrying rotor rotatably mounted on said end frame members, its shaft ends protruding therethrough and having mounted thereon pinions adapted to engage the teeth of said gears, said end frame members being formed from flat stock and having outwardly extending continuous flanges on their edges which partially surround said gears, other flanges secured to said end members adapted to surround the remainder of the gears.

2,450,850
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,696
16 Claims. (Cl. 117—107)



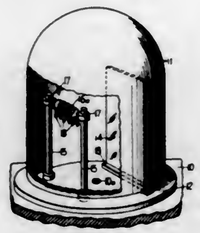
1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with a metal of the calcium family which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,851
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,697
14 Claims. (Cl. 117—107)



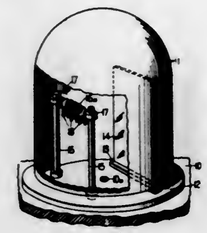
1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with aluminum which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,852
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,698
14 Claims. (Cl. 117—107)



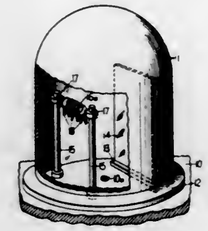
1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with magnesium which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,853
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,699
14 Claims. (Cl. 117—107)



1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with titanium which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,854
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,700
14 Claims. (Cl. 117—107)

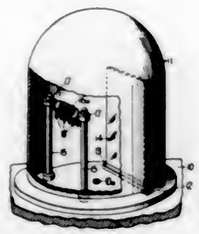


1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with manganese which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,855
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,701
14 Claims. (Cl. 117—107)

1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and coment as an alloy with chromium which causes the lumbium wherein the metal is heated on such filametal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,856
METHOD OF COATING BY EVAPORATING METALS
William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio
Application December 3, 1946, Serial No. 713,702
14 Claims. (Cl. 117—107)

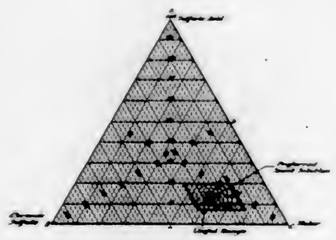


1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with zirconium which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,857
METHOD OF COATING BY EVAPORATING METALS

William H. Colbert and Arthur R. Weinrich, Brackenridge, Pa., assignors to Libbey-Owens-Ford Glass Company, Toledo, Ohio, a corporation of Ohio

Application December 3, 1946, Serial No. 713,703
14 Claims. (Cl. 117—107)

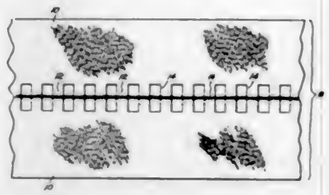


1. The method of making mirrors by the deposition of a metal on a polished support material, comprising evaporating a metal from a filament made of a metal selected from the group consisting of tungsten, tantalum, molybdenum and columbium wherein the metal is heated on such filament as an alloy with vanadium which causes the metal desired to be evaporated to wet, to adhere to, and to spread out over the filament surfaces and by the continued application of heat to evaporate, and depositing a coating thereof on said polished support material.

2,450,858
METHOD OF OXIDIZING UNSATURATED FATTY BODIES

J. D. Fitzpatrick and Latimer D. Myers, Cincinnati, Ohio

Application January 20, 1944, Serial No. 518,992
24 Claims. (Cl. 260—406)

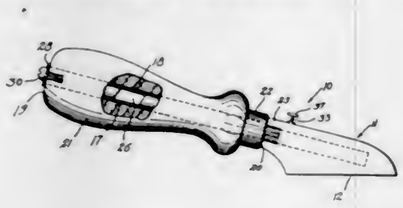


1. The method of oxidizing relatively long chain unsaturated fatty bodies to produce relatively short chain saturated fatty bodies, said method comprising electrolyzing an aqueous solution containing substantially 7 to 20% sulphuric acid and substantially 15 to 35% chromium sulphate to liberate hydrogen and convert 40 to 75% of chromium sulphate to chromic acid and sulphuric acid, treating the fatty body with said solution to produce cleavage of the chain and separating the fatty bodies so treated from said solution, all percentages being by weight.

2,450,859
MANUFACTURE OF ABRADING ELEMENTS

Floyd H. Ogden, Arlington, Mass., assignor to F. L. & J. C. Codman, Rockland, Mass., a corporation of Massachusetts

Application March 14, 1945, Serial No. 582,659
3 Claims. (Cl. 51—193)



1. The method of making an abrading element which comprises cutting a cloth strip to form two complementary strips each with a series of tongues and a series of notches, the tongues of one series being disposed in the notches of the other series, separating the complementary strips and reassembling them with the ends of one series of tongues presented to the ends of the other series of tongues, and fastening the ends of one series of tongues to ends of the other series of tongues.

2,450,860
LEAD TROWEL

Lester M. Proffit, Superior, Wis.

Application September 18, 1945, Serial No. 617,085
1 Claim. (Cl. 113—111)

A lead trowel including a body having a smoothing surface and an arcuate oil guiding surface extending upwardly and rearwardly from the rear end thereof, said body being formed with a longitudinal bore extending inwardly from its rear end, said bore being internally threaded at its rear end, a tubular oil receiving reservoir externally threaded on one end for threading into the threaded end of the bore in said trowel body, aligned bores extending through said trowel body intersecting the longitudinal bore therein, one of said aligned bores being formed with a valve seat at its inner end, said other aligned bore being threaded, a screw threadable through said threaded bore having an operating head on its outer end and a ball valve on its inner end seatable in said valve seat, a ferrule and handle slidably mounted upon said oil receiving reservoir, a threaded set screw engageable in the outer end of said oil receiving reservoir, and a washer on said screw contacting the outer end of said handle to hold said parts in operative position.

2,450,861
COMPOSITION FOR DESCALING FERROUS METAL

Harold A. Robinson, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Delaware

No Drawing. Application April 16, 1945, Serial No. 588,711
3 Claims. (Cl. 252—147)

1. A composition for descaling a ferrous metal surface comprising by weight 5 to 25 per cent of hydrogen chloride, 0.1 to 1 per cent of an organic nitrogen base selected from the group consisting of pyridine, quinoline, methyl quinoline, and o-toluidine, and 2.2 to 3.3 per cent of a water-soluble salt selected from the group consisting of the water-soluble divalent chromium salts and the water-soluble trivalent titanium salts, the balance being water.

2,450,862
ANKLE SUPPORT

George Henry Wilkinson, Windsor, Ontario, Canada; The Canada Trust Company executor of said George Henry Wilkinson, deceased

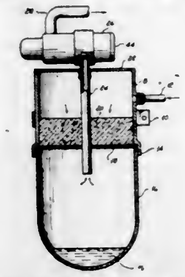
Application November 27, 1946, Serial No. 712,642
1 Claim. (Cl. 128—80)

In an ankle support adapted to be worn on a foot and associated ankle portion of the anatomy, a body member comprising a pair of sides and a back, the front of said body member being open and terminating in the rear of the toes, said member being composed of layers of resilient and pliable material and a strap secured to one end of said body member, a pair of slits in the other end of said body for receiving said strap thereby clamping the device to a foot and said strap supporting the arch of a foot.

2,450,863
AMIDES FROM SULFONYL FLUORIDES

Mario S. Altamura, Brooklyn, N. Y., assignor to Socony-Vacuum Oil Company, Incorporated, a corporation of New York

No Drawing. Application March 7, 1946, Serial No. 652,818
4 Claims. (Cl. 260—556)



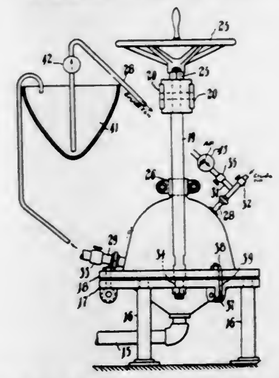
1. The method for preparing an organic sulfonamide from an organic sulfonyl fluoride of an aromatic mineral oil hydrocarbon, which comprises: reacting said organic sulfonyl fluoride with urea at a temperature between about 160° C. and about 190° C.

2,450,864
CRANKCASE VENTILATING APPARATUS

Clarence R. Callaway, New York, N. Y., and Frank R. Dunn, Little Ferry, N. J., assignors to Motor Economy Products, Inc., New York, N. Y., a corporation of New Jersey

Application April 4, 1947, Serial No. 739,488
5 Claims. (Cl. 123—196)

1. Crank case ventilating apparatus, including in combination a housing, means for supporting a filter within said housing, a reservoir, means for securing said reservoir to said housing below said filter, a conduit providing communication between the crank case of an internal combustion engine and the interior of said housing above said filter, a control valve having a valve housing formed



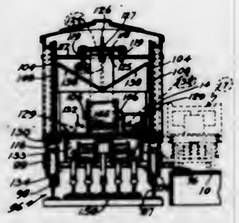
with a chamber, means providing communication between said reservoir and said valve chamber, means providing communication between said valve chamber and the intake manifold of an internal combustion engine and a valve positioned in said valve chamber adapted to control said communication.

2,450,865
FILTER

Robert Lepsoe and Edward Llewelyn Jones, Trail, British Columbia, Canada, assignors to The Consolidated Mining and Smelting Company of Canada, Limited, Montreal, Quebec, Canada, a corporation of Canada

Original application June 7, 1943, Serial No. 489,930. Divided and this application June 3, 1944, Serial No. 538,608
3 Claims. (Cl. 210—62)

1. Apparatus for filtering tin which comprises a filtrate receiving basin, an outlet for said basin, a cover for said basin detachably securable thereto in substantially air-sealing engagement, a filtering medium between said cover and said basin, an inlet conduit to said cover in communication with a source of supply of molten tin and with a source of supply of air under pressure, an outlet conduit from said cover in communication with the source of supply of molten tin, said conduits extending into said cover above said filtering medium and the inlet end of the outlet conduit being positioned adjacent to the filtering medium, valves in said conduits for regulating the flow of molten tin and air to said cover and molten tin from said cover, said inlet



and outlet conduits being adapted to circulate molten tin from and to the source of supply through all parts of said cover and the valve in the outlet conduit being adapted to stop such circulation, pressure means for maintaining said circulation and for forcing molten tin through said filtering medium when said circulation is stopped, means for forcing through the filtering medium the molten tin contained in the residue retained thereon, and means for raising the cover for removal of the residue collected on the filtering medium.

2,450,866
POULTRY TREATMENT COMPOSITION
Neal F. Morehouse and Orley J. Mayfield, Charles City, Iowa, assignors to Dr. Salsbury's Laboratories, Charles City, Iowa, a corporation of Iowa
No Drawing. Application October 4, 1946, Serial No. 701,076
16 Claims. (Cl. 167—53.1)

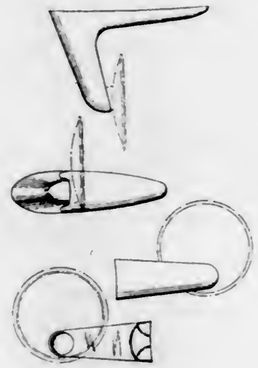
1. A composition for the treatment of poultry containing a vehicle adapted for oral ingestion and a substance selected from the group consisting of 3-nitro-4-hydroxy phenyl arsonic acid, water soluble salts of 3-nitro-4-hydroxy phenyl arsonic acid and mixtures thereof in the approximate concentration range of 0.00005% to 0.035%.

2,450,867
TOY CAR UNLOADER
William R. Smith, Philadelphia, Pa., assignor to The A. C. Gilbert Company, New Haven, Conn., a corporation of Maryland
Application December 15, 1942, Serial No. 469,046
3 Claims. (Cl. 46—218)

1. An elongated toy railway box car constructed and operative to unload therefrom a toy article, including in combination, a side wall of the car containing a doorway for a slidable door, a horizontal main floor of the car having a cut-out extending through the lateral edge of said floor at said doorway, an auxiliary floor section constructed and pivotally mounted to turn about an axis positioned to enable said floor section to swing about said axis between a tilted position occupying said doorway and blocking said door and a normal position in coplanar relation to said

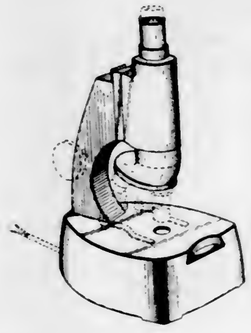
car floor confined to the limits of said cut-out in the latter, means normally to suport said floor section in said position, means to swing said floor section upward away from its said position toward said doorway into a tilted position, and a stop arranged in the path of the upward swinging movement of said section thereby suddenly to check said section in tilted position for catapulting out of said doorway a toy article resting on said floor section.

DESIGNS



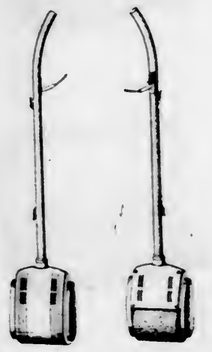
OCTOBER 5, 1948

151,204
DESIGN FOR A WATCH DIAL
George H. Adamson, Tecumseh, Mich.
Application December 9, 1947, Serial No. 143,079
Term of patent 14 years
(Cl. D42—10)



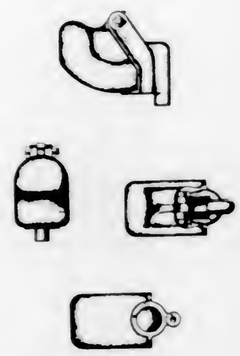
The ornamental design for a watch dial, substantially as shown and described.

151,205
DESIGN FOR A REAR VISION MIRROR OR SIMILAR ARTICLE
James W. Anderson, Jr., Detroit, Mich.
Application August 15, 1947, Serial No. 140,891
Term of patent 7 years
(Cl. D14—6)



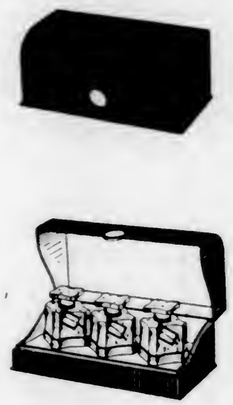
The ornamental design for a rear vision mirror or similar article, substantially as shown and described.

151,206
DESIGN FOR A MICROSCOPE OR SIMILAR ARTICLE
John T. Armbruster, Niagara Falls, and Thomas G. Aitcheson, Kenmore, N. Y., assignors to American Optical Company, Southbridge, Mass., a voluntary association of Massachusetts
Application September 30, 1947, Serial No. 141,672
Term of patent 14 years
(Cl. D57—1)



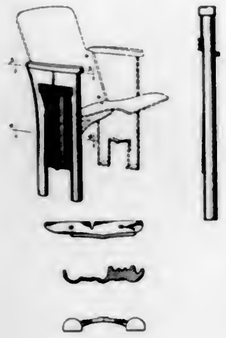
The ornamental design for a microscope or similar article, substantially as shown and described.

151,207
DESIGN FOR AN ELECTRIC FLOOR POLISHER
Kenneth C. Atkin, Muskegon, Mich., assignor to Clarke Sanding Machine Company, Muskegon, Mich., a corporation of Michigan
Application January 12, 1948, Serial No. 143,667
Term of patent 14 years
(Cl. D9—2)



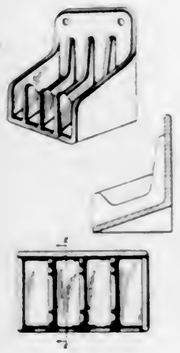
The ornamental design for an electric floor polisher, substantially as shown.

151,208
DESIGN FOR A HEAD FOR RAILROAD WATER HYDRANTS AND SIMILAR ARTICLES
Thomas E. Bart, Cincinnati, Ohio, assignor to The Murdock Mfg. & Supply Co., Cincinnati, Ohio, a corporation of Ohio
Application September 3, 1946, Serial No. 133,028
Term of patent 14 years
(Cl. D91—1)



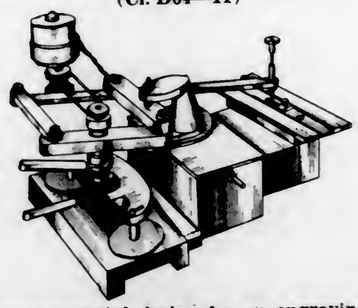
The ornamental design for a head for railroad water hydrants and similar articles, as shown.

151,209
DESIGN FOR A COMBINED HOLDER AND CONTAINERS FOR PERFUMERY
Georges Baud, Paris, France
Application March 29, 1946, Serial No. 128,048
Term of patent 14 years
(Cl. D80—5)



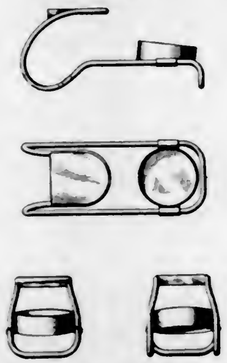
The ornamental design for a combined holder and containers for perfumery, as shown and described.

151,210
DESIGN FOR A CHAIR STANDARD
Willard H. Bond, Jr., Grand Rapids, Mich., assignor to American Seating Company, Grand Rapids, Mich., a corporation of New Jersey
Application March 8, 1947, Serial No. 137,461
Term of patent 14 years
(Cl. D15—8)



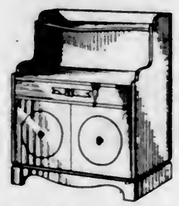
The ornamental design for a chair standard, substantially as shown and described.

151,211
DESIGN FOR A SOAP DISH
Joseph W. Bradbury, Bridgeport, Conn.
Application October 25, 1946, Serial No. 134,238
Term of patent 3½ years
(Cl. D4—3)



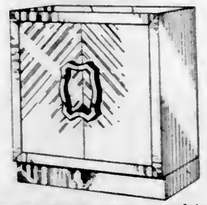
The ornamental design for a soap dish, as shown.

151,212
DESIGN FOR AN ENGRAVING MACHINE
Philip J. Brohawn, New York, N. Y., assignor to International Engraving Machine Corp., a corporation of New York
Application September 28, 1946, Serial No. 133,816
Term of patent 3½ years
(Cl. D64—11)



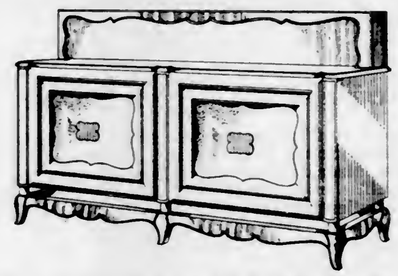
The ornamental design for an engraving machine, substantially as shown.

151,213
DESIGN FOR A MILKING STOOL
Charles C. Bruner, Wichita, Kans.
Application February 3, 1947, Serial No. 136,649
Term of patent 3½ years
(Cl. D23—1)



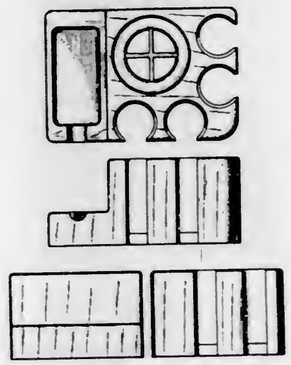
The ornamental design for a milking stool, as shown.

151,214
DESIGN FOR A CABINET OR SIMILAR ARTICLE
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application March 29, 1947, Serial No. 138,046
Term of patent 7 years
(Cl. D33—19)



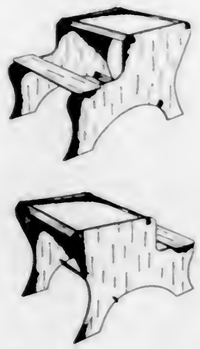
The ornamental design for a cabinet or similar article, substantially as shown and described.

151,215
DESIGN FOR A CABINET OR SIMILAR ARTICLE
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application March 29, 1947, Serial No. 138,051
Term of patent 7 years
(Cl. D33—19)



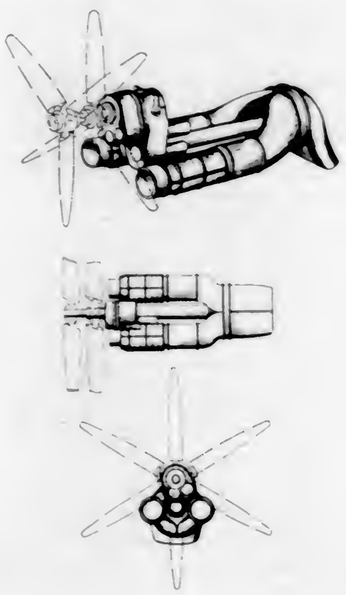
The ornamental design for a cabinet or similar article, substantially as shown and described.

151,216
DESIGN FOR A CABINET OR SIMILAR ARTICLE
Anthony J. Buckner, New York, N. Y., assignor to Grosfeld House, Inc., New York, N. Y.
Application March 29, 1947, Serial No. 138,052
Term of patent 7 years
(Cl. D33—19)



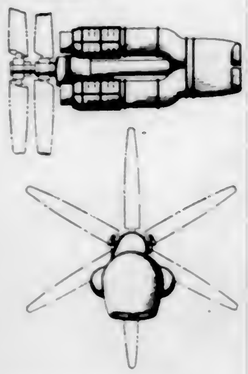
The ornamental design for a cabinet or similar article, substantially as shown and described.

151,217
DESIGN FOR A COMBINED ASHTRAY, GLASS, AND POKER CHIP HOLDER
Mary Buehren, Winnetka, Ill.
Application December 3, 1946, Serial No. 135,236
Term of patent 14 years
(Cl. D85—2)



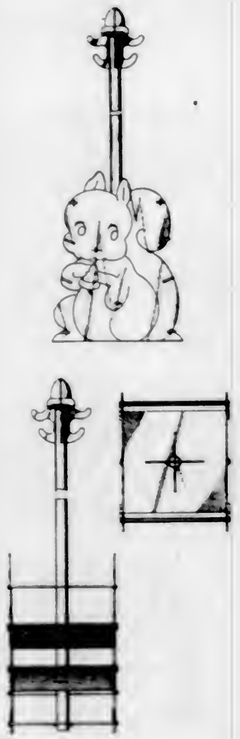
The ornamental design for a combined ash tray, glass, and poker chip holder, as shown.

151,218
DESIGN FOR A CHILD'S DESK
Paul P. Cameron, Flint, Mich., assignor to Parker Products Company, Flint, Mich., a corporation of Michigan
Application March 10, 1947, Serial No. 137,492
Term of patent 3½ years
(Cl. D33—7)



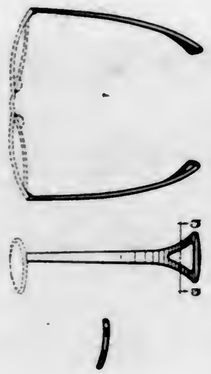
The ornamental design for a child's desk, substantially as shown.

151,219
DESIGN FOR A TURBINE JET AIRCRAFT ENGINE
Milton U. Clauser, Los Angeles, and Arlton N. Hatch, Santa Monica, Calif., assignors to Douglas Aircraft Company, Inc., Santa Monica, Calif.
Application July 2, 1946, Serial No. 131,280
Term of patent 7 years
(Cl. D71—1)

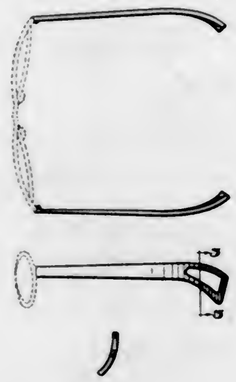


The ornamental design for a turbine jet aircraft engine, substantially as shown and described.

151,219—Continued



151,220
DESIGN FOR A COSTUMER OR THE LIKE
Lloyd S. Crain, Evanston, Ill.
Application March 29, 1946, Serial No. 128,079
Term of patent 3½ years
(Cl. D33—8)

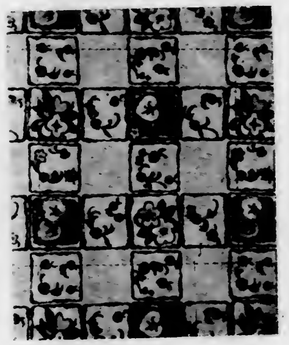


The ornamental design for a costumer or the like, substantially as shown.

151,221
DESIGN FOR A SPECTACLE FRAME
Arthur Ditto, Boston, Mass., assignor to Marine Optical Mfg. Co., Boston, Mass., a partnership
Application November 6, 1947, Serial No. 142,348
Term of patent 14 years
(Cl. D57—1)

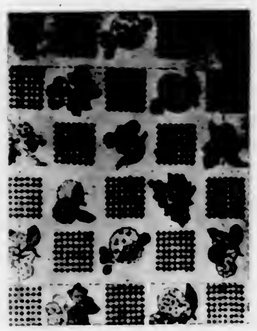
The ornamental design for a spectacle frame, as shown and described.

151,222
DESIGN FOR A SPECTACLE FRAME
Arthur Ditto, Boston, Mass., assignor to Marine Optical Mfg. Co., Boston, Mass., a partnership
Application November 6, 1947, Serial No. 142,349
Term of patent 14 years
(Cl. D57—1)



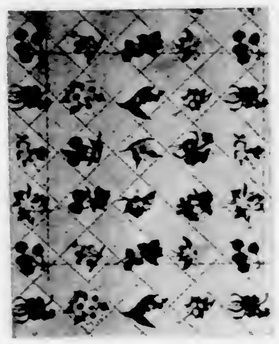
The ornamental design for a spectacle frame, as shown and described.

151,223
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Samuel A. Dix, New York, N. Y., assignor to Bartmann & Bixer, Inc., New York, N. Y., a corporation of New York
Application October 3, 1947, Serial No. 141,721
Term of patent 14 years
(Cl. D92—1)



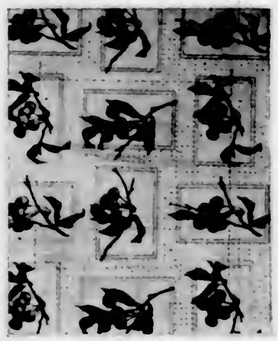
The ornamental design for a textile fabric or similar article, substantially as shown and described.

151,224
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Samuel A. Dix, New York, N. Y., assignor to Bartmann & Bixer, Inc., New York, N. Y., a corporation of New York
Application October 3, 1947, Serial No. 141,722
Term of patent 14 years
(Cl. D92—1)



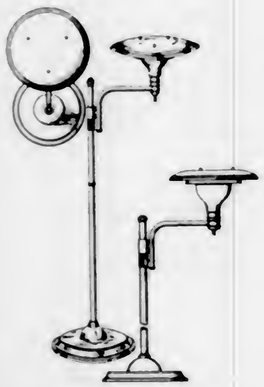
The ornamental design for a textile fabric or similar article, substantially as shown and described.

151,225
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Samuel A. Dix, New York, N. Y., assignor to Bartmann & Bixer, Inc., New York, N. Y., a corporation of New York
Application October 3, 1947, Serial No. 141,723
Term of patent 14 years
(Cl. D92—1)



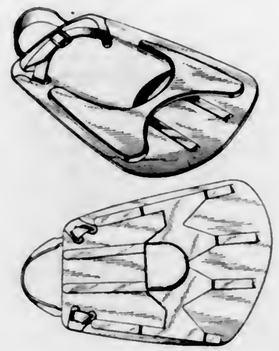
The ornamental design for a textile fabric or similar article, substantially as shown and described.

151,226
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Samuel A. Dix, New York, N. Y., assignor to Bartmann & Bixer, Inc., New York, N. Y., a corporation of New York
Application October 3, 1947, Serial No. 141,724
Term of patent 14 years
(Cl. D92—1)



The ornamental design for a textile fabric or similar article, substantially as shown and described.

151,227
DESIGN FOR A TEXTILE FABRIC OR SIMILAR ARTICLE
Samuel A. Dix, New York, N. Y., assignor to Bartmann & Bixer, Inc., New York, N. Y., a corporation of New York
Application October 3, 1947, Serial No. 141,725
Term of patent 14 years
(Cl. D92—1)

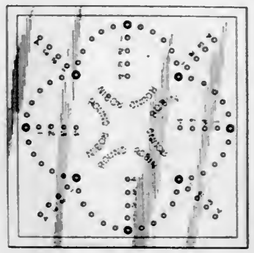


The ornamental design for a textile fabric or similar article, substantially as shown and described.

151,228
DESIGN FOR A FLOOR LAMP
Leroy C. Doane, Essex, Conn., assignor to The Sight Light Corporation, Deep River, Conn., a corporation of Connecticut
Application June 7, 1946, Serial No. 130,494
Term of patent 14 years
(Cl. D48—20)

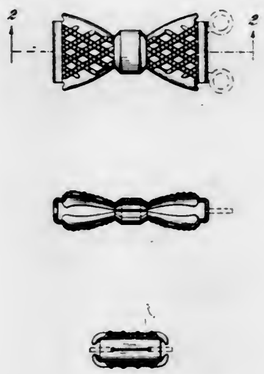
The ornamental design for a floor lamp, substantially as shown.

151,229
DESIGN FOR A SWIMMING FLIPPER
Donald F. Eddy, South Gate, Calif.
Application March 10, 1947, Serial No. 137,486
Term of patent 14 years
(Cl. D71—1)



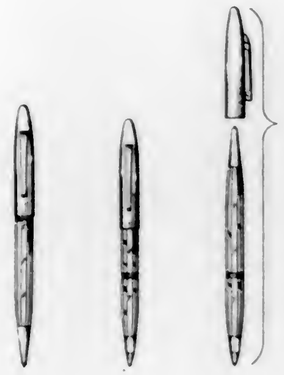
The ornamental design for a swimming flipper, substantially as shown.

151,230
DESIGN FOR AN EXPANSIBLE LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Emil E. Fachon, Edgewood, R. I., assignor to Bulova Watch Company, Inc., New York, N. Y., a corporation of New York
Application June 28, 1947, Serial No. 139,996
Term of patent 7 years
(Cl. D45—4)



The ornamental design for an expansible link chain for a bracelet or similar article, as shown.

151,231
DESIGN FOR A GAME BOARD
John E. Funderburg, Ashland, Ky.
Application April 29, 1947, Serial No. 138,680
Term of patent 14 years
(Cl. D34—5)

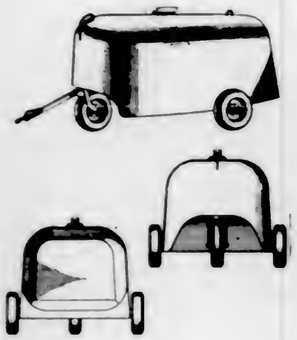


The ornamental design for a game board, as shown.

151,232
DESIGN FOR A CONNECTING LINK FOR A NECKLACE OR SIMILAR ARTICLE
Robert Gardel, New York, N. Y.
Application December 24, 1947, Serial No. 143,317
Term of patent 7 years
(Cl. D45—4)

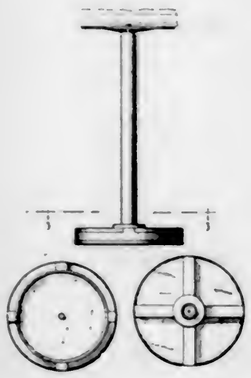
The ornamental design for a connecting link for a necklace or similar article, substantially as shown and described.

151,233
DESIGN FOR A COMBINATION PEN AND PENCIL
Gerald A. Goessling, Richmond Heights, Mo., assignor to Quick Point Pencil Co., St. Louis, Mo., a corporation of Missouri
Application September 17, 1947, Serial No. 141,449
Term of patent 14 years
(Cl. D74—24)



The ornamental design for a combination pen and pencil, substantially as shown.

151,234
DESIGN FOR A COMBINED EYE SHADOW AND ROUGE CASE
Elizabeth N. Graham, New York, N. Y.
Application July 22, 1947, Serial No. 140,454
Term of patent 14 years
(Cl. D86—10)

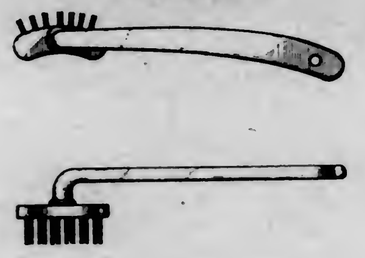


The ornamental design for a combined eye shadow and rouge case, substantially as shown and described.

151,235
DESIGN FOR A TRAILER VEHICLE
Gerald J. Harman, Beverly Hills, Calif.
Application August 15, 1946, Serial No. 132,555
Term of patent 7 years
(Cl. D14—3)

The ornamental design for a trailer vehicle, as shown.

151,236
DESIGN FOR A SMOKER'S STAND OR THE LIKE
Philip S. Harper, Chicago, Ill., assignor to Harper-Wyman Company, Chicago, Ill., a corporation of Illinois
Application June 24, 1946, Serial No. 130,983
Term of patent 14 years
(Cl. D85—2)



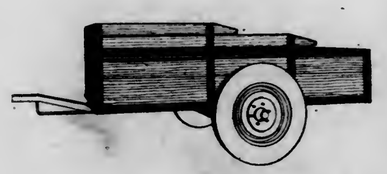
151,236—Continued

The ornamental design for a smoker's stand or the like, as shown and described.

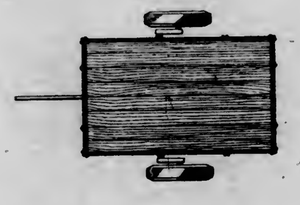
151,237
DESIGN FOR A TOOTHBRUSH
Kenneth Harris and Otto A. May, Chicago, Ill.
Application July 30, 1947, Serial No. 140,619
Term of patent 7 years
(Cl. D9—2)

The ornamental design for a toothbrush, as shown.

151,238
DESIGN FOR A PARING KNIFE
Leo A. Heintzelman, Grand Rapids, Mich.
Application October 25, 1946, Serial No. 134,224
Term of patent 3½ years
(Cl. D22—3)

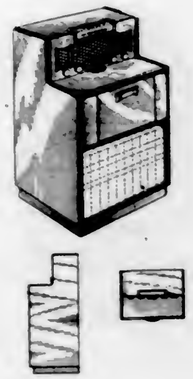


The ornamental design for a paring knife, as shown.

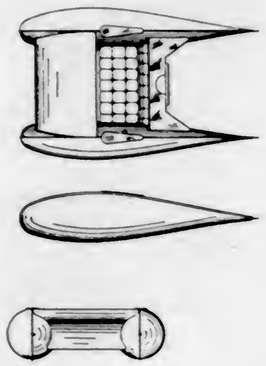


151,239
DESIGN FOR A COMBINED TEA URN AND STAND
Vilhelm Hingelberg, Aarhus, Denmark
Application December 10, 1946, Serial No. 135,388
Term of patent 14 years
(Cl. D44—25)

The ornamental design for a combined tea urn and stand, as shown and described.

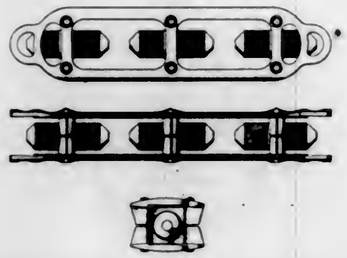


151,240
DESIGN FOR A TWO-WHEEL TRAILER
Oliver W. Inskeep, Stockton, Calif., assignor to Harris Manufacturing Company, Stockton, Calif., a corporation of California
Application November 5, 1945, Serial No. 123,443
Term of patent 14 years
(Cl. D14—3)



The ornamental design for a two-wheel trailer, as shown and described.

151,241
DESIGN FOR A RADIO RECEIVER CABINET
Albert L. Jenks, Dixon, Ill., assignor to Motorola, Inc., Chicago, Ill., a corporation of Illinois
Application August 23, 1947, Serial No. 141,025
Term of patent 7 years
(Cl. D56—4)



The ornamental design for a radio receiver cabinet, substantially as shown and described.

151,242
DESIGN FOR A BOAT
John E. Jones, Long Beach, Calif., assignor to James C. Whittaker Co., Inc., Long Beach, Calif., a corporation of California
Application February 7, 1947, Serial No. 136,772
Term of patent 7 years
(Cl. D71—1)

The ornamental design for a boat, as shown.

151,243
DESIGN FOR AN ELECTROLYTIC WATER CORRECTION DEVICE
Theodore C. Jones, Louisville, Ky.
Application October 3, 1947, Serial No. 141,730
Term of patent 14 years
(Cl. D26—1)

The ornamental design for an electrolytic water correction device, as shown and described.

151,244
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 15, 1948, Serial No. 143,789
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,245
DESIGN FOR A CLIP OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 30, 1948, Serial No. 144,162
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a clip or similar article, substantially as shown.

151,246
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 30, 1948, Serial No. 144,163
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,247
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 30, 1948, Serial No. 144,164
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,248
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 30, 1948, Serial No. 144,165
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,249
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 30, 1948, Serial No. 144,166
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

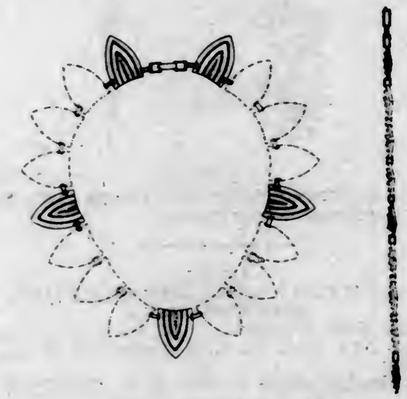
151,250
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application January 30, 1948, Serial No. 144,167
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,251
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 4, 1948, Serial No. 144,257
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,252
DESIGN FOR A BRACELET OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 4, 1948, Serial No. 144,259
Term of patent 7 years
(Cl. D45—4)



The ornamental design for a bracelet or similar article, substantially as shown and described.

151,253
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 4, 1948, Serial No. 144,261
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,254
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 4, 1948, Serial No. 144,267
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,255
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 12, 1948, Serial No. 144,437
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,256
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 12, 1948, Serial No. 144,443
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,257
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application February 27, 1948, Serial No. 144,787
Term of patent 7 years
(Cl. D45—16)

The ornamental design for a necklace or similar article, substantially as shown and described.

151,258
DESIGN FOR A SEPARABLE BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 13, 1948, Serial No. 145,071
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a separable brooch or similar article, substantially as shown.

151,259
DESIGN FOR A SEPARABLE BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 13, 1948, Serial No. 145,072
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a separable brooch or similar article, substantially as shown.

151,260
DESIGN FOR A BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 16, 1948, Serial No. 145,125
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a brooch or similar article, substantially as shown.

151,261
DESIGN FOR A BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 16, 1948, Serial No. 145,131
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a brooch or similar article, substantially as shown.

151,262
DESIGN FOR A SEPARABLE BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 17, 1948, Serial No. 145,162
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a separable brooch or similar article, substantially as shown.

151,263
DESIGN FOR AN EARRING OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 17, 1948, Serial No. 145,163
Term of patent 7 years
(Cl. D45—9)

The ornamental design for an earring or similar article, substantially as shown.

151,264
DESIGN FOR A SEPARABLE BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 17, 1948, Serial No. 145,165
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a separable brooch or similar article substantially as shown.

151,265
DESIGN FOR A SEPARABLE BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 17, 1948, Serial No. 145,166
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a separable brooch or similar article, substantially as shown.

151,266
DESIGN FOR A SEPARABLE BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 17, 1948, Serial No. 145,167
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a separable brooch or similar article, substantially as shown.

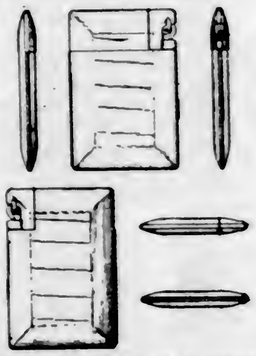
151,267
DESIGN FOR A BROOCH OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 17, 1948, Serial No. 145,168
Term of patent 7 years
(Cl. D45—19)

The ornamental design for a brooch or similar article, substantially as shown and described.

151,268
DESIGN FOR A JEWELRY FINDING OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application March 24, 1948, Serial No. 145,301
Term of patent 7 years
(Cl. D45—1)

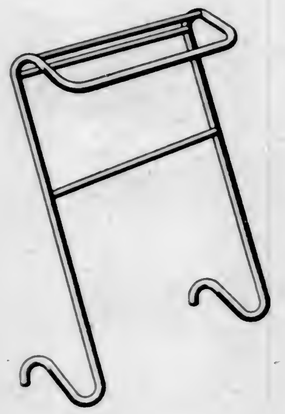
The ornamental design for a jewelry finding or similar article, substantially as shown.

151,269
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Adolph Katz, Providence, R. I., assignor to Coro, Inc., New York, N. Y., a corporation of New York
Application June 25, 1948, Serial No. 147,198
Term of patent 7 years
(Cl. D45—16)



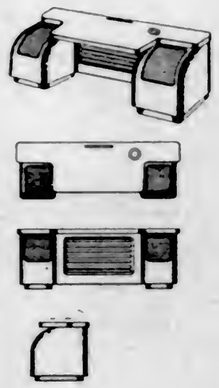
The ornamental design for a necklace or similar article, substantially as shown and described.

151,270
DESIGN FOR A LOUNGE
Martin Kaufman, Minneapolis, Minn.
Application May 19, 1947, Serial No. 139,134
Term of patent 14 years
(Cl. D15—11)



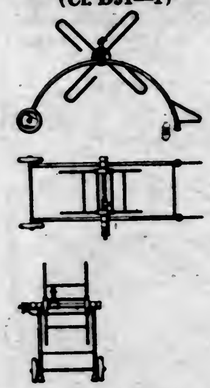
The ornamental design for a lounge, substantially as shown.

151,271
DESIGN FOR A COMBINED LIGHTER AND CIGARETTE CASE
David M. King, Chicago, and Albert Wewetzer, Elgin, Ill., assignors to Illinois Watch Case Co., a corporation of Illinois
Application April 11, 1947, Serial No. 138,310
Term of patent 14 years
(Cl. D48—27)



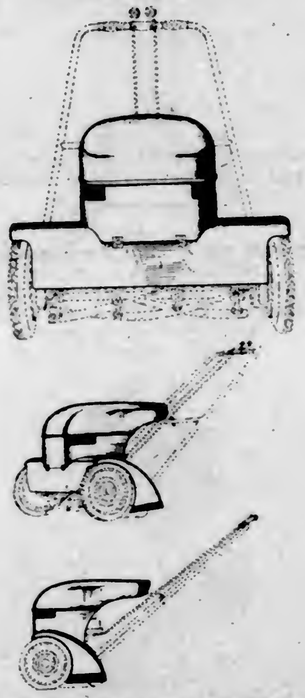
The ornamental design for a combined lighter and cigarette case, as shown.

151,272
DESIGN FOR A TOWEL RACK
Karl Kipp, Olean, N. Y., assignor to Daystrom Corporation, Olean, N. Y., a corporation of New York
Application May 10, 1946, Serial No. 129,573
Term of patent 7 years
(Cl. D33—16)



The ornamental design for a towel rack, substantially as shown.

151,273
DESIGN FOR A TABLE TYPE REFRIGERATOR
Edward A. Kirchhof, Altadena, Calif.
Application September 23, 1946, Serial No. 133,497
Term of patent 3½ years
(Cl. D67—3)

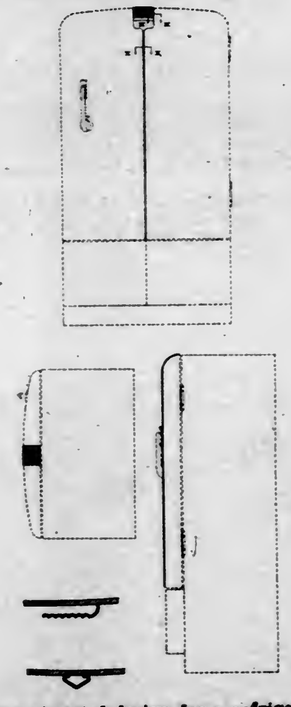


The ornamental design for a table type refrigerator, as shown.

151,274
DESIGN FOR A HOSE REEL
Henry E. Kirschner, St. Joseph, Mo.
Application September 23, 1946, Serial No. 133,498
Term of patent 7 years
(Cl. D91—1)

The ornamental design for a hose reel, as shown.

151,275
DESIGN FOR A POWER LAWN MOWER
Marlowe H. Kluter, Richmond, Ind., assignor to The F. & N. Lawn Mower Company, Richmond, Ind., a corporation of Delaware
Application October 30, 1946, Serial No. 134,376
Term of patent 14 years
(Cl. D40—1)

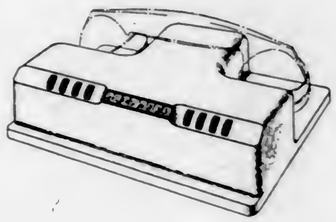


The ornamental design for a power lawn mower, substantially as shown and described.

151,276
DESIGN FOR A FISH LURE
Hosea Lamb, Ponca City, Okla.
Application July 9, 1946, Serial No. 131,429
Term of patent 3½ years
(Cl. D31—4)

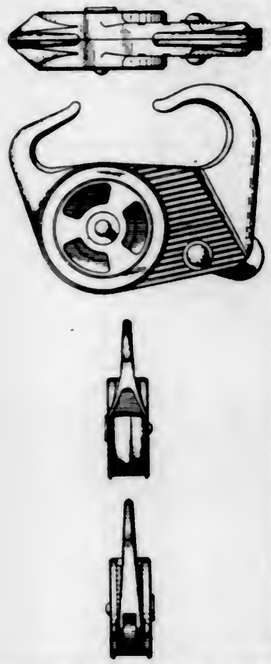
The ornamental design for a fish lure, as shown.

151,277
DESIGN FOR A REFRIGERATOR CABINET
John M. Little, Toledo, Ohio, assignor to Westinghouse Electric Corporation, a corporation of Pennsylvania
Application November 21, 1946, Serial No. 134,967
Term of patent 14 years
(Cl. D67—3)



The ornamental design for a refrigerator cabinet, substantially as shown and described.

151,278
DESIGN FOR A TWINE HOLDER
Jack Lucchesi, Chicago, Ill.
Application July 13, 1946, Serial No. 131,570
Term of patent 14 years
(Cl. D44—30)

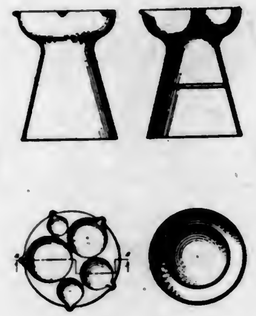


The ornamental design for a twine holder, as shown.

151,279
DESIGN FOR A DESK STAND FOR A HAND TELEPHONE SET
Warren A. Marrison, Maplewood, N. J., and Francis M. Thayer, Jackson Heights, N. Y., assignors to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application December 13, 1946, Serial No. 135,466
Term of patent 14 years
(Cl. D26—14)

The ornamental design for a desk stand for a hand telephone set, as shown and described.

151,280
DESIGN FOR A RAILWAY CAR DOOR OPENER AND CLOSER
Glenn W. Merritt, Bowerston, Ohio, assignor to The Nolan Company, Bowerston, Ohio, a corporation of Ohio
Application March 11, 1946, Serial No. 127,333
Term of patent 14 years
(Cl. D50—5)

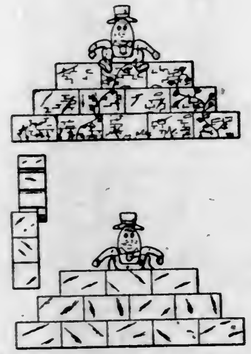


The ornamental design for a railway car door opener and closer, as shown and described.

151,281
DESIGN FOR A PORTABLE STORAGE CHEST OR SIMILAR ARTICLE
Swen M. Meyer, Stockton, Calif.
Application April 14, 1947, Serial No. 138,342
Term of patent 14 years
(Cl. D33—19)

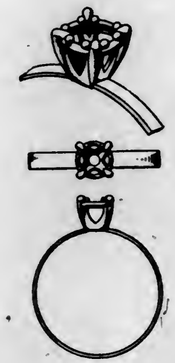
The ornamental design for a portable storage chest or similar article, as shown and described.

151,282
DESIGN FOR A COMBINED SPOON AND CUP MEASURER
Lois E. Middleton, Oakland, Calif.
Application December 3, 1946, Serial No. 135,240
Term of patent 14 years
(Cl. D44—9)



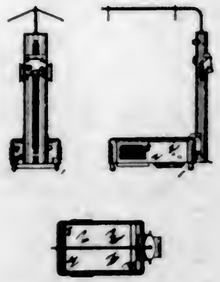
The ornamental design for a combined spoon and cup measurer, as shown.

151,283
DESIGN FOR A BOTTLE CAP
Edith Jean Blanc Miller, Chicago, Ill., assignor to Associated Products, Inc., Chicago, Ill., a corporation of Illinois
Application January 19, 1946, Serial No. 125,726
Term of patent 3½ years
(Cl. D58—26)



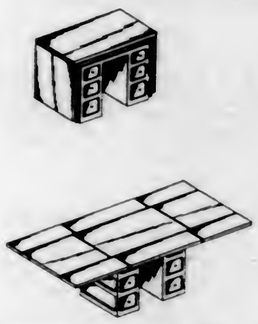
The ornamental design for a bottle cap, substantially as shown.

151,284
DESIGN FOR A JIG-SAW PUZZLE
Richard B. Morris, Quincy, Ill.
Application June 28, 1946, Serial No. 131,115
Term of patent 14 years
(Cl. D34—15)



The ornamental design for a jig-saw puzzle, as shown and described.

151,285
DESIGN FOR A FINGER RING MOUNTING
David Pfeffer, New York, N. Y.
Application September 17, 1946, Serial No. 133,365
Term of patent 3½ years
(Cl. D45—10)

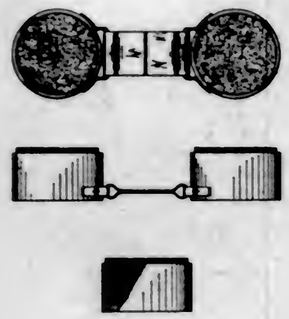


The ornamental design for a finger ring mounting, as shown.

151,286
DESIGN FOR AN OXYGEN THERAPY APPARATUS
Andrew H. St. Louis, Utica, N. Y.
Application April 7, 1947, Serial No. 138,213
Term of patent 14 years
(Cl. D83—1)

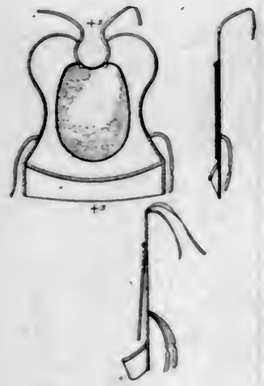
The ornamental design for an oxygen therapy apparatus, as shown.

151,287
DESIGN FOR A COMBINED DINING TABLE AND WRITING DESK
Margaret Sanders, Pittsburgh, Pa.
Application December 5, 1946, Serial No. 135,275
Term of patent 3½ years
(Cl. D33—14)



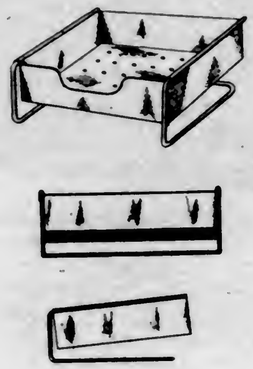
The ornamental design for a combined dining table and writing desk, as shown.

151,288
DESIGN FOR A PENDANT CHARM
Ernst G. Schwarz, New York, N. Y.
Application February 7, 1948, Serial No. 144,350
Term of patent 3½ years
(Cl. D45—19)



The ornamental design for a pendant charm, substantially as shown and described.

151,289
DESIGN FOR AN ARTICULATED PIN TRAY UNIT
Ruth M. Seeger, Newark, N. J.
Application July 9, 1946, Serial No. 131,422
Term of patent 14 years
(Cl. D3—19)

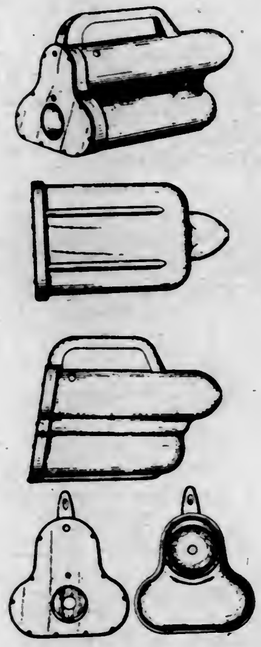


The ornamental design for an articulated pin tray unit, as shown.

151,290
DESIGN FOR A MULTIPLE BIB
Irving Shelton, New York, N. Y., assignor to Mistletoe Children's Products, Inc., New York, N. Y., a corporation of New York
Application September 13, 1947, Serial No. 141,380
Term of patent 7 years
(Cl. D3—26)

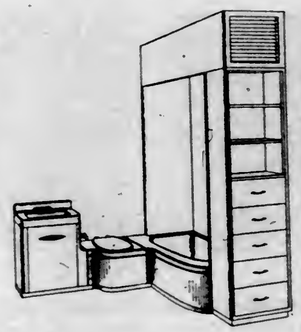
The ornamental design for a multiple bib, substantially as shown.

151,291
DESIGN FOR A DOG BED OR SIMILAR ARTICLE
Paul E. Shoemaker, Los Angeles, and Lyle L. Lewis, Sherman Oaks, Calif.
Application December 2, 1946, Serial No. 135,204
Term of patent 3½ years
(Cl. D12—5)



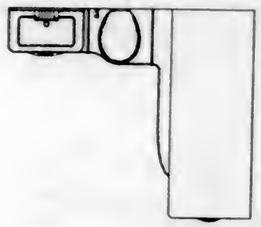
The ornamental design for a dog bed or similar article, substantially as shown.

151,292
DESIGN FOR A TOY JACK-IN-THE-BOX
William Smith, New York, N. Y.
Application August 25, 1947, Serial No. 141,057
Term of patent 3½ years
(Cl. D34—15)



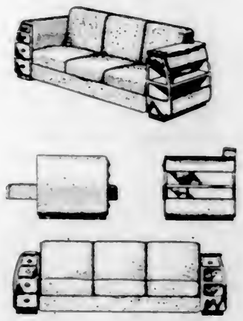
The ornamental design for a toy jack-in-the-box, as shown.

151,293
DESIGN FOR A DEVICE FOR DISPENSING LIQUID IN SPRAYED OR GASEOUS FORM
Hamilton R. Stagner, St. Louis, Mo.
Application July 3, 1947, Serial No. 140,088
Term of patent 14 years
(Cl. D62—2)



The ornamental design for a device for dispensing liquid in sprayed or gaseous form, as shown.

151,294
DESIGN FOR A BATHROOM ENSEMBLE
Jacques Stanitz, Warren, Ohio, assignor to Mullins Manufacturing Corporation, Salem, Ohio, a corporation of New York
Application April 9, 1947, Serial No. 138,265
Term of patent 14 years
(Cl. D4—5)



151,294—Continued

The ornamental design for a bathroom ensemble, substantially as shown.

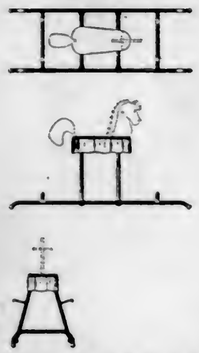
151,295
DESIGN FOR A SOFA BED
George L. Stanley, Fort Worth, Tex.
Application April 17, 1947, Serial No. 138,462
Term of patent 14 years
(Cl. D5—4)

The ornamental design for a sofa bed, substantially as shown.

151,296
DESIGN FOR A RADIO PHONOGRAPH CABINET
Leland George Stone, Fort Wayne, Ind., assignor to The Magnavox Company, Fort Wayne, Ind., a corporation of Delaware
Application April 24, 1947, Serial No. 138,596
Term of patent 7 years
(Cl. D56—4)

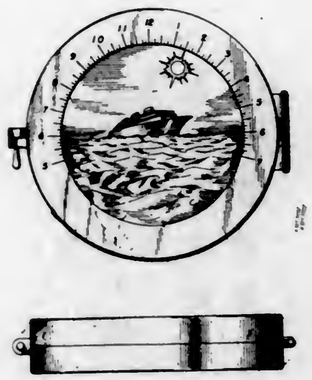
The ornamental design for a radio phonograph cabinet, substantially as shown and described.

151,297
DESIGN FOR A RADIO PHONOGRAPH CABINET
Leland George Stone, Fort Wayne, Ind., assignor to The Magnavox Company, Fort Wayne, Ind., a corporation of Delaware
Application April 30, 1947, Serial No. 138,702
Term of patent 7 years
(Cl. D56—4)



The ornamental design for a radio phonograph cabinet, substantially as shown and described.

151,298
DESIGN FOR A HELICOPTER
Frank L. Sutton, Buffalo, N. Y., assignor to Bell Aircraft Corporation, Wheatfield, N. Y.
Application August 22, 1947, Serial No. 140,993
Term of patent 14 years
(Cl. D71—1)

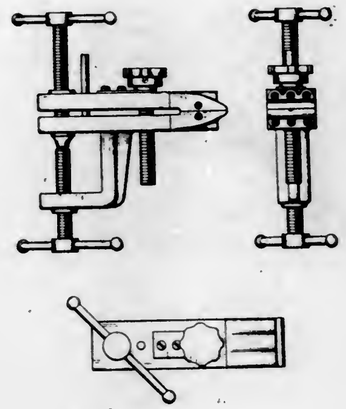


The ornamental design for a helicopter, as shown and described.

151,299
DESIGN FOR A HOBBYHORSE
Robert C. Swengel, York, Pa.
Application November 12, 1946, Serial No. 134,702
Term of patent 14 years
(Cl. D34—15)

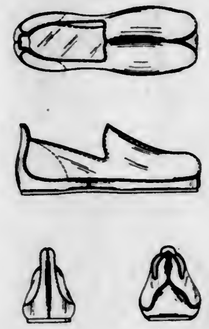
The ornamental design for a hobbyhorse, as shown and described.

151,300
DESIGN FOR A CLOCK
William Francis Thompson, Philadelphia, Pa.
Application February 26, 1947, Serial No. 137,177
Term of patent 14 years
(Cl. D42—7)



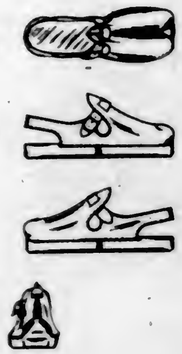
The ornamental design for a clock, as shown.

151,301
DESIGN FOR A COMBINED WRIST WATCH AND STEM GUARD
James A. Tuffo, Boston, Mass.
Application July 5, 1947, Serial No. 140,099
Term of patent 14 years
(Cl. D42—8)



The ornamental design for a combined wrist watch and stem guard, substantially as shown.

151,302
DESIGN FOR A BENCH VISE
Benjamin Uydess, New York, N. Y.
Application March 29, 1947, Serial No. 138,037
Term of patent 3½ years
(Cl. D54—13)



The ornamental design for a bench vise, substantially as shown.

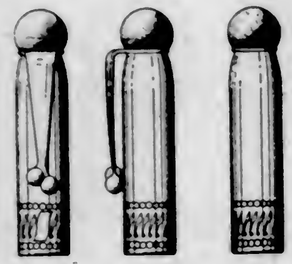
151,303
DESIGN FOR A SHOE
John J. Walsh, St. Louis, Mo.
Application April 21, 1947, Serial No. 138,524
Term of patent 14 years
(Cl. D7—7)

The ornamental design for a shoe, substantially as shown.

151,304
DESIGN FOR A SHOE
John J. Walsh, St. Louis, Mo.
Application April 21, 1947, Serial No. 138,525
Term of patent 14 years
(Cl. D7—7)

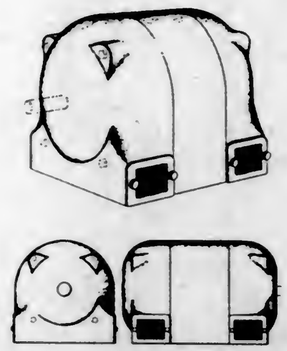
The ornamental design for a shoe, substantially as shown.

151,305
DESIGN FOR A PUSH BUTTON
Chauncey E. Waltman, Chicago, Ill., assignor to Nutone, Incorporated, Cincinnati, Ohio, a corporation of New York
Application January 16, 1947, Serial No. 136,184
Term of patent 3½ years
(Cl. D26—13)



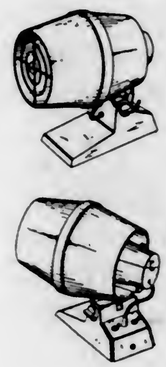
The ornamental design for a push botton, substantially as shown.

151,306
DESIGN FOR AN ALPHABET FOR FORMING MONOGRAMS OR THE LIKE
Julius Weisman, Providence, R. I., assignor to Plainville Stock Company, Plainville, Mass., a corporation of Massachusetts
Application May 4, 1948, Serial No. 146,158
Term of patent 14 years
(Cl. D64—12)



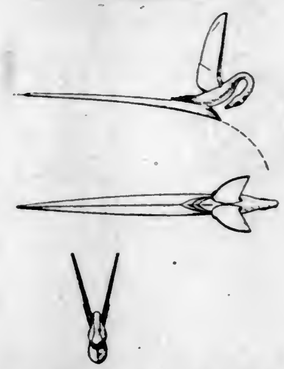
The ornamental design for an alphabet for forming monograms or the like, substantially as shown.

151,307
DESIGN FOR A COMBINED CAP AND CLIP FOR A FOUNTAIN PEN OR SIMILAR ARTICLE
Alexander Sydney Weston, New York, N. Y.
Application April 21, 1947, Serial No. 138,512
Term of patent 14 years
(Cl. D74—1)



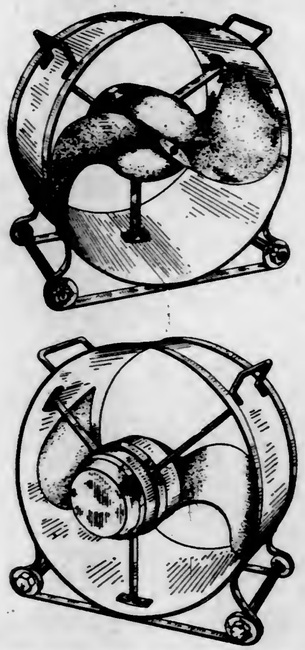
The ornamental design for a combined cap and clip for a fountain pen or similar article, as shown.

151,308
DESIGN FOR AN ELECTRIC MOTOR
Theodore R. Wieseman and Russell I. Robinson, Milwaukee, Wis., assignors to The Louis Allis Company, Milwaukee, Wis., a corporation of Wisconsin
Application October 17, 1947, Serial No. 141,964
Term of patent 14 years
(Cl. D26—5)



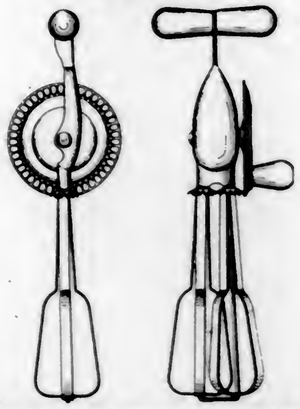
The ornamental design for an electric motor, as shown and described.

151,309
DESIGN FOR AN OSCILLATING ELECTRIC FAN TYPE HEATER
Samuel A. Witte, Chicago, Ill., assignor to Wittle Mfg. & Sales Co., Chicago, Ill., a firm
Application July 3, 1947, Serial No. 140,091
Term of patent 14 years
(Cl. D81—10)



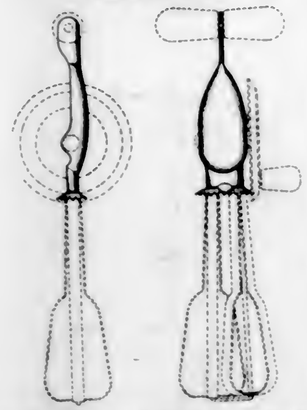
The ornamental design for an oscillating electric fan type heater, substantially as shown and described.

151,310
DESIGN FOR A VEHICLE HOOD ORNAMENT OR SIMILAR ARTICLE
Howard F. Yaeger, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a corporation of Michigan
Application May 14, 1947, Serial No. 139,044
Term of patent 14 years
(Cl. D14—18)



The ornamental design of a vehicle hood ornament or similar article, substantially as shown.

151,311
DESIGN FOR AN EXHAUST FAN
Henry Zeller and Albert H. Herter, Denver, Colo.
Application March 25, 1946, Serial No. 127,942
Term of patent 14 years
(Cl. D26—7)



The ornamental design for an exhaust fan, as shown.

151,312
DESIGN FOR A STIRRING APPARATUS
Myron J. Zimmer, Wood Dale, Ill., assignor to Ekco Products Company, Chicago, Ill., a corporation of Illinois
Application October 12, 1946, Serial No. 133,907
Term of patent 14 years
(Cl. D44—29)

The ornamental design for a stirring apparatus, as shown.

151,313
DESIGN FOR A STIRRING APPARATUS
Myron J. Zimmer, Wood Dale, Ill., assignor to Ekco Products Company, Chicago, Ill., a corporation of Illinois
Application October 12, 1946, Serial No. 133,908
Term of patent 14 years
(Cl. D44—29)

The ornamental design for a stirring apparatus, as shown and described.

Total	1,095		

Patents expiring: Patent Numbers 1,826,701 to 1,827,723, inclusive, and Plant Patent No. 2, issued October 13, 1931, expire October 13, 1948

Condition of Applications Under Examination at Close of Business Sept. 24, 1948

Total number of patent applications awaiting action, 155,248. Date of oldest new application, September 20, 1946; date of oldest amended application, April 16, 1946.

PATENT EXAMINING DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
1. GOLDBERG, A. J., Closure Operators; Fences; Gates; Planters; Plows; Harrows and Diggers; Plant Husbandry; Scattering Unloaders; Baths, Closets, Sinks, and Spittoons; Sewerage.	4-4-47	2-5-47	2868
2. HERRMANN, D., Fishing, Trapping and Vermin Destroying; Presses; Tobacco; Textile Wringers	1-22-47	9-5-46	3012
3. MARMELSTEIN, N., Metal Founding and Treatment; Metallurgy (Process and Apparatus)	12-16-47	11-21-47	1425
4. BISHOP, WALTER C., Conveyors; Hoists; Handling Apparatus; Excavating; Elevators; Fire Escapes; Ladders; Scaffolds; Pneumatic Dispatch; Store Service; Mining, Quarrying, and Ice Harvesting.	1-20-47	2-8-47	4083
5. ROBINSON, C. W., Harvesters; Bee Culture; Dairy; Knotters; Animal Husbandry; Butchering	2-21-47	9-3-46	1810
6. SURLE, H., Carbon Chemistry (part)	10-15-47	9-9-47	1812
7. HANLIN, GEORGE, Optics; Photographic Apparatus	12-24-47	8-16-47	1674
8. LEWIS, R. O., (Acting), Furniture; Racks and Cabinets	12-6-46	9-9-46	4480
9. BENSON, R. B., Pumps and Fans; Fluid and Fluid-Current Motors	6-20-47	1-21-47	2246
10. ANDRUS, L. M., Radiant Energy (part, e. g., Portable Radio Sets, Radio Accessories, Detectors, Oscillation Generators, Wave Meters, Tuners); Music; Modulators; Piezo-electric Crystals.	12-26-47	11-20-47	1674
11. BENHAM, E. V., Boots, Shoes, and Leggings, Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whip Apparatus.	12-24-47	1-7-48	779
12. SPINTMAN, S., Machine Elements (part); Engine Starters; Motor Control with Clutch or Brake; Transmission with Clutch or Brake.	7-30-47	9-9-46	2191
13. BEALL, T. E., Gear Cutting, Milling, Planing, Metal Working (part); Needle and Pin Making; Turning	9-20-46	9-24-46	2397
14. FREEHOF, H. B., Metal Working (Bending; Sheet-Metal; Wire; Misc. Processes); Wire Fabrics; Farriery	12-18-47	10-3-47	1376
15. HENKIN, B., Plastics; Plastic Block and Earthenware Apparatus; Glass	6-14-47	4-3-47	2102
16. LOVEWELL, N. N., Television; Telephony	11-4-47	6-21-47	1523
17. HABECKER, LEON B., Paper Manufactures; Typewriters; Printing; Type Casting and Setting; Sheet Material Associating or Folding; Sheet or Web Feeding.	3-10-47	10-11-46	2067
18. HURZ, J. A., Motors, Expansible-Chamber Type; Power Plants; Speed Responsive Devices; Rotary Internal-Combustion Engines.	7-15-47	8-28-46	1992
19. PATRICK, P. L., Liquid and Gaseous Fuel Burners; Stoves and Furnaces	9-18-47	2-1-47	1858
20. BROWN, L. M., Miscellaneous Hardware; Closure Fasteners; Locks; Undertaking; Bread, Pastry, and Confection Making; Bank Protection; Safes; Tents, Canopies, Umbrellas and Canes.	3-17-47	1-8-47	2033
21. MADER, R. C., Textiles	10-18-47	8-7-47	1233
22. CARPENTER, B. H., Aeronautics; Firearms; Ordnance	11-14-47	12-26-46	1728
23. LEWIS, J. B., Cash Registers; Calculators and Counters; Education	9-30-47	8-23-46	1212
24. LUSBY, CHARLES, Apparel; Apparel Apparatus; Package and Article Carriers; Sewing Machines	9-16-47	8-9-47	2763
25. BLAKELY, C. F., Classifying Solids; Centrifugal-Bowl Separators; Mills; Threshing; Vegetable and Meat Cutters and Comminutors; Distillation.	11-12-47	1-24-47	1750
26. YOUNG, R. R., Electricity—Generation and Motive Power	1-10-48	11-20-46	1206
27. JAMES, S., Brushing, Scrubbing; Fluid Treatment of Textiles (Apparatus); Liquid Treatment of Solids; General Cleaning; Ironing; Brush, Broom and Mop Making.	7-2-47	12-20-46	3516
28. SOLYOM, H. L., Internal Combustion Engines (part); Cylinders; Pistons; Spring, Weight and Horsepower Motors; Land Vehicles, Dumping, Wheel Substitutes; Railway Wheels and Axles.	6-14-47	9-10-47	1048
29. SKLARIN, J. B., Baggage; Cloth, Leather, and Rubber Receptacles; Button Making; Woodworking; Tools.	3-6-47	1-22-47	3194
30. BISHOFF, A., Automatic Temperature and Humidity Regulation; Thermostats and Humidostats; Heating and Heating Systems; Illuminating Burners; Ammunition and Explosive Devices.	12-24-47	8-9-47	1286
31. DUNCOMBE, C. S., Mineral Oils; Carbocyclic or Acyclic Carbon Compounds (part)—e. g., Ketones, Aldehydes, Ethers, Hydroxy Compounds, Hydrocarbons, Halogenated Hydrocarbons.	1-5-48	1-6-48	2188
32. LESH, KARL R., Gas and Liquid Contact Apparatus; Heat Exchange; Gas Separation; Agitating; Wells; Earth Boring.	1-2-47	10-29-46	3178
33. KAUFFMAN, H. E., Bridges; Hydraulic and Earth Engineering; Building Structures; Roads and Pavements.	12-2-46	9-20-46	3555
34. SAPERSTEIN, S., Electricity—Transmission of Vehicles; Railways; Track Sanders; Signals and Indicators	3-6-47	8-28-46	1523
35. BROMLEY, E. D., Card and Sign Exhibiting; Dispensing; Filling and Closing Portable Receptacles; Ammunition and Explosive Charge Making.	6-2-47	9-21-46	2307
36. McFADYEN, A. D., Automatic Weighers; Measuring and Testing; Force Measuring	11-4-46	9-16-46	2068
37. WEAVER, M. E., Electricity, Circuit Makers and Breakers	12-29-47	2-7-47	1390
38. ARNOLD, D., Coating Processes and Apparatus; Coating or Plastic Compositions (part); Rubber	7-25-47	5-1-47	1833
39. WHITNEY, F. I., Fluid-Pressure Regulators; Valves; Water Distribution	3-10-47	8-29-46	2099
40. DRUMMOND, E. J., Receptacles (part); Packages	10-27-47	11-4-46	3273
41. HERTZ, M., Check-controlled Apparatus; Coin Handling; Article Dispensing Cabinets; Deposit Receptacles; Buckles, Buttons, Clasps.	1-21-47	9-23-46	2367
42. MARANS, H., Telegraphy (part); Electric Signaling; Electricity, Voltage Magnitude and Phase Control Systems; Variable Transformer and Reactor Structure.	12-30-47	1-9-48	1207
43. STONE, I. G., Medicines, Poisons and Cosmetics; Explosive Compositions; Sugar and Starch; Bleaching and Dyeing; Fluid Treatment of Textiles; Hides, Skins and Leathers.	12-15-47	12-3-47	1331
44. HARVEY, L. P., Refrigeration; Preserving	9-28-46	7-22-46	1122
45. MANTER, W. B., Shafting and Flexible Shaft Couplings; Wheels, Tires and Axles; Lubrication; Bearings and Guides; Belt and Sprocket Gearing; Spring Devices; Animal Draft Appliances; Vehicle Fenders.	3-16-47	10-2-46	2567
46. MUSHAKE, W. I., Concentrating Evaporators; Fluid Sprinkling, Spraying and Diffusing; Fire Extinguishers; Liquid Heaters and Vaporizers; Kitchen and Table Articles.	6-11-47	8-17-46	1850

Total number of patent applications awaiting action, 155,248. Date of oldest new application, September 20, 1946; date of oldest amended application, April 16, 1946.

PATENT EXAMINING DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
47. KANOF, WM. J., Motor Vehicles; Land Vehicles (part); Fluid Pressure Brakes	12-1-47	6-9-47	2217
48. BERNSTEIN, S., Electricity, General Applications; Electric Igniters	12-27-47	2-24-47	1548
49. SHEFFIELD, E. L., Drying and Gas or Vapor Contact with Solids; Ventilation; Liquid Separation or Purification.	8-13-47	8-8-47	1563
50. LEVIN, SAMUEL, Synthetic Resins	12-29-47	8-18-47	2246
51. FRIEDMAN, M. H., Radiant Energy (part, e. g., Radio Transmission and Reception, Transmitters, Receivers, Antennae); Radiant Energy Communications.	12-29-47	7-1-47	1808
52. KNOTTS, M. K., Supports; Chucks; Joint Packing; Pipe and Rod Joints or Couplings; Tool-Handle Fastenings; Pipes and Tubular Conduits.	10-2-47	12-16-46	3845
53. BRINDISI, M. V., Label Pasting and Paper Hanging; Book Making; Manifolding; Printed Matter, Stationery; Paper Files and Binders; Cutlery; Closures, Partitions and Panels, Flexible and Portable.	4-12-47	9-4-46	3636
54. STRACHAN, O. W., Electric Lamp and Discharge Devices, Systems, Structure, Manufacture and Repair; Light Sensitive Circuits; Ray Energy Applications.	12-2-47	7-18-47	1753
55. BOWEN, S. T., Artificial Body Members; Dentistry; Surgery; Toilet	9-18-47	7-31-47	1976
56. COCKERILL, S., Electrical and Wave Energy Chemistry; Paper Making; Heating and Illuminating Gas	11-6-47	10-31-47	1079
57. MILLER, A. B., Cutting and Punching; Bolt, Nut, Rivet, Nail, Screw, Chain, and Horseshoe Making; Driven and Screw Fastenings; Nut and Bolt Locks; Jewelry; Toys	3-25-47	9-18-46	3622
58. DOWELL, E. F., Abrading; Food Apparatus; Bottles and Jars; Stone Working; Making Metal Tools and Implements.	12-31-46	1-20-47	2148
59. SHEPARD, P. W., Chemistry; Fertilizers; Gas, Heating and Illuminating; Heterocyclic Compounds (part)	8-23-47	4-4-47	2014
60. GLASS, R. L., Electricity—Heating; Welding; Furnaces; Battery Charging and Discharging; Consumable Electrode Lamp and Discharge Devices; Resistances and Rheostats; Prime Mover Dynamo Plants.	1-6-48	6-9-47	1439
61. LANNAN, J., Winding and Reeling; Pushing and Pulling; Horology; Time-Controlling Apparatus; Railway Mail Delivery; Boats, Buoys, Ships and Marine Propulsion.	11-29-46	6-17-46	3637
62. PUGH, E. C., Games; Tables; Amusement and Exercising Devices; Mechanical Guns and Projectors	5-1-47	9-12-46	1927
63. WINKELSTEIN, A. H., Fermentation; Foods and Beverages; Heterocyclic Compounds (part); Oils and Fats.	9-30-47	7-3-47	1474
64. NASH, P. M., Compositions—Coating or Plastic (part); Fuel and Miscellaneous	2-20-48	2-24-48	1562
65. McDERMOTT, F. P., Batteries; Electrical Conductors, Conduits, Insulators and Connectors; Illumination	12-31-47	5-29-47	2145
66. LISANN, I., Geometrical Instruments	6-5-47	4-16-46	2097
67. KRAFFT, C. F., Laminated Fabrics; Photographic Processes and Products; Ornamentation	7-23-47	4-25-47	2011
68. BERMAN, H., Brakes, Boring and Drilling; Clutches and Power Stop Control	1-10-48	7-15-47	1480
69. GALVIN, D. J., Electricity—Wave Transmission, Repeaters and Relays (e. g., Amplifiers), Galvanometers and Meters; Acoustics, Sound Recording; Recorders.	6-21-47	10-14-46	1874
DESIGNS: BREHM, G. L	2-10-47	1-15-48	7783

Total number of trade-mark applications awaiting action (including renewals and republications), 40,572. Date of oldest new application, Sept. 11, 1947; date of oldest amended application, Feb. 12, 1948.

TRADE-MARK EXAMINING DIVISIONS, EXAMINERS AND TRADE-MARK CLASSES UNDER EXAMINATION	Oldest new application and oldest action by applicant awaiting Office action		Applications awaiting action
	New	Amended	
1. BARBOUR, H. E., Classes 1, 4, 5, 6 (part), 12, 31, 44	1-8-48	6-10-48	3074
2. KASCHUB, H. E., Classes 2, 15, 30, 33, 36, 46, 50	9-29-47	3-20-48	5597
3. SUMMERS, O. S., Classes 13, 21, 23, 26	9-11-47	5-3-48	4816
4. BARR, E., Classes 3, 7, 39, 40, 41, 42, 43	9-26-47	2-12-48	4441
5. RACKNOR, M., Classes 8, 17, 20, 24, 25, 32, 37, 38, 45, 47, 48, 49	10-25-47	3-11-48	3431
6. STERBA, J. R., Classes 6 (part), 9, 10, 11, 14, 22, 27, 28, 29, 34, 35	11-12-47	6-23-48	3401
7. KEYS, O. M., Classes 16, 19, 55	9-15-47	3-30-48	2209
8. GEDIMAN, H. W. {Renewals / Republications} All Classes	8-19-48 / 10-22-47	9-2-48 / 9-4-48	66 / 13537

LIST OF TRADE-MARK APPLICANTS

PUBLISHED FOR OPPOSITION

Advance Solvents & Chemical Corporation, New York, N. Y. Chemical wetting agents, emulsifiers for paints, varnishes, resins and oils. Serial No. 517,687, Oct. 12. Class 6.

A-Jus-Tee Co.: *See*—
Reifman, Leo.

Aktiengesellschaft Chocolat Tobler, Bern, Switzerland. Chocolate, cocoa powder, assorted chocolates and candy. Serial No. 516,111, Oct. 12. Class 46.

Allison-Bedford Company, Chicago, Ill. Fruit preserves. Serial No. 541,063, Oct. 12. Class 46.

Allmann, F. R., Woolen Co.: *See*—
Allmann, Fred R.

Allmann, Fred R., doing business as F. R. Allmann Woolen Co., Brooklyn, N. Y. Woolen and worsted piece goods. Serial No. 544,526, Oct. 12. Class 42.

Amber Weaving Service: *See*—
Freitas, Amber.

Arlington Chemical Company, The, Yonkers, N. Y. Pharmaceutical preparation of amino acids and polypeptides from hydrolysed protein foods. Serial No. 557,335, Oct. 12. Class 6.

Armour and Company, Chicago, Ill. Soap. Serial No. 560,157, Oct. 12. Class 4.

Armstrong Cork Company, Lancaster, Pa. Prescription bottles. Serial No. 529,953, Oct. 12. Class 33.

B-L Electric Manufacturing Company, St. Louis, Mo., assignor to the Benwood-Linze Company. Syringe which is provided with a float. Serial No. 521,427, Oct. 12. Class 26.

Bates, C. J., & Son, Chester, Conn. Crochet hooks for hand use. Serial No. 531,989, Oct. 12. Class 40.

Bay State Abrasive Products Company, Westboro, Mass. Grinding, abrading, polishing, cutting-off, and knife sharpening wheels, etc. Serial No. 532,404, Oct. 12. Class 4.

Bay State Abrasive Products Company, Westboro, Mass. Furnace refractories and linings, and refractory cements. Serial No. 556,309, Oct. 12. Class 12.

Beam Manufacturing Company: *See*—
Solar Corporation.

Benwood-Linze Company: *See*—
B-L Electric Manufacturing Company.

Berger Brothers Company, The, New Haven, Conn. Corsets, girdles, and brassières. Serial No. 538,348, Oct. 12. Class 39.

Berlinger, Joseph, Company, New York, N. Y. Piece goods. Serial No. 544,967, Oct. 12. Class 42.

Berman's Jewelry Stores, Inc., Charleston, W. Va. Ladies' and men's watches. Serial No. 542,810, Oct. 12. Class 27.

Blanchard Deco-Plastics, Inc., Newark, N. J., assignor to Deco-Plastics, Inc., New York, N. Y. Plastic sheeting for upholstery, luggage, wall covering and other industrial uses. Serial No. 536,491, Oct. 12. Class 42.

Blue Buckle Overall Company, Inc., Lynchburg, Va. Overalls, coats, dungarees, etc. Serial No. 511,665, Oct. 12. Class 39.

Boonton Full Fashion Hosiery Mills, Boonton, N. J. Hosiery. Serial No. 531,294, Oct. 12. Class 39.

Bracke-Seib X-Ray Co., Inc., New York, N. Y. Fluoroscopes for use with babies. Serial No. 542,905, Oct. 12. Class 44.

Brannan and Ross Chemical Products Co., Dallas, Tex. Spot remover. Serial No. 521,318, Oct. 12. Class 4.

Brightwater Paper Company, Dover, Del., and Adams, Mass. Writing paper. Serial No. 531,085, Oct. 12. Class 37.

Broemmel's Pharmaceuticals, San Francisco, Calif. Vitamin B complex compound in tablet form. Serial No. 487,989, Oct. 12. Class 6.

Brown & Bigelow, St. Paul, Minn. Mechanical pencils, leads, and erasers. Serial No. 512,374, Oct. 12. Class 37.

Brownville Board Company, Brownville, N. Y. Bristol board, poster board, and blanks. Serial No. 503,798, Oct. 12. Class 37.

Bulova Watch Company, Inc., New York, N. Y. Watches, watch movements and parts thereof and watchcases. Serial No. 523,766, Oct. 12. Class 27.

California Canners Associates, Los Angeles, Calif. Canned fruit juices for food purposes. Serial No. 506,006, Oct. 12. Class 46.

Cameo Fabrics, Inc., New York, N. Y. Woven textile fabrics of rayon yarn, in the piece. Serial No. 536,046, Oct. 12. Class 42.

Cannon, H. P., & Son, Inc., Bridgeville, Del. Canned vegetables and canned tomato juice. Serial No. 438,493, Oct. 12. Class 46.

Carsolite Corporation, Maywood, Ill. Cleanser and renovator for terrazzo floors. Serial No. 551,167, Oct. 12. Class 4.

Caterpillar Tractor Co., Peoria, Ill. Dump-wagons, wheel tractor-dump-wagon combinations, and structural parts for such products. Serial No. 540,644, Oct. 12. Class 19.

Century Ribbon Mills, Inc., New York, N. Y. Ribbons in reels, rolls and by the yard. Serial No. 537,004, Oct. 12. Class 42.

Chemical Bank & Trust Company, assignee: *See*—
Continental Bank & Trust Company of New York.

Christian Peper Tobacco Company, St. Louis, Mo. Cigarettes. Serial No. 562,178, Oct. 12. Class 17.

Coast-A-Way Toys, Petersburg, Ohio. Toy wagons and wheeled vehicles used on toy roller coasters and tracts therefor. Serial No. 512,159, Oct. 12. Class 22.

Consolidated Coal Company, The, St. Louis, Mo. Coal. Serial No. 527,289, Oct. 12. Class 1.

Consolidated Coal Company, The, St. Louis, Mo. Coal. Serial No. 527,445, Oct. 12. Class 1.

Continental Bank & Trust Company of New York, The, assignor to Chemical Bank & Trust Company, New York, N. Y. Periodical published weekly. Serial No. 499,766, Oct. 12. Class 38.

Craft Bag Corporation, The, Brooklyn, N. Y. Paper bags. Serial No. 544,327, Oct. 12. Class 2.

Crompton Company, Crompton, R. I. Fabrics in the piece. Serial No. 543,127, Oct. 12. Class 42.

Crompton Company, Crompton, R. I. Fabrics in the piece. Serial No. 543,133, Oct. 12. Class 42.

Crouse-Hinds Company, Syracuse, N. Y. Electrical apparatus for airports. Serial No. 503,555, Oct. 12. Class 21.

Cudahy Packing Company, The, Chicago, Ill. Soap powder combined with mineral ingredients. Serial No. 550,792, Oct. 12. Class 4.

Cunningham, Minnie, San Mateo, Calif. Absorbent bed pads. Serial No. 501,166, Oct. 12. Class 44.

Dabney Pharmacal Company: *See*—
Dabney, William C., Jr.

Dabney, William C., Jr., doing business as Dabney Pharmacal Company, Louisville, Ky. Fungicidal ointment and fungicidal powder. Serial No. 557,120, Oct. 12. Class 6.

Deco-Plastics, Inc., assignee: *See*—
Blanchard Deco-Plastics, Inc.

Duncan Coffee Company, Houston, Tex. Coffees. Serial No. 537,575, Oct. 12. Class 46.

Eckbro Manufacturing Company, Chicago, Ill. Clothing. Serial No. 537,439, Oct. 12. Class 39.

Escalante, Jose, & Co., Chicago, Ill. Cigars. Serial No. 533,239, Oct. 12. Class 17.

Refractory materials. Basic Refractories, Inc. 429,463, Apr. 29, 1947. Republished Oct. 12.
Refractory materials for furnace-linings and similar purposes. Basic Products Company. 112,465, Sept. 12, 1916. Republished Oct. 12.
Refractory materials for furnace linings and the like. Dolomite Products Company. 119,178, Oct. 30, 1917. Republished Oct. 12.

CLASS 13

Check valves, Inverted vent. R. H. Wager. 333,389. Mar. 17, 1936. Republished Oct. 12.
Chicken fryer, dutch oven, and casserole, Combined. Maco Corporation. 440,923. Oct. 12; Serial No. 503,300, published July 13, 1948.
Hydrant and parts thereof, Railroad water service. Murdock Mfg. and Supply Company. 440,997–8, Oct. 12; Serial Nos. 523,918–19, published July 13, 1948.
Nozzles for fire hose. Wooster Brass Company. 502,849, Oct. 12; Serial No. 529,518, published July 13, 1948.
Pipe fittings and pipe couplings. Brockway Company. 502,878, Oct. 12; Serial No. 531,437, published July 6, 1948.
Plugs, Cord. Garlock Packing Company. 257,033, May 28, 1929. Republished Oct. 12.
Plugs for cleaning condenser tubes, Cord. Garlock Packing Company. 250,480, renewed Dec. 11, 1948. O. G. Oct. 12.
Plugs for dry oil and gas wells, metal pipes, pipe-couplings, etc., Metal. National Supply Company. 120,992, Mar. 19, 1918. Republished Oct. 12.
Screws, drive screws, drive pins, etc. Parker-Kalon Corporation. 502,842. Oct. 12; Serial No. 529,196, published July 13, 1948.
Shower bath heads, tubular traps, chrome faucet handles, etc. Chicago Specialty Manufacturing Company. 440,914, Oct. 12; Serial No. 497,453, published July 6, 1948.
Sprinkler apparatus, Automatic. Grinnell Corporation. 502,772, Oct. 12; Serial No. 466,694, published July 13, 1948.
Steam specialties, vacuum traps, steam and oil separators, etc. Strong, Carlisle & Hammond Company. 161,644, Nov. 14, 1922. Republished Oct. 12.
Utensils, Aluminum culinary. F. L. Talge. 318,299, Oct. 23, 1934. Republished Oct. 12.
Valve and seat assemblies for steam traps. Strong, Carlisle & Hammond Company. 426,269, Dec. 24, 1946. Republished Oct. 12.
Valves, Flow control, pressure reducing valves, pressure relief valves, etc. Bell & Gossett Company. 502,803, Oct. 12; Serial No. 523,349, published July 13, 1948.

CLASS 14

Alloys. Eutectic Welding Alloys Corporation. 428,270, Mar. 18, 1947. Republished Oct. 12.
Castings and forgings, Rough and semi-finished metal. General Steel Castings Corporation. 311,490, Mar. 27, 1934. Republished Oct. 12.
Coating metal and soldering metal, Noncorrosive. American Machine & Foundry Company. 250,782, renewed Dec. 18, 1948. O. G. Oct. 12.
Steels in bars, billets, and shapes, Tool. Carpenter Steel Company. 244,863, renewed July 31, 1948. O. G. Oct. 12.
Welding electrodes. R. D. Wasserman. 416,971, Oct. 9, 1945. Republished Oct. 12.

CLASS 15

Grease for stopcocks and the like. W. H. Hart. 132,165, June 15, 1920. Republished Oct. 12.
Oil for automobiles, Lubricating. Gibson Oil Company. 245,629, renewed Aug. 21, 1948. O. G. Oct. 12.
Oils and greases, Lubricating. G. B. Carran. 201,328, July 21, 1925. Republished Oct. 12.
Oils and greases, Naphtha and lubricating. R. J. Brown Petroleum Company. 158,906, Sept. 19, 1922. Republished Oct. 12.
Oils and lubricant oils and greases, Motor fuel. Pennzoil Company. 248,431, renewed Oct. 23, 1948. O. G. Oct. 12.
Oils, Lubricating. Marquette Petroleum Products, Inc. 198,316, May 12, 1935. Republished Oct. 12.
Oils, Soluble. Oakite Products, Inc. 418,060, Nov. 27, 1945. Republished Oct. 12.

CLASS 16

Coating in the nature of a paint, White tire, black tire paint, automobile polish and cleaner, etc. Dunlop Tire and Rubber Corporation. 440,958, Oct. 12; Serial No. 513,616, published July 6, 1948.
Coating preparation, Liquid. Kedmont Manufacturing & Waterproofing Co. 502,799, Oct. 12; Serial No. 522,029, published June 29, 1948.
Coatings, Resinous plastic. Products-Research-Service, Inc. 440,917, Oct. 12; Serial No. 500,897, published June 29, 1948.
Covering material, Protective plastic. Griscom Russell Company. 440,906, Oct. 12; Serial No. 483,771, published June 29, 1948.
Diluents for use in the manufacture of lacquers and lacquer thinners. Standard Oil Company of California. 440,971, Oct. 12; Serial No. 518,791, published July 6, 1948.
Enamel paint, Ready mixed. W. H. La Vine. 441,004, Oct. 12; Serial No. 525,608, published July 6, 1948.
Enamel, Ready-mixed baking. Talon, Inc. 502,823, Oct. 12; Serial No. 527,922, published July 6, 1948.
Finishes, Painters' gloss and flat; mixed, ready mixed, cold-water, and paste paints, etc. Acme White Lead & Color Works. 248,517, renewed Oct. 23, 1948. O. G. Oct. 12.
Floor coatings, Protective. Tremco Manufacturing Company. 418,382, Dec. 18, 1945. Republished Oct. 12.
Lacquer emulsions. Rohm & Haas Company. 440,990, Oct. 12; Serial No. 523,281, published June 29, 1948.
Lacquers, Nitrocellulose. Red Spot Paint & Varnish Co., Inc. 440,992. Oct. 12; Serial No. 523,539, published June 29, 1948.
Oils and their fractions, High-boiling aromatic. Standard Oil Company. 440,951, Oct. 12; Serial No. 512,349, published July 6, 1948.
Paint. Chas. R. Long, Jr., Co. 70,215, re-renewed Aug. 11, 1948. O. G. Oct. 12.
Paint and painters' materials. Tremco Manufacturing Company. 270,849, May 13, 1930. Republished Oct. 12.
Paint, Corrosion resistant. Merchants Chemical Company. 440,956, Oct. 12; Serial No. 513,438, published July 6, 1948.
Paint, Creosote exterior. Phelan-Faust Paint Mfg. Co. 502,911, Oct. 12; Serial No. 533,368, published July 6, 1948.
Paint enamels. Atlantic Calsomine Co., Inc. 440,966, Oct. 12; Serial No. 516,808, published July 6, 1948.
Paint enamels, lacquer enamels, lacquers, painters' wall sizings, etc. Peninsular Paint and Varnish Company. 247,900, renewed Oct. 9, 1948. O. G. Oct. 12.
Paint, Fire retardant. Reardon Company. 502,858, Oct. 12; Serial No. 530,430, published July 6, 1948.

Paint, Ready-mixed. Rust-Oleum Corporation. 441,010, Oct. 12; Serial No. 514,243.
Paint, Ready-mixed, paint enamel, and varnishes. Boston Varnish Company. 241,765, renewed May 8, 1948. O. G. Oct. 12.
Paint, Ready-mixed, paint enamel, and varnishes. Boston Varnish Company. 502,928, Oct. 12; Serial No. 536,492, published June 29, 1948.
Paint remover and paint brush cleaner, Chemical. Penetone Company. 440,994–5, Oct. 12; Serial Nos. 523,799–800, published July 6, 1948.
Paint remover compound. Industrial Chemical Development Corp. 440,980, Oct. 12; Serial No. 521,014, published July 6, 1948.
Paint thinner. Tri-State Paint & Chemical Co. 440,985, Oct. 12; Serial No. 522,448, published July 6, 1948.
Paints and paint enamel, Ready-mixed. Spencer-Adams Paint Company. 440,993, Oct. 12; Serial No. 523,550, published June 29, 1948.
Paints, Dry, paste, and ready-mixed, and varnishes. Baker Paint & Varnish Co. 243,407, renewed June 19, 1948. O. G. Oct. 12.
Paints, Fluorescent ready-mixed, lacquers, lacquer-enamels, and water colors. Switzer Brothers. 440,924, Oct. 12; Serial No. 503,479, published July 6, 1948.
Paints in paste or semi-paste form. Seidlitz Paint & Varnish Co. 502,927, Oct. 12; Serial No. 536,156, published July 6, 1948.
Paints, Porch and deck. R. N. Nason & Co. 502,814, Oct. 12; Serial No. 527,075, published June 29, 1948.
Paints, varnishes, lacquers, etc. R. N. Nason & Co. 441,001, Oct. 12; Serial No. 525,493, published July 6, 1948.
Polishes and wax. Morton Manufacturing Corporation. 502,783, Oct. 12; Serial No. 506,186, published June 29, 1948.
Polishes and waxes, Furniture and floor. H. G. Strauss. 440,957, Oct. 12; Serial No. 513,474, published July 6, 1948.
Primers and surfacers, etc. R. N. Nason & Co. 502,813, Oct. 12; Serial No. 527,071, published June 29, 1948.
Resinous materials or solutions, Synthetic. Resinous Products & Chemical Company. 440,940, Oct. 12; Serial No. 507,853, published July 13, 1948.
Sealer, Wood penetrating floor. Phelan-Faust Paint Mfg. Co. 502,910, Oct. 12; Serial No. 533,367, published July 6, 1948.
Varnish. Chicago Mica Company. 277,192, Nov. 11, 1930. Republished Oct. 12.
Varnish. Davis Paint Co. 440,983, Oct. 12; Serial No. 521,563, published July 6, 1948.
Varnish. Patek Brothers, Inc. 502,888, Oct. 12; Serial No. 531,830, published June 29, 1948.
Wax and furniture polish, Floor. Household Paper Products Co. 440,930, Oct. 12; Serial No. 504,768, published July 6, 1948.

CLASS 17

Cigarettes. Brothers Tobacco Corporation. 440,963, Oct. 12; Serial No. 515,603, published July 20, 1948.
Cigarettes. R. L. Swain Tobacco Company, Inc. 440,960, Oct. 12; Serial No. 514,445, published July 20, 1948.
Cigars. Bayuk Cigars Incorporated. 251,776, renewed Jan. 15, 1949. O. G. Oct. 12.
Cigars. Consolidated Cigar Corporation. 502,797, Oct. 12; Serial No. 519,569, published July 20, 1948.
Cigars, cheroots, cigarettes, etc. D. Emil Klein Co., Inc. 502,851, Oct. 12; Serial No. 529,778, published July 13, 1948.
Tobacco and tobacco products. Larus & Brother Company, Inc. 502,938, Oct. 12; Serial No. 539,179, published July 13, 1948.

CLASS 19

Airplanes and structural parts thereof. Consolidated Vultee Aircraft Corporation. 502,951, Oct. 12; Serial No. 505,335.
Automobile body replacement panels and patches. Schofield Manufacturing Co. 502,974, Oct. 12; Serial No. 537,083.
Repair sets for reconditioning or repairing shock absorbers of automotive vehicles. Micro-Linor Service Corporation. 502,954, Oct. 12; Serial No. 507,831.
Trailers, Platform, stake body trailers, livestock trailers, etc. Dorsey Trailers. 502,965, Oct. 12; Serial No. 530,179.

CLASS 21

Door opening mechanism, Combination mechanically and electrically operated. Vendo Company. 433,122, Sept. 23, 1947. Republished Oct. 12.
Elevator parts. Shepard Elevator Company. 430,166, June 10, 1947. Republished Oct. 12.
Lanterns, Electric, electric flash lights, electric searchlights, etc. Yale Electric Corporation. 250,832, renewed Dec. 18, 1948. O. G. Oct. 12.
Plates, Metal. Oakite Products, Inc. 423,464, Sept. 3, 1946. Republished Oct. 12.
Radio receiver-electric alarm clock combinations. Telechron Inc. 502,875, Oct. 12; Serial No. 531,256, published June 8, 1948.
Radio receiving sets and parts thereof. Arkwright, Incorporated. 427,414, Feb. 11, 1947. Republished Oct. 12.
Suction cleaners and parts thereof, etc., Electrically operated. P. A. Grier Company. 405,109, Jan. 11, 1944. Republished Oct. 12.
Switch plate, Electrically lighted wall. Associated Projects Co. 413,460, Apr. 24, 1945. Republished Oct. 12.
Voltage regulators, head light relays, horn relays, etc. Electra Manufacturing Company. 433,114, Sept. 23, 1947. Republished Oct. 12.

CLASS 22

Bowling balls. Brunswick-Balke-Collender Company. 132,902, July 6, 1920. Republished Oct. 12.
Dice, dice shakers, dominoes, poker chips, etc. G. E. Koppe. 249,951, renewed Nov. 17, 1948. O. G. Oct. 12.
Fishing rods. Montague Rod and Reel Company. 247,925–30, renewed Oct. 9, 1948. O. G. Oct. 12.
Fishing rods. Montague Rod and Reel Company. 248,465, renewed Oct. 23, 1948. O. G. Oct. 12.
Sleds, Coasting. S. L. Allen & Co., Inc. 252,134, renewed Jan. 22, 1949. O. G. Oct. 12.
Toys operated by water and/or electricity. Hydro-Toys Mfg. Co. 502,962, Oct. 12; Serial No. 529,464.

CLASS 23

Air cylinders for mechanical power operation. Bellows Company. 502,779, Oct. 12; Serial No. 495,443, published June 29, 1948.
Aligning machines and parts therefor, Automobile frame and axle straightening and wheel. Builders Ornamental Iron Company. 502,796, Oct. 12; Serial No. 517,236, published June 29, 1948.
Aligning machines and parts therefor, Automobile frame and axle straightening and wheel. Builders Ornamental Iron Company. 502,800, Oct. 12; Serial No. 522,265, published June 29, 1948.
Automatic regulators. Le Roi Company. 396,112, June 30, 1942. Republished Oct. 12.
Automobile accessories. R. W. Kerr Co. 502,786, Oct. 12; Serial No. 508,292, published July 13, 1948.
Automotive and industrial lubricating equipment. Aro Equipment Corporation. 428,167, Mar. 11, 1947. Republished Oct. 12.
Bakery machinery. W. K. Booth. 440,988, Oct. 12; Serial No. 522,956, published June 29, 1948.
Ball bearings, roller bearings, parts thereof and mounting accessories thereto. S K F Industries, Inc. 502,840, Oct. 12; Serial No. 529,102, published July 13, 1948.
Ball bearings, roller bearings, parts thereof and mounting accessories thereto, etc. S K F Industries, Inc. 502,839, Oct. 12; Serial No. 529,098, published July 13, 1948.
Bearings and bearing seals, Anti-friction. Stephens-Adamson Mfg. Co. 380,006, Aug. 6, 1940. Republished Oct. 12.
C-clamps. Cincinnati Tool Company. 502,867, Oct. 12; Serial No. 530,720, published July 13, 1948.
Carbonating apparatus, Electrically controlled. Bastian-Blessing Company. 440,925, Oct. 12; Serial No. 503,968, published July 13, 1948.
Clamps. Cincinnati Tool Company. 294,181, May 24, 1932. Republished Oct. 12.
Cotton gins and distributors, lint flues, etc. Continental Gin Co. 147,287, Oct. 11, 1921. Republished Oct. 12.
Cotton gins, cottonseed linters, feeders and condensers for gins, etc. Continental Gin Company. 224,283–4, Feb. 22, 1927. Republished Oct. 12.
Cranes, Power, power shovels and power dragline machines. Thew Shovel Company. 502,843, Oct. 12; Serial No. 529,213, published June 29, 1948.
Cutting machines and parts thereof, Gear. Farrel Foundry & Machine Company. 179,317, Feb. 5, 1924. Republished Oct. 12.
Die holders. M. E. Cunningham Company. 426,836, Jan. 14, 1947. Republished Oct. 12.
Dough mixers, Horizontal, flour sifters, flour elevators, etc. Triumph Manufacturing Co. 502,832, Oct. 12; Serial No. 528,749, published July 6, 1948.
Drilling units and pumping units, Oil field. Climax Engineering Company. 405,591, Feb. 8, 1944. Republished Oct. 12.
Engines and road working machines, Gasolene and traction. Holt Manufacturing Company. 85,816, Mar. 19, 1912. Republished Oct. 12.
Engraving machines, Variously motivated power driven, profile grinding and cutting machines, etc. 502,780, Oct. 12; Serial No. 499,024, published June 29, 1948.
Feed for a drill press, Power. Bellows Company. 502,773, Oct. 12; Serial No. 481,880, published June 29, 1948.
Feeds for machine tools, Pneumatic. Bellows Company. 502,774, Oct. 12; Serial No. 488,732, published June 29, 1948.
Filters in the nature of accessories for internal combustion engines. Fram Corporation. 440,905, Oct. 12; Serial No. 441,200, published June 29, 1948.
Fire extinguishing apparatus, Portable hand. International Fire Equipment Corporation. 251,403, renewed Jan. 8, 1949. O. G. Oct. 12.
Gear manufacturing equipment. National Broach & Machine Co. 356,074, Apr. 12, 1938. Republished Oct. 12.
Grain cleaning, scalping, and separating machinery, graders, and stackers. Superior Separator Company. 502,817, Oct. 12; Serial No. 527,365, published July 13, 1948.
Hand-clamps. Cincinnati Tool Co. 140,773, Mar. 29, 1921. Republished Oct. 12.
Harvesting machine. V. Lemanski. 440,968, Oct. 12; Serial No. 518,232, published June 29, 1948.

Ice crushers. Rival Manufacturing Company. 422,185, July 9, 1946. Republished Oct. 12.
Implements, Farm. Southern Iron & Equipment Company. 502,944, Oct. 12; Serial No. 554,849, published July 13, 1948.
Internal-combustion engines. Climax Engineering Company. 283,120, May 19, 1931. Republished Oct. 12.
Internal combustion engines. Climax Engineering Company. 283,205, May 19, 1931. Republished Oct. 12.
Internal combustion engines, air or gas compressors, and parts thereof. Le Roi Company. 410,502, Nov. 28, 1944. Republished Oct. 12.
Internal combustion engines, air or gas compressors, and parts thereof. Le Roi Company. 412,785, Mar. 27, 1945. Republished Oct. 12.
Jacks, Hand operated auto, and auto spark plug wrenches. S. & J. Machine Corp. 440,936, Oct. 12; Serial No. 507,433, published June 29, 1948.
Knives for woodworking machines. Yates-American Machine Company. 252,457, Feb. 5, 1929. Republished Oct. 12.
Knives, Pocket, hunting knives, bread knives, etc. Camillus Cutlery Company. 502,844, Oct. 12; Serial No. 529,229, published June 29, 1948.
Loaders or lift trucks, Utility. West Coast Machinery, Inc. 440,987, Oct. 12; Serial No. 522,581, published June 29, 1948.
Machines for mixing concrete, mortar, and similar aggregates. Bridwell Boiler Works. 440,950, Oct. 12; Serial No. 511,670, published July 13, 1948.
Mechanical apparatus including a valve. Galland-Henning Mfg. Co. 440,937, Oct. 12; Serial No. 507,525, published June 29, 1948.
Mechanic's equipment, Garage. Associated Producers, Inc. 440,959, Oct. 12; Serial No. 513,791, published June 17, 1947.
Metal casting and metal foundry equipment. Diamond Clamp & Flask Company. 440,967, Oct. 12; Serial No. 517,890, published July 13, 1948.
Metal working machinery. Consolidated Machine Tool Corporation. 502,819, Oct. 12; Serial No. 527,449, published July 6, 1948.
Molding machines, vibrators, and valves therefor. Spo, Incorporated. 440,946, Oct. 12; Serial No. 509,963, published June 29, 1948.
Motors, Outboard. Champion Motors Company. 502,834, Oct. 12; Serial No. 528,768, published June 29, 1948.
Oil engines. Continental Gin Company. 198,624, May 19, 1925. Republished Oct. 12.
Openers, Can. Regina Corporation. 502,835, Oct. 12; Serial No. 528,819, published July 6, 1948.
Openers, Can. Rival Manufacturing Company. 419,922, Mar. 12, 1946. Republished Oct. 12.
Press metal machinery, comprising mechanical and hydraulic punch presses; press brakes, etc. Verson All-steel Press Company. 502,845, Oct. 12; Serial No. 529,323, published June 29, 1948.
Presses, Hydraulic rubber, hose-making machines, rubber calenders, etc. Farrel-Birmingham Company, Incorporated. 422,642, Aug. 6, 1946. Republished Oct. 12.
Presses, Offset printing. Electric Boat Company. 440,999, Oct. 12; Serial No. 524,121, published July 13, 1948.
Presses, Punch, press brakes, and like metal working presses and parts therefor. Warren City Manufacturing Company. 440,943, Oct. 12; Serial No. 508,827, published July 6, 1948.
Pumps and parts thereof. Tungstone Products Limited. 440,921, Oct. 12; Serial No. 502,037, published June 29, 1948.
Regulators, Automobile engine oil. C. F. Johnston. 440,913, Oct. 12; Serial No. 496,912, published July 13, 1948.
Saws, Napier Saw Works, Inc. 243,803, renewed June 26, 1948. O. G. Oct. 12.
Scrapers, Organic plastic. Magic Finger, Inc. 440,972, Oct. 12; Serial No. 518,960, published July 6, 1948.
Soldering irons, Electric. A. L. Johnson. 386,556, Apr. 15, 1941. Republished Oct. 12.
Tableware, cleaning and salvaging machines. Salvajor Company. 415,198, July 31, 1945. Republished Oct. 12.
Tong springs, tong dies and tong pins. Web Wilson Oil Tools Inc. 502,785, Oct. 12; Serial No. 506,563, published July 13, 1948.
Tools, Hand. F. B. Lewandowski. 440,982, Oct. 12; Serial No. 521,266, published July 6, 1948.
Tools, Kitchen. Everedy Company. 440,979, Oct. 12; Serial No. 521,007, published July 6, 1948.
Tractors, plows, cultivators, etc. Le Roi Company. 398,387, Oct. 27, 1942. Republished Oct. 12.
Water pumps. Jabsco Pump Company. 422,191, July 9, 1946. Republished Oct. 12.
Well drillers. E. S. Russell. 502,831, Oct. 12; Serial No. 528,646, published June 29, 1948.

Read, Julia, New York, N. Y. Hanger or similar article. 151,404, Oct. 12.
Rehrmann, Edward A., assignor to State Welding Works, Inc., New York, N. Y. Grill guard for automobile radiators. 151,405, Oct. 12.
Reinecke, Jean O., Oak Park, assignor to Motorola, Inc., Chicago, Ill. Radio receiver cabinet. 151,406, Oct. 12.
Rerea, Mariano, Brooklyn, N. Y. Combined lamp and flower pot. 151,407, Oct. 12.
Ricchiuti, Paul S., assignee: *See*—
Kately, Mathias J., and Peckwas.
Richards, Kenneth D., Gardner, Mass. Shot gun sight. 151,408, Oct. 12.
Rogers, Helyn M., Minneapolis, Minn. Brooch or similar article. 151,409, Oct. 12.
Rosenbaum, Harry S., Baltimore, Md. Lower rail for Venetian blinds. 151,410, Oct. 12.
Roseberg, Charles S., Chicago, Ill. Merchandising counter display lamp. 151,411, Oct. 12.
Ruczynski, Narcy B., Detroit, Mich. Aerial toy. 151,412, Oct. 12.
Sanchez, Lee, and T. E. Lord, Hornitos, Calif. Combined ash tray and cigarette holder. 151,413, Oct. 12.
Schladermundt, Peter: *See*—
Thygeson, Arthur T., and Schladermundt.
Smith, Frederick R., Toledo, Ohio. Vegetable slicer. 151,414, Oct. 12.
Solomon, Mortimer, New York, N. Y. Bathing suit. 151,415, Oct. 12.
Standard Gas Equipment Corporation, assignee: *See*—
Felver, Richard I.
State Welding Works, Inc., assignee: *See*—
Rehrmann, Edward A.
Sundberg, Carl W., Birmingham, assignor to Pratt Manufacturing Company, Coldwater, Mich. Sled. 151,416, Oct. 12.
Sverdlik, Jack D., West Hempstead, Long Island, N. Y. Combined high chair and baby walker. 151,417, Oct. 12.
Teague, Walter D., Annandale, assignor to Finch Telecommunications, Inc., Passaic, N. J. Facsimile recorder. 151,418, Oct. 12.
Teague, Walter D., Annandale, assignor to Finch Telecommunications, Inc., Passaic, N. J. Facsimile recorder. 151,419, Oct. 12.
Teague, Walter D., Annandale, assignor to Finch Telecommunications, Inc., Passaic, N. J. Facsimile recorder. 151,420, Oct. 12.
Thygeson, Arthur T., New York, and P. Schladermundt, Bronxville, N. Y., assignors to National Casket Company, Inc., Boston, Mass. Burial casket. 151,421, Oct. 12.
Trifari, Krussman & Fishel, Inc., assignee: *See*—
Philippe, Alfred.
United Advertising Corporation, assignee: *See*—
Hathaway, William R.
Van Cleef & Arpels, Inc., assignee: *See*—
Duvalet, Maurice.
Wapnick, Herman, Brooklyn, N. Y. Dress ornament. 151,422, Oct. 12.
Weidlich Bros. Manufacturing Company, assignee: *See*—
Flauder, Alfred J.
Well, Lewis P., Cynwyd, Pa. Portable electric fountain. 151,423, Oct. 12.
Weisblatt, Sol: *See*—
Margolis, David, and Weisblatt.
Wheeler, Blanche S.: *See*—
Farnam, Helen R., and Wheeler.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 12TH DAY OF OCTOBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Ackerman, Milton J.: *See*—
Clammer, Edward S., Ackerman, and Barton.
Acme Electric Corporation, assignee: *See*—
Comstock, James A.
Adair, Paul F., Dayton, Ohio. Relative temperature indicator. 2,450,871, Oct. 12.
Adams, Heston D., Mount Morrison, Colo. Dispensing package for cartridge reloading components. 2,451,015, Oct. 12.
Addressograph-Multigraph Corporation, assignee: *See*—
Gollwitzer, Walter T.
Aeroquip Corporation, assignee: *See*—
Main, Benjamin A., Jr.
Affleck, Theodore H., North Hollywood, assignor, by mesne assignments, to W. A. Cooke, Hollywood, Calif. Fingertip control for tractor-trailer air brake systems. 2,451,268, Oct. 12.
Agriculture, the United States of America as represented by the Secretary of, assignee: *See*—
Cowan, John C., Falkenburg, Teeter, and Skell.
Sanderson, William J.
Aiken, Elmer W., Dayton, Ohio, assignor to the United States of America as represented by the Secretary of War. Condenser tester. 2,450,872, Oct. 12.
Albertson, Noel F., East Greenbush, S. Archer, and C. M. Suter, Albany, assignors, by mesne assignments, to Winthrop-Stearns Inc., New York, N. Y. Alkyl esters of α-acylamino, α-cyano, β-(3-indole)-propionic acid. 2,451,310, Oct. 12.
Alderfer, Sterling W., Akron, Ohio. Elastic thread and process of making same. 2,450,016, Oct. 12.
Alderson, Witty L., Jr., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Long-chain secondary alkyl N-substituted polymeric styrene/maleamic acids and dispersions containing them. 2,451,370, Oct. 12.
Aldreany, Victor, Danbury, Conn. Movie camera attachment for making lap dissolves. 2,450,017, Oct. 12.
Alexanderson, Ernst F. W., A. H. Mittag, Schenectady, N. Y., and M. W. Sims, Fort Wayne, Ind., assignors to General Electric Company. Electric frequency transformation system. 2,451,189, Oct. 12.
Allen, Frank M., Azusa, and R. E. Snyder, Pasadena, assignors to The All-Flex Corporation, Los Angeles, Calif. Flexible tubing joint. 2,451,269, Oct. 12.
Allen, Paul E., Skokie, assignor to Baby's Pal Company, Chicago, Ill. Bottle holder. 2,450,927, Oct. 12.
All-Flex Corporation, The, assignee: *See*—
Allen, Frank M., and Snyder.
Alliance Manufacturing Company, assignee: *See*—
Schneider, Emmor V.
Alliance Porcelain Products Company, The, assignee: *See*—
Chesney, Robert M.
Allison, Ira E., McLoud, Okla. Hay baler. 2,450,928, Oct. 12.
Allwein, Aloysius F., assignor to The Brown Instrument Company, Philadelphia, Pa. Flowmeter. 2,451,425, Oct. 12.
Alpak, assignee: *See*—
Crane, Walton B.
American Car and Foundry Company, assignee: *See*—
Pancake, Herman H.
American Cyanamid Company, assignee: *See*—
Amick, Chester A., and Kenle.
Baker, Bernard R.
Baker, Bernard R., and Querry.
Blann, William A.
Dorfman, Louis, and Bernstein.
Erickson, John G.
American Linen Supply Co., assignee: *See*—
Birr, Rudolph G.
Steiner, Frank G., and Birr.
American Machine & Foundry Company: *See*—
Newman, Max M.
American Steel and Wire Company of New Jersey, The, assignee: *See*—
Thompson, James R.
Ammerman, Harry E., Silver Spring, Md. Window bracket. 2,451,143, Oct. 12.
Amick, Chester A., and R. H. Kienle, Bound Brook, N. J., assignors to American Cyanamid Company, New York, N. Y. Printing with vat colors. 2,451,270, Oct. 12.
Amsler Morton Corporation, assignee: *See*—
Morton, William A.
Andersen, Carl N., Pleasantville, N. Y., assignor, by mesne assignments, to Gallowhur Chemical Corporation. Metallo-organic compositions. 2,451,052, Oct. 12.
Anderson, David P., Pittsburgh, Pa., and S. Kneass, Jr., Boylston, assignors to Morgan Construction Company, Worcester, Mass. Conveying mechanism for billet heating furnaces. 2,451,053, Oct. 12.
Anderson, Frank W., North Weymouth, Mass. Stud welding gun. 2,451,190, Oct. 12.
Andreasen, Harry N., Sr., Chicago, Ill. Golf tee. 2,451,311, Oct. 12.
Andrew, Edward F., assignee: *See*—
O'Brien, William J.
Antony, Charles, Jr., Rockville Centre, N. Y., assignor to The Sperry Corporation. Tube socket. 2,450,873, Oct. 12.
Apex, Tool & Cutter Company, assignee: *See*—
Sheridan, Henry M.
Arboll, Rolf, assignee: *See*—
Fjeld, Thorbjorn.
Archer, Sydney: *See*—
Albertson, Noel F., Archer, and Suter.
Arengo-Jones, Rhys W., assignor to Thomas J. Lipton Limited, Toronto, Ontario, Canada. Dehydrated food product and making the same. 2,451,312, Oct. 12.
Arengo-Jones, Rhys W., assignor to Thomas J. Lipton Limited, Toronto, Ontario, Canada. Dehydrated fruit pie filling. 2,451,313, Oct. 12.
Armstrong Cork Company, assignee: *See*—
Lyall, John D.
Park, Arthur D., and Johnson.
Armstrong, James, & Company Limited, assignee: *See*—
Newberry, Stanley.
Arrow-Hart & Hegeman Electric Company, assignee: *See*—
Johnson, David W.
Ashworth, Fred, Wenham, and C. W. Carter, Topsfield, Mass., assignors to United Shoe Machinery Corporation, Flemington, N. J. Rocket launcher. 2,450,929, Oct. 12.
Atkinson, Linwood, Hillman, Mich. Self-aligning swinging drawbar. 2,451,054, Oct. 12.
Attorney General of the United States, vested in the: *See*—
Ferretti, Antonio.
Aubrey, William M., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Froth level controlling device. 2,451,144, Oct. 12.
Austin Company, The, assignee: *See*—
Gannett, Joseph K., Smith, Jr., and Saveland.
Auto Diesel Piston Ring Company, The, assignee: *See*—
Heinrich, August H.
Automatic Electric Laboratories, Inc., assignee: *See*—
Blair, William R., and Woodruff.
Candy, Charles M., and Owen.
Herrick, Roswell H.
McCreary, Harold J.
Sargisson, Robert L., and Obergfell.
Baby's Pal Company, assignee: *See*—
Allen, Paul E.
Backstrom, John A., Euclid, Ohio, assignor to The Breck Company. Cutting toolholding means for machine tools. 2,451,371, Oct. 12.
Baclawski, Theodore, Philadelphia, Pa., assignor to Philco Corporation. Electrical bridge network. 2,450,930, Oct. 12.
Bair, Robert R., H. L. Benner, Niagara Falls, and J. F. Walker, Lewiston, N. Y., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Bright zinc plating. 2,451,426, Oct. 12.
Baker, Albert L., Summit, A. R. C. Markl, Teaneck, and A. Blahut, Trenton, N. J., assignors to The M. W. Kellogg Company, New York, N. Y. Lined pipe. 2,451,145, Oct. 12.
Baker, Albert L., Summit, W. H. Hill, Pennington, and A. R. C. Markl, Teaneck, N. J., assignors to The M. W. Kellogg Company, New York, N. Y. Internally insulation lined vessel. 2,451,146, Oct. 12.
Baker, Bernard R., Nanuet, assignor, by mesne assignments, to American Cyanamid Company, New York, N. Y. Hydroxythiophane carboxylic acids and esters and methods of preparing same. 2,451,427, Oct. 12.
Baker, Bernard R., Nanuet, assignor, by mesne assignments, to American Cyanamid Company, New York, N. Y. Dihydrothiophenes and preparing same. 2,451,428, Oct. 12.
Baker, Bernard R., Nanuet, and M. V. Querry, Pearl River, assignors, by mesne assignments, to American Cyanamid Company, New York, N. Y. Thiophane carboxyhydrazides and preparing the same. 2,451,429, Oct. 12.
Baldwin Locomotive Works, assignee: *See*—
Tate, Malcolm C.
Ballenger, Clarence E., Spartanburg, S. C. Sandal with adjustable front and rear straps. 2,451,372, Oct. 12.

Balster, George L., Seward, Nebr. V-type internal-combustion engine. 2,451,271, Oct. 12.
Barber-Colman Company, assignee: *See*—
Ransome, Stafford M.
Barone, Salvatore A., Freeport, N. Y., assignor, by mesne assignments, to Jefferson Standard Broadcasting Company. Carrier frequency shift signaling. 2,451,430, Oct. 12.
Barton, George A.: *See*—
Clammer, Edward S., Ackerman, and Barton.
Bault, William V., Watseka, Ill. Chuck. 2,450,931, Oct. 12.
Beach, Leland K., Mountainside, N. J., assignor to Standard Oil Development Company. Production of alkyl cyanides. 2,451,314, Oct. 12.
Beach, Lennox F.: *See*—
Braddon, Frederick D., and Lennox.
Beacham, Thomas E., London, England. Fuel pump. 2,451,055, Oct. 12.
Beachler, Edward D., assignor to Beloit Iron Works, Beloit, Wis. Rotating tool lathe. 2,451,147, Oct. 12.
Beall, Charles R., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Speed controlled motor-driven gate. 2,451,373, Oct. 12.
Bear Manufacturing Company, assignee: *See*—
South, Chester.
Beard, Edward S., Spring City, Pa. Textile spreader. 2,450,932, Oct. 12.
Bechman, William C.: *See*—
Ziskal, Joseph F., and Bechman.
Bell Aircraft Corporation, assignee: *See*—
Bell, Lawrence D.
Williams, William W.
Williams, William W., and Bowers.
Bell, Joseph D., San Francisco, Calif. Engine drive. 2,451,374, Oct. 12.
Bell, Lawrence D., Eggertsville, assignor to Bell Aircraft Corporation, Wheatfield, N. Y. Horn control. 2,450,933, Oct. 12.
Bell, Richmond T., Highland Park, assignor to The Pure Oil Company, Chicago, Ill. Conversion of hydrocarbons. 2,451,375, Oct. 12.
Bell Telephone Laboratories, Incorporated, assignee: *See*—
Mallina, Rudolph F.
Pierce, John R.
Robinson, Albert L.
Shann, Oscar A.
Thomas, Frank M.
Belmont Radio Corporation, assignee: *See*—
Royal, Leslie L.
Beloit Iron Works, assignee: *See*—
Beachler, Edward D.
Belz, Louis: *See*—
Nagy, Milo J., and Belz.
Bendix Aviation Corporation, assignee: *See*—
Hengst, Walter D.
Nardone, Romeo M.
Bendix-Westinghouse Automotive Air Brake Company, assignee: *See*—
Eaton, Wilfred A.
Gates, Charles E.
Benner, Harry L.: *See*—
Bair, Robert R., Benner, and Walter.
Bennetch, David S., Sheridan, Pa. Semiautomatic automotive transmission with governor-synchronized gears. 2,451,058, Oct. 12.
Bennett, Robert N., Findlay, Ohio, assignor, by mesne assignments, to Gar Wood Industries, Inc., Detroit, Mich. Digging wheel drive for trenchers. 2,451,315, Oct. 12.
Berger, Joseph, and M. Wachman, Brooklyn, N. Y. Key holder. 2,451,056, Oct. 12.
Berman, Samuel, Richmond Hill, assignor to Waugh Equipment Company, New York, N. Y. Variable transformer. 2,450,868, Oct. 12.
Bernard, George G., Evanston, and D. C. Bond, Northbrook, assignors to The Pure Oil Company, Chicago, Ill. Separation of olefins from hydrocarbon mixtures. 2,451,376, Oct. 12.
Bernard, Julius Z., Freeport, N. Y. Bed frame and detachable grinding roller unit. 2,451,057, Oct. 12.
Bernstein, Seymour: *See*—
Dorfman, Louis, and Bernstein.
Berry, Walter R., assignor to Jonas Woodhead & Sons Limited, Leeds, England. Leaf spring. 2,450,869, Oct. 12.
Betts, Gilbert A.: *See*—
De Boer, Willis, Betts, and Polidor.
Bible, Milbert D., Mosheim, Tenn. Portable play pen. 2,451,431, Oct. 12.
Bieber, Otto, New York, N. Y. Apparatus for desiccation. 2,451,316, Oct. 12.
Bielak, Frank A.: *See*—
Blumensaadt, Svend G, and Bielak.
Bindler, Jakob, assignor to J. R. Geigy A. G., Basel, Switzerland. High molecular guanamines and their manufacture. 2,451,432, Oct. 12.
Birr, Rudolph G.: *See*—
Steiner, Frank G., and Birr.
Birr, Rudolph G., Lombard, Ill., assignor, by mesne assignments, to American Linen Supply Co., Carson City, Nev. Stop mechanism and means for mounting. 2,451,191, Oct. 12.
Blaas, Johanna G., née Westendorp, widow: *See*—
Blaas, Theeuwis A. H.
Blaas, Theeuwis A. H., deceased, Nimeguen, by J. G. Blaas, née Westendorp, widow, Epse, Gorssel, Netherlands, assignor to Naamlooze Vennootschap Kunstzijdespinnerij Nyma, Nimeguen, Netherlands. Spinning viscose artificial silk filaments comprising threads, staple fibers, bands, and the like. 2,451,148, Oct. 12.
Blahut, Anthony: *See*—
Baker, Albert L., Markl, and Blahut.
Blair, James H., Prince Bay, Staten Island, assignor to Chayes Dental Instrument Corporation, New York, N. Y. Dental tool attachment. 2,451,192, Oct. 12.
Blair, William R., Washington, D. C., and A. E. Woodruff, Oak Park, assignors to Automatic Electric Laboratories, Inc., Chicago, Ill. Microphone adapted to be actuated by a bone structure of a user. 2,451,317, Oct. 12.
Blanchard, Werner J., and C. S. J. MacNeil, Dayton, Ohio, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich. Propeller mechanism. 2,451,059, Oct. 12.
Blann, William A., Stamford, Conn., assignor to American Cyanamid Company, New York, N. Y. Activation of anion exchangers in sugar purification. 2,451,272, Oct. 12.
Bliss, Harding, Hamden, Conn., and W. C. Sussky, Little Rock, Ark., assignors to Dictaphone Corporation, New York, N. Y. Hydrogenation of tall oil. 2,451,377, Oct. 12.
Bloom, Sven F., Rutland, Mass. Precision cannon pinion tightener. 2,451,378, Oct. 12.
Blumensaadt, Svend G., Beachwood Village, and F. A. Bielak, Fairview Village, assignors to Universal Wire Spring Company, Cleveland, Ohio. Wire twisting device. 2,450,876, Oct. 12.
Boehm, Erich, assignor of one-half to Nipa Laboratories, Limited, Cardiff, Wales. Manufacture of materials resistant to or active against microorganisms. 2,451,149, Oct. 12.
Boeing Airplane Company, assignee: *See*—
Cooper, James B., and Jepson.
Bond, Donald C.: *See*—
Bernard, George G., and Bond.
Booth, James H., Detroit, Mich., assignor to Thompson Products, Inc., Cleveland, Ohio. Joint assembly. 2,451,060, Oct. 12.
Booth, James H., Detroit, Mich., assignor to Thompson Products, Inc., Cleveland, Ohio. Variable ratio steering assembly. 2,451,061, Oct. 12.
Booth, James H., Detroit, Mich., assignor to Thompson Products, Inc., Cleveland, Ohio. Clamp assembly. 2,451,062, Oct. 12.
Bowers, Herbert L.: *See*—
Williams, William W., and Bowers.
Boynton, Earl S.: *See*—
O'Brien, Joseph F.
Braddon, Frederick D., Babylon, N. Y., assignor to The Sperry Corporation. Gyro vertical instrument. 2,450,874, Oct. 12.
Braddon, Frederick D., Babylon, and L. F. Beach, Port Washington, N. Y., assignors to The Sperry Corporation. Gyroscopic instrument. 2,450,875, Oct. 12.
Bradenburg, Joseph L., Brooklyn, N. Y. Portable air clearing fan. 2,451,193, Oct. 12.
Braun, Frank C., New York, N. Y. Adhesive-containing suction cup. 2,451,194, Oct. 12.
Braun, G. A., Inc., assignee: *See*—
Yanchenko, Basil J.
Breck Company, The, assignee: *See*—
Backstrom, John A.
Brian, Joseph M., Westmount, Quebec, Canada, assignor, by mesne assignments, to Radio Corporation of America, New York, N. Y. Radio remote-control system. 2,451,150, Oct. 12.
Bridgeport Fabrics, Inc., assignee: *See*—
Spraragen, Louis.
Bright, Elvin M., assignor to Bright Laboratories, Inc., Whitefish Bay, Wis. Applying bottle caps. 2,451,273, Oct. 12.
Bright Laboratories, Inc., assignee: *See*—
Bright, Elvin M.
Bristol Company, The, assignee: *See*—
Cowherd, Robert D.
Thynell, Gistave M.
Brooks, Richard E.: *See*—
Gresham, William F., and Brooks.
Brown Instrument Company, The, assignee: *See*—
Allwein, Aloysius F.
Jordan, Arthur H.
Brown, Morris, San Diego, Calif. Riveting tool. 2,451,063, Oct. 12.
Brown and Sharpe Manufacturing Company, assignee: *See*—
Twamley, William E.
Brown, William F., Flushing, N. Y. Beverage package and apparatus. 2,451,195, Oct. 12.
Browser, Inc., assignee: *See*—
Harvuot, Frank B.
Bruck, Michael, assignor, by mesne asignments, to R. Frankfield, New York, N. Y. Board game device. 2,451,196, Oct. 12.
Brunow, George F.: *See*—
Whitehurst, Graham, and Slater, and Bruno, Hubbard, and Krawits.
Bucyrus Erie Company: *See*—
Mork, George W.

Budd Company, The, assignee: *See*—
Ekxergian, Carolus L., and Gaensele.
Ekxergian, Carolus L., Temple, and Horie.
Gaensele, Paul W.
Meissner, Clarence E.
Watter, Michael.
Bunn, D. H., Company, assignee: *See*—
Bunn, Benjamin H.
Bunn, Benjamin H., assignor to B. H. Bunn Company, Chicago, Ill. Tying machine. 2,451,197, Oct. 12.
Burk, Robert E., Cleveland Heights, assignor to The Standard Oil Company, Cleveland, Ohio. Preparing an isomerization catalyst for normal paraffins. 2,451,018, Oct. 12.
Burke, Byron R., Los Angeles, Calif. Compressor pump. 2,451,379, Oct. 12.
Burke, Richard L., Swarthmore, assignor to Sun Shipbuilding & Dry Dock Company, Chester, Pa. Loading ships. 2,451,198, Oct. 12.
Burrell, Forrest B.: *See*—
Martin, John R., and Burrell.
Burrell Technical Supply Company, assignee: *See*—
Carlson, George W.
Burstiner, Jack, New York, N. Y. Confection package. 2,451,318, Oct. 12.
Bush, Burton T., Inc., assignee: *See*—
Carpenter, Marion S., and Easter.
Butler, Edgar M., New Orleans, La. Electrolytic water correction device. 2,451,064, Oct. 12.
Butler, Edgar M., New Orleans, La. Electrolytic water correction device. 2,451,065, Oct. 12.
Butler, Edgar M., New Orleans, La. Electrolytic water correction device. 2,451,066, Oct. 12.
Butler, Edgar M., New Orleans, La. Self-energizing electrolytic water correction device. 2,451,067, Oct. 12.
Butler, Edgar M., New Orleans, La. Electrolytic water correction device for insertion in circulatory systems. 2,451,068, Oct. 12.
Byram, Frederick C., Springfield, Ohio. Pumping volatile liquids. 2,451,151, Oct. 12.
Caldwell, Leona T., executrix: *See*—
Meinser, Arthur E.
Caldwell, Wallace L.: *See*—
Meinser, Arthur E.
California Research Corporation, assignee: *See*—
Cardwell, William T., Jr.
Elwell, William E., and Meier.
Calhoun, Ingram X., Oklahoma City, Okla. Well pipe handling apparatus. 2,450,934, Oct. 12.
Candor, Robert R., Oakwood, assignor to General Motors Corporation, Dayton, Ohio. Time and temperature controller for domestic appliances. 2,451,069, Oct. 12.
Candy, Albert M., La Grange, assignor, by mesne assignments, to National Cylinder Gas Company, Chicago, Ill. Stud welding gun. 2,451,152, Oct. 12.
Candy, Charles M., Chicago, and W. W. Owen, Elgin, assignors to Automatic Electric Laboratories, Inc., Chicago, Ill. Totalizator indicator control. 2,451,319, Oct. 12.
Caradine Hat Company, assignee: *See*—
Wittcoff, Edward.
Carder, Lorena B., Orlando, Fla. Handbag casing structure. 2,451,274, Oct. 12.
Cardwell, William T., Jr., Whittier, assignor to California Research Corporation, San Francisco, Calif. Conditioning of drilling fluids. 2,450,936, Oct. 12.
Carlson, George: *See*—
Scott, Carl F., Carlson, and Rugg.
Carlson, George W., Bridgeville, assignor to Burrell Technical Supply Company, Pittsburgh, Pa. Power shaker. 2,451,199, Oct. 12.
Carnegie-Illinois Steel Corporation, assignee: *See*—
Tree, George.
Carpenter, Marion S., Nutley, and W. M. Easter, Jr., Lodi, N. J., assignors to Burton T. Bush, Inc., New York, N. Y. 3-tertiary-butyl-4-alkoxy benzaldehydes. 2,450,877, Oct. 12.
Carpenter, Marion S., Nutley, and W. M. Easter, Jr., Lodi, N. J., assignors to Burton T. Bush, Inc., New York, N. Y. 3 - tertiary - butyl - 4 - alkoxy - 5 - nitro benzaldehydes. 2,450,878, Oct. 12.
Carpenter, Marion S., Nutley, and W. M. Easter, Jr., Lodi, N. J., assignors to Burton T. Bush, Inc., New York, N. Y. 2,4-di-tertiary-butyl-5-methoxy benzaldehyde. 2,450,879, Oct. 12.
Carpenter Steel Company, The, assignee: *See*—
Fetzer, Maurice C., and Post.
Carr, Charles H., Boston, Mass. Therapeutic device. 2,450,935, Oct. 12.
Carter, Chester W.: *See*—
Ashworth, Fred, and Carter.
Goodhue, William V., and Carter.
Carter, Ralph B., Company: *See*—
Jones, Fred C.
Cassee, Ewout: *See*—
Klinkhamer, Hendrik A. W., and Cassee.
Celanese Corporation of America: *See*—
Kelght, Albert W.
Cercownay, John M., Fort Lauderdale, Fla. Table assembly for automobiles. 2,451,275, Oct. 12.
Cerruti, Leland G.: *See*—
Gattuccio, Salvadore, and Cerruti.
Chain Belt Company, assignee: *See*—
Klein, Robert E.
Chamberlain, James M. W., Fairlawn, assignor to United States Stoneware Company, Akron, Ohio. Fluid-retaining joint and method of making the same. 2,451,070, Oct. 12.
Chandler Products Corporation, assignee: *See*—
Klukan, Joseph F.
Charlton, William, and J. B. Harrison, Blackley, Manchester, England, assignors to Imperial Chemical Industries Limited. Reaction of an etherified melamine-formaldehyde condensation product with an etherified phenol-formaldehyde condensation product. 2,451,153, Oct. 12.
Chatham Chemical Company, The, assignee: *See*—
Daugherty, Charles C.
Chatten, Clarence K., and S. A. Eller, New York, N. Y. Brittle point testing apparatus. 2,450,880, Oct. 12.
Chayes Dental Instrument Corporation, assignee: *See*—
Blair, James H.
Chesney, Jane L., executrix: *See*—
Chesney, Robert M.
Chesney, Robert M., deceased, Alliance, by J. L. Chesney, executrix, Youngstown, assignor to The Alliance Porcelain Products Company, Alliance, Ohio. Apparatus for making tubs or the like. 2,450,937, Oct. 12.
Chrysler Corporation, assignee: *See*—
Kimberly, Albert E., Jr.
Church, Harry, Esquimalt, British Columbia, Canada. Artificial respiration training device. 2,451,200, Oct. 12.
Ciba Limited, assignee: *See*—
Widmer, Gustave, and Hertner.
Clammer, Edward S., Merchantville, M. J. Ackerman, Camden, N. J., and G. A. Barton, Bridgeport, Conn., assignors to Radio Corporation of America. Frequency measuring system. 2,451,320, Oct. 12.
Clark, Stephen C., Jr., Scotia, N. Y., assignor to General Electric Company. Attenuator for ultra high frequencies. 2,451,201, Oct. 12.
Cline, Earl E., assignor to Mueller Co., Decatur, Ill. Spray nozzle. 2,451,071, Oct. 12.
Color Research Corporation, assignee: *See*—
Grimson, Samuel B.
Combined Optical Industries Limited: *See*—
Jeffree, John H.
Combustion Engineering Company, Inc., assignee: *See*—
Mittendorf, Harvey C.
Comstock, James A., Clyde, N. Y., assignor, by mesne assignments, to Acme Electric Corporation. Laminated magnetic core and method of making. 2,451,202, Oct. 12.
Confections, Inc., assignee: *See*—
Kooman, Jacob J.
Consolidated Edison Company of New York, Inc., assignee: *See*—
Donovan, Lewis B.
Consolidated Vultee Aircraft Corporation, assignee: *See*—
Stringfield, Raymond B., and Miles.
Controls Laboratories, Inc., assignee: *See*—
Gano, Joseph J., and Richardson.
Cooke, William A., assignee: *See*—
Afleck, Theodore H.
Cooper, James B., and A. B. Jepson, Seattle, Wash., assignors to Boeing Airplane Company. Pressure cabin control. 2,450,881, Oct. 12.
Cooper, Lonzo S., Piqua, assignor to General Motors Corporation, Dayton, Ohio. Refrigerating system having thermometer-receiving well at the evaporator inlet and outlet. 2,451,072, Oct. 12.
Copeland, Brooks W., Prescott, Ariz. Automatic shutoff valve. 2,450,938, Oct. 12.
Cor, Pierre, Paris, France. Vibration fatigue testing method and machine. 2,450,939, Oct. 12.
Corning Glass Works, assignee: *See*—
Hicks, John F. G., and Henkel.
Coss, Harold T., Plainfield, and E. R. Powell, North Plainfield, N. J., assignors to Johns-Manville Corporation, New York, N. Y. Apparatus for forming mineral wool mats. 2,450,916, Oct. 12.
Costa, Philip J., Franklin Square, N. Y., assignor to The Sperry Corporation. Detonation suppression system. 2,450,882, Oct. 12.
Cowan, John C., L. B. Falkenburg, and H. M. Teeter, Peoria, and P. S. Skell, Urbana, Ill., assignors to the United States of America as represented by the Secretary of Agriculture. Polyamides from polymeric fat acids. 2,450,940, Oct. 12.
Cowherd, Robert D., Atlanta, Ga., assignor to The Bristol Company, Waterbury, Conn. Control apparatus. 2,451,073, Oct. 12.
Craig, W. E.: *See*—
Hester, William F., and Craig.
Crane, Walton B., assignor to Alpak, Los Angeles, Calif. Shipping, storage, and display cartons. 2,450,941, Oct. 12.
Croisant, Donald P.: *See*—
Dolza, John, Croisant, Gaubatz, and Perish.
Crotty, Michael C., Flushing, N. Y. Boiler. 2,451,321, Oct. 12.
Crowley, John C., Cleveland Heights, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Valve insides. 2,451,276, Oct. 12.
Crowley, John C., Willoughby, assignor to The Dill Manufacturing Company, Cleveland, Ohio. Valve stem and valve. 2,451,277, Oct. 12.

Cruzan, Harold, Los Angeles, Calif. Cabin pressure regulator valve. 2,451,278, Oct. 12.

Curtiss, George E., Jr., Penn Wynne, assignor to Philco Corporation, Philadelphia, Pa. Latch. 2,451,380, Oct. 12.

Curtiss, George E., Jr., Penn Wynne, assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa. Refrigerator door latch. 2,451,381, Oct. 12.

Curtiss-Wright Corporation, assignee: *See*—
Keck, Andrew.

D'Amico, Paul M., Philadelphia, Pa. Stuffing tube. 2,450,883, Oct. 12.

Daniel and Florence Guggenheim Foundation, The, assignee: *See*—
Goddard, Robert H.

Daub, Rudolph, West Caldwell, N. J. Internal-combustion engine. 2,451,322, Oct. 12.

Daugherty, Charles C., assignor to The Chatham Chemical Company, Siler City, N. C. Making manganous sulfate. 2,450,870, Oct. 12.

D'Avaucourt, Pierre D., Bainbridge, Pa. Wire saw strand. 2,451,383, Oct. 12.

Davis, Albert G., Newton Center, Mass., assignor to The Nevins-Church Press, New York, N. Y. Combined dispensing and blade holding box. 2,451,382, Oct. 12.

Davis, Archibald H., Jr., University Heights, assignor to The Apex Electrical Manufacturing Co., Cleveland, Ohio. Liquid measuring device. 2,451,154, Oct. 12.

Davis, Garland H. B., Elizabeth, N. J., assignor to Standard Oil Development Company. Apparatus for producing artificial fog. 2,451,019, Oct. 12.

Davis, Hyman R., Jackson Heights, assignor to The Lummus Company, New York, N. Y. Hydrocarbon extraction apparatus. 2,451,433, Oct. 12.

Davis, Orrie E., Ballston Spa, N. Y. Easel bracket. 2,451,020, Oct. 12.

Dawson, Edward, New York, and J. R. Ericson, Westbury, N. Y., assignors to The Sperry Corporation. Pressure measuring apparatus. 2,450,884, Oct. 12.

Dean, Beatrice M., Los Angeles, Calif. Strainer. 2,451,074, Oct. 12.

De Boer, Willis, Williamsville, G. A. Betts, Eggertsville, and E. C. Polidor, Rochester, assignors, by mesne assignments, to Precision Methods Co., Inc., Buffalo, N. Y. Optical projection contour comparison device. 2,451,155, Oct. 12.

De Carli, John J., Stockton, Calif. Milk receiver for automatic milking systems. 2,451,075, Oct. 12.

De Lancey, Warren H., assignor to Gilbert & Barker Manufacturing Company, Springfield, Mass. Variable capacity vane pump for oil burners. 2,451,279, Oct. 12.

Del Mar, Bruce E., Los Angeles, assignor to Douglas Aircraft Company, Inc., Santa Monica, Calif. Control system. 2,451,280, Oct. 12.

De Mattos, Annibal R., Recife, Brazil. Process and apparatus for producing alcohol by fermentation. 2,451,156, Oct. 12.

Dennison Manufacturing Company, assignee: *See*—
Pecker, J. S.

Dental Research Corporation, assignee: *See*—
Erdle, Reiner W.

De Tray, George E., Independence, Mo. Scissors sharpener. 2,451,203, Oct. 12.

Detuno, Rocco J., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Voltage regulating amplifier system. 2,451,021, Oct. 12.

Dictaphone Corporation, assignee: *See*—
Bliss, Harding, and Suesky.

Dike, Ralph E., McCook, Nebr. Bed lamp. 2,451,157, Oct. 12.

Dill Manufacturing Company, The, assignee: *See*—
Crowley, John C.

Dings Magnetic Separator Co., assignee: *See*—
Manegold, Robert L.

Doane, Leroy C., Essex, assignor to The Sight Light Corporation, Deep River, Conn. Shock resistant relay. 2,451,323, Oct. 12.

Dohrmann, Frederick C., Los Angeles, Calif. Color changing antiseptic composition. 2,451,022, Oct. 12.

Dolza, John, D. P. Croisant, A. W. Gaubatz, and P. W. Perish, Indianapolis, Ind., assignors to General Motors Corporation, Detroit, Mich. Engine controller. 2,451,204, Oct. 12.

Donnelly, Thomas, Wilmington, Calif. Multiple blade hacksaw. 2,450,942, Oct. 12.

Donovan, Lewis B., White Plains, assignor to Consolidated Edison Company of New York, Inc., New York, N. Y. Painting of gas holders. 2,451,158, Oct. 12.

Dorfman, Louis, New York, and S. Bernstein, Pearl River, assignors, by mesne assignments to American Cyanamid Company, New York, N. Y. Enol-thioethers of keto-steroids and preparing the same. 2,451,434, Oct. 12.

Dougherty, John J., assignee: *See*—
Fenlon, Hugh F.

Douglas Aircraft Company, Inc., assignee: *See*—
Del Mar, Bruce E.
Rechton, George D.

Downing, Rexford D., Rock Island, Ill., assignor to International Harvester Company. Brake pedal lock. 2,450,943, Oct. 12.

Dreyer, Albert, assignor to Metallschlauchfabrik A. G., Lucerne, Switzerland. Apparatus for the continual production of electrically welded tubes. 2,451,159, Oct. 12.

Dunton, Charles H., Oakland, Calif. Shield for transformers. 2,451,324, Oct. 12.

Du Pont, E. I., de Nemours & Company, assignee: *See*—
Alderson, Witty L., Jr.
Bair, Robert R., Benner, and Walker.
Gresham, William F., and Brooks.
Hager, Glenn F.
Raasch, Maynard S.
Seney, John S.
Watkins, William W.

Durant Manufacturing Co., assignee: *See*—
Hennessy, Mark M.

Dusko, Joseph R., Youngstown, Ohio. Mannequin limb. 2,451,023, Oct. 12.

Easter, William M., Jr.: *See*—
Carpenter, Marion S., and Easter.

Eastman, Fred C., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Dithering valve. 2,450,944, Oct. 12.

Eaton, Thomas T., Haddon Heights, N. J., assignor to Radio Corporation of America. Pulse-echo motion detector. 2,450,945, Oct. 12.

Eaton, Wilfred A., assignor to Bendix-Westinghouse Automotive Air Brake Company, Elyria, Ohio. Fluid pressure control mechanism. 2,451,160, Oct. 12.

Edwards, Alfred B., Jr., Plandome, N. Y. Frame structure. 2,451,076, Oct. 12.

Eksergian, Carolus L., Detroit, R. B. Temple, Grosse Pointe Park, and K. C. Harle, Detroit, Mich., assignors to The Budd Company, Philadelphia, Pa. Internal expanding vehicle brake. 2,451,325, Oct. 12.

Eksergian, Carolus L., and P. W. Gaenssle, Detroit, Mich., assignors to The Budd Company, Philadelphia, Pa. Brake shoe assembly. 2,451,326, Oct. 12.

Electrical Engineering and Manufacturing Corporation. *See*—
Hoover, Vaino A.

Elfner, Henry L., Indianapolis, assignor of one-half to E. H. Stein, Marion County, Ind. Retainer and dispenser for sanitary tissues. 2,451,281, Oct. 12.

Ellender, Harold L., Baytown, Tex., assignor to Standard Oil Development Company. Refining lubricating oils. 2,451,025, Oct. 12.

Eller, Saul A.: *See*—
Chatten, Clarence K., and Eller.

Ellerbeck, Thomas R., Salt Lake City, Utah. Calcining and calcining apparatus. 2,451,024, Oct. 12.

Ellis Drier Co., The, assignee: *See*—
Ellis, Hubert C.

Ellis, Hubert C., Evanston, assignor to The Ellis Drier Co., Chicago, Ill. Method and device for drying woven fabric material. 2,451,206, Oct. 12.

Elwell, William E., and R. L. Meier, Berkeley, assignors to California Research Corporation, San Francisco, Calif. Plastic compositions and making the same from an unsaturated ketone and an unsaturated nitrile. 2,451,435, Oct. 12.

Emsig, Sidney, Woodmere, N. Y. Molded integral sewing hole button of thermosetting synthetic resinous materials. 2,451,077, Oct. 12.

Erdle, Reiner W., assignor to Dental Research Corporation, Chicago, Ill. Making artificial teeth. 2,450,885, Oct. 12.

Erickson, John G., Greenwich, Conn., assignor to American Cyanamid Company, New York, N. Y. Preparing n-alkyl acrylamides. 2,451,436, Oct. 12.

Ericson, John R.: *See*—
Dawson, Edward, and Ericson.

Escoffery, Charles A., East Orange, N. J., and M. D. Merva, Bernice, Pa., assignors to Federal Telephone and Radio Corporation, New York, N. Y. Semiconductor. 2,450,886, Oct. 12.

Escoffery, Charles A., East Orange, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Semiconductor. 2,450,887, Oct. 12.

Euclid Production Development Corp, assignee: *See*—
Humphreys, Marion W.

Evans, John, Kingston, N. J., assignor to Radio Corporation of America. Pulse-echo radio velocity indicator. 2,450,946, Oct. 12.

Fairbanks, Jerry, Hollywood, Calif. Pressure device for camera mechanisms and filler inserts therefor. 2,451,161, Oct. 12.

Fairchild Engine and Airplane Corporation, assignee: *See*—
Wescott, John E.

Falkenburg, Lee B.: *See*—
Cowan, John C., Falkenburg, Teeter, and Skell.

Fantozzi, Vincent J.: *See*—
Metzger, Leopold H., and Fantozzi.

Fasce, Egi V., Baton Rouge, La., and W. H. Wood, Warren, Pa.; S. T. Fasce, attorney-in-fact for said Egi V. Fasce, assignors to Standard Oil Development Company. Removal of acetylene from diolefin-containing mixtures. 2,451,327, Oct. 12.

Fasce, Sarah T., attorney-in-fact: *See*—
Fasce, Egi V., and Wood.

Fayette Manufacturing Company, The, assignee: *See*—
Long, Leland E.

Federal Cartridge Corporation, assignee: *See*—
Reed, Cortes F.

Federal Telephone and Radio Corporation, assignee: *See*—
Escoffery, Charles A.
Escoffery, Charles A., and Merva.

Feibel, Adolph H., Cincinnati, Ohio, assignor to The Kelley-Koett Manufacturing Co., Inc., Covington, Ky. X-ray protective device. 2,451,282, Oct. 12.

Fenlon, Hugh F., Pelham, assignor of one-half to J. J. Dougherty, St. Albans, N. Y. Pipe coupling. 2,451,437, Oct. 12.

Ferguson, Albert C., Jacksonville, Fla. Weaving frame. 2,451,207, Oct. 12.

Ferretti, Antonio, Milan, Italy; vested in the Attorney General of the United States. Manufacture of artificial textile fibers. 2,450,889, Oct. 12.

Fetzer, Maurice C., and C. B. Post, Wyomissing, assignors to The Carpenter Steel Company, Reading, Pa. Wear resistant steel. 2,450,888, Oct. 12.

Field, Donald C.: *See*—
Sparks, William J., and Field.

Finch, William G. H., Newtown, Conn. Directional antenna tuning system. 2,451,078, Oct. 12.

Finch, William G. H., Newtown, Conn. Facsimile apparatus record mounting means. 2,451,079, Oct. 12.

Finch, William G. H., Newtown, Conn., and G. H. Hohmann, Bronx, N. Y., assignors to Finch Telecommunications, Inc., Passaic, N. J. Facsimile transmitter-sheet loading and stripping mechanism. 2,450,080, Oct. 12.

Finch Telecommunications, Inc., assignee: *See*—
Finch, William G. H., and Hohmann.

Fine Art Apron Co., Inc., assignee: *See*—
Mink, Isadore.

Fishwood, Rollin W.: *See*—
Williams, Norman C., and Fishwood.

Fix, Eugene J., Philadelphia, Pa., assignor to the Government of the United States of America as represented by the Secretary of War. Mechanical time fuse. 2,450,890, Oct. 12.

Fjeld, Thorbjörn, assignor to R. Arbøll, Oslo, Norway. Razor blade sharpening apparatus. 2,451,384, Oct. 12.

Flater, Harold, E. T. Waernhoff, and N. G. Franson, Norrkoping, Sweden, assignors to International Harvester Company. Twine making machine. 2,450,947, Oct. 12.

Ford Instrument Company, Inc., assignee: *See*—
Newell, William H.
Ross, Elliott P., and Marsh.

Ford, Lester L., Eufaula, Ala. Apparatus for extracting vegetable oil. 2,451,081, Oct. 12.

Foster, Boutwell H., Maplewood, N. J., assignor to United States Rubber Company, New York, N. Y. Making elastic fabrics. 2,450,948, Oct. 12.

Fouke, George W., assignor to Lee-Rowan Company, St. Louis, Mo. Sock drier. 2,451,208, Oct. 12.

Foulkes, Christopher H., London W. C. 2, assignor to Standard Telephones and Cables Limited, London, England. Ultra high requency electron discharge device. 2,451,328, Oct. 12.

Frankenstein, William P., Cincinnati, Ohio. Hollow-walled carton. 2,451,209, Oct. 12.

Frankfield, Robert, assignee: *See*—
Bruck, Michael.

Franson, Nils G.: *See*—
Flater, Harold, Waernhoff, and Franson.

Friend, Albert W., Collingswood, N. J., assignor to Radio Corporation of America. Television system. 2,451,026, Oct. 12.

Gaenssle, Paul W.: *See*—
Eksergian, Carolus L., and Gaenssle.

Gaenssle, Paul W., Detroit, Mich., assignor to The Budd Company, Philadelphia, Pa. Cushioned disk brake shoe assembly. 2,451,329, Oct. 12.

Gallowhur Chemical Corporation, assignee: *See*—
Andersen, Carl N.

Gamble, Ralph M., assignor to Jones & Lamson Machine Company, Springfield, Vt. Chuck for automatic machine tools. 2,451,210, Oct. 12.

Gannett, Joseph K., Montclair, N. J., R. Smith, Jr., Richmond Heights, and B. W. Saveland, Cleveland Heights, assignors to The Austin Company, Cleveland, Ohio. Broadcasting studio. 2,451,283, Oct. 12.

Gano, Joseph J., Worcester, and L. W. Richardson, Cherry Valley, Mass., assignors to Controls Laboratories, Inc. Cutting machine for plastic material. 2,451,027, Oct. 12.

Garnett, Edward V., Denver, Colo. Automobile transporting truck. 2,451,284, Oct. 12.

Gar Wood Industries, Inc., assignee: *See*—
Bennett, Robert N.
Miller, George E.

Gaubatz, Arthur W.: *See*—
Dolza, John, Croisant, Gaubatz, and Perish.

Gates, Charles E., assignor to Bendix-Westinghouse Automotive Air Brake Company, Elyria, Ohio. Valve mechanism. 2,451,162, Oct. 12.

Gates, Charles W., and C. R. Howey, Elmira, Ontario, Canada, assignors to United States Rubber Company, New York, N. Y. Purification of phenothiazine. 2,451,082, Oct. 12.

Gattuccio, Salvadore, and L. G. Cerruti, San Jose, Calif. Bottle cap. 2,450,949, Oct. 12.

Geigy, J. R., A. G., assignee: *See*—
Bindler, Jakob.

Gellman Manufacturing Company, assignee: *See*—
Petskeyes, Charles H.

General Aniline & Film Corporation, assignee: *See*—
Thunberg, Leander O.

General Electric Company, assignee: *See*—
Alexanderson, Ernst F. W., Mittag, and Sims.
Clarke, Stephen C., Jr.
Holmgren, Viking R.
Lunberg, John E.
Ogden, Harold S.
Reifschneider, Paul J.
Rosentreter, Ernest W.
Scott, Carl F., and Carlson, and Rugg.
Stoeckly, Eugene E.
Warren, Glenn B., and Smith.
Webb, Donald R.

General Motors Corporation, assignee: *See*—
Blanchard, Werner J., and MacNeil.
Candor, Robert R.
Cooper, Lonzo S.
Dolza, John, Croisant, Gaubatz, and Perish.
Hindall, Alva L.
Jorgensen, Clarence H., and Taylor.
La Motte, Ralph R.

General Tire & Rubber Company, The, assignee: *See*—
Kraft, Herman T.

Gersten, Lee, New York, N. Y. Cabinet, chest, and similar article. 2,451,211, Oct. 12.

Gibson, G. H., assignee: *See*—
Richbourg, James W.

Gilbert & Barker Manufacturing Company, assignee: *See*—
De Lancey, Warren H.

Gilbert, Joseph A., San Francisco, and P. A. Johnson, assignors to Moore Business Forms, Inc., Emeryville, Calif. Sheet feed for writing machines. 2,451,330, Oct. 12.

Goddard, Esther C., executrix: *See*—
Goddard, Robert H.

Goddard, Robert H., deceased, Annapolis, Md.; E. C. Goddard, executrix, assignor of one-half to The Daniel and Florence Guggenheim Foundation, New York, N. Y. Gas blast actuated auxiliary turbine for gas blast propelled craft. 2,450,950, Oct. 12.

Goin, Everett, Weatherford, Okla. Implement anchor. 2,451,163, Oct. 12.

Gold, Leon J., Shorewood, assignor to Milprint, Inc., Milwaukee, Wis. Thermoplastic coating composition. 2,451,212, Oct. 12.

Gollwitzer, Walter T., Euclid, assignor to Addressograph-Multigraph Corporation, Cleveland, Ohio. Reciprocable feed means for printing machines. 2,451,213, Oct. 12.

Goodhue, William V., Ipswich, and C. W. Carter, Topsfield, Mass., assignors to United Shoe Machinery Corporation, Flemington, N. J. Rocket launcher. 2,450,951, Oct. 12.

Goodrich, B. F., Company, The, assignee: *See*—
Reuter, Louis F.
Semegen, Stephen T.
Stewart, William D.
Taft, George H.

Green, Arthur D., Cranford, N. J., assignor to Standard Oil Development Company. Stripping of polymer latices. 2,451,332, Oct. 12.

Green, Isaac H. C., Pawtucket, assignor to Hemphill Company, Central Falls, R. I. Knitting. 2,451,214, Oct. 12.

Greger, Herbert H., Washington, D. C. Phosphate cements. 2,450,952, Oct. 12.

Greig, Harold G., Princeton, N. J., assignor to Radio Corporation of America. Electrolytic recording. 2,451,331, Oct. 12.

Gresham, William F., and R. E. Brooks, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Synthesis of polyhydroxy compounds. 2,451,333, Oct. 12.

Grimson, Samuel B., assignor to Color Research Corporation, New York, N. Y. Photography in additive color by the controlled utilization of chromatic aberrations in lenses. 2,451,164, Oct. 12.

Groat, Keith P., assignor to York Corporation, York, Pa. Control of convertible evaporator-condensers for use in refrigerative circuits. 2,451,385, Oct. 12.

Groves, Martin V., Brooklyn, assignor of one-half to A. Wilde and A. Hull-Ryde, jointly, Bayside, N. Y. Fluid pressure operated actuating device. 2,451,334, Oct. 12.

Groves, Martin V., Brooklyn, assignor of one-half to A. Wilde and A. Hull-Ryde, jointly, Bayside, N. Y. Control valve means for power-operated hydraulic motive means. 2,451,335, Oct. 12.

Guthrie, James E., assignor to Dr. Hess & Clark, Inc., Ashland, Ohio. Escharotic solution for dehorning calves. 2,450,953, Oct. 12.

Habicht, Louis O., Thorofare, N. J. Clamp. 2,450,891, Oct. 12.

Hagen, Harry W., Decatur, Ill. Nonrefillable bottle closure. 2,451,336, Oct. 12.

Hager, Glenn F., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Isomerization of 1,4-dicyano-2-butene. 2,451,386, Oct. 12.

Haines, William A., Jr., Glendale, Calif. Lather making machine. 2,451,083, Oct. 12.

Hale, George C., Dover, N. J. Delay powder. 2,450,892, Oct. 12.

Halfvarson, Gustaf A., Springfield, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Piston and connecting rod. 2,451,216, Oct. 12.

Hall, Charles S., New York, N. Y. Indicating the state of gas in cells of aircraft. 2,450,954, Oct. 12.

Hall, Gordon L., Old Lyme, Conn. Holder-dispenser for roll sheet material. 2,451,215, Oct. 12.

Hammond Iron Works, assignee: *See*—
Plummer, Fred L.

Halpert, Percy: *See*—
Newton, John C.

Hansen Mfg. Company, assignee: *See*—
Hansen, William L., and Hurst.

Hansen, William L., and I. N. Hurst, assignors to Hansen Mfg. Company, Princeton, Ind. Synchronous motor. 2,450,955, Oct. 12.

Hansen, William W., and J. R. Woodyard, Garden City, N. Y., assignors to The Sperry Corporation. High-frequency tube structure. 2,450,893, Oct. 12.

Harle, Karl C.: *See*—
Ekserdjian, Carolus L., Temple, and Harle.

Harrison, Jack B.: *See*—
Charlton, William, and Harrison.

Hart, George T., Lynn, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Electrode retaining clamps for marginal bonding with high-frequency electric field. 2,450,956, Oct. 12.

Hart, John J., Bryn Mawr, Pa., assignor to the United States of America, as represented by the Secretary of War. Mechanical time fuse. 2,450,894, Oct. 12.

Hartford National Bank and Trust Company, assignee, trustee: *See*—
Klinkhamer, Hendrik A. W., and Cassee.

Hartman, Carl H., New Rochelle, assignor to St. Regis Paper Company, New York, N. Y. Sealing of closures for gusseted paper bags. 2,451,165, Oct. 12.

Hartman, Richard A., assignor to Tinnerman Products, Inc., Cleveland, Ohio. Fastening device. 2,451,438, Oct. 12.

Harvuot, Frank B., assignor to Bowser, Inc., Fort Wayne, Ind. Lubricator. 2,451,387, Oct. 12.

Haseltine, Stacy B., La Grange, assignor to W. H. Miner, Inc., Chicago, Ill. Hand brake. 2,451,028, Oct. 12.

Haughton Elevator Company, The, assignee: *See*—
Thurston, Ernest B.

Hawes, Richard D., Los Angeles, Calif. Sheet positioning and feeding device for printing presses. 2,451,388, Oct. 12.

Hawthorne, Louis A., Hillside, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Roll stripping mechanism. 2,450,957, Oct. 12.

Hayes, Arthur R., Cambridge, Ohio. Adjustable fender skirt brace. 2,450,958, Oct. 12.

Hayes, Edward F., Pelham, N. H., assignor to Talbot Mills, Inc., North Billerica, Mass., trustee. Semidecating machine. 2,451,337, Oct. 12.

Heath, William C., and P. A. Pitt, assignors to Solar Aircraft Company, San Diego, Calif. Exhaust structure for resiliently mounted engines. 2,451,285, Oct. 12.

Heberlein Patent Corporation, assignee: *See*—
Kunzle, August.

Hegbar, Howard R.: *See*—
Smith, Philip T., and Hegbar.

Heinecke, William, New York, N. Y. Silk screen printing ink. 2,450,959, Oct. 12.

Heinrich, August H., Euclid, assignor to The Anto Diesel Piston Ring Company, Cleveland, Ohio. Shock absorbing hammer. 2,451,217, Oct. 12.

Heintz, Ralph M., assignor by mesne assignments, to Jack & Heintz Precision Industries, Inc., Cleveland, Ohio. Oil tank and cooler assembly. 2,450,960, Oct. 12.

Heller, Harold P., Palmyra, N. J., assignor to Radio Corporation of America. Electrical condenser. 2,451,338, Oct. 12.

Hemphill Company, assignee: *See*—
Green, Isaac H. C.

Hengst, Walter D., Roscoe, Calif., assignor to Bendix Aviation Corporation, South Bend, Ind. Quick disconnect coupling. 2,451,218, Oct. 12.

Henkel, Carl F. *See*—
Hicks, John F. G., and Henkel.

Hennessy, Mark M., assignor to Durant Manufacturing Co., Milwaukee, Wis. Locking and resetting means for counters. 2,451,084, Oct. 12.

Heritage, Clark C., Cloquet, assignor to Wood Conversion Company, St. Paul, Minn. Refrigerator construction having means to restrict moisture in the walls of the cabinet. 2,451,286, Oct. 12.

Herrick, Roswell H., assignor to Automatic Electric Laboratories, Inc., Chicago, Ill. Intercommunicating system. 2,451,330, Oct. 12.

Hertner, Wilhelm: *See*—
Widmer, Gustave, and Hertner.

Hess, Dr., & Clark, Inc., assignee: *See*—
Guthrie, James E.

Hester, William F., Drexel Hill, and W E Craig, assignors to Rohm & Haas Company, Philadelphia, Pa. Insecticidal haloido-alkylene esters of caprylphenoxyacetic acid. 2,451,085, Oct. 12.

Hetherington, Robert, & Son, Inc., assignee: *See*—
Schellman, Joseph H.

Hewlett-Packard Company, assignee: *See*—
Kingman, Rufus M.

Heymann, Seymour E., Evanston, J. H. Leslie, II, Winnetka, and W. A. Marshall, Jr., assignors to Stewart-Warner Corporation, Chicago, Ill. Electric switch. 2,450,961, Oct. 12.

Hicks, John F. G., Corning, and C. F. Henkel, Big Flats, assignors to Corning Glass Works, Corning, N. Y. Apparatus for melting and casting glass. 2,451,086, Oct. 12.

Hill, William H.: *See*—
Baker, Albert L., and Hill, and Markl.

Hilliard Corporation, The, assignee: *See*—
La Brecque, Theodore A., and Skoog.

Hillier, James: *See*—
Zworykin, Vladimir K., and Hillier.

Hindall, Alva L., Muncie, Ind., assignor to General Motors Corporation, Detroit, Mich. Reconditioning battery plates. 2,451,087, Oct. 12.

Hippen, Herman A.: *See*—
Lance, Herbert C., and Hippen.

Hohmann, Gottfried H.: *See*—
Finch, William, G. H., and Hohmann.

Holmgren, Viking R., Lynn, Mass., assignor to General Electric Company. Dynamoelectric machine. 2,451,219, Oct. 12.

Hoover Ball and Bearing Company, assignee: *See*—
Pew, Thomas C.

Hoover, Vaino A., assignor to Electrical Engineering and Manufacturing Corporation, Los Angeles, Calif. Cooling system for electric motors and hydraulic pumps. 2,450,963, Oct. 12.

Hoppe, William, Longmeadow, assignor to National Bread Wrapping Machine Co., Springfield, Mass. Wrapper feed for wrapping machines. 2,451,287, Oct. 12.

Hornkohl, Carl J., and F. H. Leslie, Chicago, Ill.; said Leslie assignor to said Hornkohl. Doughnut cooking art. 2,450,962, Oct. 12.

Howe, Earl L., Dayton, Ohio. Line stretcher. 2,451,389, Oct. 12.

Howey, Cecil R.: *See*—
Gates, Charles W., and Howey.

Hoyt, Lawrence, Little Rock, Ark. Coin-receiving structure. 2,451,088, Oct. 12.

Hubbard, Joseph M.: *See*—
Whitehurst, Graham, Slater, Bruno, Hubbard, and Krawitz.

Huebner, William C., New York, N. Y. Method of and means for printing multicolor images by electric discharge. 2,451,288, Oct. 12.

Hughes, Walter J., assignor to Infilco Incorporated, Chicago, Ill. Flow controller reset. 2,451,029, Oct. 12.

Hull, Howard L., Anderson, Ind. Tire pressure alarm switch. 2,451,166, Oct. 12.

Hull-Ryde, Arthur, assignee, et al.: *See*—
Groves, Martin V.

Humphreys, Marion W., assignor to Euclid Production Development Corp., Euclid, Ohio. Hydraulic jack. 2,451,390, Oct. 12.

Hunt, Floyd E., St. Petersburg, Fla. Wall construction. 2,451,220, Oct. 12.

Hunter, Frank B., Roscoe, assignor to Casimir A. Miketta, Beverly Hills, Calif. Hydraulic cylinder construction. 2,451,089, Oct. 12.

Hurd, Fraser A., Liverpool, N. Y. Machine tool. 2,450,964, Oct. 12.

Hurst, Ira N.: *See*—
Hansen, William L., and Hurst.

Hutter, William H., Chicago, Ill. Wedged needle type phonograph pickup. 2,451,221, Oct. 12.

Hydro-Speed Equipment Co., assignee: *See*—
McGee, Leland T.

Imperial Chemical Industries Limited, assignee: *See*—
Charlton, William, and Harrison.

Independent Pneumatic Tool Company, assignee: *See*—
Mitchell, Walter G.

Infilco Incorporated: *See*—
Hughes, Walter J.

Interchemical Corporation: *See*—
Marberg, Carl M.

International Harvester Company, assignee: *See*—
Downing, Rexford D.
Flater, Harold, Waernooff, and Franson.
McNamara, Gordon G., Jr.
Ziskal, Joseph F., and Bechman.

Jack & Heintz Precision Industries, Inc., assignee: *See*—
Heintz, Ralph M.

Jackson, Joseph G., assignee, et al.: *See*—
Mullen, Milton R.

Jackson, Wm. Steell, assignee, et al.: *See*—
Mullen, Milton R.

James, Robert B., Cincinnati, Ohio. Coil former. 2,451,222, Oct. 12.

Jarvis, Harold T., Manchester, assignor to United Aircraft Corporation, East Hartford, Conn. Ignition control. 2,451,289, Oct. 12.

Jefferson Standard Broadcasting Company, assignee: *See*—
Barone, Salvatore A.
Norde, Leslie.

Jeffree, John H., Cobham, assignor to Combined Optical Industries Limited, Slough, England. Determining correct curvatures of lenses and spacings thereof. 2,450,965, Oct. 12.

Jepson, Alfred B.: *See*—
Cooper, James B., and Jepson.

Jerichow, Walter R.: *See*—
Kephart, C. Paul, and Jerichow.

Jernstedt, George W., Pittsburgh, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Electroplating. 2,451,840, Oct. 12.

Jernstedt, George W., Belleville, N. J., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Electroplating. 2,451,841, Oct. 12.

Johansen, Harry C., Michigan City, Ind., assignor to Joy Manufacturing Company. Drilling apparatus. 2,451,223, Oct. 12.

Johns-Manville Corporation, assignee: *See*—
Coss, Harold T., and Powell.
Hawthorne, Louis A.
Powell, Edward R.
Rembert, Ernest W.

Johnson, Andrew T., Las Vegas, Nev. Block molding machine. 2,451,167, Oct. 12.

Johnson, Charles P.: *See*—
Sporing, Percy A., and Johnson.

Johnson, David W., New Britain, assignor to The Arrow-Hart & Hegeman Electric Company, Hartford, Conn. Push-pull selector switch. 2,451,224, Oct. 12.

Johnson, David W., New Britain, assignor to The Arrow-Hart & Hegeman Electric Co., Hartford, Conn. Selector switch. 2,451,225, Oct. 12.

Johnson, Edward B., Grand Rapids, Mich. Key locking mechanism. 2,451,090, Oct. 12.

Johnson, Henry A., assignee: *See*—
Snyder, Rudolph M.

Johnson, Keith W., Arlington County, Va. Key ring. 2,451,091, Oct. 12.

Johnson, Norman A.: *See*—
Park, Arthur D., and Johnson.

Johnson, Paul A.: *See*—
Gilbert, Joseph A., and Johnson.

Jonas Woodhead & Sons Limited, assignee: *See*—
Berry, Walter R.

Jones, Donald S., Ellwood City, Pa. Utility holder. 2,451,092, Oct. 12.

Jones, Fred C., Teaneck, assignor to Ralph B. Carter Company, Hackensack, N. J. Centrifugal pump. 2,451,030, Oct. 12.

Jones & Lamson Machine Company, assignee: *See*—
Gamble, Ralph M.

Jordan, Arthur H., Norristown, assignor to The Brown Instrument Company, Philadelphia, Pa. Control instrument. 2,451,439, Oct. 12.

Jorgensen, Clarence H., and W. H. Taylor, Anderson, Ind., assignors to General Motors Corporation, Detroit, Mich. Engine controller. 2,451,205, Oct. 12.

Joy Manufacturing Company, assignee: *See*—
Johansen, Harry C.

Kahn, Alfred: *See*—
Shenk, Eugene R., and Kahn.

Kaminer, Bernard H., Brooklyn, N. Y. Key case. 2,451,093, Oct. 12.

Kauffman, Harry M., assignor of one-half to W. La Monaca, Philadelphia, Pa. Dispensing machine. 2,451,094, Oct. 12.

Kearfott Company, Inc., assignee: *See*—
Kent, Henry J.

Keck, Andrew, Gahanna, Ohio, assignor to Curtiss-Wright Corporation. Apparatus for surface treating small objects. 2,451,391, Oct. 12.

Keight, Albert W., Cumberland, Md., assignor to Celanese Corporation of America. Yarn support. 2,450,966, Oct. 12.

Kelm, Charles J., Oil City, Pa., assignor to Oil Well Supply Company. Stuffing box. 2,450,895, Oct. 12.

Keiser, John, Windsor, Colo. Combined pipe wrench and vise. 2,450,967, Oct. 12.

Kelley-Koett Manufacturing Co., Inc., The, assignee: *See*—
Feibel, Adolph H.

Kellogg, M. W., Company, The, assignee: *See*—
Baker, Albert L., Hill, and Markl.
Baker, Albert L., and Markl, and Blahut.

Kelsh, Harry T., Washington, D. C. Map making and projection instrument. 2,451,031, Oct. 12.

Kemp, John H., Jr., San Carlos, Calif. Apparatus for handling loads. 2,451,226, Oct. 12.

Kennedy, Truman H., McKeesport, Pa., assignor to National Tube Company. Checkerwork and brick therefor. 2,451,392, Oct. 12.

Kent, Henry J., Teaneck, N. J., assignor to Kearfott Company, Inc., New York, N. Y. Gear mounting. 2,451,342, Oct. 12.

Kephart, C. Paul, Jersey City, and W. E. Jerichow, Far Hills, N. J. Electric soldering tool. 2,451,290, Oct. 12.

Kershaw, Henry, Belleville, N. J. Bridge for junction boxes. 2,451,393, Oct. 12.

Kienle, Roy H.: *See*—
Amick, Chester A., and Kienle.

Kimberly, Albert E., Jr., Birmingham, assignor to Chrysler Corporation, Highland Park, Mich. Power transmission mechanism. 2,450,896, Oct. 12.

Kingman, Rufus M., assignor, by mesne assignments, to Hewlett-Packard Company, Palo Alto, Calif. Instrument drive. 2,451,032, Oct. 12.

Klein, Robert E., West Allis, assignor to Chain Belt Company, Milwaukee, Wis. Self-aligning conveyer roll mounting. 2,451,394, Oct. 12.

Klinkhamer, Hendrik A. W., and E. Cassee, Eindhoven, Netherlands, assignors, by mesne assignments, to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. Safety device for rectifiers. 2,451,095, Oct. 12.

Klukan, Joseph F., Garfield Heights, assignor to Chandler Products Corporation, Euclid, Ohio. Truing mechanism for grinding wheels. 2,451,395, Oct. 12.

Kneass, Strickland, Jr.: *See*—
Anderson, David P., and Kneass.

Knubel, Barbara B., Westport, Conn. Stocking protector. 2,450,968, Oct. 12.

Koch, Winfield R., Haddonfield, N. J., assignor to Radio Corporation of America. Superregenerative receiver. 2,451,291, Oct. 12.

Konrad, Hermann, Moutier, Switzerland. Pyrophoric lighter. 2,451,188, Oct. 12.

Kooman, Jacob J., assignor to Confections, Inc., Chicago, Ill. Preparing candy coated confections. 2,451,096, Oct. 12.

Kraft, Herman T., assignor to The General Tire & Rubber Company, Akron, Ohio. Tire bead spreader. 2,451,097, Oct. 12.

Krause, Norman R., Racine, Wis. Self-cleaning screen or filter. 2,451,227, Oct. 12.

Krawitz, Gustave P.: *See*—
Whitehurst, Graham, Slater, Bruno, Hubbard, and Krawitz.

Krebs, Ernst, Zurich, Switzerland. Friction-wheel regulating gear. 2,451,033, Oct. 12.

Krueger, Herbert E., Vallejo, Calif. Fixture for supporting and gauging brush riggings of motors and generators. 2,450,897, Oct. 12.

Künzle, August, Wattwil, Switzerland, assignor to Heberlein Patent Corporation, New York, N. Y. Web guiding device, particularly for tentering frames. 2,451,343, Oct. 12.

La Brecque, Theodore A., and A. W. Skoog, assignors to The Hilliard Corporation, Elmira, N. Y. Oil purifying system for vacuum pumps. 2,451,098, Oct. 12.

La Monaca, William, assignee: *See*—
Kauffman, Harry M.

La Motte, Ralph R., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Uniting metal pieces by means of a bonding layer of predetermined thickness. 2,451,099, Oct. 12.

Lancaster, John T., Newton, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Pressure mechanism. 2,450,969, Oct. 12.

Lanphere, Clive W., New York, N. Y. Curtain and curtain hanging means. 2,451,034, Oct. 12.

Lance, Herbert C., Rock Island, and H. A. Hippen, Moline, Ill. Chuck for internal grinders. 2,450,970, Oct. 12.

Lash, Leda I., now by marriage: *See*—
Speiser, Leda I.

Lauman, Herman E., Garden City, N. Y. Well pumping system. 2,451,168, Oct. 12.

Lecompte, Armand, Montreal, Quebec, Canada. Chain lock. 2,451,100, Oct. 12.

Lee-Rowan Company, assignee: *See*—
Fouke, George W.

Lemerond, Joseph L., Green Bay, Wis. Position holder for flashlights. 2,451,228, Oct. 12.

Lemke, Lawrence H., assignor to D. J. Murray Manufacturing Co., Wausau, Wis. Log barking drum. 2,451,229, Oct. 12.

Leschinsky, Francis P., assignor of one-half to E. S. Waldie, Berkeley, Calif. Bulldozer-loader device. 2,451,101, Oct. 12.

Leslie, Freeland H.: *See*—
Hornkohl, Carl J., and Leslie.

Leslie, John H.: *See*—
Heymann, Seymour R., Leslie, and Marshall.

Letch, Gerald C., Fort Sam Houston, Tex. Patient transfer carriage. 2,450,971, Oct. 12.

Le Tourneau, R. G., Inc., assignee: *See*—
Le Tourneau, Robert G.

Le Tourneau, Robert G., Peoria, Ill., assignor to R. G. Le Tourneau, Inc., Stockton, Calif. Operating mechanism for lathes. 2,450,972, Oct. 12.

Leverenz, Humboldt W., Princeton, N. J., assignor to Radio Corporation of America. Dark trace screen. 2,451,292, Oct. 12.

Lewis, Frank M., Weston, Mass., assignor, by mesne assignments, to Lima-Hamilton Corporation, Hamilton, Ohio. Fuel injector control mechanism for free piston engines. 2,450,898, Oct. 12.

Lidington, Robert W., Rochester, N. Y., assignor to The Ohio State University Research Foundation, Columbus, Ohio. Protective guard for power take-off shafts of tractors. 2,451,440, Oct. 12.

Linde Air Products Company, assignee: *See*—
Wagner, Robert L.

Lipton, Thomas J., Limited, assignee: *See*—
Arengo-Jones, Rhys W.

Liljegren, Lyle K., Alexandria, Va. Fuse. 2,450,899, Oct. 12.

Lima-Hamilton Corporation, assignee: *See*—
Lewis, Frank M.

Lingel, Frederick J., assignor to The Triplett Electrical Instrument Company, Bluffton, Ohio. Instrument current transformer with part turn winding. 2,450,973, Oct. 12.

Litke, Bernhardt J., Burbank, Calif. Ruffle ironer. 2,451,102, Oct. 12.

Loew, Theodore, New York, N. Y. Centrifugal casting apparatus. 2,451,103, Oct. 12.

Long, Leland E., Dayton, assignor to The Fayette Manufacturing Company, Fayette, Ohio. Suspension for tandem wheeled vehicles. 2,451,293, Oct. 12.

Lowe, Horace, assignor to Riviera Packing Company, Eastport, Maine, a partnership composed of V. N. Cory and A. Vogl. Distributing apparatus. 2,451,104, Oct. 12.

Lummus Company, The, assignee: *See*—
Davis, Hyman R.

Lundberg, John E., Marblehead, Mass., assignor to General Electric Company. Directional gyro. 2,451,230, Oct. 12.

Lyall, John D., Lancaster Township, Lancaster County, assignor to Armstrong Cork Company, Lancaster, Pa. Machine for forming articles from a liquid slurry. 2,450,900, Oct. 12.

Lyall, John D., Lancaster Township, Lancaster County, assignor to Armstrong Cork Company, Lancaster, Pa. Treating liquid slurries to separate fibers from heavier particles. 2,450,901, Oct. 12.

Machlett Laboratories, Incorporated, assignee: *See*—
Skehan, Joseph W.

Macleod, Donald K., assignor to United Steel Fabricators, Inc., Wooster, Ohio. Metal door and panel construction. 2,451,396, Oct. 12.

Macnamara, Harold C., Minneapolis, Minn. Push-button stepping switch. 2,451,105, Oct. 12.

MacNeil, Charles S. J.: *See*—
Blandhard, Werner J., and MacNeil.

Main, Benjamin A., Jr., assignor, by mesne assignments, to Aeroquip Corporation, Jackson, Mich. Self-sealing coupling. 2,451,441, Oct. 12.

Mallina, Rudolph F., Hastings on Hudson, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Making multiple cables for terminal banks. 2,450,974, Oct. 12.

Manegold, Robert L., assignor to Dings Magnetic Separator Co., Milwaukee, Wis. Magnet. 2,451,231, Oct. 12.

Marberg, Carl M., Elmhurst, Long Island, assignor to Interchemical Corporation, New York, N. Y. Decoration of glass fabrics. 2,450,902, Oct.12.

Marhoefer, Laurence J.: *See*—
Vidal, Eugene L., and Marhoefer.

Markl, Arthur R. C.: *See*—
Baker, Albert L., Markl, and Blahut.
Baker, Albert L., Hill, and Markl.

Marquardt, Carl G., Chatham, N. J., assignor to Sterling Injection Molding, Inc., Buffalo, N. Y. Apparel belt or chain. 2,451,397, Oct. 12.

Marquette, Ernest D., St. Albans, Vt. Heat exchanger. 2,451,398, Oct. 12.

Marquette Metal Products Company, The, assignee: *See*—
Sacchini, Columbus R.

Marsh, Harry S.: *See*—
Ross, Elliott P., and Marsh.

Marshall, William A. Jr.: *See*—
Heymann, Seymour E., Leslie, and Marshall.

Marsilius, Newman M., Trumbull, Conn. Jig. 2,451,035, Oct. 12.

Martin, Erle, West Hartford, assignor to United Aircraft Corporation, East Hartford, Conn. Propeller blade construction. 2,451,106, Oct. 12.

Martin, John R., and F. B. Burrell, Baytown, Tex., assignors to Standard Oil Development Company. Specific gravity recorder. 2,451,036, Oct. 12.

Martin, Ralph V., Philadelphia, Pa. Rain gutter for automobile windows. 2,451,399, Oct. 12.

Maxson, Gordon J., Western Springs, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Producing a nitrogen atmosphere. 2,450,975, Oct. 12.

May, Frederick T., Verona, and R. A. Rehberg, Livingston, N. J., assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Wire winding and welding device. 2,451,169, Oct. 12.

McCabe, Ira E., Chicago, Ill. Electric switch. 2,451,107, Oct. 12.

McCauley, Claudius R., New Orleans, La. Switch control device. 2,451,232, Oct. 12.

McCleary, Rush F., Beacon, and S. M. Roberts, Glenham, assignors to The Texas Company, New York, N. Y. Lubricating oil. 2,451,037, Oct. 12.

McCreary, Harold J., Lombard, assignor to Automatic Electric Laboratories, Inc., Chicago, Ill. Grid-controlled rectifier circuit. 2,451,344, Oct. 12.

McDowell, William, Glendale, Calif. Rolling pin. 2,451,170, Oct. 12.

McGee, Leland T., Los Angeles, Calif., assignor to Hydro-Speed Equipment Co. Power-operated scraper. 2,451,294, Oct. 12.

McGraw Electric Company, assignee: *See*—
Osterheld, Clark M.

McIlvaine, Oran T., St. Charles, Ill. Photoelectric tube. 2,451,400, Oct. 12.

McKelvey, Reuben M., Johnstown, Pa. Dust arrester for blast furnaces. 2,450,976, Oct. 12.

McNab, John G., Cranford, and D. T. Rogers, Summit, N. J., assignors to Standard Oil Development Company. Compounded lubricating oil. 2,451,345, Oct. 12.

McNab, John G., Cranford, and D. T. Rogers, Summit, N. J., assignors to Standard Oil Development Company. Compounded lubricating oil. 2,451,346, Oct. 12.

McNamara, Gordon G., Jr., Chicago, Ill., assignor to International Harvester Company. Vehicle reach and hound construction. 2,450,977, Oct. 12.

McShan, Clarence H., Newark, N. J. Frequency shift pulse time modulation. 2,451,347, Oct. 12.

Meier, Richard L.: *See*—
Elwell, William E., and Meier.

Meinzer, Arthur E., assignor to W. L. Caldwell, Birmingham, Ala.; L. T. Caldwell, executrix, of said W. L. Caldwell, deceased. Method and apparatus for production of expanded slag. 2,450,978, Oct. 12.

Meissner, Clarence E., Washington, D. C., assignor to The Budd Company, Philadelphia, Pa. Method of spot welding hollow sections. 2,451,442, Oct. 12.

Melchior, Norten C.: *See*—
Morris, Rupert C., and Melchior.

Menocal, Santiago M., Habana, Cuba. Combined envelope and letter sheet. 2,451,233, Oct. 12.

Merten, Eugen, Houston, Tex., assignor to Shell Development Company, San Francisco, Calif. Apparatus for orientation. 2,451,443, Oct. 12.

Merva, Madeline D.: *See*—
Escoffery, Charles A., and Merva.

Metallschlauchfabrik A. G., assignee: *See*—
Dreyer, Albert.

Metzger, Leopold H., and V. J. Fantozzi, assignors, by mesne assignments, to Super-Cut, Inc., Chicago, Ill. Abrasive wheel. 2,451,295, Oct. 12.

Mikeska, Louis A., Westfield, N. J., assignor to Standard Oil Development Company. Phosphorus acid esters of petroleum phenols. 2,450,903, Oct. 12.

Miketta, Casimir A., assignee: *See*—
Hunter, Frank B.

Miles, Thomas R.: *See*—
Stringfield, Raymond B., and Miles.

Miller, George E., Findlay, Ohio, assignor, by mesne assignments, to Gar Wood Industries, Inc., Detroit, Mich. Adjustable trunnion mounting for bulldozers and the like. 2,451,348, Oct. 12.

Milprint, Inc., assignee: *See*—
Gold, Leon J.

Miner, W. H., Inc.: *See*—
Haseltine, Stacy B.

Mink, Isadore, Brooklyn, assignor to Fine Art Apron Co., Inc., New York, N. Y. Bib. 2,451,038, Oct. 12.

Miskel, John J.: *See*—
Richter, Richard, and Miskel.

Mistretta, Vincent F.: *See*—
Mottern, Henry O., and Mistretta.

Mitchell, Hubert R., and C. M. Sobotka, Hartselle, Ala. Transmission. 2,451,401, Oct. 12.

Mitchell, Walter G., Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Compression member. 2,451,234, Oct. 12.

Mittag, Albert H.: *See*—
Alexanderson, Ernst F. W., Mittag, and Sims.

Mittendorf, Harvey C., East Orange, N. J., assignor to Combustion Engineering Company, Inc., New York, N. Y. Electric hot-water heater. 2,451,296, Oct. 12.

Moller, Wilhelm, Kirklyn, Pa. Bicycle and like vehicles. 2,450,979, Oct. 12.

Molpus, Caleb M., Memphis, Tenn. Toilet ventilating means. 2,451,108, Oct. 12.

Moncrief, John L., Eatontown, N. J. Remote-control system for prime mover dynamo plants. 2,450,904, Oct. 12.

Monsanto Chemical Company, assignee: *See*—
Queeny, Edgar M.

Moore, Arnold R., Lancaster, Pa., assignor to Radio Corporation of America. Rugged gaseous discharge triodes. 2,451,297, Oct. 12.

Moore Business Forms, Inc., assignee: *See*—
Gilbert, Joseph A., and Johnson.

Morgan Construction Company, assignee: *See*—
Andersen, David P., and Kneass.

Mork, George W., assignor to Bucyrus Erie Company, South Milwaukee, Wis. Bulldozer attachment for jeeps. 2,450,905, Oct. 12.

Morris, Rupert C., and N. C. Melchior, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Hydrogenation of unsaturated cyclic sulfones. 2,451,298, Oct. 12.

Morris, Rupert C., Berkeley, and E. C. Shokal, Oakland, assignors to Shell Development Company, San Francisco, Calif. Sulfolanyl esters. 2,451,299, Oct. 12.

Morton, William A., Mount Lebanon, assignor, by mesne assignments, to Amsler Morton Corporation, Pittsburgh, Pa. Continuous heating furnace and operating the same. 2,451,349, Oct. 12.

Morway, Arnold J., Clark Township, Union County, and J. C. Zimmer, Union, N. J., assignors to Standard Oil Development Company. Lubricant. 2,451,039, Oct. 12.

Mottern, Henry O., Hillside, and V. F. Mistretta, Fanwood, N. J., assignors to Standard Oil Development Company. Preparation of unsaturated ketones. 2,451,350, Oct. 12.

Mottern, Henry O., Hillside, and V. F. Mistretta, Fanwood, N. J., assignors to Standard Oil Development Company. Production of unsaturated ketones. 2,451,351, Oct. 12.

Moyer, George E., Alturas, Calif. Scrubber for removing dirt from aggregates such as sand and gravel. 2,450,980, Oct. 12.

Mueller Co., assignee: *See*—
Cline, Earl E.

Mullen, Milton R., Philadelphia, Pa., assignor of one-quarter to W. S. and J. G. Jackson. Oleo strut for airplane landing gears. 2,451,171, Oct. 12.

Murphree, Eger V., Summit, N. J., assignor to Standard Oil Development Company. Production of butadiene. 2,451,040, Oct. 12.

Murphree, Eger V., Summit, N. J., assignor to Standard Oil Development Company. Catalytic cracking and reforming the production of aviation gasoline. 2,451,041, Oct. 12.

Murray, D. J., Manufacturing Co., assignee: *See*—
Lemke, Lawrence H.

Myers, John H., Tornillo, Tex. Rake. 2,451,402, Oct. 12.

Naamlooze Vennootschap Kunstzijdespinnerij Nyma: *See*—
Blaaas, Theeuwis A. H.

Nagy, Milo J., Richmond Hill, and L. Belz, Brooklyn, N. Y. Device for resurfacing grinding wheels. 2,451,235, Oct. 12.

Nancarrow, Harry L., Philadelphia, and A. R. Wilson, Lansdowne, assignors to The Pennsylvania Railroad Company, Philadelphia, Pa. Method of and device for retracking rail vehicles. 2,451,042, Oct. 12.

Napco Chemical Company, assignee: *See*—
Richter, Richard, and Miskel.

Nardone, Romeo M., Teaneck, assignor to Bendix Aviation Corporation, Teterboro, N. J. Actuator and control assembly for retractable landing gears. 2,451,109, Oct.

National Bread Wrapping Machine Co., assignee: *See*—
Hoppe, William.

National Cylinder Gas Company, assignee: *See*—
Candy, Albert M.

National Malleable and Steel Castings Company, assignee: *See*—
Spence, Hubert L.

National Steel Corporation, assignee: *See*—
Rees, William J.

National Tube Company, assignee: *See*—
Kennedy, Truman H.

Nau-Touron, Albert, Le Vesinet, assignor to Societe a responsabilite limitee Fonderie de Precision, Nanterre, France. Revolving thread guiding flier. 2,451,352, Oct. 12.

Neal, Mary L., Baton Rouge, La. Baby garment. 2,451,300, Oct. 12.

Nefske, Frank J.: *See*—
Putnam, Earl R., and Nefske.

Nevins-Church Press, The, assignee: *See*—
Davis, Albert G.

Newbery, Stanley, Peterborough, assignor of one-half to James Armstrong & Company Limited, London, England. Machine used in laundries for washing or drying articles. 2,451,403, Oct. 12.

Newell, William H., New York, assignor to Ford Instrument Company, Inc., Long Island City, N. Y. Ball caster. 2,451,353, Oct. 12.

Newman, Alexander L., River Forest, assignor to Precision Scientific Co., Chicago, Ill. Flask heater. 2,450,981, Oct. 12.

Newman, Armand E., New York, N. Y. Suspension rack. 2,451,110, Oct. 12.

Newman, Max M., New York, N. Y., assignor to American Machine & Foundry Company. Necktie machine. 2,450,906, Oct. 12.

Newton, John C., Bayside, and P. Halpert, Hempstead, N. Y., assignors to The Sperry Corporation. Turn control means for an automatic pilot. 2,450,907, Oct. 12.

Niccolls, Walter C., San Jose, Calif. Folding concrete form. 2,451,112. Oct. 12.

Nichols, Edgar B., Morristown, N. J. Writing instrument. 2,451,111, Oct. 12.

Nies, Hans C., Passaic, N. J. Cushion tire. 2,451,172, Oct. 12.

Nipa Laboratories, Limited, assignee: *See*—
Boehm, Erich.

Norde, Leslie, Hempstead, N. Y., assignor, by mesne assignments, to Jefferson Standard Broadcasting Company. Adjustable wave coupling system. 2,451,444, Oct. 12.

Norman, Horace M., Skokie, assignor to Stewart-Warner Corporation, Chicago, Ill. Inductive electrical indicator with compensated damper. 2,451,404, Oct. 12.

Oakes, George W., Crystal City, Mo. Combination clamp and closure. 2,451,405, Oct. 12.

Obergfell, Amanda, executrix: *See*—
Sargisson, Robert L., and Obergfell.

Obergfell, Herbert F.: *See*—
Sargisson, Robert L., and Obergfell.

O'Brien, Joseph F., Lebanon, and E. S. Boynton, East Orange, N. J., assignors to John B. Pierce Foundation, New York, N. Y. Conduit receptacle. 2,450,908, Oct. 12.

O'Brien, William J., assignor to E. F. Andrews, Chicago, Ill. Dynamoelectric machine. 2,450,982, Oct. 12.

O'Connell, Joseph, Kensington, Victoria, Australia. Apparatus for the molding of butter and like products. 2,451,301, Oct. 12.

Oeth, Earl W., assignor of one-third to R. A. Oeth, Evansville, Ind. Trailer for boat handling. 2,451,236, Oct. 12.

Oeth, Ruby A., assignee: *See*—
Oeth, Earl W.

Ogden, Harold S., Erie, Pa., assignor to General Electric Company. Traction motor control system. 2,451,237, Oct. 12.

Ohio State University Research Foundation, The, assignee: *See*—
Lidington, Robert W.

Ohls, Robert L., Houston, Tex. Pipe coupling. 2,451,354, Oct. 12.

Oil Well Supply Company, assignee: *See*—
Keim, Charles J.

O'Neil, Harold D., Hatboro, Pa. Hydrostatic testing device. 2,450,909, Oct. 12.

O'Rear, George M., United States Navy. Aerial bomb. 2,450,910, Oct. 12.

Osterheld, Clark M., Stoughton, Wis., assignor to McGraw Electric Company, Elgin, Ill. Heat storage control system. 2,450,983, Oct. 12.

Owen, William W.: *See*—
Candy, Charles M., and Owen.

Owens-Illinois Glass Company: *See*—
Schutz, Harold R.

Ozols, Karlis V., Brooklyn, N. Y. Automatically adjustable ladder. 2,451,113, Oct. 12.

Packard Motor Car Company, assignee: *See*—
Vincent, Jesse G.

Pancake, Herman H., Huntington, W. Va., assignor to American Car and Foundry Company, New York, N. Y. Mine car latch assembly. 2,451,406, Oct. 12.

Paolucci, Vincent R., Cleveland Heights, Ohio. Vehicle attached jack operated from luggage compartment. 2,451,407, Oct. 12.

Paolucci, Vincent R., Cleveland Heights, Ohio. Lifting device for automobiles. 2,451,408, Oct. 12.

Park, Arthur D., and N. A. Johnson, assignors to Armstrong Cork Company, Lancaster, Pa. Acoustical structure. 2,450,911, Oct. 12.

Parsons, Joseph R., assignor to United States Gypsum Company, Chicago, Ill. Manufacture of dense products from cement material. 2,451,445, Oct. 12.

Parsons, Joseph R., assignor to United States Gypsum Company, Chicago, Ill. Light-weight fiber containing product. 2,451,446, Oct. 12.

Pastore, Alfredo, Brooklyn, N. Y. Gem grinding and polishing tool. 2,450,984, Oct. 12.

Paust, Lawrence R., Chicago, Ill. Power supply for electronic apparatus. 2,450,985, Oct. 12.

Pecker, Joseph S., Upper Darby, Pa., assignor to Dennison Manufacturing Company, Framingham, Mass. Making identification tags. 2,451,355, Oct. 12.

Pennsylvania Railroad Company, The, assignee: *See*—
Nancarrow, Harry L. ,and Wilson.

Pennybacker, Miles, Westport, Conn. Gas discharge lamp. 2,451,043, Oct. 12.

Perish, Peter W.: *See*—
Dolza, John, Croisant, Gaubatz, and Perish.

Peters, Alva E., Olney, Ill. Pipe-bending machine. 2,451,302, Oct. 12.

Peterson, Fritz R., Denver, Colo. Folding clothes hanger. 2,451,114, Oct. 12.

Peterson, Glen, Asbury Park, N. J. Radiotelegraphy superregenerative receiver. 2,450,913, Oct. 12.

Petry, Stanton H., Evanston, and H. S. Snyder, assignors to Victor Adding Machine Co., Chicago, Ill. Portable collimator apparatus for testing the gyroscope and optical system of bomb-sights. 2,451,409, Oct. 12.

Petskeyes, Charles H., Davenport, Iowa, assignor to Gellman Manufacturing Company, Rock Island, Ill. Mechanical movement. 2,451,303, Oct. 12.

Pew, Thomas C., assignor to Hoover Ball and Bearing Company, Ann Arbor, Mich. Pillow block bearing. 2,451,115, Oct. 12.

Philco Corporation, assignee: *See*—
Baclawski, Theodore.
Curtiss, George E., Jr.
Terry, Matson C.

Pierce, John B., Foundation, assignee: *See*—
O'Brien, Joseph F., and Boynton.
Stilwell, William E., Jr.

Pierce, John R., Millburn, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Communication system employing pulse code modulation. 2,451,044, Oct. 12.

Pit, Paul A.: *See*—
Heath, William C., and Pitt.

Plummer, Fred L., assignor to Hammond Iron Works, Warren, Pa. Guide construction for movable tank tops. 2,450,986, Oct. 12.

Polidor, Edward C.: *See*—
De Boer, Willis, Betts, and Polidor.

Pollak, Frederick F., New York, N. Y. Recovering albumin adhering to egg shells. 2,451,116, Oct. 12.

Post, Carl B.: *See*—
Fetzer, Maurice C., and Post.

Potter, Robert, Mount Lebanon, assignor to Superior Steel Corporation, Pittsburgh, Pa. Handling and joining cooperating members. 2,450,987, Oct. 12.

Potts, Louis M., Evanston, assignor to Teletype Corporation, Chicago, Ill. Automatic message numbering telegraph transmitter. 2,451,045, Oct. 12.

Powell, Edward R., North Plainfield, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Apparatus and process for the manufacture of mineral wool. 2,450,914, Oct. 12.

Powell, Edward R., North Plainfield, N. J., assignor to Johns-Manville Corporation, New York, N. Y. Method and apparatus for forming mineral wool products. 2,450,915, Oct. 12.

Powell, Edward R.: *See*—
Coss, Harold T., and Powell.

Power Brake Equipment Co., assignee: *See*—
Williams, Norman C., and Fishwood.

Precision Methods Co., Inc., assignee: *See*—
De Boer, Willis, Betts, and Polidor.

Precision Scientific Co., assignee: *See* —
Newman, Alexander I.

Price, Leo F., Spokane, Wash. Pulling apparatus. 2,451,117, Oct. 12.

Pritchard, Herbert E., New Orleans, La. Vaporizer. 2,451,238, Oct. 12.

Pure Oil Company, The, assignee: *See*—
Bell, Richmond T.
Bernard, George G., and Bond.

Putnam, Earl R., Grosse Pointe Woods, and F. J. Nefske, Detroit, Mich. Artificial fish bait. 2,450,988, Oct. 12.

Putnam, James B., El Campo, Tex. Internal-combustion motor with pistons symmetrically arranged about cams on the drive shaft. 2,450,912, Oct. 12.

Pyle, Robert A., Lapeer, Mich. Fluid transmission. 2,451,118, Oct. 12.

Queeny, Edgar M., Kirkwood, assignor to Monsanto Chemical Company, St. Louis, Mo. Thermosetting laminating sirups. 2,451,410, Oct. 12.

Querry, Merle V.: *See*—
Baker, Bernard R., and Querry.

Raasch, Maynard S., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Saturated polyhaloalkyl sulfides and methods for their preparation. 2,451,411, Oct. 12.

Radio Corporation of America, assignee: *See*—
Brian, Joseph M.
Clammer, Edward S., Ackerman, and Barton.
Eaton, Thomas T.
Evans, John.
Friend, Albert W.
Greig, Harold G.
Heller, Harold P.
Koch, Winfield R.
Leverenz, Humboldt W.
Moore, Arnold R.
Rosencrans, Charles A.
Sanders, Royden C.
Shenk, Eugene R., and Kahn.
Smith, James E.
Smith, Philip T., and Hegbar.
Smith, Rogers M.
Spencer, James A., and Warwick.
Trevor, Bertram.
Weimer, Paul K., Zworykin, and Wolff.
Wolff, Irving.
Zworykin, Vladimir K., and Hillier.

Raffold Process Corporation, assignee: *See*—
Rafton, Harold R.

Rafton, Harold R., Andover, Mass., assignor to Raffold Process Corporation. Treatment of pigment comprising calcium carbonate. 2,451,448, Oct. 12.

Ransome, Stafford M., assignor to Barber-Colman Company, Rockford, Ill. Hobbing machine. 2,451,447, Oct. 12.

Rawson, Emanuel, assignor to Rite-Way Products Company, Chicago, Ill. Stall cock. 2,451,456, Oct. 12.

Rechton, George D., Los Angeles, assignor to Douglas Aircraft Company, Inc., Santa Monica, Calif. Hollow rivet for pressural upsetting, method of upsetting, and resulting joint. 2,451,356, Oct. 12.

Reed, Cortes F., Anoka, assignor to Federal Cartridge Corporation, Minneapolis, Minn. Apparatus for stripping pods from milkweed plants. 2,450,917, Oct. 12.

Rees, William J., Trenton, Mich., assignor to National Steel Corporation. Method and mold for casting blast-furnace salamanders. 2,450,989, Oct. 12.

Regan, Maynard T., Lansing, Mich. Towing hitch. 2,451,119, Oct. 12.

Rehberg, Richard A.: *See*—
May, Frederick T., and Rehberg.

Reifschneider, Paul J., Springfield, Pa., assignor to General Electric Company. Shockproof electromagnet with armature. 2,451,239, Oct. 12.

Rembert, Ernest W., Hinsdale, Ill., assignor to Johns-Manville Corporation, New York, N. Y. Coupling pipe. 2,451,046, Oct. 12.

Reuter, Louis F., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Vulcanization of vinyl resin. 2,451,174, Oct. 12.

Richardson, Leon W.: *See*—
Gano, Joseph J.

Richbourg, James W., assignor of two-fifths to G. H. Gibson, Vidalia, Ga. Pressure switch. 2,451,412, Oct. 12.

Richter, Richard, Irvington, N. J., and J. J. Miskel, Brooklyn, N. Y., assignors to Nopco Chemical Company, Harrison, N. J. Rubberoid tall oil polymers and process for making the same. 2,451,173, Oct. 12.

Riggen, Theodore K., Elmira, N. Y. Sensitive photoelectric control for signal devices. 2,450,990, Oct. 12.

Risberg, Fred A., Chicago, Ill. Wrapping, banding, and tipping machine. 2,451,175, Oct. 12.

Rite-Way Products Company, assignee: *See*—
Rawson, Emanuel.

Riviera Packing Company, assignee: *See*—
Lowe, Horace.

Roberts, Stiles M.: *See*—
McCleary, Rush F., and Roberts.

Robinson, Albert L., South Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Coupling device for concentric conductor lines. 2,451,413, Oct. 12.

Rogers, Dilworth T.: *See*—
McNab, John G., and Rogers.

Rohm & Haas Company, assignee: *See*—
Hester, William F., and Craig.

Rosencrans, Charles A., Haddonfield, N. J., assignor to Radio Corporation of America. Electron discharge device employing cavity resonator apparatus. 2,451,240, Oct. 12.

Rosentreter, Ernest W., De Witt, N. Y., assignor to General Electric Company. Shielded volume control and switch. 2,451,241, Oct. 12.

Ross, Elliott P., Forest Hills, and H. S. Marsh, Great Neck, assignors, by mesne assignments, to Ford Instrument Company, Inc., Long Island City, N. Y. Director firing system. 2,451,357, Oct. 12.

Rossetter, Charles F., Los Angeles, Calif. Cabinet having means for moving compartments vertically and horizontally. 2,451,120, Oct. 12.

Royal, Leslie L., assignor to Belmont Radio Corporation, Chicago, Ill. Control apparatus for radio receivers. 2,450,918, Oct. 12.

Rugg, Edward H.: *See*—
Scott, Carl F., Carlson, and Rugg.

Runnels, Garland D., Seattle, Wash. Powder applicator. 2,450,919, Oct. 12.

Sacchini, Columbus R., Willoughby, assignor to The Marquette Metal Products Company, Cleveland, Ohio. Shaft actuated snap action mechanism for reciprocating expansible chamber motors. 2,451,449, Oct. 12.

St. Pierre, Henry, Worcester, Mass. Making chain links. 2,451,253, Oct. 12.

St. Pierre, Henry, Worcester, Mass. Chain link. 2,451,254, Oct. 12.

St. Pierre, Henry, Worcester, Mass. Chain link and making same. 2,451,255, Oct. 12.

St. Regis Paper Company, assignee: *See*—
Hartman, Carl H.

Sanders, Royden C., Jr., Hightstown, N. J., assignor to Radio Corporation of America. Radar control system. 2,450,991, Oct. 12.

Sanderson, William J., Madison, Wis., assignor to the United States of America as represented by the Secretary of Agriculture. Free-fall aerial container. 2,450,992, Oct. 12.

Santagata, Joseph, Cranston, R. I. Electric motor-driven concrete mixer. 2,450,993, Oct. 12.

Sargisson, Robert L., Berwyn, and H. F. Obergfell, deceased; by A. Obergfell, executrix, River Forest, assignor to Automatic Electric Laboratories, Inc., Chicago, Ill. Impulse transmitter. 2,451,358, Oct. 12.

Saveland, Brown W.: *See*—
Gannett, Joseph K., Smith, Jr., and Saveland.

Schaefer, Norman G., Jersey City, N. J. C-clamp with laterally adjustable arm extensions. 2,450,994, Oct. 12.

Schellman, Joseph H., Ridley Park, Pa., assignor to Robert Hetherington & Son, Inc., Wilmington, Del. Moisture-proofed plunger snap switch. 2,451,176, Oct. 12.

Schermuly, Alfred J.: *See*—
Schermuly, Conrad D., A. J., and C.

Schermuly, Charles: *See*—
Schermuly, Conrad D., A. J., and C.

Schermuly, Conrad D., A. J., and C., Parkgate, Newdigate, England. Illuminating flare. 2,451,121, Oct. 12.

Schläpfer, Oskar, assignor to Sulzer Freres, Societe Anonyme, Winterthur, Switzerland. Electric generating plant for the drive of vehicles. 2,451,242, Oct. 12.

Schlicksupp, Theodore F., Long Island City, N. Y. Rotary and sliding ball bearing. 2,451,359, Oct. 12.

Schlums, Otto W., assignor to Whitin Machine Works, Whitinsville, Mass. Traverse motion. 2,451,243, Oct. 12.

Schneider, Emmor V., assignor to The Alliance Manufacturing Company, Alliance, Ohio. Idler system for phonograph turntable drives. 2,451,304, Oct. 12.

Schultz, H. O., Inc., assignee: *See*—
Schultz, Henry O.

Schultz, Henry O., assignor to H. O. Schultz, Inc., Milwaukee, Wis. Multiple drill template. 2,451,123, Oct. 12.

Schutz, Harold R., assignor, by mesne assignments, to Owens-Illinois Glass Company, Toledo, Ohio. Apparatus for forming hollow glassware. 2,450,995, Oct. 12.

Scott, Carl F., Milford, C. G. Trumbull, and E. H. Rugg, Bridgeport, Conn., assignors to General Electric Company. Glider tow indicator. 2,451,244, Oct. 12.

Sebotka, Charles M.: *See*—
Mitchell, Hubert R., and Sobotka.

Semegen, Stephen T., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Treatment of acrylic ester polymers. 2,451,177, Oct. 12.

Semegen, Stephen T., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Treatment of acrylic ester polymers. 2,451,178, Oct. 12.

Seney, John S., Richmond, Va., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Automatic stop mechanism for warpers. 2,450,996, Oct. 12.

Shand, John A., West Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Wire cutting and bending press. 2,450,920, Oct. 12.

Shann, Oscar A., Short Hills, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Signaling system. 2,450,997, Oct. 12.

Shannon, William P., Port St. Joe, Fla. Pressure head box for paper machines. 2,451,305, Oct. 12.

Shell Development Company, assignee: *See*—
Merten, Eugen.
Morris, Rupert C., and Melchior.
Morris, Rupert C., and Shokal.

Shenk, Eugene R., Brooklyn, and A. Kahn, Queens Village, N. Y., assignors to Radio Corporation of America. Low frequency oscillator. 2,451,245, Oct. 12.

Sheppard, Richard H., Hanover, Pa. Cylinder head construction, bridge cooling. 2,450,998, Oct. 12.

Shepherd, Judson O., Atlanta, Ga. Traffic signal control system. 2,451,457, Oct. 12.

Sheridan, Henry M., Erie, Pa., assignor to Apex Tool & Cutter Company, Shelton, Conn. Tool bit and holder therefor. 2,451,246, Oct. 12.

Sherwood, Lester L., Los Angeles, Calif. Attaching transparent envelopes to billfolds. 2,451,122, Oct. 12.

Shoemaker, George E., Ithan, Pa. Terminal for electric discharge tubes. 2,450,999, Oct. 12.

Shokal, Edward C.: *See*—
Morris, Rupert C., and Shokal.

Sight Light Corporation, The, assignee: *See*—
Doane, Leroy C.

Sims, Herman, Brooklyn, N. Y. Adjustable locking shoe lace tip. 2,451,247, Oct. 12.

Sims, Marion W.: *See*—
Alexanderson, Ernst F. W., Mittag, and Sims.

Singer Manufacturing Company, The, assignee: *See*—
Smith, Floyd T.

Sisson, Thomas U., assignor to Training Devices, Inc., Detroit, Mich. Picture film strip projection apparatus. 2,451,306, Oct. 12.

Skehan, Joseph W., Stamford, assignor to Machlett Laboratories, Incorporated, Springdale, Conn. Making grids. 2,451,360, Oct. 12.

Skell, Philip S.: *See*—
Cowan, John C., Falkenburg, Teeter, and Skell.

Skoog, Arvid W.: *See*—
La Brecque, Theodore A., and Skoog.

Skooglund, Arthur C., Clark Township, Union County, and C. C. Swoope, Union, N. J., assignors to Standard Oil Development Company. Polymer recovery from low-temperature polymerization of olefinic material. 2,451,047, Oct. 12.

Slater, Vernon E.: *See*—
Whitehurst, Graham, Slater, Bruno, Hubbard, and Krawitz.

Slatin, Joseph L., Berwyn, Ill. Phonograph-radio switch. 2,451,248, Oct. 12.

Smith, Arthur R.: *See*—
Warren, Glenn B., and Smith.

Smith, Floyd T., Plainfield, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Bearing for electric motors. 2,451,124, Oct. 12.

Smith, James E., Jackson Heights, N. Y., assignor to Radio Corporation of America. Overmodulation alarm. 2,451,361, Oct. 12.

Smith, John E., Plainfield, N. J. Electric space heaters and method of making. 2,450,921, Oct. 12.

Smith, Philip T., and H. R. Hegbar, Princeton, N. J., assignors to Radio Corporation of America. Electron discharge device for ultra high frequencies. 2,451,249, Oct. 12.

Smith, Robert, Jr.: *See*—
Gannett, Joseph K., Smith, and Saveland.

Smith, Rogers M., Merchantville, N. J., assignor to Radio Corporation of America. Repeater indicator for pulse echo distance measuring devices. 2,451,000, Oct. 12.

Snider, Carl J., Dayton, Ohio. Oil regulator test stand. 2,450,922, Oct. 12.

Snyder, Hartland S.: *See*—
Petry, Stanton H., and Snyder.

Snyder, Jacob R., Cleveland, Ohio. Rail holding device. 2,451,414, Oct. 12.

Snyder, Robert E.: *See*—
Allen, Frank M., and Snyder.

Snyder, Rudolph M., assignor to H. A. Johnson, Kansas City, Mo. Lining composition and container wall lined therewith. 2,451,362, Oct. 12.

Societe a responsabilite limitee Fonderie de Precision, assignee: *See*—
Nau-Touron, Albert.

Solar Aircraft Company, assignee: *See*—
Heath, William C., and Pitt.

Sonner, Edwin W., Jr., Queens Village, N. Y. Fishing rod holder and bait digging apparatus. 2,451,363, Oct. 12.

South, Chester, assignor to Bear Manufacturing Company, Rock Island, Ill. Clamp for frame straightening machines. 2,451,307, Oct. 12.

Southern Steel Company, assignee: *See*—
White, Loyd J.

Sparks, William J., Cranford, N. J., and D. C. Field, Baton Rouge, La., assignors to Standard Oil Development Company. Lubricating oil addition agents. 2,451,048, Oct. 12.

Spector, Ralph, Kansas City, Mo. Garment and collar combination. 2,451,364, Oct. 12.

Spence, Hubert L., East Cleveland, assignor to National Malleable and Steel Castings Company, Cleveland, Ohio. Railway car draft gear. 2,451,415, Oct. 12.

Spencer, James A., Teaneck, N. J., and J. C. Warwick, Jr., Beechhurst, Long Island, N. Y., assignors to Radio Corporation of America. Record tape advancing device. 2,451,365, Oct. 12.

Sperry Corporation, The, assignee: *See*—
Antony, Charles, Jr.
Braddon, Frederick D.
Costa, Philip J.
Dawson, Edward, and Ericson.
Hansen, William W., and Woodyard.
Newton, John C., and Halpert.

Speiser, Leda I., Chicago, Ill., now by marriage, L. I. Lash. Brassière. 2,451,001, Oct. 12.

Spiro, Edward H., Jr., New York, N. Y. Combination mattress cover and blanket retainer. 2,450,923, Oct. 12.

Sporing, Percy A., Hampton Hill, and C. P. Johnson, Hanwell, assignors to The Telegraph Condenser Company Limited, North Acton, England. Tubular container for electrical condensers or other apparatus. 2,451,125, Oct. 12.

Spraragen, Louis, assignor to Bridgeport Fabrics, Inc., Bridgeport, Conn. Weather strip. 2,451,450, Oct. 12.

Springer, Hans, Ashland, Mass., assignor to Telechron, Inc. Elapsed time indicator. 2,451,250, Oct. 12.

Staaf, Werner I., Rennerdale, Pa. Electrical device. 2,451,308, Oct. 12.

Standard Oil Development Company, assignee: *See*—
Beach, Leland K.
Bark, Robert E.
Davis, Garland H. B.
Ellender, Harold L.
Fasce, Egi V., and Wood.
Green, Arthur D.
Martin, John R., and Burrell.
McNab, John G., and Rogers.
Mikeska, Louis A.
Morway, Arnold J., and Zimmer.
Mottern, Henry O., and Mistretta.
Murphree, Eger V.
Skooglund, Arthur C., and Swoope.
Sparks, William J., and Field.
Tongberg, Carl O.

Standard Telephones and Cables Limited, assignee: *See*—
Foulkes, Christopher H.

Steffes, Henry J., Great Falls, Mont. Handy scaffold bracket. 2,451,179, Oct. 12.

Stein, Emil H., assignee: *See*—
Elfner, Henry L.

Steiner, Frank G., Miami Beach, Fla., and R. G. Birr, Lombard, Ill., assignors, by mesne asignments, to American Linen Supply Co., Carson City, Nev. Towel dispensing device. 2,451,251, Oct. 12.

Sterling Injection Molding, Inc., assignee: *See*—
Marquardt, Carl G.

Stewart-Warner Corporation: *See*—
Heymann, Seymour R., Leslie, and Marshall.
Norman, Horace M.

Stewart, William D., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Catalysts for the polymerization of butadiene-1,3 hydrocarbons. 2,451,180, Oct. 12.

Stilwell, William E., Jr., Cincinnati, Ohio, assignor to John B. Pierce Foundation, New York, N. Y. Electromagnetic switch. 2,450,924, Oct. 12.

Stoeckly, Eugene E., Marblehead, Mass., assignor to General Electric Company. Flexible conduit joint. 2,451,252, Oct. 12.

Stop-Motion Devices Corp., assignee: *See*—
Vossen, Edward.

Strickland, Howard L., Clinton, S. C. Film spool switch. 2,451,256, Oct. 12.

Stringfield, Raymond B., Los Angeles, Calif., and T. R. Miles, Fort Worth, Tex., assignors to Consolidated Vultee Aircraft Corporation, San Diego, Calif. Translucent sheet for reproduction purposes. 2,451,126, Oct. 12.

Stupakoff Ceramic & Manufacturing Company, assignee: *See*—
Tell, Alta W.

Sturtevant, Mark J., assignor to Wingfoot Corporation, Akron, Ohio. Salvage apparatus. 2,451,002, Oct. 12.

Sulzer Freres, Societe Anonyme, assignee: *See*—
Schlapfer, Oskar.

Sun Shipbuilding & Dry Dock Company, assignee: *See*—
Burke, Richard L.

Super-Cut, Inc., assignee: *See*—
Metzger, Leopold H., and Fontozzi.

Superior Steel Corporation, assignee: *See*—
Potter, Robert.

Sussky, William C.: *See*—
Bliss, Harding, and Sussky.

Suter, Chester M.: *See*—
Albertson, Nole F., Archer, and Suter.

Swartsman, Morris, Brooklyn, N. Y. Dental floss holder. 2,451,181, Oct. 12.

Swoope, Charles C.: *See*—
Skooglund, Arthur C., and Swoope.

Syrjala, Irene E., Mount Clemens, Mich. Safety device for firearms. 2,451,003, Oct. 12.

Taft, George H., Hudson, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Composite article. 2,451,182, Oct. 12.

Talbot Mills, Inc., assignee, trustee: *See*—
Hayes, Edward F.

Tantimonaco, Leonardo, West Haven, Conn. Blood extracting apparatus. 2,451,183, Oct. 12.

Tarwater, Lawson, assignor of one-half to E. G. Witmer, Redlands, Calif. Rail anchor. 2,451,127, Oct. 12.

Tate, Malcolm C., Stamford, Conn., assignor to Baldwin Locomotive Works. Weighing system. 2,451,451, Oct. 12.

Taylor, William H.: *See*—
Jorgensen, Clarence H., and Taylor.

Teeter, Howard M.: *See*—
Cowan, John C., Falkenburg, Teeter, and Skell.

Telechron, Inc., assignee: *See*—
Springer, Hans.

Telegraph Condenser Company Limited, The, assignee: *See*—
Sporing, Percy, Archibald, and Johnson,

Teletype Corporation, assignee: *See*—
Potts, Louis M.

Tell, Alta W., Ligonier, assignor to Stupakoff Ceramic & Manufacturing Company, Latrobe, Pa. Abrasive pneumatic finishing machine. 2,451,049, Oct. 12.

Temple, Robert B.: *See*—
Eksergian, Carolus L., and Temple, and Harle.

Terry, Matson C., Rydal, assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa. Air conditioning apparatus. 2,451,366, Oct. 12.

Texas Company, The, assignee: *See*—
McCleary, Rush F., and Roberts.

Thiesse, Carl E., Porterville, Calif. Material distributor. 2,451,128, Oct. 12.

Thomas, Frank M., Summit, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Intermittent drive device. 2,451,416, Oct. 12.

Thompson, James R., Shaker Heights, Ohio, assignor to The American Steel and Wire Company of New Jersey. Steel wool. 2,451,417, Oct. 12.

Thompson Products, Inc., assignee: *See*—
Booth, James H.

Thunberg, Leander O., Johnson City, assignor to General Aniline & Film Corporation, New York, N. Y. Feed claw and shutter movement for motion-picture mechanisms. 2,451,452, Oct. 12.

Thurston, Ernest B., assignor to The Haughton Elevator Company, Toledo, Ohio. Hoisting motor control system. 2,451,257, Oct. 12.

Thynell, Gustave M., Naugatuck, assignor to The Bristol Company, Waterbury, Conn. Telemetering apparatus of the impulse-duration class. 2,451,129, Oct. 12.

Tillman, Ferdinand J., St. Louis, Mo. Carriage controlled stop setting and key operating mechanism for typewriting machines. 2,450,925, Oct. 12.

Tinnerman Products, Inc., assignee: *See*—
Hartman, Richard A.

Tongberg, Carl O., Westfield, N. J., assignor to Standard Oil Development Company. Olefin extraction. 2,451,050, Oct. 12.

Townsend, Sidney A., Bennettsville, S. C. Cotton-picking machine. 2,451,130, Oct. 12.

Training Devices, Inc., assignee: *See*—
Sisson, Thomas U.

Tree, George, Gary, Ind., assignor to Carnegie-Illinois Steel Corporation. Method of and apparatus for reducing visible vapors above open vats and the like. 2,451,418, Oct. 12.

Trevor, Bertram, Riverhead, N. Y., assignor to Radio Corporation of America. Sealed antenna. 2,451,258, Oct. 12.

Triplett Electrical Instrument Company, assignee: *See*—
Lingel, Frederick J.

Tronic, Max, Worcester, Mass. Sleeve board having a lowered inoperative position and having a raised and locked operative position. 2,451,259, Oct. 12.

Tubbs, Riley R., Great Bend, Kans. Sanitary pipe clean-out device. 2,451,051, Oct. 12.

Tucker, William G., Ludlow, Vt. Intermediate feed for carding machines. 2,451,260, Oct. 12.

Tuxhorn, Blaine M., Kansas City, Mo. Apparatus for controlling rotation of vehicle wheels. 2,451,453, Oct. 12.

Twamley, William E., Providence, R. I., assignor to Brown and Sharpe Manufacturing Company. Feed mechanism. 2,451,367, Oct. 12.

Union Switch & Signal Company, The, assignee: *See*—
Beall, Charles R.

United Aircraft Corporation, assignee: *See*—
Jarvis, Harold T.
Martin, Erle.

United Shoe Machinery Corporation, assignee: *See*—
Ashworth, Fred, and Carter.
Eastman, Fred C.
Goodhue, William V., and Carter.
Hart, George T.
Lancaster, John T.

United States Gypsum Company, assignee: *See*—
Parsons, Joseph R.

United States Rubber Company, assignee: *See*—
Foster, Boutwell H.
Gates, Charles W., and Howey.

United States Stoneware Company, assignee: *See*—
Chamberlain, James M. W.

United Steel Fabricators, Inc., assignee: *See*—
Macleod, Donald K.

Universal Oil Products Company, assignee: *See*—
Wenzke, Herman H.

Universal Wire Spring Company, assignee: *See*—
Blumensaadt, Svend G., and Bielak.

Van Antwerp, George S., Norristown, Pa. Sectionalized aerial duct. 2,451,004, Oct. 12.

Vanity Fair Mills, Inc., assignee: *See*—
Young, George O.

Van Norman Company, assignee: *See*—
White, Charles E.

Victor Adding Machine Co., assignee: *See*—
Petry, Stanton H., and Snyder.

Vidal Corporation, assignee: *See*—
Vidal, Eugene L., and Marhoefer.

Vidal, Eugene L., Washington, D. C., and L. J. Marhoefer, Haddon Heights, assignors to Vidal Corporation, Camden, N. J. Making reinforced structures. 2,451,131, Oct. 12.

Vincent, Jesse G., Grosse Pointe Park, assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 2,451,132, Oct. 12.

Vinyard, Roy M., Portland, Oreg. Duplex micrometer gauge. 2,451,419, Oct. 12.

Vossen, Edward, assignor to Stop-Motion Devices Corp., Brooklyn, N. Y. Yarn carrier stop motion. 2,451,133, Oct. 12.

Wachman, Morris: *See*—
Berger, Joseph, and Wachman.

Waernhoff, Ernst T.: *See*—
Flate, Harold, Waernhoff, and Franson.

Wagner, Robert L., Niagara Falls, N. Y., assignor to The Linde Air Products Company. Thermochemical removal of metal with a flux-forming powder in the oxygen cutting stream. 2,451,422, Oct. 12.

Waldie, Earl S., assignee: *See*—
Lechinsky, Francis P.

Walker, Joseph F.: *See*—
Bair, Robert R., Benner, and Walker.

Walldov, Gustav A., Marlboro, N. J. Poultry food. 2,451,134, Oct. 12.

War, the United States of America, as represented by the Secretary of, assignee: *See*—
Aiken, Elmer W.
Fix, Eugene J.
Hart, John J.

Ward, Frank A., Baltimore, Md. Time switch. 2,451,135, Oct. 12.

Warren, Glenn B., and A. R. Smith, Schenectady, N. Y., assignors to General Electric Company. High and low pressure turbine rotor cooling arrangement. 2,451,261, Oct. 12.

Warwick, James C.: *See*—
Spencer, James A., and Warwick.

Watkins, William B., Norfolk, Va. Adjustable golf club. 2,451,262, Oct. 12.

Watkins, William W., Waynesboro, Va., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Artificial yarns and process of producing the same. 2,451,420, Oct. 12.

Watrous, Ward W., Jr., Chatham, N. J., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Protective device and the manufacture thereof. 2,451,184, Oct. 12.

Watter, Michael, assignor to The Budd Company, Philadelphia, Pa. Method of fabricating airfoils. 2,451,454, Oct. 12.

Watter, Michael, assignor to The Budd Company, Philadelphia, Pa. Aircraft airfoil construction. 2,451,458, Oct. 12.

Waugh Equipment Company, assignee: *See*—
Berman, Samuel.

Wayman, Albert J., Youngstown, Ohio. Coupling device. 2,451,421, Oct. 12.

Webb, Donald R., Schenectady, N. Y., assignor to General Electric Company. Power boost control system. 2,451,263, Oct. 12.

Weimer, Paul K., V. K. Zworykin, Princeton, and I. Wolff, Manasquan, N. J., assignors to Radio Corporation of America. Cathode-ray storage tube apparatus and method of operation. 2,451,005, Oct. 12.

Weinig, Friedrich S., Stuttgart-Moehringen, Germany. Parachute made of self-supporting ribbons which are composed of broad and narrow bands. 2,450,926, Oct. 12.

Wellman, S. K., Company, The, assignee: *See*—
Wellman, Samuel K.

Wellman, Samuel K., Cleveland Heights, assignor to The S. K. Wellman Company, Cleveland, Ohio. Applying powdered metal briquettes to curved metallic surfaces. 2,451,264, Oct. 12.

Wenzke, Herman H., assignor to Universal Oil Products Company, Chicago, Ill. Treatment of normally gaseous mixtures. 2,451,136, Oct. 12.

Wescott, John E., Hagerstown, Md., assignor to Fairchild Engine and Airplane Corporation. Aircraft landing gear lock. 2,451,265, Oct. 12.

West, William L., Belmont, N. C. Helicopter roundabout. 2,451,006, Oct. 12.

Western Electric Company, Incorporated: *See*—
Detuno, Rocco J.
Maxson, Gordon J.
Shand, John A.

Westinghouse Electric Corporation, assignee: *See*—
Halfvarson, Gustaf A.
Jernstedt, George W.
May, Frederick T., and Rehberg.
Watrous, Ward W., Jr.

Whaley, Atherton M., Columbia, S. C. Fluorinated products and process. 2,451,185, Oct. 12.

White, Charles E., Ashburnham, assignor, by mesne assignments, to Van Norman Company, Springfield, Mass. Contour grinding machine for work pieces each having a hollow spherical section. 2,451,137, Oct. 12.

White, Gertrude K., Philadelphia, Pa. Baby strap. 2,451,007, Oct. 12.

White, John F.: *See*—
White, Le Roy J. and J. F.

White, Le Roy J. and J. F., Wilmington, Del. Hose handling apparatus. 2,451,368, Oct. 12.

White, Loyd J., assignor to Southern Steel Company, San Antonio, Tex. Vaporizer for two-stage liquefied petroleum gas dispensing systems. 2,451,309, Oct. 12.

Whitehurst, Graham, Glendale, V. E. Slater, Los Angeles, G. F. Bruno, Montebello, and J. M. Hubbard, and G. P. Krawitz, Los Angeles, Calif. Truck loader. 2,451,138, Oct. 12.

Whitin Machine Works, assignee: *See*—
Schluma, Otto W.

Whittemore, Leslie E., Dorchester, Mass. Telescope sight mount for shoulder arms. 2,451,266, Oct. 12.

Wickwire Brothers, Inc., assignee: *See*—
Wickwire, Charles C.

Wickwire, Charles C., assignor to Wickwire Brothers, Inc., Cortland, N. Y. Art of welding wire-mesh fabrics. 2,451,423, Oct. 12.

Widmer, Gustave, Basel, and W. Hertner, Pratteln, assignors to Ciba Limited, Basel, Switzerland. Glue composition containing vetch seed meal. 2,451,186, Oct. 12.

Wilde, Arthur, assignee, et al.: *See*—
Groves, Martin V.

Wilder, James W. S., Levelland, Tex. Locking spider for wall switches and the like. 2,451,267, Oct. 12.

Williams, Ernest, Edwight, W. Va. Endless-type conveyer for coal and the like. 2,451,424, Oct. 12.

Williams, Norman C., and R. W. Fishwood, assignors to Power Brake Equipment Co., Portland, Oreg. Automatic control instrument. 2,451,139, Oct. 12.

Williams, William W., assignor to Bell Aircraft Corporation, Buffalo, N. Y. Reaction jet system for aircraft control. 2,451,008, Oct. 12.

Williams, William W., Buffalo, and H. L. Bowers, Kenmore, assignors to Bell Aircraft Corporation, Buffalo, N. Y. Aircraft control surface. 2,451,009, Oct. 12.

Willson, David S., Muskegon Heights, Mich., assignor to John Wood Manufacturing Company, Inc., Philadelphia, Pa. Crank arm and driving block means. 2,451,455, Oct. 12.

Wilson, Allen R.: *See*—
Nancarrow, Harry L., and Wilson.

Winthrop-Stearns Inc., assignee: *See*—
Albertson, Noel F., Archer, and Suter.

Wingfoot Corporation, assignee: *See*—
Sturtevant, Mark J.

Witmer, Earl G., assignee: *See*—
Tarwater, Lawson.

Wittcoff, Edward, University City, assignor to Caradine Hat Company, St. Louis, Mo. Headwear. 2,451,140, Oct. 12.

Wolff, Irving: *See*—
Weimer, Paul K., and Zworykin, and Wolff.

Wolff, Irving, Merchantville, N. J., assignor to Radio Corporation of America. Object detecting device. 2,351,141, Oct. 12.

Wood Conversion Company, assignee: *See*—
Heritage, Clark C.

Wood, John, Manufacturing Company, Inc., assignee: *See*—
Willson, David S.

Wood, William H.: *See*—
Fasce, Egi V., and Wood.

Woodruff, Albert E.: *See*—
Blair, William R., and Woodruff.

Woodyard, John R.: *See*—
Hansen, William W., and Woodyard.

Yale & Towne Manufacturing Company, The, assignee: *See*—
Aubrey, William M.

Yanchenko, Basil J., assignor, by mesne assignments, to G. A. Braun, Inc., Syracuse, N. Y. Safety locking and unlocking two-hand control. 2,451,010, Oct. 12.

Yarin, Irving H., Chelsea, Mass. Igniter. 2,451,369, Oct. 12.

Yoars, Fred P., New Orleans, La. Apparatus for filling containers. 2,451,011, Oct. 12.

York Corporation, assignee: *See*—
Groat, Keith P.

Young, George O., Robesonia, assignor to Vanity Fair Mills, Inc., Reading, Pa. Thread guide bar mounting for knitting machines. 2,451,187, Oct. 12.

Zalkind, Philip, New York, N. Y. File cabinet interlock and reinforcing elements. 2,451,012, Oct. 12.

Zimmer, John C.: *See*—
Morway, Arnold J., and Zimmer.

Zimmern, Benno, New York, N. Y. Bag. 2,451,142, Oct. 12.

Ziskal, Joseph F., Cicero, and W. O. Bechman, Chicago, Ill., assignors to International Harvester Company. Apparatus for controlling selective delivery of fluid from a continuous delivery source to a fluid-driven motor. 2,451,013, Oct. 12.

Zworykin, Vladimir K.: *See*—
Weimer, Paul K., Zworykin, and Wolff.

Zworykin, Vladimir K., Princeton, and J. Hillier, Cranbury, N. J., assignors to Radio Corporation of America. Optophone. 2,451,014, Oct. 12.

LIST OF PLANT INVENTIONS

Apricot tree. M. E. Francisco. 808, Oct. 12.

LIST OF DESIGN INVENTIONS

Accessory unit for cooking stoves, Splash panel. R. I. Felver. 151,339, Oct. 12.
Aerial toy. N. B. Ruczynski. 151,412, Oct. 12.
Airplane. R. C. Coates. 151,327, Oct. 12
Airplane E. H. Heinemann and L J. Devlin. 151,346, Oct. 12.
Ash tray. A. L. Duckwall, Jr. 151,334, Oct. 12.
Ash tray and cigarette holder, Combined. L. Sanchez and T. E. Lord. 151,413, Oct. 12.
Bathing suit. M. A. De Weese. 151,331–2, Oct. 12.
Bathing suit. M. Solomon. 151,415, Oct. 12.
Bowling game device and ash tray, Combined. J. D. Nagel and W. Lang. 151,385, Oct. 12.
Bracelet or similar article. A. Katz. 151,361–3, Oct. 12.
Bracelet or similar article. A. Katz. 151,367, Oct. 12.
Brooch or similar article. M. Duvalet. 151,335, Oct. 12.
Brooch or similar article. A. Katz. 151,358–60, Oct. 12.
Brooch or similar article. A. Katz. 151,365–6, Oct. 12.
Brooch or similar article. A. Philippe. 151,389–91, Oct. 12.
Brooch or similar article. A. Philippe. 151,393–9, Oct. 12.
Brooch or similar article. R. Pomatti. 151,401, Oct. 12.
Brooch or similar article. H. M. Rogers. 151,409, Oct. 12.
Brooch or similar article, Separable. A. Katz. 151,364, Oct. 12.
Brush, Denture. P. B. Brandt. 151,319, Oct. 12.
Cabinet or similar article, Vending machine. H. G. Nissen. 151,386, Oct. 12.
Cabinet, Radio receiver. J. O. Reinecke. 151,406, Oct. 12.
Camp trailer. J. M. Poche. 151,400, Oct. 12
Case and lighter, Combined cigarette. A. F. Fukal. 151,341, Oct. 12.
Casket, Burial. A. T. Thygeson and P. Schladermundt. 151,421, Oct. 12.
Chair, Child's. D. O. Benson. 151,317, Oct. 12.
Clip or similar article. A. Philippe. 151,392, Oct. 12.
Clothes hanger L. S. Keefer. 151,372, Oct. 12.
Dispenser, Cigarette. C. Kutik. 151,376, Oct. 12.
Display case, Merchandise. H. P. Glass. 151,342, Oct. 12.
Display lamp, Merchandising counter. C. S. Rosenberg. 151,411, Oct. 12.
Doll, Child's. H. R. Farnam and B. S. Wheeler. 151,338, Oct. 12.
Dome light for automotive vehicles, External. M. J. Kately and E. M. Peckwas. 151,351, Oct. 12.
Door handle or similar article for an automobile vehicle, Outside. G. M. Haviland. 151,345, Oct. 12.
Door handle or similar article for an automotive vehicle, Outside. C. M. MacKichan. 151,379, Oct. 12.
Dough extrusion device or like article. S. Cenci. 151,322, Oct. 12.
Drawer pull. W. A. Kendall. 151,373–4, Oct. 12.
Dress. J. L. Asteroff. 151,316, Oct. 12
Dress G. Constantine. 151,329, Oct. 12.
Earring or the like. M. Chernow. 151,325–6, Oct. 12.
Earring or similar article. A. Philippe. 151,387–8, Oct. 12.

Fountain, Portable electric. L. P. Weil. 151,423, Oct. 12.
Frame, Picture. G. R. Arons. 151,315, Oct. 12.
Grill, Barbecue. W. R. Hathaway. 151,344, Oct. 12.
Grill guard for automobile radiators. E. A. Rehrmann. 151,405, Oct. 12.
Hammer, Metal straightening. N. Leskin. 151,378, Oct. 12.
Hanger or similar article. J. Read. 151,404, Oct. 12.
Helicopter. W. S. Hoover. 151,347, Oct. 12.
High chair and baby walker, Combined J. D. Sverdlik. 151,417, Oct. 12.
Hobby horse. C. B. Dobson. 151,333, Oct. 12.
Iron, Electric. F. W. Busch. 151,321, Oct. 12.
Lamp and flower pot, Combined. M. Rerea. 151,407, Oct. 12.
Lighter, Cigarette. A. J. Flauder. 151,340, Oct. 12.
Link chain for a necklace or similar article. M. Rahthus. 151,403, Oct. 12.
Loud speaker and shelter therefor, Combined. E. W. La Barre. 151,377, Oct. 12.
Louver, Automobile hood. N. J. De Sanders. 151,330, Oct. 12.
Mounting, Picture. H. G. Koltnow. 151,375, Oct. 12.
Necklace or similar article. A. Katz. 151,352–7, Oct. 12.
Necklace or similar article. A. Katz. 151,368–71, Oct. 12.
Necktie. D. Margolis and S. Weisblatt. 151,380, Oct. 12.
Ornament, Dress. H. Wapnick. 151,422, Oct. 12.
Oven and grill, Combined C. L. Moffat. 151,384, Oct. 12.
Phonograph. M. Mayerson. 151,381, Oct. 12.
Pin. W. J. Jorgenson 151,348, Oct. 12.
Radio and bed lamp, Combined. L. R. Brothers. 151,320, Oct. 12.
Rail for Venetian blinds, Lower H. S. Rosenbaum. 151,410, Oct. 12.
Recorder, Facsimile. W. D. Teague. 151,418–20, Oct. 12.
Scale. E. C. Karp. 151,350, Oct. 12
Sharpener, Knife B. L. Chapin, N. L. Davis, and T. H. Cabot, Jr. 151,324, Oct. 12.
Sharpener, Scissors. B. L. Chapin, N. L. Davis, and T. H. Cabot, Jr. 151,323, Oct. 12.
Sight, Shot gun. K. D. Richards. 151,408, Oct. 12.
Sled. C. W. Sundberg. 151,416, Oct. 12
Slicer, Vegetable. F. R. Smith. 151,414, Oct. 12.
Socket, Angle. C. J. Adams and H. Z. Benton. 151,314, Oct. 12.
Sprayer. C. E. Meyerhoefer 151,383, Oct 12.
Stand, Portable collapsible motion picture projection screen. H. E. Eller. 151,337, Oct. 12.
Table and bookholder, Combined. M. L. Eckman. 151,336, Oct. 12.
Tie-rack. T. J. Ragland. 151,402, Oct. 12.
Toy, Mechanical. S. I. Berger. 151,318, Oct. 12.
Trailer. W. Josephian. 151,349, Oct. 12.
Tray. J. S. Connors. 151,328, Oct. 12.
Tray for desk articles. G. G. Greger. 151,343, Oct. 12.
Water craft. E. Melton. 151,382, Oct. 12.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 12TH DAY OF OCTOBER, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abrasive pneumatic finishing machine. A. W. Tell. 2,451,049, Oct. 12.
Abrasive wheel. L. H. Metzger and V. J. Fantozzi. 2,451,295, Oct. 12.
Acetylene from diolefin-containing mixtures, Removal of. E. V. Fasce and W. H. Wood. 2,451,327, Oct. 12.
Acid esters of petroleum phenols, Phosphorus. L. A. Mikeska. 2,450,903, Oct. 12.
Acoustical structure. A. D. Park and N. A. Johnson. 2,450,911, Oct. 12.
Acrylic ester polymers, Treatment of. S. T. Semegen. 2,451,177–8, Oct. 12.
Activation of anion exchangers in sugar purification. W. A. Blann. 2,451,272, Oct. 12.
Actuating device, Fluid pressure operated. M. V. Groves. 2,451,334, Oct. 12.
Actuator and control assembly for retractable landing gears. R. M. Nardone. 2,451,109, Oct. 12.
Aerial bomb. G. M. O'Rear. 2,450,910, Oct. 12.
Aerial duct, Sectionalized. G. S. Van Antwerp. 2,451,004, Oct. 12.
Air clearing fan, Portable. J. L. Brandenburg. 2,451,193, Oct. 12.
Air conditioning apparatus. M. C. Terry. 2,451,366, Oct. 12.
Aircraft airfoil construction. M. Watter. 2,451,458, Oct. 12.
Aircraft control surface. W. W. Williams and H. L. Bowers. 2,451,009, Oct. 12.
Aircraft landing gear lock. J. E. Wescott. 2,451,265, Oct. 12.
Alarm, Overmodulation. J. E. Smith. 2,451,361, Oct. 12.
Albumin adhering to egg shells, Recovering. F. F. Pollak. 2,451,116, Oct. 12.
Alkyl cyanides, Production of. L. K. Beach. 2,451,314, Oct. 12.
Alkyl esters of α-acylamino, α-cyano, β-(3-indole)-propionic acid. N. F. Albertson, S. Archer, and C. M. Suter. 2,451,310, Oct. 12.
Alkyl-N-substituted polymeric styrene maleamic acids and dispersions containing them, Long-chain secondary. W. L. Alderson, Jr. 2,451,370, Oct. 12.
Amplifier system, Voltage regulating. R. J. Detuno. 2,451,021, Oct. 12.
Anchor, Implement. E. Goin. 2,451,163, Oct. 12.
Anchor, Rail. L. Tarwater. 2,451,127, Oct. 12.
Antenna, Sealed. B. Trevor. 2,451,258, Oct. 12.
Antenna tuning system, Directional. W. G. H. Finch. 2,451,078, Oct. 12.
Antiseptic composition, Color changing. F. C. Dohrmann. 2,451,022, Oct. 12.
Apparatus for controlling rotation of vehicle wheels. B. M. Tuxhorn. 2,451,453, Oct. 12.
Apparatus for controlling selective delivery of fluid from a continuous delivery source to a fluid-driven motor. J. F. Ziskal and W. O. Bechman. 2,451,013, Oct. 12.
Apparatus for desiccation. O. Bieber. 2,451,316, Oct. 12.
Apparatus for extracting vegetable oil. L. L. Ford. 2,451,081, Oct. 12.
Apparatus for filling containers. F. P. Yoars. 2,451,011, Oct. 12.
Apparatus for forming hollow glassware. H. R. Schutz. 2,450,995, Oct. 12.
Apparatus for forming mineral wool mats. H. T. Coss and E. R. Powell. 2,450,916, Oct. 12.
Apparatus for handling loads. J. H. Kemp, Jr. 2,451,226, Oct. 12.
Apparatus for making tubs or the like. R. M. Chesney. 2,450,937, Oct. 12.
Apparatus for melting and casting glass. J. F. G. Hicks and C. F. Henkel. 2,451,086, Oct. 12.
Apparatus for orientation. E. Merten. 2,451,443, Oct. 12.
Apparatus for producing artificial fog. G. H. B. Davis. 2,451,019, Oct. 12.
Apparatus for stripping pods from milkweed plants. C. F. Reed. 2,450,917, Oct. 12.
Apparatus for surface treating small objects. A. Keck. 2,451,391, Oct. 12.
Apparatus for the continual production of electrically welded tubes. A. Drayer. 2,451,159, Oct. 12.
Apparatus for the molding of butter and like products. J. O'Connell. 2,451,301, Oct. 12.
Applicator, Powder. G. D. Runnels. 2,450,919, Oct. 12.
Arrester for blast furnaces, Dust. R. M. McKelvey. 2,450,976, Oct. 12.
Artificial teeth, Making. R. W. Erdle. 2,450,885, Oct. 12.
Artificial yarns and producing the same. W. W. Watkins. 2,451,420, Oct. 12.
Attenuator for ultra high frequencies. S. C. Clark, Jr. 2,451,201, Oct. 12.

Automatic shutoff valve. B. W. Copeland. 2,450,938, Oct. 12.
Automobile transporting truck. E. V. Garnett. 2,451,284, Oct. 12.
Bag. B. Zimmern. 2,451,142, Oct. 12.
Baler, Hay. I. E. Allison. 2,450,928, Oct. 12.
Ball caster. W. H. Newell. 2,451,353, Oct. 12.
Battery plates, Reconditioning. A. L. Hindall. 2,451,087, Oct. 12.
Bearing: *See*—
Pillow block bearing.
Rotary and sliding ball bearing.
Bearing for electric motors. F. T. Smith. 2,451,124, Oct. 12.
Bed frame and detachable grinding roller unit. J. Z. Bernard. 2,451,057, Oct. 12.
Bed lamp. R. E. Dike. 2,451,157, Oct. 12.
Belt or chain, Apparel. C. G. Marquardt. 2,451,397, Oct. 12.
Beverage package and apparatus. W. F. Brown. 2,451,195. Oct. 12.
Bib. I. Mink. 2,451,038, Oct. 12.
Bicycle and like vehicles. W. Moller. 2,450,979, Oct. 12.
Bit and holder therefor, Tool. H. M. Sheridan. 2,451,246, Oct. 12.
Blade construction, Propeller. E. Martin. 2,451,106, Oct. 12.
Blast-furnace salamanders, Method and mold for casting. W. J. Rees. 2,450,989, Oct. 12.
Blood extracting apparatus. L. Tantimonaco. 2,451,183, Oct. 12.
Board game device. M. Bruck. 2,451,196, Oct. 12.
Boiler. M. C. Crotty. 2,451,321, Oct. 12.
Bomb, Aerial. G. M. O'Rear. 2,450,910, Oct. 12.
Bottle cap. S. Gattuccio and L. G. Cerruti. 2,450,949, Oct. 12.
Bottle caps, Applying. E. M. Bright. 2,451,273, Oct. 12.
Bottle holder. P. E. Allen. 2,450,927, Oct. 12.
Box: *See*—
Combined dispensing and blade holding box.
Stuffing box.
Brace, Adjustable fender skirt. A. R. Hayes. 2,450,958, Oct. 12.
Bracket: *See*—
Easel bracket.
Handy scaffold bracket.
Window bracket.
Brake: *See*—
Hand brake.
Internal expanding vehicle brake.
Brake pedal lock. R. D. Downing. 2,450,943, Oct. 12.
Brake shoe assembly. C. L. Eksergian and P. W. Gaenssle. 2,451,326, Oct. 12.
Brake shoe assembly, Cushioned disk. P. W. Gaenssle. 2,451,329, Oct. 12.
Brassière. L. I. Speiser. 2,451,001, Oct. 12.
Bridge for junction boxes. H. Kershaw. 2,451,393, Oct. 12.
Bright zinc plating. R. R. Bair, H. L. Benner, and J. F. Walker. 2,451,426, Oct. 12.
Briquettes to curved metallic surfaces, Applying powdered metal. S. K. Wellman. 2,451,264, Oct. 12.
Bulldozer attachment for jeeps. G. W. Mork. 2,450,905, Oct. 12.
Bulldozer-loader device. F. P. Leschinsky. 2,451,101, Oct. 12.
Butadiene, Production of. E. V. Murphree. 2,451,040, Oct. 12.
Button of thermosetting synthetic resinous materials, Molded integral sewing hole. S. Emsig. 2,451,077, Oct. 12.
C-clamp with laterally adjustable arm extensions. N. G. Schaefer. 2,450,994, Oct. 12.
Cabin control, Pressure. J. B. Cooper and A. B. Jepson. 2,450,881. Oct. 12.
Cabin pressure regulator valve. H. Cruzan. 2,451,278, Oct. 12.
Cabinet, chest, and similar article. L. Gersten. 2,451,211, Oct. 12.
Cabinet having means for moving compartments vertically and horizontally. C. F. Rossetter. 2,451,120, Oct. 12.
Cabinet interlock and reinforcing elements, File. P. Zalkind. 2,451,012, Oct. 12.
Cables for terminal banks, Making multiple. R. F. Mallina. 2,450,974, Oct. 12.
Calcining and calcining apparatus. T. R. Ellerbeck. 2,451,024, Oct. 12.
Camera attachment for making lap dissolves, Movie. V. Aldreany. 2,451,017, Oct. 12.

Cap: *See*—
Bottle cap.
Carriage controlled stop setting and key operating mechanism for typewriting machines. F. J. Tillman. 2,450,925, Oct. 12.
Carriage, Patient transfer. G. C. Letch. 2,450,971, Oct. 12.
Cartons, Shipping, storage, and display. W. B. Crane. 2,450,941, Oct. 12.
Case: *See*—
Key case.
Casing structure, Handbag. L. B. Carder. 2,451,274, Oct. 12.
Casting apparatus, Centrifugal. T. Loew. 2,451,103, Oct. 12.
Catalyst for normal paraffins, Preparing an isomerization. R. E. Burk. 2,451,018, Oct. 12.
Catalysts for the polymerization of butadiene-1.3 hydrocarbons. W. D. Stewart. 2,451,180, Oct. 12.
Catalytic cracking and reforming the production of aviation gasoline. E. V. Murphree. 2,451,041, Oct. 12.
Centrifugal pump. F. C. Jones. 2,451,030, Oct. 12.
Chain link. H. St. Pierre. 2,451,254, Oct. 12.
Chain link and making same. H. St. Pierre. 2,451,255, Oct. 12.
Chain links, Making. H. St. Pierre. 2,451,253, Oct. 12.
Chain lock. A. Lecompte. 2,451,100, Oct. 12.
Checkerwork and brick therefor. T. H. Kennedy. 2,451,392, Oct. 12.
Chuck. W. V. Bault. 2,450,931, Oct. 12.
Chuck for automatic machine tools. R. M. Gamble. 2,451,210, Oct. 12.
Chuck for internal grinders. H. C. Lance and H. A. Hippen. 2,450,970, Oct. 12.
Circuit: *See*—
Grid-controlled rectifier circuit.
Clamp. L. O. Habicht. 2,450,891, Oct. 12.
Clamp assembly. J. H. Booth. 2,451,062, Oct. 12.
Clamp for frame straightening machines. C. South. 2,451,307, Oct. 12.
Clamps for marginal bonding with high-frequency electric field, Electrode retaining. G. T. Hart. 2,450,956, Oct. 12.
Closure, Nonrefillable bottle. H. W. Hagen. 2,451,336, Oct. 12.
Closures for gusseted paper bags, Sealing of. C. H. Hartman. 2,451,165, Oct. 12.
Coating composition, Thermoplastic. L. J. Gold. 2,451,212, Oct. 12.
Cock, Stall. E. Rawson. 2,451,456, Oct. 12.
Coil former. R. B. James. 2,451,222, Oct. 12.
Coin-receiving structure. L. Hoyt. 2,451,088, Oct. 12.
Collimator apparatus for testing the gyroscope and optical system of bomb-sights, Portable. S. H. Petry and H. S. Snyder. 2,451,409, Oct. 12.
Combination clamp and closure. G. W. Oakes. 2,451,405, Oct. 12.
Combined dispensing and blade holding box. A. G. Davis. 2,451,382, Oct. 12.
Communication system employing pulse code modulation. J. R. Pierce. 2,451,044, Oct. 12.
Composite article. G. H. Taft. 2,451,182, Oct. 12.
Compression member. W. G. Mitchell. 2,451,234, Oct. 12.
Compressor pump. B. R. Burke. 2,451,379, Oct. 12.
Concrete form, Folding. W. C. Niecolls. 2,451,112, Oct. 12.
Condenser: *See*—
Electrical condenser.
Conduit receptacle. J. F. O'Brien and E. S. Boynton. 2,450,908, Oct. 12.
Confection package. J. Burstiner. 2,451,318, Oct. 12.
Confections, Preparing candy coated. J. J. Kooman. 2,451,096, Oct. 12.
Container: *See*—
Free-fall aerial container.
Container for electrical condensers or other apparatus, Tubular. P. A. Sporing and C. P. Johnson. 2,451,125, Oct. 12.
Control apparatus. R. D. Cowherd. 2,451,073, Oct. 12.
Control apparatus for radio receivers. L. L. Royal. 2,450,918, Oct. 12.
Control device, Switch. C. R. McCauley. 2,451,232, Oct. 12.
Control instrument. A. H. Jordan. 2,451,439, Oct. 12.
Control instrument, Automatic. N. C. Williams and R. W. Fishwood. 2,451,139, Oct. 12.
Control means for an automatic pilot, Turn. J. C. Newton and P. Halpert. 2,450,907, Oct. 12.
Control of convertible evaporator-condensers for use in refrigerative circuits. K. P. Groat. 2,451,385, Oct. 12.
Control system. B. E. Del Mar. 2,451,280, Oct. 12.
Control system, Heat storage. C. M. Osterheld. 2,450,983, Oct. 12.
Control system, Radar. R. C. Sanders, Jr. 2,450,991, Oct. 12.
Control system, Traffic signal. J. O'D. Shepherd. 2,451,457, Oct. 12.
Control system, Power boast. D. R. Webb. 2,451,264, Oct. 12.
Control valve means for power-operated hydraulic motive means. M. V. Groves, 2,451,335, Oct. 12.
Controller for domestic appliances, Time and temperature. R. R. Candor. 2,451,069, Oct. 12.
Controller reset, Flow. W. J. Hughes. 2,451,029, Oct. 12.
Conveyer for coal and the like, Endless-type. E. Williams. 2,451,424, Oct. 12.
Conveying mechanism for billet heating furnaces. D. P. Anderson and S. Kneass, Jr. 2,451,053, Oct. 12.
Cooling system for electric motors and hydraulic pumps. V. A. Hoover. 2,450,963, Oct. 12.
Core and making, Laminated magnetic. J. A. Comstock. 2,451,202, Oct. 12.
Cotton-picking machine. S. A. Townsend. 2,451,130, Oct. 12.
Coupling: *See*—
Pipe coupling. Self-sealing coupling.
Quick disconnect coupling.
Coupling device. A. J. Wayman. 2,451,421, Oct. 12.
Coupling device for concentric conductor lines. A. L. Robinson. 2,451,413, Oct. 12.
Coupling system, Adjustable wave. L. Norde. 2,451,444, Oct. 12.
Crank arm and driving block means. D. S. Willson. 2,451,455, Oct. 12.
Cup, Adhesive-containing suction. F. C. Braun. 2,451,194, Oct. 12.
Curtain and curtain hanging means. C. W. Lanphere. 2,451,034, Oct. 12.
Curvatures of lenses and spacings thereof, Determining correct. J. H. Jeffree. 2,450,965, Oct. 12.
Cutting machine for plastic material. J. J. Gano and L. W. Richardson. 2,451,027, Oct. 12.
Cyclic sulfones, Hydrogenation of unsaturated. R. C. Morris and N. C. Melchior. 2,451,298, Oct. 12.
Cylinder construction, Hydraulic. F. B. Hunter. 2,451,089, Oct. 12.
Cylinder head construction, bridge cooling. R. H. Sheppard. 2,450,998, Oct. 12.
Dark trace screen. H. W. Leverenz. 2,451,292, Oct. 12.
Dental floss holder. M. Swartzman. 2,451,181, Oct. 12.
Dense products from cement material, Manufacture of. J. R. Parsons. 2,451,445, Oct. 12.
Dental tool attachment. J. H. Blair. 2,451,192, Oct. 12.
Detecting device, Object. I. Wolff. 2,451,141, Oct. 12.
Device for resurfacing grinding wheels. M. J. Nagy and L. Belz. 2,451,235, Oct. 12.
Dihydrothiophenes and preparing same. B. R. Baker. 2,451,428, Oct. 12.
Discharge device, Ultra high frequency electron. C. H. Foulkes. 2,451,328, Oct. 12.
Discharge device for ultra high frequencies, Electron. P. T. Smith and H. R. Hegbar. 2,451,249, Oct. 12.
Discharge triodes, Rugged gaseous. A. R. Moore. 2,451,297, Oct. 12.
Dispensing device, Towel. F. G. Steiner and R. G. Birr. 2,451,251, Oct. 12.
Dispensing machine. H. M. Kauffman. 2,451,094, Oct. 12.
Distributing apparatus. H. Lowe. 2,451,104, Oct. 12.
Distributor, Material. C. E. Thiesse. 2,451,128, Oct. 12.
Dithering valve. F. C. Eastman. 2,450,944, Oct. 12.
Door and panel construction, Metal. D. K. Macleod. 2,451,396, Oct. 12.
Doughnut cooking art. C. J. Hornkohl and F. H. Leslie. 2,450,962, Oct. 12.
Drawbar, Self-aligning swinging. L. Atkinson. 2,451,054, Oct. 12.
Drier: *See*—
Socket drier.
Drilling apparatus. H. C. Johansen. 2,451,223, Oct. 12.
Drilling fluids, Conditioning of. W. T. Cardwell, Jr. 2,450,936, Oct. 12.
Drill template, Multiple. H. O. Schultz. 2,451,123, Oct. 12.
Drive, Engine. J. D. Bell. 2,451,374, Oct. 12.
Duplex micrometer gauge. R. M. Vinyard. 2,451,419, Oct. 12.
Dynamoelectric machine. V. R. Holmgren. 2,451,219, Oct. 12.
Dynamoelectric machine. W. J. O'Brien. 2,450,982, Oct. 12.
Easel bracket. O. E. Davis. 2,451,020, Oct. 12.
Elapsed time indicator. H. Springer. 2,451,250, Oct. 12.
Elastic fabrics, making. B. H. Foster. 2,450,948, Oct. 12.
Electric hot-water heater. H. C. Mittendorf. 2,451,296, Oct. 12.
Electric motor-driven concrete mixer. J. Santagata, 2,450,993, Oct. 12.
Electric soldering tool. C. P. Kephart. 2,451,290, Oct. 12.
Electric switch. S. R. Heymann, J. H. Leslie, II, and W. A. Marshall, Jr. 2,450,961, Oct. 12.
Electric switch. I. E. McCabe. 2,451,107, Oct. 12.
Electrical condenser H. P. Heller. 2,451,338, Oct. 12.
Electrical device. W. I. Staf. 2,451,308, Oct. 12.
Electrolytic recording. H. G. Greig. 2,451,331, Oct. 12.
Electromagnet with armature, Shockproof. P. J. Reifschneider. 2,451,239, Oct. 12.
Electromagnetic switch. W. E. Stilwell, Jr. 2,450,924, Oct. 12.
Electron discharge device employing cavity resonator apparatus. C. A. Rosencrans. 2,451,240, Oct. 12.
Electroplating. G. W. Jernstedt. 2,451,340–1, Oct. 12.

Engine: *See*—
Internal-combustion engine.
Engine controller. J. Dolza, D. P. Croisant, A. W. Gaubatz, and P. W. Perish. 2,451,204, Oct. 12.
Engine controller C. H. Jorgensen and W. H. Taylor. 2,451,205, Oct. 12.
Enol-thioethers of ketosteroids and preparing the same. L. Dorfman and S. Bernstein. 2,451,434, Oct. 12.
Envelope and letter sheet, Combined. S. M. Menocal. 2,451,233, Oct. 12.
Envelopes to billfolds, Attaching transparent. L. L. Sherwood. 2,451,122, Oct. 12.
Escharotic solution for dehorning calves. J. E. Guthrie. 2,450,953, Oct. 12.
Esters, Sulfolanyl. R. C. Morris and E. C. Shokal. 2,451,299, Oct. 12.
Exchanger, Heat. E. D. Marquette. 2,451,398, Oct. 12.
Exhaust structure for resiliently mounted engines. W. C. Heath and P. A. Pitt. 2,451,285, Oct. 12.
Extraction apparatus, Hydrocarbon. H. R. Davis. 2,451,433, Oct. 12.
Fabricating airfoils. M. Watter. 2,451,454, Oct. 12.
Fastening device. R. A. Hartman. 2,451,438, Oct. 12.
Fatigue testing method and machine, Vibration. P. Cor. 2,450,939, Oct. 12.
Feed claw and shutter movement for motion-picture mechanisms. L. O. Thunberg. 2,451,452, Oct. 12.
Feed for carding machines, Intermediate. W. G. Tucker. 2,451,260, Oct. 12.
Feed for wrapping machines, Wrapper. W. Hoppe. 2,451,287, Oct. 12.
Feed for writing machines, Sheet. J. A. Gilbert and P. A. Johnson. 2,451,330, Oct. 12.
Feed means for printing machines, Reciprocable. W. T. Gollwitzer. 2,451,213, Oct. 12.
Feed mechanism. W. E. Twamley. 2,451,367, Oct. 12.
Filter: *See*—
Self-cleaning screen or filter.
Fiber containing product, Light-weight. J. R. Parsons. 2,451,446, Oct. 12.
Film spool switch. H. L. Strickland. 2,451,256, Oct. 12.
Finger-tip control for tractor-trailer air brake systems. T. H. Affleck. 2,451,268, Oct. 12.
Firing system, Director. E. P. Ross and H. S. Marsh. 2,451,357, Oct. 12.
Fish bait, Artificial. E. R. Putnam and F. J. Nefske. 2,450,988, Oct. 12.
Fixture for supporting and gauging brush riggings of motors and generators. H. E. Krueger. 2,450,897, Oct. 12.
Flare, Illuminating. C. D., A. J., and C. Schermuly. 2,451,121, Oct. 12.
Flask heater. A. I. Newman. 2,450,981, Oct. 12.
Flexible conduit joint. E. E. Stoeckly. 2,451,252, Oct. 12.
Flexible tubing joint. F. M. Allen and R. E. Snyder. 2,451,269, Oct. 12.
Flowmeter. A. F. Allwein. 2,451,425, Oct. 12.
Fluorinated products and process. A. M. Whaley. 2,451,185, Oct. 12.
Folding clothes hanger. F. R. Peterson. 2,451,114, Oct. 12.
Food product and making the same, Dehydrated. R. W. Arengo-Jones. 2,451,312, Oct. 12.
Frame: *See*—
Weaving frame.

Free-fall aerial container. W. J. Sanderson. 2,450,992, Oct. 12.
Frequency shift pulse time modulation. C. H. McShan. 2,451,347, Oct. 12.
Friction-wheel regulating gear. E. Krebs. 2,451,033, Oct. 12.
Froth level controlling device. W. M. Aubrey. 2,451,144, Oct. 12.
Fuel pump. T. E. Beacham. 2,451,055, Oct. 12.
Fuse. L. K. Liljegren. 2,450,899, Oct. 12.
Fuse, Mechanical time. J. J. Hart. 2,450,894, Oct. 12.
Garment, Baby. M. L. Neal. 2,451,300, Oct. 12.
Garment and collar combination. R. Spector. 2,451,364, Oct. 12.
Gas discharge lamp. M. Pennybacker. 2,451,043, Oct. 12.
Gas holders, Painting of. L. B. Donovan. 2,451,158, Oct. 12.
Gas in cells of aircraft, Indicating the state of. C. S. Hall. 2,450,954, Oct. 12.
Gate: *See*—
Speed controlled motor-driven gate.
Gauge: *See*—
Duplex micrometer gauge.
Gear: *See*—
Friction-wheel regulating Railway car draft gear.
gear.
Gear mounting. H. J. Kent. 2,451,342, Oct. 12.
Gem grinding and polishing tool. A. Pastore. 2,450,984, Oct. 12.
Generating plant for the drive of vehicles, Electric. O. Schläpfer. 2,451,242, Oct. 12.
Glass fabrics, Decoration of. C. M. Marberg. 2,450,902, Oct. 12.
Glider tow indicator. C. F. Scott, G. Carlson, and E. H. Rugg. 2,451,244, Oct. 12.
Glue composition containing vetch seed meal. G. Widmer and W. Hertner. 2,451,186, Oct. 12.
Golf club, Adjustable. W. B. Watkins. 2,451,262, Oct. 12.
Golf tee. H. N. Andreasen, Sr. 2,451,311, Oct. 12.
Grid-controlled rectifier circuit. H. J. McCreary. 2,451,344, Oct. 12.
Grids, Making. J. W. Skehan. 2,451,360, Oct. 12.
Grinding machine for work pieces each having a hollow spherical section, Contour. C. E. White. 2,451,137, Oct. 12.
Guanamines and their manufacture, High Molecular. J. Bindler. 2,451,432, Oct. 12.
Guard for power take-off shafts of tractors, Protective. R. W. Lidington. 2,451,440, Oct. 12.
Guide bar mounting for knitting machines, Thread. G. O. Young. 2,451,187, Oct. 12.
Guide construction for movable tank tops. F. L. Plummer. 2,450,986, Oct. 12.
Gun, Stud welding. A. M. Candy. 2,451,152, Oct. 12.
Gutter for automobile windows, Rain. R. V. Martin. 2,451,399, Oct. 12.
Gyro, Directional. J. E. Lundberg. 2,451,230, Oct. 12.
Gyroscopic instrument. F. D. Braddon and L. F. Beach. 2,450,875, Oct. 12.
Hacksaw, Multiple-blade. T. Donnelly. 2,450,942, Oct. 12.
Hammer, Shock absorbing. A. H. Heburich. 2,451,217, Oct. 12.
Hand brake. S. B. Haseltine. 2,451,028, Oct. 12.
Handling and joining cooperating members. R. Potter. 2,450,987, Oct. 12.
Handy scaffold bracket. H. J. Steffes. 2,451,179, Oct. 12.
Hanger: *See*—
Folding clothes hanger.
Headwear. E. Wittcoff. 2,451,140, Oct. 12.
Heater: *See*—
Electric hot-water heater. Flask heater.
Heaters and making, Electric space. J. E. Smith. 2,450,921, Oct. 12.
Heating furnace and operating the same, Continuous. W. A. Morton. 2,451,349, Oct. 12.
Helicopter roundabout. W. L. West. 2,451,006, Oct. 12.
Hitch, Towing. M. T. Regan. 2,451,119, Oct. 12.
Hobbing machine. S. M. Ransome. 2,451,447, Oct. 12.
Holder: *See*—
Bottle holder. Key holder.
Dental floss holder. Utility holder.
Holder and bait digging apparatus, Fishing rod. E. W. Sonner, Jr. 2,451,363, Oct. 12.
Holder-dispenser for roll sheet material. G. L. Hall. 2,451,215, Oct. 12.
Holder for flashlights, Position. J. L. Lemerond. 2,451,228, Oct. 12.
Holding device, Rail. J. R. Snyder. 2,451,414, Oct. 12.
Hollow sections, Spot welding. C. E. Meissner. 2,451,442, Oct. 12.
Hollow-walled carton. W. P. Frankenstein. 2,451,209, Oct. 12.
Horn control. L. D. Bell. 2,450,933, Oct. 12.
Hose handling apparatus. L. J. and J. F. White. 2,451,368, Oct. 12.
Hydraulic jack. M. W. Humphreys. 2,451,390, Oct. 12.
Hydrocarbons, Conversion of. R. T. Bell. 2,451,375, Oct. 12.
Hydroxythiophane carboxylic acids and esters and preparing same. B. R. Baker. 2,451,427, Oct. 12.
Idler system for phonograph turntable drives. E. V. Schneider. 2,451,304, Oct. 12.
Igniter. I. H. Yarin. 2,451,369, Oct. 12.
Ignition control. H. T. Jarvis. 2,451,289, Oct. 12.
Indicator: *See*—
Elasped time indicator. Relative temperature indicator.
Glider tow indicator.
Pulse-echo radio velocity indicator.
Indicator control, Totalizator. C. M. Candy and W. W. Owen. 2,451,319, Oct. 12.
Indicator for pulse echo distance measuring devices, Repeater. R. M. Smith. 2,451,000, Oct. 12.
Indicator with compensated damper, Inductive electrical. H. M. Norman. 2,451,404, Oct. 12.
Injector control mechanism for free piston engines, Fuel. F. M. Lewis. 2,450,898, Oct. 12.
Insecticidal haloido-alkylene esters of capryliphenoxyacetic acid. 2,451,085, Oct. 12.
Instrument drive. R. M. Kingman. 2,451,032, Oct. 12.
Instrument, Gyro vertical. F. D. Braddoh. 2,450,874, Oct. 12.
Instrument, Map making and projection. H. T. Kelsh. 2,451,031, Oct. 12.
Instrument, Writing. E. B. Nichols. 2,451,111, Oct. 12.
Intercommunicating system. R. H. Herrick. 2,451,339, Oct. 12.
Intermittent drive device. F. M. Thomas. 2,451,416, Oct. 12.
Internal-combustion engine. R. Daub. 2,451,322, Oct. 12.
Internal-combustion engine. J. G. Vincent. 2,451,132, Oct. 12.
Internal expanding vehicle brake. C. L. Eksergian, R. B. Temple, and K. C. Harle. 2,451,325, Oct. 12.
Internally insulation lined vessel. A. L. Baker, W. H. Hill, and A. R. C. Markl. 2,451,146, Oct. 12.

Ironer, Ruffle. B. J. Litke. 2,451,102, Oct. 12.
Isomerization of 1,4-dicyano-2-butene. G. F. Hager. 2,451,386, Oct. 12.
Jack: *See*—
Hydraulic jack.
Jack operated from luggage compartment, Vehicle attached. V. R. Paolucci. 2,451,407, Oct. 12.
Jet system for aircraft control, Reaction. W. W. Williams. 2,451,008, Oct. 12.
Jig. N. M. Marsillus. 2,451,035, Oct. 12.
Joint: *See*—
Flexible conduit joint. Flexible tubing joint.
Joint and making the same, Fluid-retaining. J. M. W. Chamberlain. 2,451,070, Oct. 12.
Joint assembly. J. H. Booth. 2,451,060, Oct. 12.
Ketones, Preparation of unsaturated. H. O. Mottern and V. F. Mistretta. 2,451,350, Oct. 12.
Ketones, Production of unsaturated. H. O. Mottern and V. F. Mistretta. 2,451,351, Oct. 12.
Key case. B. H. Kaminer. 2,451,093, Oct. 12.
Key holder. J. Berger and M. Wachman. 2,451,056, Oct. 12.
Key ring. K. W. Johnson. 2,451,091, Oct. 12.
Knitting. I. H. C. Green. 2,451,214, Oct. 12.
Ladder, Automatically adjustable. K. V. Ozols. 2,451,113, Oct. 12.
Lamp: *See*—
Bed lamp. Gas discharge lamp.
Latch: *See*—
Refrigerator door latch.
Latch. G. E. Curtiss, Jr. 2,451,380, Oct. 12.
Latch assembly, Mine car. H. H. Pancake. 2,451,406, Oct. 12.
Lather making machine. W. A. Haines, Jr. 2,451,083, Oct. 12.
Launcher, Rocket. F. Ashworth and C. W. Carter. 2,450,929, Oct. 12.
Launcher, Rocket. W. V. Goodhue and C. W. Carter. 2,450,951, Oct. 12.
Leaf spring. W. R. Berry. 2,450,869, Oct. 12.
Lifting device for automobiles. V. R. Paolucci. 2,451,408, Oct. 12.
Lighter, Pyrophoric. H. Konrad. 2,451,188, Oct. 12.
Lined pipe. A. L. Baker, A. R. C. Markl, and A. Blahut. 2,451,145, Oct. 12.
Lining composition and container wall lined therewith. R. M. Snyder. 2,451,362, Oct. 12.
Loader, Truck. G. Whitehurst, V. E. Slater, G. F. Bruno, J. M. Hubbard, and G. P. Krawitz. 2,451,138, Oct. 12.
Loading ships. R. L. Burke. 2,451,198, Oct. 12.
Lock: *See*—
Aircraft landing gear lock. Chain lock.
Brake pedal lock.
Locking mechanism, Key. E. B. Johnson. 2,451,090, Oct. 12.
Locking and unlocking two-hand control, Safety. B. J. Yanchenko. 2,451,010, Oct. 12.
Locking and resetting means for counters. M. M. Hennessy. 2,451,084, Oct. 12.
Locking spider for wall switches and the like. J. W. S. Wilder. 2,451,267, Oct. 12.
Log barking drum. L. H. Lemke. 2,451,229, Oct. 12.
Lubricant. A. J. Morway and J. C. Zimmer. 2,451,039, Oct. 12.
Lubricator. F. B. Harvuot. 2,451,387, Oct. 12.
Machine for forming articles from a liquid slurry. J. D. Lyall. 2,450,900, Oct. 12.
Machine tool. F. A. Hurd. 2,450,964, Oct. 12.
Machine used in laundries for washing or drying articles. S. Newbery. 2,451,403, Oct. 12.
Magnet. R. L. Manegold. 2,451,231, Oct. 12.
Manganous sulfate, Making. C. C. Daugherty. 2,450,870, Oct. 12.
Mannequin limb. J. R. Dusko. 2,451,023, Oct. 12.
Materials resistant to or active against microorganisms, Manufacture of. E. Boehm. 2,451,149, Oct. 12.
Mattress cover and blanket retainer, Combination. E. H. Spiro, Jr. 2,450,923, Oct. 12.
Measuring apparatus, Pressure. E. Dawson and J. R. Ericson. 2,450,884, Oct. 12.
Measuring device, Liquid. A. H. Davis, Jr. 2,451,154, Oct. 12.
Measuring system, Frequency. E. S. Clammer, M. J. Ackerman, and G. A. Barton. 2,451,320, Oct. 12.
Mechanical movement. C. H. Petskeyes. 2,451,303, Oct. 12.
Metal pieces by means of a bonding layer of predetermined thickness, Uniting. R. R. La Motte. 2,451,099, Oct. 12.
Metallo-organic compositions. C. N. Andersen. 2,451,052, Oct. 12.
Metal with a flux-forming powder in the oxygen cutting stream, Thermochemical removal of. R. L. Wagner. 2,451,422, Oct. 12.
Method and device for drying woven fabric material. H. C. Ellis. 2,451,206, Oct. 12.
Microphone adapted to be actuated by a bone structure of a user. W. R. Blair and A. E. Woodruff. 2,451,317, Oct. 12.
Mineral wool products, Method and apparatus for forming. E. R. Powell. 2,450,915, Oct. 12.
Mineral wool, Apparatus and process for the manufacture of. E. R. Powell. 2,450,914, Oct. 12.
Mixer: *See*—
Electric motor-driven concrete mixer.
Moisture-proofed plunger snap switch. J. H. Schellman. 2,451,176, Oct. 12.
Molding machine, Block. A. T. Johnson. 2,451,167, Oct. 12.
Motion detector, Pulse-echo. T. T. Eaton. 2,450,945, Oct. 12.
Motor: *See*—
Synchronous motor.
Motor control system, Hoisting. E. B. Thurston. 2,451,257, Oct. 12.
Motor control system, Traction. H. S. Ogden. 2,451,237, Oct. 12.
Motor with pistons symmetrically arranged about cams on the drive, Internal-combustion. J. B. Putnam. 2,450,912, Oct. 12.
Mounting: *See*—
Gearing mounting.
Self-aligning conveyer roll mounting.
Multicolor images by electric discharge, Method of and means for printing. W. C. Huebner. 2,451,288, Oct. 12.
N-alkyl acrylamides, Preparing. J. G. Erickson. 2,451,436, Oct. 12.
Necktie machine. M. M. Newman. 2,450,906, Oct. 12.
Network, Electrical bridge. T. Baclawski. 2,450,930, Oct. 12.
Nitrogen atmosphere, Producing a. G. J. Maxson. 2,450,975, Oct. 12.
Nozzle, Spray. E. E. Cline. 2,451,071, Oct. 12.
Oil, Lubricating. R. F. McCleary and S. M. Roberts. 2,451,037, Oct. 12.
Oil, Compounded lubricating. J. G. McNab and D. T. Rogers. 2,451,345–6, Oct. 12.
Oil addition agents, Lubricating. W. J. Sparks and D. C. Field. 2,451,048, Oct. 12.
Oil purifying system for vacuum pumps. T. A. La Breeque and A. W. Skoog. 2,451,098, Oct. 12.
Oil regulator test stand. C. J. Snider. 2,450,922, Oct. 12.
Oils, Refining lubricating. H. L. Ellender. 2,451,025, Oct. 12.
Olefin extraction. C. O. Tongberg. 2,451,050, Oct. 12.
Olefins from hydrocarbon mixtures, Separation of. G. G. Bernard and D. C. Bond. 2,451,376, Oct. 12.
Oleo strut for airplane landing gears. M. R. Mullen. 2,451,171, Oct. 12.
Operating mechanism for lathes. R. G. Le Tourneau. 2,450,972, Oct. 12.
Optical projection contour comparison device. W. De Boer, G. A. Betts, and E. C. Polidor. 2,451,155, Oct. 12.
Optophone. V. K. Zworykin and J. Hillier. 2,451,014, Oct. 12.
Oscillator, Low frequency. E. R. Shenk and A. Kahn. 2,451,245, Oct. 12.
Package for cartridge reloading components, Dispensing. H. D. Adams. 2,451,015, Oct. 12.
Parachute made of self-supporting ribbons which are composed of broad and narrow bands. F. S. Weinig. 2,450,926, Oct. 12.
Pen, Portable play. M. D. Bible. 2,451,431, Oct. 12.
Phenothiazine, Purification of. C. W. Gates and C. R. Howey. 2,451,082, Oct. 12.
Phonograph pickup, Wedged needle type. W. H. Hutter. 2,451,221, Oct. 12.
Phonograph-radio switch. J. L. Slatin. 2,451,248, Oct. 12.
Phosphate cements. H. H. Greger. 2,450,952, Oct. 12.
Photoelectric control for signal devices, Sensitive. T. K. Riggen. 2,450,990, Oct. 12.
Photoelectric tube. O. T. McIlvaine. 2,451,400, Oct. 12.
Photography in additive color by the controlled utilization of chromatic aberrations in lenses. S. B. Grimson. 2,451,164, Oct. 12.
Pie filling, Dehydrated fruit. R. W. Arengo-Jones. 2,451,313, Oct. 12.
Pigment comprising calcium carbonate, Treatment of. H. R. Rafton. 2,451,448, Oct. 12.
Pillow block bearing. T. C. Pew. 2,451,115, Oct. 12.
Pin: *See*—
Rolling pin.
Pipe-bending machine. A. E. Peters. 2,451,302, Oct. 12.
Pipe cleanout device, Sanitary. R. R. Tubbs. 2,451,051, Oct. 12.

Signaling system. O. A. Shann. 2,450,997, Oct. 12.
Sirups, Thermosetting laminating. E. M. Queeny. 2,451,410, Oct. 12.
Slag, Method and apparatus for production of expanded. A. E. Meinzer. 2,450,978, Oct. 12.
Sleeve board having a lowered inoperative position and having a raised and locked operative position. M. Tronic. 2,451,259, Oct. 12.
Slurries to separate fibers from heavier particles, Treating liquid. J. D. Lyall. 2,450,901, Oct. 12.
Sock drier. G. W. Fonke. 2,451,208, Oct. 12.
Socket, Tube. C. Antony, Jr. 2,450,873, Oct. 12.
Speed controlled motor-driven gate. C. R. Beall. 2,451,373, Oct. 12.
Spreader, Tire bead. H. T. Kraft. 2,451,097, Oct. 12.
Spring: *See*—
Leaf spring.
Stand: *See*—
Oil regulator test stand.
Steel, Wear resistant. M. C. Fetzer and C. B. Post. 2,450,888, Oct. 12.
Steel wool. J. R. Thompson. 2,451,417, Oct. 12.
Stocking protector. B. B. Knubel. 2,450,968, Oct. 12.
Stop mechanism and means for mounting. R. G. Birr. 2,451,191, Oct. 12.
Stop mechanism for warpers, Automatic. J. S. Seney. 2,450,996, Oct. 12.
Strainer. B. M. Dean. 2,451,074, Oct. 12.
Strand, Wire saw. P. D. d'Avaucourt. 2,451,383, Oct. 12.
Strap, Baby. G. K. White. 2,451,007, Oct. 12.
Stretcher, Line. E. L. Howe. 2,451,389, Oct. 12.
Strip projection apparatus, Picture film. T. U. Sisson. 2,451,306, Oct. 12.
Studio, Broadcasting. J. K. Gannett, R. Smith, Jr., and B. W. Saveland. 2,451,283, Oct. 12.
Stuffing box. C. J. Keim. 2,450,895, Oct. 12.
Stuffing tube. P. M. D'Amico. 2,450,883, Oct. 12.
Support: *See*—
Yarn support.
Suppression system, Detonation. P. J. Costa. 2,450,882, Oct. 12.
Suspension for tandem wheeled vehicles. L. E. Long. 2,451,293, Oct. 12.
Suspension rack. A. E. Newman. 2,451,110, Oct. 12.
Switch: *See*—
Electric switch. Push-button stepping switch.
Electromagnetic switch. Push-pull selector switch.
Film spool switch. Selector switch.
Moisture-proofed plunger snap switch. Tire pressure alarm switch.
Phonograph-radio switch.
Pressure switch.
Synchronous motor. W. L. Hansen and I. N. Hurst. 2,450,955, Oct. 12.
Synthesis of polyhydroxy compounds. W. F. Gresham and R. E. Brooks. 2,451,333, Oct. 12.
Table assembly for automobiles. J. M. Cercownay. 2,451,275, Oct. 12.

Tags, Making identification. J. S. Pecker. 2,451,355, Oct. 12.
Tall oil, Hydrogenation of. H. Bliss and W. C. Sussky. 2,451,377, Oct. 12.
Tank and cooler assembly, Oil. R. M. Heintz. 2,450,960, Oct. 12.
Tape advancing device, Record. J. A. Spencer and J. C. Warwick, Jr. 2,451,365, Oct. 12.
Telegraph transmitter, Automatic message numbering. L. M. Potts. 2,451,045, Oct. 12.
Telemetering apparatus of the impulse-duration class. G. M. Thynell. 2,451,129, Oct. 12.
Television system. A. W. Friend. 2,451,026, Oct. 12.
Terminal for electric discharge tubes. G. E. Shoemaker. 2,450,999, Oct. 12.
Tester, Condenser. E. W. Aiken. 2,450,872, Oct. 12.
Testing apparatus, Brittle point. C. K. Chatten and S. A. Eller. 2,450,880, Oct. 12.
Testing device, Hydrostatic. H. D. O'Neil. 2,450,909, Oct. 12.
Textile fibers, Manufacture of artificial. A. Ferretti. 2,450,889, Oct. 12.
Textile spreader. E. S. Beard. 2,450,932, Oct. 12.
Therapeutic device. C. H. Carr. 2,450,935, Oct. 12.
Thiophane carboxyhydrazides and preparing the same. B. R. Baker and M. V. Querry. 2,451,429, Oct. 12.
Thread and making same, Elastic. S. W. Alderfer. 2,451,016, Oct. 12.
Thread guiding flier, Revolving. A. Nau-Touron. 2,451,352, Oct. 12.
3-tertiary-butyl-4-alkoxy benzaldehydes. M. S. Carpenter and W. M. Easter, Jr. 2,450,877, Oct. 12.
3-tertiary-butyl-4-alkoxy-5-nitro benzaldehydes. M. S. Carpenter and W. M. Easter, Jr. 2,450,878, Oct. 12.
Tightener, Precision cannon pinion. S. F. Bloom. 2,451,378, Oct. 12.
Time fuse, Mechanical. E. J. Fix. 2,450,890, Oct. 12.
Time switch. F. A. Ward. 2,451,135, Oct. 12.
Tire, Cushion. H. C. Nies. 2,451,172, Oct. 12.
Tire pressure alarm switch. H. L. Hull. 2,451,166, Oct. 12.
Tool: *See*—
Electric soldering tool. Machine tool.
Gem grinding and polishing tool. Riveting tool.
Toolholding means for machine tools, Cutting. J. A. Backstrom. 2,451,371, Oct. 12.
Tool lathe, Rotating. E. D. Beachler. 2,451,147, Oct. 12.
Trailer for boat handling. E. W. Oeth. 2,451,236, Oct. 12.
Training device, Artificial respiration. H. Church. 2,451,200, Oct. 12.
Transformation system, Electric frequency. E. F. W. Alexanderson, A. H. Mittag, and M. W. Sims. 2,451,189, Oct. 12.
Transformer, Variable. S. Berman. 2,450,868, Oct. 12.
Transformer with part turn winding, Instrument current. F. J. Lingel. 2,450,973, Oct. 12.
Transmission. H. R. Mitchell and C. M. Sobotka. 2,451,401, Oct. 12.
Transmission, Fluid. R. A. Pyle. 2,451,118, Oct. 12.
Transmission with governor-synchronized gears, Semiautomatic automotive. D. S. Bennetch. 2,451,058, Oct. 12.
Transmitter, Impulse. R. L. Sargisson and H. F. Obergfell. 2,451,358, Oct. 12.
Transmitter-sheet loading and stripping mechanism, Facsimile. W. G. H. Finch and G. H. Hohmann. 2,451,080, Oct. 12.
Traverse motion. O. W. Schlums. 2,451,243, Oct. 12.
Treatment of normally gaseous mixtures. H. H. Wenzke. 2,451,136, Oct. 12.
Truing mechanism for grinding wheels. J. F. Klukan. 2,451,395, Oct. 12.
Trunnion mounting for bulldozers and the like, Adjustable. G. E. Miller. 2,451,348, Oct. 12.

Vane pump for oil burners, Variable capacity. W. H. De Lancey. 2,451,279, Oct. 12.
Vaporizer. H. E. Pritchard. 2,451,238, Oct. 12.
Vaporizer for two-stage liquefied petroleum gas dispensing systems. L. J. White. 2,451,309, Oct. 12.
Vehicle reach and bound construction. G. G. McNamara, Jr. 2,450,977, Oct. 12.
Ventilating means, Toilet. C. M. Molpus. 2,451,108, Oct. 12.
Vinyl resin, Vulcanization of. L. F. Reuter. 2,451,174, Oct. 12.
Viscose artificial silk, filaments comprising threads, staple fibers, bands, and the like, Spinning. T. A. H. Blaas. 2,451,148, Oct. 12.
Volume control and switch, Shielded. E. W. Rosentreter. 2,451,241, Oct. 12.
Water correction device, Electrolytic. E. M. Butler. 2,451,064–6, Oct. 12.
Wall construction. F. E. Hunt. 2,451,220, Oct. 12.
Water correction device for insertion in circulatory systems, Electrolytic. E. M. Butler. 2,451,068, Oct. 12.
Water correction device, Self-energizing electrolytic. E. M. Butler. 2,451,067, Oct. 12.
Weather strip. L. Spraragen. 2,451,450, Oct. 12.
Weaving frame. A. C. Ferguson. 2,451,207, Oct. 12.
Web guiding device, particularly for tentering frames. A. Künzle. 2,451,343, Oct. 12.
Weighing system. M. C. Tate. 2,451,451, Oct. 12.
Welding gun, Stud. F. W. Anderson. 2,451,190, Oct. 12.
Welding wire-mesh fabrics, Art of. C. C. Wickwire. 2,451,423, Oct. 12.
Wheel: *See*—
Abrasive wheel.
Wheel drive for trenchers, Digging. R. N. Bennett. 2,451,315, Oct. 12.
Winding and welding device, Wire. F. T. May and R. A. Rehberg. 2,451,169, Oct. 12.
Window bracket. H. E. Ammerman. 2,451,143, Oct. 12.
Wire cutting and bending press. J. A. Shand. 2,450,920, Oct. 12.
Wire twisting device. S. G. Blumensandt and F. A. Bielak. 2,450,876, Oct. 12.
Wrapping, banding, and tipping machine. F. A. Risberg. 2,451,175, Oct. 12.
X-ray protective device. A. H. Feibel. 2,451,282, Oct. 12.
Yarn carrier stop motion. E. Vossen. 2,451,133, Oct. 12.
Yarn support. A. W. Keight. 2,450,966, Oct. 12.

CLASSIFICATION OF PATENTS

ISSUED OCTOBER 12, 1948

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number = class, second number = subclass, third number = patent number

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

IN RE WILLIAMS

No. 5500. Decided June 1, 1948

[168 F.2d 525; 78 USPQ 86]

1. INTERFERENCE—SUBSTITUTION OF JOINT APPLICATION FOR SOLE APPLICATION—EFFECT THEREOF.

Held that by obtaining the substitution of a joint application for appellant's sole application in an interference, appellant disclaimed sole inventorship of the subject matter in issue therein, and he is, therefore, in the same position as if he had unsuccessfully contested an interference with the joint application on that subject matter.

2. PATENTABILITY—CHEMICAL CLAIM—SPECIES IN INTERFERENCE DISCLAIMED—GENUS UNPATENTABLE.

Where appellant by his motion to substitute the joint application for his sole application in an interference involving a species which forms an integral part of the genus covered by the appealed claims admitted that he is not the first inventor of that species, *Held* that appellant may not obtain a patent covering it merely by including it in a genus with other species of which he may be the first inventor.

3. SAME—PROCESS OF PREPARING PANTOTHENIC ACID.

Certain claims to a process of preparing a substance having the physiological properties of pantothenic acid *Held* properly rejected on the basis of appellant's substitution of the joint application for his sole application in an interference.

APPEAL from the Patent Office. Serial No. 265,799. AFFIRMED.

Stowell & Evans (*Harold T. Stowell* and *John O. Evans, Jr.*, of counsel) for Williams.

W. W. Cochran (*J. Schimmel* of counsel) for the Commissioner of Patents.

HATFIELD, *J.*:

This is an appeal from the decision of the Board of Appeals of the United States Patent Office affirming the decision of the Primary Examiner rejecting claims 46, 65, 71, and 73 in appellant's application for a patent for an invention relating to a method of producing pantothenic acid.

Claims 49, 56, and 66 to 68, inclusive, were allowed by the Board of Appeals.

Claims 46 and 73 are sufficiently representative of the appealed claims. They read:

46. The process of preparing a substance having the physiological properties of pantothenic acid which comprises reacting the lactone obtained by hydrolytic splitting of natural pantothenic acid with a member of the group consisting of β-alanine and β-alanine in which the hydrogen of the carboxyl group is replaced by a constituent which protects the carboxyl group without destroying the reactivity of the amino group of the β-alanine.

73. The process which comprises reacting α-hydroxy-β,β-dimethyl-γ-butyro lactone with a compound of the group consisting of the salts and lower alkyl esters of β-alanine without the application of extraneous heat.

Appellant's application relates to the production of a growth promoting substance known as pantothenic acid and discloses a method in which this substance is prepared by reacting alpha-hydroxy-beta, beta-dimethyl-gamma-butyro lactone which, as stated by the Board, is also known as pantoyl lactone, with the salts and lower alkyl esters of alanine. Pantoyl lactone may be prepared by the hydrolytic splitting of natural pantothenic acid and claim 46 calls for that method of preparation, instead of designating the pantoyl lactone by name or formula. The details of appellant's process are not set forth in the appealed claims, and are not pertinent to the issues here involved.

All of the appealed claims were rejected as being unpatentable to appellant because of actions taken by him in connection with interference No. 78,737, hereinafter referred to. Appealed claims 46, 65, and 71 were further rejected on the grounds of indefiniteness and functionality, and claims 46 and 73 were further rejected as containing two distinct artificial classes of different scope.

Interference No. 78,737 was originally declared between a sole application of appellant Williams, No. 328,526, and applications of other parties. As the result of a motion by appellant, a joint application of Williams and Weinstock was substituted in the interference for the Williams sole application, and the issue of the interference was amended to include the following count:

Count 2. The method of synthesizing pantothenic acid which comprises directly combining an alkali-forming metal salt of β-alanine with α-hydroxy-β, β-dimethyl-γ-butyro lactone.

The quoted count is similar to the appealed claims, but is limited to the use of alkali-forming metal salts of beta-alanine, whereas the appealed claims are broad enough to include not only those salts but other salts and esters.

[1] It is evident that, by obtaining the substitution of a joint application for appellant's sole application in the interference, appellant disclaimed sole inventorship of the subject matter in issue therein. He is, therefore, in the same position as if he had unsuccessfully contested an interference with the joint application on that subject matter.

Since, as hereinbefore stated, the appealed claims are generic to the use of various beta-alanine compounds, while count 2 of interference No. 78,737 is specific to the use of alkali-forming metal salts of beta-alanine, the issue presented by this appeal is whether an applicant who admittedly is not the first

Vol. 615 • No. 2 Tuesday, October 12, 1948 Price $16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $19.50; single numbers, 35 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 25 cents each; copies of TRADE-MARKS and DESIGNS at 10 cents each. Address orders to the Commissioner of Patents, Washington 25, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or TRADE-MARKS will be sent without cost on request to the Commissioner of Patents, Washington 25, D. C.

inventor of a species in a chemical claim is nevertheless entitled to the allowance of a generic claim embracing that species.

The issue presented in the instant case is similar to that in the case of *In re Kaase et al.*, 31 CCPA (Patents) 932, 104 F.2d 1016, 60 USPQ 565, 563 O. G. 582. In that case appellants had lost an interference on an issue involving the use of isothiocyanates in a certain process, and thereafter sought to obtain the allowance of a process claim generic to the use of isothiocyanates and isocyanates. In holding that the appealed claim was properly rejected this court stated:

> What appellants are here seeking is to regain what they lost in interference No. 76,387. In the patent issued to Hanford and Holmes as a result of the decision in that interference, the public is taught that isothiocyanates may be used in the involved process.
>
> Now appellants seek to dominate the patent to Hanford and Holmes by claiming as an element of their process the use of isothiocyanates, although it has been determined that appellants were not the first inventors of such use.

[2] The species disclaimed by appellant by his motion to substitute the joint application for his sole application in interference No. 78,737 forms an integral part of the genus covered by each of the appealed claims. Having admitted that he is not the first inventor of that species, appellant may not obtain a patent covering it merely by including it in a genus with other species of which he may be the first inventor. His claims should be made commensurate in scope with his invention.

[3] It follows that all of the appealed claims were properly rejected on the basis of appellant's substitution of the joint application for his sole application in the interference, and it is, therefore, unnecessary to consider the other grounds of rejection.

For the reasons stated, the decision of the Board of Appeals is affirmed.

AFFIRMED.

By reason of illness, O'CONNELL, *J.*, was not present at the argument of this case and did not participate in the decision.

NOTICES

Classification Order No. 35

September 28, 1948

The following transfers are hereby ordered to take effect immediately:

Class 185, Motors; Class 293, Vehicle Fenders; Class 298, Land Vehicles, Dumping; and Class 305, Land Vehicles, Wheel Substitutes, from Division 45 to Division 28.

Class 263, Heating, from Division 28 to Division 30.

THOMAS F. MURPHY,
Assistant Commissioner of Patents.

Adjudicated Patents

(D. C. Del.) Smalley patent, No. 1,850,813, for a fuse, claims 1 to 13 *Held* invalid and not infringed. *Signalite Fuse Co. v. Fuse Indicator Corp.*, 78 F. Supp. 588, 78 USPQ 189.

(D. C. Mich.) Calvert patent, No. 1,908,218, for an abrasive stone holder, claim 1 *Held* invalid and not infringed. *Micromatic Home Corp. v. Mid-West Abrasive Co.*, 78 F. Supp. 641, 78 USPQ 13.

Disclaimers

Re. No. 19,719.—*Ralph E. Hall*, Mount Lebanon, Pa. WATER SOFTENING AND WASHING. Patent dated Oct. 8, 1935. Disclaimer filed Sept. 10, 1948, by the assignee, *Hall Laboratories, Inc.*

Hereby enters this disclaimer of claims 1, 2, 3, 4, 5, 6, 16, 18, 20, 21, 22, 24, 25, 26, 27, and 28.

2,035,652.—*Ralph E. Hall*, Mount Lebanon, Pa. WASHING AND CLEANSING. Patent dated Mar. 31, 1936. Disclaimer filed Sept. 10, 1948, by the assignee, *Hall Laboratories, Inc.*

Hereby enters this disclaimer of claims 9, 10, and 11.

2,207,775.—*Alda V. Bedford*, Collingswood, N. J. TELEVISION RECEIVER. Patent dated July 16, 1940. Disclaimer filed Sept. 13, 1948, by the assignee, *Radio Corporation of America.*

Hereby disclaims claims 1, 2, and 3 of said patent.

2,379,818.—*Warren P. Mason*, West Orange, N. J. COUPLING BETWEEN RESONATORS AND ELECTRON STREAMS. Patent dated July 3, 1945. Disclaimer filed Sept. 8, 1948, by the assignee, *Bell Telephone Laboratories, Incorporated.*

Hereby enters this disclaimer to claims 1 and 2 of said patent.

Adverse Decisions in Interferences

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not first inventors with respect to the claims listed.

Pat. 2,408,903, O. H. Biggs and H. Heins, Ultra high frequency generator, decided July 28, 1948, claims 1 and 4.

Pat. 2,416,345, J. E. Piccardo, Valve and air charger for pumps and storage tanks, decided Sept. 17, 1948, claims 15, 16, and 17.

Pat. 2,427,622, H. W. Rasmussen, Handle lock, decided Sept. 17, 1948, claims 2, 3, 4, and 5.

Interference Notice

The Big Store Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Marlboro Shirt Company, Inc., Lombard and Paca Sts., Baltimore, Md., for registration of a trade-mark and registration No. 277,138, issued November 4, 1930, to The Big Store Company, southeast corner of Seventh and Race Sts., Cincinnati, Ohio, and the notice of such declaration sent by registered mail to the said The Big Store Company at the said address having been returned by the post office undelivered, notice is hereby given that unless The Big Store Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order, the interference will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS F. MURPHY,
Sept. 15, 1948. *Assistant Commissioner of Patents.*

Cancellation Notice

Willoughby Camera Stores, Inc., its assigns or legal representatives, take notice:

A cancellation proceeding has been instituted by this Office upon the application of The Spencer Company, 711 West Lake St., Chicago, Ill., to effect the cancellation of trade-mark registration of Willoughby Camera Stores, Inc., No. 300,972, dated February 14, 1933. The assignment records of this Office show a transfer of title to this registration to Robert B. Wheelan, New York, N. Y., joined as a respondent to defend the registration concerned. The Office having been unable to secure service upon the registrant or said Wheelan, notice is hereby given that unless they, their assigns, legal representatives, or other person claiming an interest in the registration shall enter an appearance therein within thirty days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS F. MURPHY,
Sept. 13, 1948. *Assistant Commissioner of Patents.*

REGISTER OF PATENTS AVAILABLE FOR LICENSING OR SALE

(The "Groups" appearing after the patent abstracts are based on the Standard Industrial Classification Manual, Vol. I, Manufacturing Industries, Executive Office of the President, Bureau of the Budget)

Pat. 2,445,522. DIRT RETAINER FOR CULVERTS AND PIPES. Patented July 20, 1948. Sectional bulkhead is adjustable to fit culverts and pipes of various diameters. It includes a plurality of segments having inner and outer arcuate edges with the inner edges forming an eccentrically positioned circular opening to receive a culvert. One end of each segment is offset to provide a supporting slip-joint for adjacent segments, and L-shaped brackets are welded to the ends of adjacent segments to receive bolts for holding the segments in adjusted position. Reinforcing angle braces are secured to the surface of the segments to prevent them from buckling. (Owner) Nicholas Fritsch, Graf, Iowa. Group 34—95. Reg. No. 10,016.

Pat. 2,445,010. SCARIFYING AND INOCULATING NEEDLE. Patented July 13, 1948. Veterinarian's needle is formed of a hollow tubular shank of uniform diameter. Upper end has openings to permit entrance of vaccine. Lower end has a piercing point through which vaccine discharges one drop at a time when skin of animal has been punctured. The point is formed with a conical recess forming a well or pool of vaccine, which cooperates with the column of vaccine in the needle to cause the vaccine discharged to form a drop. In use, the needle is inserted through the conventional stopper of a bottle. Bottle can thus be used as handle. (Owner) L. H. Thompson, 2204 La Casa Drive, Austin, Tex. Group 39—15. Reg. No. 10,017.

The following 11 patents are owned by Juan Loumiet, Apartado 1998, Havana, Cuba.

Pat. 2,015,076. CENTRIFUGAL SEPARATOR. Patented Sept. 24, 1935. Groups 29—11; 35—51. Reg. No. 10,018.

Pat. 2,360,066. GAS PURIFICATION SYSTEM. Patented Oct. 10, 1944. Groups 29—11; 35—51. Reg. No. 10,019.

These two patents pertain to a centrifugal separator for liquids entrained in a gas or vapor stream. A helical coil is utilized, having a lower outer edge that constitutes a continuous gutter in which liquid impurities separated are collected by the combined action of centrifugal force and gravity. The impurities are periodically withdrawn through tangentially positioned tubes which empty into traps that allow the extraction of liquids, but prevent the escape of gases. Thus the fluid undergoing purification is subjected to progressively increasing purification in its flow through the separator, every additional extraction increasing its exhaustion. The arrangement makes possible greater purification with smaller apparatus or loss of pressure.

Pat. 2,182,566. CENTRIFUGAL RECTIFICATION. Patented Dec. 5, 1939. According to this patent distillation and rectification are simultaneously accomplished. The vaporous products to be rectified are made to flow at great speed through successive turns of a curvilinear coil. A rectifying liquid is injected toward the center of the coil, causing the atomization of the liquid by the vapor stream being rectified and effecting intimate mixture of the vapor and the liquid, and the rectification of both. Separation of the rectified liquid in the coil is effected by subjecting the vapor and liquid to centrifugal force, after which the separated rectified liquids are extracted from drains on the exterior of the coils. Groups 29—11; 35—51. Reg. No. 10,020.

Pat. 2,193,460. SEPARATOR. Patented Mar. 12, 1940. In usual condensing processes minute particles entrained by the vapor stream constitute a nucleus around which more vapor condenses progressively. As cooling sets in, the particles grow in size until forced to separate from the vapor stream. According to this patent, the original particle, rich in low-volatility components, may be separated from the vapor before it is degraded by admixtures from successive condensations. Separation is obtained by the application of centrifugal force in which the mixed vapor is sent through a curved refrigerated coil where the vapor condenses progressively. Inertia causes the particles to strike the outer wall, where they are intermittently withdrawn through tubes tangentially placed on the coil. Groups 29—11; 35—51. Reg. No. 10,021.

Pat. 2,230,253. SEPARATION OF LIQUIDS. Patented Feb. 4, 1941. Broadly, this patent provides fractional vaporization of a mixture being distilled by causing a stream to flow successively through a series of confined zones heated at temperatures increasing from zone to zone progressively, causing the more volatile constituents of the mixture to be evaporated. The process makes available for recovery in each zone the specific heat contained in all liquid transmitted from zone to zone as well as all latent heat of vaporization contained in the vapors being transmitted. Groups 29—11; 35—51. Reg. No. 10,022.

Pat. 2,230,255. METHOD AND APPARATUS FOR PRODUCING INTIMATE CONTACT BETWEEN FLUIDS. Patented Feb. 4, 1941. Two non-miscible fluids of different densities are caused to circulate simultaneously in one direction at a high speed within a specially shaped conduit. The conduit used is of oval cross-section and wave-like in form so that alternate concavities and convexities occur along its length. At every undulation, centrifugal force tends to throw the denser fluid toward the outer part of the section, and the lighter fluid inwardly. On passing from a convexity to a concavity the fluids alternate their relative positions, crossing each other and causing the fluids of different densities to be thoroughly mixed. The process and apparatus have many uses: The cooling and condensation of distillation products, the rectification and purification of oils, water heating, etc. Groups 29—11; 35—51. Reg. No. 10,023.

Pat. 2,281,065. FLUID SEPARATION. Patented Apr. 28, 1942. To separate fluids or vapor mixtures of different densities, expanded vapors are forced to travel through several sections of a helical coil at high pressure. The temperature of the sections is regulated to promote condensation of the heavier constituent. Centrifugal force, induced by the travel of the fluid, causes all condensed liquid to be thrown outwardly to the side of the coil,

effecting a preliminary classification. Successive sections are subdivided into concentric zones, with a greater number of partitions. This enables any dense fluid entrained in the lighter stream in the course of earlier classification to be returned to the denser stream, the same readjustment being available to the lighter fluid. Groups 29—11; 35—51. Reg. No. 10,024.

Pat. 2,338,773. AUTOMATIC BOILER FEED REGULATOR. Patented Jan. 11, 1944. This patent discloses several arrangements for regulating the flow of water into a boiler to maintain a constant level. In one arrangement, a column composed of several fluids (one of which is a good conductor of electricity) is used, in which the fluids move vertically in accordance with changes in the level of water in the boiler. The water feed is regulated by making and breaking contact with electrodes appropriately located in the fluid passage. A fuel feed is made interdependent with the water feed, and adjusted to the needs of the system as the fluids rise and fall. For example, when the level of the conducting liquid is below a lower electrode, the motor is energized to open a feed valve, and, when above an upper electrode, causes the motor to reverse direction so that the valve is gradually closed. Groups 29—11; 35—51. Reg. No. 10,025.

Pat. 2,377,254. BOILER FEED REGULATING APPARATUS. Patented May 29, 1945. Groups 29—11; 35—51. Reg. No. 10,026.

Pat. 2,437,327. PROCESS FOR REGULATING STEAM GENERATORS AND AUTOMATIC FEED SYSTEMS FOR SUCH GENERATORS. Patented Mar. 9, 1948. Groups 29—11; 35—51. Reg. No. 10,027.

In these two patents the regulation of a steam generator is accomplished by proportionately feeding supplies of water, fuel, and air in accordance with either maximum or minimum requirements necessary to efficiently operate the generator. Constant adjustment is obtained by utilizing variations in the water level in the generator in proportion to the steam consumed to adjust the fuel, air, and water supply. In Pat. 2,377,254 a single drive motor associated with a constant volumetric discharge apparatus (proportional in speed to the motor) functions to drive a water feed pump, a fuel feed, and an air blower to maintain constant water level and steam pressure. Emphasis in Pat. 2,437,327 is in the primary regulation of the drive motor in accordance with variations in the steam pressure independently of variations in the water level, the regulation of water supply being likewise effected in accordance with variations in the water level independent of the variations in steam pressure. Several modifications are shown in both patents.

Pat. 2,423,397. STEAM BOILER REGULATING SYSTEM. Patented July 1, 1947. Automatic steam-boiler regulating system includes a coil formed of vertical tubes filled with non-miscible liquids of different densities. One end of the coil is connected to the steam zone of the boiler and the upper ends of two tubes connected to a horizontal capillary tube filled with mercury. The arrangement is such that the mercury column is shifted by movements of the liquids in the coils in accordance with variations of the water level in the boiler. The liquids are balanced by variations in the proportions of light and heavy liquid in each tube, counterbalancing changes in pressure. Double electrodes are arranged so that a control circuit is closed by bridging the electrodes. The current actuated by movement of the mercury varies the feed in accordance with variations in the column of mercury corresponding with the water level, etc. Groups 29—11; 35—51. Reg. No. 10,028.

Pat. 2,383,696. LAWN MOWER GEAR AND LOCKING DEVICE. Patented Aug. 28, 1945. A lawn mower gear is automatically locked to the operating shaft through overrun cam clutch action and the use of a roller-like locking pin connected to a leaf spring. Spring is counterseated in the gear and tensioned clipped about the shaft. A stepped cam is provided on the gear for action on the pin to automatically lock and unlock the gear and shaft according to the direction of rotation of the pinion. The pinion and pin are interchangeable from one end to the other of the shaft. The device is designed to be dirt- and dust-proof and to permit convenient lubrication. May be quickly removed. (Owner) Albert E. Thompson, 33 Valley St., Lawrence, Mass. Group 35—22. Reg. No. 10,029.

Pat. 2,443,372. FASTENER. Patented June 15, 1948. Fastener is, among various other uses, designed to detachably secure buttons or ornaments to garments. A safety-pin-like structure of resilient wire has button-holding jaws extending upward from upper part of pin. Jaws open and close with the pin, penetrating the fabric and securing the buttons, etc. (Owner) Frederick A. Bertram, 6526 Selma Ave., Hollywood 28, Calif. Groups 39—99; 40. Reg. No. 10,030.

Pat. 2,401,962. MEASURING INSTRUMENT. Patented June 11, 1946. A device for making pressureless micrometric measurements. An electron-ray tube gives a visible signal when a pair of calipers, micrometer, or the like come into contact with an object. The grid of the electron-ray tube is made positive with regard to the anode and the target, plate current flows, and a shadow appears on the target. (Owner) William E. Reynolds, 1515 Van Dyke Ave., San Francisco 24, Calif. Groups 35—43; 36—92. Reg. No. 10,031.

Pat. 2,445,514. DOOR HOLDER AND STOP. Patented July 20, 1948. A combined door bumper and holder has a body member which is screwed near lower edge of a door. A plunger or piston is mounted on projecting end of the body member, having a recessed end which slides into a cylinder located in the extension of a suction cup. When door is opened, the suction cup hits the baseboard and holds the door. Sudden attempts to close the door, thus withdrawing the piston from the cylinder, are resisted by increased suction and by frictional engagement, but a steady pressure on the door causes its disengagement. The suction cup is self-attaching and is retained on the baseboard in proper alignment with the piston. Device may be mounted on baseboard, and suction cup attach itself to a door. (Owner) Henry P. Clausen, 23 Ogden Ave., White Plains, N. Y. Groups 33—59; 40. Reg. No. 10,032.

Pat. 2,447,269. ELECTROTHERAPEUTIC APPARATUS. Patented Aug. 17, 1948. This apparatus for treatment of flat feet and weak ankles consists of an electrically heated roller mounted on a support having adjustable heat-radiating wings at opposite ends. When roller has been heated to desired temperature, user places the sole of his foot upon the roller and moves roller backward and forward. At same time the ankles may be "baked" by heat radiated from wings. Temperature may be regulated by a rheostat, and time of treatment by a time switch. (Owner) Frederick Myers, 43 Sullivan St., Charlestown 29, Mass. Group 36—92. Reg. No. 10,033.

Pat. 2,428,534. CLEAN SWEEP COUNTER AND STOOL CONSTRUCTION. Patented Oct. 7, 1947. Construction of this lunch counter and stool is designed to simplify the cleaning of lunchroom or restaurant floors. A conventional rotating stool seat fitted to an upright standard, which is bent somewhat in the form of a J (with the end of the loop turning downward), is used in combination with a ramp arrangement down which crumbs, etc., falling from the counter may slide. The ramp, an inclined

plate extending from counter wall to floor, is supported by a concealed bracket. The lower part of the upright standard passes through an opening in the ramp and is bolted to the floor. The bend in the upright standard above the ramp clears the floor to allow access for a push-broom. A foot rail is included in the structure. Model in use. (Owner) Ira O. Stelzer, 1738 N. W. 114th St., Miami 38, Fla. Group 25—21—22—41. Reg. No. 10,034.

Pat. 2,308,657. COCKTAIL SHAKER. Patented Jan. 19, 1943. Reg. No. 10,035.

Pat. 2,387,151. COCKTAIL SHAKER. Patented Oct. 16, 1945. Reg. No. 10,036.

These two patents cover a number of embodiments of a cocktail or beverage shaker (a) into which ice and ingredients are loaded together for the usual quick chilling and expected initial dilution, (b) in which after initial chilling the remaining ice and the drink are segregated by merely orienting the shaker, and (c) in which the remaining ice serves to maintain the drink cold but without further diluting it. (Owner) Charles T. Jacobs, Box 352, Orange, N. J. Groups 32—29; 34—63; 39—81; 40.

Des. Pat. 149,602. SPECTACLE HOLDER ATTACHMENT FOR TELEPHONES. Patented May 11, 1948. Shaped base has four upstanding flanges which grip the sides of a standard handset phone. Extending from the rear flange is an upright T-shaped holder provided with a slotted head in which a pair of spectacles may be rested. Holder may be made of plastic or of stamped sheet metal. (Owner) Mrs. Grace H. Yost, 6837 Kingsbury Blvd., St. Louis, Mo. Groups 33—73; 39—81; 40. Reg. No. 10,037.

Des. Pat. 150,512. TOBACCO HUMIDOR. Patented Aug. 10, 1948. A barrel-shaped humidor rests horizontally on a standard which has an ash tray at one end. (Owner) Michael Pendriss, Route 2, South Burlington, Vt. Groups 25—99; 32—29, 40. Reg. No. 10,038.

United States Government Owned Patents

The following patents have been assigned to the United States as represented by the Secretary of Agriculture. Licenses to practice the inventions will be issued on a royalty-free, non-exclusive, non-transferable, revocable basis. Applications for licenses should be addressed to the Bureau of Agricultural and Industrial Chemistry, U. S. Department of Agriculture, Washington 25, D. C.

Pat. 2,438,300. PROCESS FOR THE PURIFICATION OF ACETIC ACID BY AZEOTROPIC DISTILLATION. Patented Mar. 23, 1948. (Granted under the act of Mar. 3, 1883, as amended April 30, 1928; 370 O. G. 757.) Acetic acid occurs as a byproduct in the manufacture of butadiene from 2,3-butylene glycol diacetate. The patent covers the method of separating acetic acid from the mixture obtained by continuously adding water and continuously distilling off the water-azeotropes of other constituents of the mixture. After this treatment, acetic acid may be separated by simple distillation. Group 28—61. Reg. No. 10,039.

Pat. 2,442,141. METHOD FOR PRODUCTION OF PENICILLIN, Patented May 25, 1948. (Granted under the act of Mar. 3, 1883, as amended April 30, 1928; 370 O. G. 757.) Penicillin is produced by incubating a penicillin-producing mold in an aqueous nutrient medium. The main nutrients are an assimilable carbon source and a proteinaceous substance. A portion of each is added at the beginning of the fermentation and additional increments are added during the period to compensate for that used up by the mold. The effect of this technique is to increase the overall yield of penicillin. Group 28—31. Reg. No. 10,040.

Pat. 2,442,928. FOOD PRODUCTS AND METHOD OF MAKING THEM. Patented June 8, 1948. (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.) Starch, if pasted with water and gelatinized, may be frozen to form a product which, upon thawing, is porous and spongy. This phenomenon is utilized in the preparation of novel food products. A wide variety of food ingredients and flavors may be incorporated in the starch paste before freezing. The dried sponge, with or without such added ingredients, may be coated or admixed with other foods to make cookies, candy, and the like. The products have a pleasing crisp or crunchy texture. Group 20—94—99. Reg. No. 10,041.

Pat. 2,443,919. FERMENTATION PROCESS FOR PRODUCTION OF α-KETOGLUTARIC ACID. Patented June 22, 1948. (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.) A nutrient medium containing gluconic acid or a soluble gluconate salt is inoculated with bacteria of the genus Pseudomonas. The desired product is obtained by continuing the fermentation beyond the stage at which 2-ketogluconic acid is formed. The submerged aerated technique is employed. Group 28—89. Reg. No. 10,042.

Pat. 2,443,989. METHOD FOR PRODUCTION OF PENICILLIN. Patented June 22, 1948. (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.) Penicillin is produced in greatly increased yield by the submerged aerated technique. A penicillin-producing mold is cultivated in an aqueous nutrient medium containing a source of assimilable carbon and a degraded proteinaceous material along with inorganic nutrients. The medium is agitated and aerated for a period of two to seven days. Group 28—31. Reg. No. 10,043.

Pat. 2,444,241. SOY WHIP. Patented June 29, 1948. (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.) A light, foamy whip similar to beaten egg whites is manufactured from soybean meal. The whip does not possess a beany, grassy, or bitter flavor and may be utilized to introduce protein into candies and like materials, as a dessert topping, icing, etc. The material is obtained from soybean flakes that have been freed from oil and other alcohol sclubles. The flakes are extracted with water and a proteinaceous material recovered from the extract from which the whip is made. Groups 20—71—99; 28—23. Reg. No. 10,044.

Pat. 2,445,128. BIOLOGICAL PROCESS FOR THE PRODUCTION OF RIBOFLAVIN. Patented July 13, 1948. (Granted under the act of Mar. 3, 1883, as amended Apr. 30, 1928; 370 O. G. 757.) Riboflavin is produced in large yields by cultivating the microorganism, *Ashbya gossypii*. The fermentation is carried out under aerobic conditions in a medium containing a fermentable carbohydrate and a proteinaceous material. Particularly advantageous results are obtained when the proteinaceous material includes a constituent derived from an animal source together with a constituent derived from a plant source. Group 28—31. Reg. No. 10,045.

TRADE-MARKS

OFFICIAL GAZETTE, OCTOBER 12, 1948

[VOL. 615. No. 2]

ACT OF 1905

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication. As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Marks published for opposition under the act of 1946 follow the 1905 publications.

CLASS 4

ABRASIVE, DETERGENT, AND POLISHING MATERIALS

Ser. No. 521,318. BRANNAN AND ROSS CHEMICAL PRODUCTS CO., Dallas, Tex. Filed Apr. 25, 1947.

B and R

FOR SPOT REMOVER.
Claims use since Apr. 10, 1946.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Ser. No. 487,989. BROEMMEL'S PHARMACEUTICALS, San Francisco, Calif. Filed Sept. 5, 1945.

INO-CHOLINE

The term "Choline" is disclaimed apart from the mark.
FOR VITAMIN B COMPLEX COMPOUND IN TABLET FORM.
Claims use since July 16, 1945.

Ser. No. 516,290. JEAN-PASCAL LORRIAUX & CO., Paris, France. Filed Jan. 24, 1947.

oh! Please

FOR PERFUMES.
Claims use since Feb. 12, 1946.

Ser. No. 517,687. ADVANCE SOLVENTS & CHEMICAL CORPORATION, New York, N. Y. Filed Feb. 18, 1947.

ADVAWET

FOR CHEMICAL WETTING AGENTS, EMULSIFIERS FOR PAINTS, VARNISHES, RESINS, AND OILS.
Claims use since July 15, 1943.

Ser. No. 518,324. REVLON PRODUCTS CORPORATION, New York, N. Y. Filed Feb. 28, 1947.

"Fashionplate"

FOR CREAM WAFER MAKE-UP AND CAKE MAKE-UP.
Claims use since May 14, 1946.

CLASS 12

CONSTRUCTION MATERIALS

Ser. No. 523,028. LEO W. KENNEDY, doing business as L. W. Kennedy Company, Detroit, Mich. Filed May 26, 1947.

KENCO

FOR COMBINATION METAL AND GLASS DOORS FOR THE ENTRANCEWAY OF STORES AND OTHER BUILDINGS.
Claims use since Apr. 30, 1947.

CLASS 17

TOBACCO PRODUCTS

Ser. No. 525,619. P. LORILLARD COMPANY, New York, N. Y. Filed July 2, 1947.

Common Sense

FOR SMOKING TOBACCO.
Claims use since 1899.

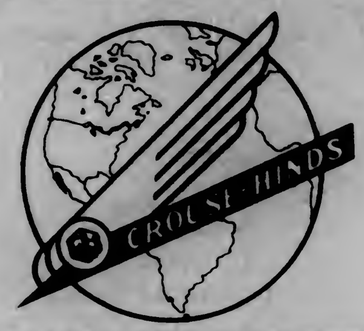
CLASS 19

VEHICLES

Ser. No. 521,936. STATE WELDING WORKS, INC., New York, N. Y. Filed May 5, 1947.

"STATE WELD"

The word "Weld" is disclaimed apart from the mark shown.



FOR AUTOMOBILE RADIATOR GUARDS, COLLAPSIBLE STEP FOR VEHICLES, AND AUTOMOBILE LUGGAGE CARRIERS.

Claims use since Mar. 1, 1947.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Ser. No. 503,553. CROUSE-HINDS COMPANY, Syracuse, N. Y. Filed June 10, 1946.

Applicant disclaims rights for the words "Crouse-Hinds" apart from the mark as shown in the drawing.

FOR ELECTRICAL APPARATUS FOR AIRPORTS—NAMELY, BEACONS, FLOODLIGHTS, SEARCHLIGHTS, BOUNDARY LIGHTS, OBSTRUCTION LIGHTS, RANGE LIGHTS, MARKER LIGHTS, RUNWAY LIGHTS, CONTACT LIGHTS, UNDERGROUND JUNCTION BOXES, TRAFFIC SIGNALS COMPRISING LIGHTING UNITS FOR INDICATING THE APPROACH, LANDING, TAKE-OFF, AND TAXI OPERATIONS OF AIRPLANES AT THE AIRPORT, AND HANGAR LIGHTING & WIRING APPARATUS.

Claims use since Mar. 20, 1946.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 512,159. COAST-A-WAY TOYS, Petersburg, Ohio. Filed Nov. 7, 1946.

Coast-A-Way

No claim is made to the word "Coast" or to the representation of the goods apart from the mark shown.

FOR TOY WAGONS AND WHEELED VEHICLES USED ON TOY ROLLER COASTERS AND TRACKS THEREFOR.

Claims use since Oct. 1, 1946.

Ser. No. 516,969. LEO EHRFMAN, doing business as A-Jus-Tee Co., Long Island, N. Y. Filed Feb. 5, 1947.

A-JUS-TEE

The word "Tee" is disclaimed apart from the mark.

FOR GOLF TEES.

Claims use since Nov. 1, 1946.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Ser. No. 501,232. MAXON CONSTRUCTION COMPANY, INC., Dayton, Ohio. Filed May 2, 1946.

DUMPCRETE

FOR DUMPING CONTAINERS FOR ATTACHMENT TO AND OPERATION FROM TRUCKS, AND INCLUDING OPERATING MECHANISM FOR RAISING AND DUMPING THE SAME AND WITH A CHUTE ASSOCIATED THEREWITH, FOR USE IN TRANSPORTING READY MIXED CONCRETE.

Claims use since Dec. 27, 1945.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

Ser. No. 521,427. B-L ELECTRIC MANUFACTURING COMPANY, St. Louis, Mo., assignor to The Benwood-Linze Company, a corporation of Missouri. Filed Apr. 28, 1947.

HYDROTHERMATIC

No exclusive claim is made to "Hydro" except in combination with "Thermatic."

FOR A SYRINGE WHICH IS PROVIDED WITH A FLOAT THAT WILL, WHEN SURROUNDED BY THE ELECTROLYTES OF ELECTRIC STORAGE BATTERIES, INDICATE THE TIME OF CHARGE AND THE CONDITION OF THE ELECTROLYTES AFTER CHARGING, AND WHICH THUS CONSTITUTES A TEST UNIT TO TEST THE CONDITION OF ELECTROLYTES OF ELECTRICAL EQUIPMENT.

Claims use since Mar. 26, 1947.

CLASS 27

HOROLOGICAL INSTRUMENTS

Ser. No. 511,150. R. GRELL & CO., INC., New York, N. Y. Filed Oct. 19, 1946.

TRANS-WORLD

FOR WATCHES, WATCH MOVEMENT, WATCHCASES AND PARTS THEREOF.

Claims use since July 31, 1946.

Ser. No. 523,706. BULOVA WATCH COMPANY, INC., New York, N. Y. Filed June 7, 1947.

Applicant is the owner of trade-mark registration No. 184,904 (renewed).

FOR WATCHES, WATCH MOVEMENTS AND PARTS THEREOF, AND WATCHCASES.

Claims use since August 1922.

Ser. No. 524,726. SELF WINDING CLOCK COMPANY, INC., Brooklyn, N. Y. Filed June 24, 1947.

FOR CLOCKS, TIME CLOCKS, CONTROL CLOCKS AND CLOCK CONTROLLED SIGNAL SELECTORS.

Claims use since February 1934.

CLASS 32

FURNITURE AND UPHOLSTERY

Ser. No. 515,917. FRANK M. TRITICO, doing business as Tritico Mattress Factory, Lake Charles, La. Filed Jan. 17, 1947.

No claim is made to the word "Mattress." The portraits shown in the drawing are fanciful.

FOR MATTRESSES.

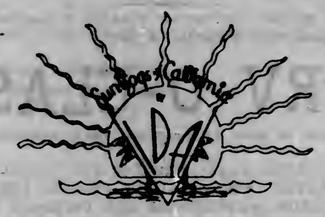
Claims use since Oct. 14, 1946.

CLASS 37

PAPER AND STATIONERY

Ser. No. 509,421. HAMILTON ROSS JETFLOW CORPORATION, Chicago, Ill. Filed Sept. 20, 1946.

JET flow



FOR FOUNTAIN PENS.

Claims use since July 2, 1946.

CLASS 39

CLOTHING

Ser. No. 510,284. SUNITOGS OF CALIFORNIA, San Francisco, Calif. Filed Oct. 4, 1946.

The word "California" is disclaimed apart from the mark as shown.

FOR UNIT ASSEMBLY CONSISTING OF READY CUT MATERIAL, STAMPED DESIGN, EMBROIDERY THREAD, AND SEWING GUIDE CHART FOR MAKING A CHILD'S PINAFORE.

Claims use since Aug. 21, 1946.

Ser. No. 511,995. GAMBLE-SKOGMO, INC., Minneapolis, Minn. Filed Nov. 4, 1946.

The drawing is lined for the color gold. No claim is made to the outline representation of the label.

FOR WORK GLOVES, WORK SHIRTS, DENIM JACKETS, WAIST BAND AND BIB OVERALLS, AND WORK SUITS.

Claims use since June 1, 1946.

CLASS 42

KNITTED, NETTED, AND TEXTILE FABRICS, AND SUBSTITUTES THEREFOR

Ser. No. 511,811. THE B. F. GOODRICH COMPANY, Akron, Ohio, and New York, N. Y. Filed Oct. 31, 1946.

Koroseal

FOR COATED AND IMPREGNATED FABRICS OF NATURAL AND SYNTHETIC FIBERS (INCLUDING COTTON, RAYON, NYLON, AND GLASS); AND FLEXIBLE PLASTIC FILM; ALL SOLD IN SHEET FORM FOR MAKING INTO GARMENTS, UMBRELLAS, DRAPERIES, AND THE LIKE.

Claims use since 1936 for the word "Koroseal"; but since 1939 for the word "Koroseal" in script lettering.

Ser. No. 522,097. IRVINGTON VARNISH & INSULATOR CO., Irvington, N. J. Filed May 8, 1947.

IRV-O-GLAS

No claim is made to the word "Glas" apart from the mark.

FOR COATED GLASS FIBER CLOTH IN THE PIECE FOR MAKING INTO AWNINGS, COVERS FOR IRONING BOARDS, MATTRESSES AND PILLOWS, FURNITURE COVERS, LAMP SHADES, AND THE LIKE.

Claims use since Jan. 29, 1947.

CLASS 44

DENTAL, MEDICAL, AND SURGICAL APPLIANCES

Ser. No. 501,166. MINNIE CUNNINGHAM, San Mateo, Calif. Filed Apr. 30, 1946.

DAPAD

FOR ABSORBENT BED PADS MADE OF GAUZE-COVERED ABSORBENT PAPER FOR HOSPITAL BEDS.

Claims use since Dec. 22, 1944.

CLASS 45

SOFT DRINKS AND CARBONATED WATERS

Ser. No. 517,503. MIDWESTERN BEVERAGE LABORATORIES, INC., St. Louis, Mo. Filed Feb. 14, 1947.

WINK

FOR NON-ALCOHOLIC, NON-CEREAL, MALTLESS CARBONATED BEVERAGES, SOLD AS SOFT DRINKS, AND SYRUPS AND EXTRACTS FOR MAKING THE SAME.

Claims use since Jan. 16, 1947.

CLASS 46

FOODS AND INGREDIENTS OF FOODS

Ser. No. 513,636. PH. ORTH COMPANY, Milwaukee, Wis. Filed Dec. 3, 1946.

FRY-D-LITE

FOR DOUGHNUT FLOUR.

Claims use since February 1940.

Ser. No. 516,111. AKTIENGESELLSCHAFT CHOCOLAT TOBLER, Bern, Switzerland. Filed Jan. 22, 1947.

The lining on the drawing does not indicate any particular color.

FOR CHOCOLATE, COCOA POWDER, ASSORTED CHOCOLATES, AND CANDY.

Claims use since December 1944.

Ser. No. 516,562. NATIONAL TEA CO., Chicago, Ill. Filed Jan. 29, 1947.

NATCO

Applicant is the owner of registration No. 428,490.

FOR FLAVOR EXTRACTS FOR FOOD PURPOSES—NAMELY, VANILLA, ALMOND, ORANGE, AND LEMON.

Claims use since Nov. 25, 1946.

Ser. No. 516,921. WALTER F. ROTHE, doing business as The Mustato Company, Washington, D. C. Filed Feb. 4, 1947.

MUSTATO

FOR SAUCE MADE OF TOMATOES AND SPICES TO BE USED ON MEATS, SALADS, AND VEGETABLES.

Claims use since Feb. 1, 1947.

Ser. No. 524,247. RALPH KILLINGSTAD, doing business as Killingstad Farms, Brownsville, Tex. Filed June 16, 1947.

BANCO

FOR FRESH TOMATOES.

Claims use since Mar. 27, 1945.

CLASS 50

MERCHANDISE NOT OTHERWISE CLASSIFIED

Ser. No. 505,139. WILLIAM B. WARD, doing business as William B. Ward Co., Kansas City, Mo. Filed July 5, 1946.

WARD-BORD

The words "Ward-Bord" are disclaimed apart from the mark.

FOR BULLETIN BOARDS.

Claims use since Jan. 1, 1946.

ACT OF 1946

The following trade-marks are published in compliance with section 12(a) of the Trade-Mark Act of 1946. Notice of opposition under section 13 may be filed within thirty days of this publication. See Rules 20.1 to 20.5.

As provided by section 31 of said act, a fee of twenty-five dollars must accompany each notice of opposition.

CLASS 1

RAW OR PARTLY PREPARED MATERIALS

Ser. No. 523,607. F. H. PEAVEY & COMPANY, Minneapolis, Minn. Filed Apr. 29, 1948.

CUSTER

The trade-mark consists in the name "Custer" in combination with a representation of that deceased celebrity on horseback.

FOR AGRICULTURAL SEEDS—NAMELY, FIELD CROP SEEDS.

Claims use since Feb. 8, 1939.

Ser. No. 523,608. F. H. PEAVEY & COMPANY, Minneapolis, Minn. Filed Apr. 29, 1948.

Pv

FOR AGRICULTURAL SEEDS—NAMELY, FIELD CROP SEEDS.

Claims use since January 1947.

Ser. No. 527,184. FOUKE FUR COMPANY, St. Louis, Mo. Filed July 5, 1947. Under section 2f of the act of 1946.

FOUKE
ST. LOUIS

Applicant makes no claim to the words "St. Louis" apart from the mark. Applicant claims ownership of registrations Nos. 151,130, 194,582, 321,309, and 418,557.

FOR FUR SEALSKINS.

Claims use since May 8, 1924.

Ser. No. 527,196. FOUKE FUR COMPANY, St. Louis, Mo. Filed July 5, 1947. Under section 2f of the act of 1946.

FOUKE
ST. LOUIS
DRESSING & DYE

Applicant makes no claim to the words "St. Louis" and "Dressing & Dye" apart from the mark. Applicant claims ownership of registrations Nos. 151,130, 194,582, 321,309, and 418,557.

FOR FURS, SKINS, HIDES, AND PELTS.

Claims use since May 23, 1921.

Ser. No. 527,289. THE CONSOLIDATED COAL COMPANY, St. Louis, Mo. Filed July 5, 1947. Under section 2f of the act of 1946.

BUCKHORN

Applicant claims ownership of registration No. 360,598.

FOR COAL.

Claims use since Feb. 15, 1938.

Ser. No. 527,445. THE CONSOLIDATED COAL COMPANY, St. Louis, Mo. Filed July 5, 1947. Under section 2f of the act of 1946.

Mount Olive

FOR COAL.

Claims use since 1905 as to "Mount Olive"; and since 1924 in its present form.

Ser. No. 529,374. GUDE BROTHERS CO., Washington, D. C. Filed July 24, 1947. Under section 2f of the act of 1946.

Gude's
GUDE BROTHERS CO.

"Say it with flowers"

The exclusive right to use the words "Say it with Flowers" and "Brothers Co." are disclaimed apart from the mark shown. Applicant claims ownership of registration No. 74,812.

FOR NATURAL FLOWERS AND NATURAL PLANTS AND FLORAL DECORATIONS MADE OF NATURAL FLOWERS.

Claims use since Apr. 1, 1941.

Ser. No. 542,662. FRED RUEPING LEATHER COMPANY, Fond du Lac, Wis. Filed Nov. 28, 1947.

TOMAHAWK

FOR LEATHER.

Claims use since Sept. 9, 1947.

CLASS 2

RECEPTACLES

Ser. No. 544,327. THE CRAFT BAG CORPORATION, Brooklyn, N. Y. Filed Dec. 15, 1947.

LAUNDROBAG

FOR PAPER BAGS.

Claims use since Nov. 26, 1947.

CLASS 3

BAGGAGE, ANIMAL EQUIPMENTS, PORTFOLIOS, AND POCKETBOOKS

Ser. No. 542,895. TREASURE COMPANY, Milwaukee, Wis. Filed Dec. 1, 1947.

Treasure-Fold

The word "Fold" is disclaimed apart from the mark.

FOR MEN'S BILLFOLDS.

Claims use since May 1938.

CLASS 4

ABRASIVE, DETERGENT, AND POLISHING MATERIALS

Ser. No. 532,404. BAY STATE ABRASIVE PRODUCTS COMPANY, Westboro, Mass. Filed Aug. 15, 1947. Under section 2f of the act of 1946.

BAY STATE

Applicant claims ownership of registration No. 345,340.

FOR GRINDING, ABRADING, POLISHING, CUTTING-OFF, AND KNIFE SHARPENING WHEELS; CYLINDER HONING STONES, RUBBING BRICKS, MARBLE FINISHING STONES, TERRAZZO RUBBING STONES, OIL STONES, ABRASIVE STICKS, PENCILS, AND STONES.

Claims use since Dec. 1, 1925.

Ser. No. 541,859. U. S. SANITARY SPECIALTIES CORPORATION, Chicago, Ill. Filed Nov. 15, 1947.

FOR SOAP, DRY CLEANING COMPOUND, GENERAL CLEANING OR WASHING COMPOUNDS FOR USE IN HOMES, FACTORIES, AND OFFICES, TOILET BOWL CLEANER, GLASS CLEANER, RUG AND CARPET CLEANER, METAL POLISH, AND COMPOUNDS FOR USE IN CLEANING AND POLISHING PORCELAIN, PAINTED, AND SIMILAR SURFACES.

Claims use since 1920.

Ser. No. 544,580. SCIENTIFIC SUPPLY CO., INC., Denver, Colo. Filed Jan. 12, 1948.

"MUST"

FOR POWDERED SOAP AND WASHING COMPOUNDS FOR LAUNDRY PURPOSES.

Claims use since Oct. 30, 1947.

Ser. No. 550,501. THE GREAT AMERICAN TEA COMPANY, New York, N. Y. Filed Feb. 25, 1948.

Golden Key

Applicant claims ownership of registrations Nos. 220,795 and 244,325.

FOR LIQUID PREPARATION FOR CLEANING GLASS, AND A GENERAL HOUSEHOLD CLEANSER IN POWDER FORM.

Claims use since Mar. 8, 1930, on the cleanser in powder form; and since Feb. 20, 1942, on the liquid cleaner.

Ser. No. 550,502. THE GREAT AMERICAN TEA COMPANY, New York, N. Y. Filed Feb. 25, 1948.

Golden Key

Applicant claims ownership of registrations Nos. 220,795 and 244,325.

FOR PREPARATION IN POWDER FORM FOR CLEANING CLOSET BOWLS.

Claims use since Mar. 5, 1938.

Ser. No. 550,503. THE GREAT AMERICAN TEA COMPANY, New York, N. Y. Filed Feb. 25, 1948.

Golden Key

Applicant claims ownership of registrations Nos. 220,795 and 244,325.

FOR CLEANSER PADS CONTAINING SOAP FOR CLEANING KITCHENWARE AND ALUMINUM; A PREPARATION IN POWDER FORM FOR GENERAL HOUSEHOLD CLEANING, HAVING INCIDENTAL WATER SOFTENING PROPERTIES; AND A PREPARATION IN LIQUID FORM FOR CLEANING WHITE SHOES.

Claims use since Sept. 1, 1945, on cleanser pads; since Mar. 14, 1936, on general household cleaner; and since Mar. 12, 1935, on liquid for cleaning white shoes.

Ser. No. 550,693. GRIFFIN MANUFACTURING COMPANY, INC., Brooklyn, N. Y. Filed Feb. 27, 1948. Under section 2f of the act of 1946.

GRIFFIN

Applicant claims ownership of registrations Nos. 75,292, 135,250, 190,017, 210,467, 279,625, 281,972, 310,170, 382,091, 382,649, 405,014, 405,015, 405,016, 405,018, and 405,019.

FOR CLEANING FLUID FOR WEARING APPAREL, FABRICS, UPHOLSTERY, AND CARPETS; AND LIQUID PREPARATION FOR CLEANING AND POLISHING SHOES.

Claims use since February 1915.

Ser. No. 550,792. THE CUDAHY PACKING COMPANY, Chicago, Ill. Filed Feb. 28, 1948.

Applicant claims ownership of registrations Nos. 50,697, 68,007, 68,213, 139,514, 224,182, and 231,395.

FOR SOAP POWDER COMBINED WITH MINERAL INGREDIENTS.

Claims use since Jan. 1, 1905.

Ser. No. 551,167. CARBOLITE CORPORATION, Maywood, Ill. Filed Mar. 4, 1948.

Teratone

FOR CLEANSER AND RENOVATOR FOR TERRAZO FLOORS.

Claims use since August 1947.

Ser. No. 552,294. THE M. WERK COMPANY, St. Bernard, Ohio. Filed Mar. 18, 1948.

RED MILL
SOLID NEUTRAL RED OIL SOAP

The lining on the drawing is for shading purposes only. Applicant disclaims as part of the trade-mark the descriptive words "Solid Neutral Red Oil Soap."

FOR SOAP.

Claims use since May 1, 1935.

Ser. No. 559,545. THE PROCTER & GAMBLE COMPANY, Cincinnati, Ohio. Filed June 17, 1948.

WATEX

Applicant claims ownership of registration No. 235,617.

FOR SUDSING CLEANER, CLEANSER, AND DETERGENT.

Claims use since Apr. 25, 1927.

Ser. No. 560,157. ARMOUR AND COMPANY, Chicago, Ill. Filed June 25, 1948.

Chiffon

FOR SOAP.

Claims use since December 1936.

Ser. No. 560,221. NETTIE ROSENSTEIN, INC., New York, N. Y. Filed June 25, 1948.

TEANNE

FOR TOILET SOAP.

Claims use since June 17, 1948.

Ser. No. 560,222. NETTIE ROSENSTEIN, INC., New York, N. Y. Filed June 25, 1948.

TIANNE

FOR TOILET SOAP.

Claims use since June 17, 1948.

Ser. No. 560,267. HOBB-SWETNAM COMPANY, INC., Wichita Falls, Tex. Filed June 26, 1948.

DUNK

FOR CLEANSER FOR REMOVING GUM, CARBON, AND GREASE FROM ANY TYPE METAL AND PARTICULARLY CARBURETORS, FUEL PUMPS, AND MOTOR BLOCKS.

Claims use since Sept. 1, 1945.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Ser. No. 476,302. NOPCO CHEMICAL COMPANY, Harrison, N. J., by change of name from National Oil. Filed Sept. 6, 1947.

Foam

The word "Foam" is disclaimed apart from the mark as a whole.

FOR SHAMPOO.

Claims use since Aug. 31, 1944.

Ser. No. 522,765. FURST-McNESS COMPANY, Freeport, Ill. Filed Sept. 26, 1947. Under section 2f of the act of 1946.

McNess

Applicant claims ownership of registrations Nos. 181,794 and 304,960.

FOR ROUND WORM REMEDY, CHOCOLATE FLAVORED LAXATIVE, HEADACHE TABLETS, BABY TALCUM, TOOTH POWDER, COUGH DROPS, LAXATIVE HERB TEA, INSECTICIDES, MINERALIZED POULTRY TONIC, ANTISEPTIC SOLUTION, AROMATIC COMPOUND FOR TREATMENT OF DIARRHOEA, COLIC AND CRAMPS DUE TO GAS, LINIMENT FOR MUSCULAR ACHES AND PAINS, COUGH SYRUP, MOUTH WASH AND GARGLE, NOSE DROPS, ANTI-PAIN OIL, BEEF IRON WINE AND MALT TONIC, VITAMIN B TONIC, VAPOR INHALANT FOR TREATMENT OF CONGESTION OF THE NASAL PASSAGES, ANTI-PAIN TABLETS, ASPIRIN, COLD TABLETS, LAXATIVE HERB TABLETS, MILK OF MAGNESIA TABLETS, MENTHOLATED OINTMENT, MUSTARD OINTMENT, SALVE FOR EXTERNAL USE, EFFERVESCENT ALKALIZER, VITAMIN A-B-D-G CAPSULES, VITAMIN A-D TABLETS, VITAMIN B COMPLEX CAPSULES, VITAMIN B COMPLEX TABLETS, HALIBUT LIVER OIL CAPSULES, MULTI-VITAMIN & MINERAL TABLETS, MULTI-VITAMIN CAPSULES, YEAST & IRON TABLETS, COSMETIC CAKE MAKE-UP, CLEANSING CREAM, COLOGNE, VANISHING CREAM, COLD CREAM, AFTER SHAVE LOTION, HAIR POMADE, HAIR TONIC, FACE & HAND LOTION, LIPSTICK AND ROUGE, ROSE POMADE, COCOANUT OIL SHAMPOO, PLANT INSECT SPRAY, MOTH PROOFING SOLUTION, CALF SCOUR CAPSULES, PREPARATION FOR TREATMENT OF DISEASES IN POULTRY IN THE FORM OF TABLETS, PREPARATION FOR THE TREATMENT OF COLIC AND BLOAT, LICE POWDER, MINERALIZED STOCK TONIC, AND LAXATIVE SYRUPS.

Claims use since Oct. 15, 1940.

Ser. No. 523,418. THE PERFEX COMPANY, Shenandoah, Iowa. Filed Dec. 18, 1947.

GlossTex

Without waiver of applicant's common-law right, no claim is made to the word "Gloss" apart from the mark as shown.

FOR LAUNDRY STARCH.

Claims use since Jan. 6, 1947.

Ser. No. 536,207. WYETH INCORPORATED, Philadelphia, Pa. Filed Nov. 20, 1947. Under section 2f of the act of 1946.

Applicant claims ownership of registrations Nos. 68,110, 104,497, and 319,304.

FOR CHEMICAL, MEDICINAL, PHARMACEUTICAL, MYCOLOGICAL, BIOLOGICAL, NUTRITIONAL AND COSMETIC PRODUCTS—NAMELY, ALLERGENS; ALUMINA GELS—NAMELY, PLAIN, WITH MAGNESIUM TRISILICATE, WITH LIQUID PETROLATUM, FOR DENTAL PURPOSES, ALUMINUM PHOSPHATE; AMBOCEPTORS; ANTIBIOTICS—NAMELY, PENICILLIN, STREPTOMYCIN, TYROTHRICIN; ANTIGENS—NAMELY, DUCREY, FREI; ANTISERA—NAMELY, B. TULARENSE; ANTITOXINS—NAMELY, DIPHTHERIA, DYSENTERY, GAS GANGRENE, SCARLET FEVER, SCARLET FEVER STREPTOCOCCUS, STAPHYLOCOCCUS, TETANUS, TETANUS GAS GANGRENE; BACTERINS—NAMELY, CATARRHALIS VACCINE; CAPSULES AND GLOBULES CONTAINING APIOL AND ERGOTIN COMPOUND, ASPIRIN, ASPIRIN COMPOUND, BEEF LIVER WITH IRON, PRO-VITAMIN A, PRO-VITAMIN A WITH VITAMIN D, COLCHICINE METHYL SALICYLATE, CYSTINE, CALCIUM PHOSPHATE COMPOUND WITH VIOSTEROL, DIGITALIS, EPHEDRINE SULFATE, PENTOBARBITAL, QUININE SULFATE, SALOL CUBEB AND COPAIBA, SALOL CUBEB AND SANTAL, SANTOL OIL, VITAMINS A, B, B-COMPLEX, D; CITRATED SHEEP BLOOD; COLD CREAM; CORDIALS—NAMELY, BUCHU; DIAGNOSTICS—NAMELY, STAINS; ELIXIRS—NAMELY, AMINOPYRINE AND POTASSIUM BROMIDE COMPOUND AROMATIC, B-COMPLEX, YEAST CONCENTRATE, VITAMIN B-1 AND B-2, JUNIPER AND POTASSIUM ACETATE, CALISAYA, CALISAYA WITH IRON AND STRYCHNINE, CATNEP AND FENNEL, SYNTHETIC WILD CHERRY, CHOLINE CHLORIDE, DIGESTIVE FERMENTS, CREOSOTE AND TERPIN HYDRATE, DIURETIC, FIVE BROMIDES, GENTIAN GLYCERINATED, GLYCERO PHOSPHATES WITH SODA AND LIME HYDRASTINE AND CRAMP BARK, PEPSIN, PHENOBARBITAL, RHUBARB, SIX GLYCEROPHOSPHATE, SAW PALMETTO AND SANTAL, SODIUM SULFOCYANATE, TERPIN HYDRATE, TERPIN HYDRATE AND CODEINE, TERPIN HYDRATE CODEINE AND WILD CHERRY, THIAMINE HYDROCHLORIDE, THIAMINE CHLORIDE, STRONTIUM SALICYLATE, THREE BROMIDES; FLUID EXTRACTS—NAMELY, ARNICA, BELLADONNA LEAF, BLACK COHOSH, BUCHU, CASCARA SAGRADA, CIMICIFUGA, COLCHICUM, COTTON ROOT BARK, ERGOT, EUPHORBIAPILULIFERA, FRANGULA, GENTIAN, LICORICE, GRINDELIA, HOPS, HYDRASTIS, HYOSCYAMUS, IMITATION VANILLA, IPECAC, LICORICE ROOT, MALT, NUX VOMICA,

ORANGE AROMATIC, ORANGE PEEL, ROOT BEER, RHUBARB, SARSAPARILLA, SENEGA, SENNA, DANDELION ROOT, SQUILL, VALERIAN; GLOBULINS—NAMELY, IMMUNE (HUMAN PLACENTAL ORIGIN), IMMUNE (HUMAN SERUM ORIGIN); HORMONES—NAMELY, CONJUGATED ESTROGENS (EQUINE), CORPUS LUTEUM, DIETHYLSTILBESTROL, ESTROGENS, ANTERIOR PITUITARY, POSTERIOR PITUITARY; INJECTIONS—NAMELY, CAFFEINE AND SODIUM BENZOATE, DEXTROSE, DIETHYLSTILBESTROL, EPINEPHRINE HYDROCHLORIDE, ERGONOVINE MALEATE, GUINEA PIG COMPLEMENT, LIVER, ANTERIOR PITUITARY, POSTERIOR PITUITARY, B-COMPLEX, PYRIDOXINE, HYDROCHLORIDE, SODIUM CITRATE, SODIUM IODIDE, SODIUM SALICYLATE AND IODIDE, VITAMIN B; JELLIES, ASEPTIC; LABORATORY REAGENTS—NAMELY, AGAR-AGAR CULTURE MEDIA; LAXATIVES—NAMELY, CASCARA, CASCARA SAGRADA, KAOLIN IN ALUMINA GEL WITH MINERAL OIL, KARAYA GUM WITH CALCIUM GLUCONATE AND LACTOSE, MINERAL OIL, AQUEOUS SUSPENSIONS, PLAIN, WITH MILK OF MAGNESIA, WITH CASCARA, WITH PHENOLPHTHALEIN; LINIMENTS—NAMELY, CAMPHORATED OIL, CAMPHORATED AMMONIUM OLEATE, CAMPHOR AND SOAP, CHLOROFORM; LOTIONS, MEDICINAL—NAMELY, AMMONIATED MERCURY WITH KAOLIN, PEDICULOSIS, EYE, KAOLIN AND ALUMINA; LIQUIDS—NAMELY, PRO-VITAMIN A WITH VITAMIN D, PRO-VITAMIN A IN OIL, PRO-VITAMIN A WITH VITAMIN D IN OIL, LICORICE, DISTILLED WATER; LOZENGES—NAMELY, BROWN COMPOUND WITH AMMONIUM CHLORIDE, BROWN COMPOUND WITH OPIUM AND AMMONIUM CHLORIDE, RED GUM; MAGMAS OF BISMUTH, MAGNESIA, ALUMINA; MEDIA—NAMELY, DEXTROSE AGAR-AGAR, DEXTROSE BOUILLON, GLYCERINE AGAR-AGAR; MIXTURES—NAMELY, BROWN COMPOUND OF OPIUM AND BLACK GLYCYRRHIZA, RHUBARB AND SODA; OILS—NAMELY, COD LIVER, CASTOR, LIQUID PETROLATUM; OINTMENTS—NAMELY, ACETYL, BETA-METHYL CHOLINE, ALOES AND CALAMINE, ANALGESIC BALM, BELLADONNA AND EPHEDRINE COMPOUND, BELLADONNA, BLUE, BORIC ACID, HYDRATED ALUMINA COMPOUND, SULPHUR AND AMMONIATED MERCURY, ICHTHAMMOL, MERCURIC OXIDE, MUSTARD MENTHOL, EPHEDRINE AND BENZOCAINE, ASTRINGENT, PROPIONATE COMPOUND, SULFATHIAZOLE, SULFUR, BENZOIC AND SALICYLIC ACID, ZINC OXIDE; OPHTHALMIC PREPARATIONS—NAMELY, BORIC ACID OINTMENT, HOMATROPINE HYDROBROMIDE, MERCURIC OXIDE OINTMENT, SULFATHIAZOLE OINTMENT; PEDICULICIDES; PLASMAS; POWDERED EXTRACTS—NAMELY, ALOIN, BELLADONNA LEAVES, CASCARA SAGRADA, COLOCYNTH, ERGOT, ERGOTIN, HYOSCYAMUS, OPIUM; POWDERS—NAMELY, SILVER PICRATE, FIRST AID, SULFATHIAZOLE; SALTS—NAMELY, KISSINGEN, LITHIUM CITRATE, VICHY ARTIFICIAL, CASCARA AND NUX VOMICA COMPOUND; SERA—NAMELY, ANTI M TYPING, ANTIMENINGOCOCCIC POLYVALENT, ANTI N TYPING, ANTIPERTUSSIS, ANTIPNEUMOCOCCIC, ANTI RH TYPING, ANTI ROCKY MOUNTAIN SPOTTED FEVER, BLOOD GROUPING, LOEFFLER'S BLOOD, MENINGOCOCCUS TYPING, NORMAL HORSE, PNEUMOCOCCUS TYPING; SOLUTIONS—NAMELY, ALKALINE AROMATIC, AMMONIUM ACETATE, ANTISEPTIC, BUFFERED SALINE, CRESOL, EPHEDRINE SULFATE, ERGOT, GLYCERITE OF BOROGLYCERIN, HYDRIODIC ACID, IRON IODIDE, IRON AND MANGANESE, METHYLENE BLUE, RENNET, SILVER NITRATE, SODIUM PHOSPHATE, PROPIONATE COMPOUND, TOLU; SPIRITS—NAMELY, AROMATIC AMMONIA, CAMPHOR, ETHYL NITRITE, PEPPERMINT; SPRAYS—NAMELY, MINERAL OIL, MINERAL OIL WITH EPHEDRINE; SUPPOSITORIES—NAMELY, AMINOPHYLLINE, DIGITALIS, GLYCERINE, HEMORRHOIDAL, SILVER PICRATE, AMMONIUM ICHTHOSULFONATE, MORPHINE SULFATE, OPIUM, OPIUM AND BELLADONNA, QUININE SULFATE, LEAD AND CREOSOTE, ACETANILID, BORATES AND HYDRASTINE, BOROGLYCERIDE, GELATIN, ICHTHAMMOL, PICRIC ACID; SYRUPS—NAMELY, ALTHEA, SQUILL AND COLTSFOOT COMPOUND WITH CODEINE SALICYLATE, AMMONIUM MANDELATE, CHERRY, CODEINE PHOSPHATE, HYPOPHOSPHITES, SQUILL, TOLU, VITAMIN B, WHITE PINE AND WILD CHERRY, WHITE PINE, WILD CHERRY AND TAR, WHITE PINE, WILD CHERRY; TABLETS—NAMELY, OF ACETANILID AND CAFFEINE COMPOUND, ACETANILID, CAFFEINE AND SODA, ACETOPHENETIDIN, ACETOPHENETIDIN AND SALOL, ACETYLSALICYLIC ACID, ALKALINE AROMATIC COMPOUND, ALOIN, BELLADONNA, STRYCHNINE AND CASCARA, ALUMINA, HYDRATED, AMINOPHYLLINE, AMINOPHYLLINE AND PHENOBARBITAL, AMINOPYRINE, AMMONIUM CHLORIDE, ANTACID COMPOUND, APOMORPHINE HYDROCHLORIDE, ASCORBIC ACID, ASPETIDA, ASPIRIN, ASPIRIN COMPOUND, ATROPINE SULFATE, BARBITAL, BILE SALTS, BISMUTH, MAGNESIA AND SODIUM BICARBONATE, BISMUTH SUBCARBONATE, BISMUTH SUBGALLATE, BISMUTH SUBNITRATE, BLAND COMPOUND, BREWERS' YEAST, BUCHU, ANTROPINE COMPOUND, CAFFEINE AND SODIUM BENZOATE, CALCIUM GLUCONATE, CALCIUM LACTATE, CALOMEL RHUBARB, CALOMEL RHUBARD AND COLOCYNTH, BROMDIETHYLACETYLUREA, CASCARA WITH STRYCHNINE, CASCARA SAGRADA, COCAINE HYDROCHLORIDE, CODEINE PHOSPHATE, CODEINE SULFATE, CORROSIVE SUBLIMATE, DIETHYLSTILBESTROL, DIGITALIS, DOBELL, ERGONOVINE MALEATE, HEXAMETHYLENAMINE, HYDRATED ALUMINA, HYOSCINEHYDRO BROMIDE, SCOPOLAMINE HYDROBROMIDE, IRON, LIME WATER, LITHIA, (2-METHYL-1,4-NAPHTHOQUINONE) METHIONINE, BICHLORIDE OF MERCURY, MERCURY CYANIDE, MORPHINE SULFATE, NIACINAMIDE, NITROGLYCERIN, PHENACETIN, PHENACETIN AND SALOL, PHENOBARBITAL, PHENOBARBITAL AND ASPIRIN, POTASSIUM CHLORATE, POTASSIUM PERMANGANATE, RHINITIS, RHUBARB AND ALOES, RINGER'S SOLUTION, SACCHARIN SOLUBLE, SODA MINT, SODIUM BICARBONATE, SODIUM BROMIDE, SODIUM CHLORIDE, SODIUM NITRITE, SODIUM SALICYLATE, STRYCHNINE SULFATE, SULFADIAZINE, SULFANILAMIDE, SULFAPYRIDINE, SULFATHIAZOLE, THEOBROMINE AND PHENOBARBITAL, THIAMINE HYDROCHLORIDE, THIAMINE CHLORIDE, MENTHOLATED WITH BENZOCAINE, THYROID, TRIPLE BROMIDES, BILE SALTS; TINCTURES—NAMELY, OF ACONITE, ARNICA, BELLADONNA, BENZOIN, BENZOIN COMPOUND, CANTHARIDES CAPSICUM, CARDAMON COMPOUND, COLCHICUM, DIGITALIS FERRIC CHLORIDE, FERRIC CITROCHLORIDE, GELSEMIUM, GENTIAN, GREEN SOAP, HYOSCYAMUS, IODINE, IRON CITROCHLORIDE, IRON CHLORIDE, LAUDANUM, LAVENDER, OPIUM, LOBELIA, MYRRH, NUX VOMICA, OPIUM CAMPHORATED, STRAMONIUM, VALERIAN, VANILLA; TONICS—NAMELY, BEEF, IRON AND WINE, BEEF LIVER WITH IRON, BEEF AND WINE, YEAST; TOXINS—NAMELY, DIPHTHERIA, SCARLET FEVER STREPTOCOCCUS, TESTING SCARLET FEVER STREPTOCOCCUS FOR IMMUNIZATION; TOXOIDS—NAMELY, DIPHTHERIA TETANUS, STAPHYLOCOCCUS, TETANUS; TRITURATES—NAMELY, CODEINE SULFATE, MORPHINE SULFATE, SACCHARIN SOLUBLE, SODIUM NITRITE, STRYCHNINE SULFATE; VACCINES—NAMELY, ACNE, ARTHRITIS, CHOLERA, DIPHTHERIA PERTUSSIS, GONOCOCCIC, INFLUENZA, PERTUSSIS ENDOTOXOID, PNEUMO-STREPTO, RABIES, ROCKY MOUNTAIN SPOTTED FEVER, SMALLPOX, STAPHYLOCOCCUS, STAPHYLO-STREPTO, TYPHOID, TYPHOID PARA TYPHOID, UNDULANT FEVER; VITAMINS—NAMELY, ASCORBIC ACID, B-COMPLEX, NIACINAMIDE, VITAMIN B_1 HYDROCHLORIDE, RIBOFLAVIN, B-MULTIPLE; AND WAFERS—NAMELY, CALCIUM PHOSPHATE COMPOUND WITH VIOSTEROL.

Claims use since Feb. 16, 1945.

Ser. No. 537,220. NATIONAL PACKAGE DRUGS, INC., St. Louis, Mo. Filed Oct. 8, 1947.

DRUGMASTER

FOR RUBBING ALCOHOL COMPOUND, VITAMIN B1, SYRUP OF COCILLANA, MINERAL OIL, ASPIRIN, HAIR TONIC, AFTER SHAVE LOTION, WAVE SET AND EPSOM SALTS.

Claims use since Feb. 15, 1941.

Ser. No. 538,016. ELI LILLY AND COMPANY, Indianapolis, Ind. Filed Oct. 16, 1947.

DOLOPHINE

FOR MEDICINAL PREPARATION OF 6-DIMETHYL AMINO 4,4 DIPHENYL 3-HEPTANONE HYDROCHLORIDE COMMONLY KNOWN AS METHADON HYDROCHLORIDE USED AS AN ANALGESIC AND AS AN ANTITUSSIVE AGENT.

Claims use since Aug. 14, 1947.

Ser. No. 542,384. WYETH INCORPORATED, Philadelphia, Pa. Filed Nov. 25, 1947. Under section 2f of the act of 1946.

Wyeth

Applicant claims ownership of registrations Nos. 68,110 and 319,304.

FOR CHEMICAL, MEDICINAL, PHARMACEUTICAL, MYCOLOGICAL, BIOLOGICAL, NUTRITIONAL AND COSMETIC PRODUCTS—NAMELY, ALLERGENS; ALUMINA GELS—NAMELY, PLAIN, WITH MAGNESIUM TRISILICATE, WITH LIQUID PETROLATUM, FOR DENTAL PURPOSES, ALUMINUM PHOSPHATE; AMBOCEPTORS; ANTIBIOTICS—NAMELY, PENICILLIN, STREPTOMYCIN, TYROTHRICIN; ANTIGENS—NAMELY, DUCREY, FREI; ANTISERA—NAMELY, B. TULARENSE; ANTITOXINS—NAMELY, DIPHTHERIA, DYSENTERY, GAS GANGRENE, SCARLET FEVER, SCARLET FEVER STREPTOCOCCUS, STAPHYLOCOCCUS, TETANUS, TETANUS GAS GANGRENE; BACTERINS—NAMELY, CATARRHALIS VACCINE; CAPSULES AND GLOBULES CONTAINING APIOL AND ERGOTIN COMPOUND, ASPIRIN, ASPIRIN COMPOUND, BEEF LIVER WITH IRON, PRO-VITAMIN A, PRO-VITAMIN A WITH VITAMIN D, COLCHICINE METHYL SALICYLATE, CYSTINE, CALCIUM PHOSPHATE COMPOUND WITH VIOSTEROL, DIGITALIS, EPHEDRINE SULFATE, PENTOBARBITAL, QUININE SULFATE, SALOL CUBEB AND COPAIBA, SALOL CUBEB AND SANTAL, SANTOL OIL, VITAMINS A, B, B-COMPLEX, D; CITRATED SHEEP BLOOD; COLD CREAM; CORDIALS—NAMELY, BUCHU; DIAGNOSTICS—NAMELY, STAINS; ELIXIRS—NAMELY, AMINOPYRINE AND POTASSIUM BROMIDE COMPOUND AROMATIC, B-COMPLEX, YEAST CONCENTRATE, VITAMIN B-1 AND B-2, JUNIPER AND POTASSIUM ACETATE, CALISAYA, CALISAYA WITH IRON AND STRYCHNINE, CATNEP AND FENNEL, SYNTHETIC WILD CHERRY, CHOLINE CHLORIDE, DIGESTIVE FERMENTS, CREOSOTE AND TERPIN HYDRATE, DIURETIC, FIVE BROMIDES, GENTIAN GLYCERINATED, GLYCERO PHOSPHATES WITH SODA AND LIME, HYDRASTINE AND CRAMP BARK, PEPSIN, PHENOBARBITAL, RHUBARB, SIX GLYCEROPHOSPHATE, SAW PALMETTO AND SANTAL, SODIUM SULFOCYANATE, TERPIN HYDRATE, TERPIN HYDRATE AND CODEINE, TERPIN HYDRATE CODEINE AND WILD CHERRY, THIAMINE HYDROCHLORIDE, THIAMINE CHLORIDE, STRONTIUM SALICYLATE, THREE BROMIDES; FLUID EXTRACTS—NAMELY, ARNICA, BELLADONNA LEAF, BLACK COHOSH, BUCHU, CASCARA SAGRADA, CIMICIFUGA, COLCHICUM, COTTON ROOT BARK, ERGOT, EUPHORBIAPILULIFERA, FRANGULA, GENTIAN, LICORICE, GRINDELIA, HOPS, HYDRASTIS, HYOSCYAMUS, IMITATION VANILLA, IPECAC, LICORICE ROOT, MALT, NUX VOMICA, ORANGE AROMATIC, ORANGE PEEL, ROOT BEER, RHUBARB, SARSAPARILLA, SENEGA, SENNA, DANDELION ROOT, SQUILL, VALERIAN; GLOBULINS—NAMELY, IMMUNE (HUMAN PLACENTAL ORIGIN), IMMUNE (HUMAN SERUM ORIGIN); HORMONES—NAMELY, CONJUGATED ESTROGENS (EQUINE), CORPUS LUTEUM, DIETHYLSTILBESTROL, ESTROGENS, ANTERIOR PITUITARY, POSTERIOR PITUITARY; INJECTIONS—NAMELY, CAFFEINE AND SODIUM BENZOATE, DEXTROSE, DIETHYLSTILBESTROL, EPINEPHRINE HYDROCHLORIDE, ERGONOVINE MALEATE, GUINEA PIG COMPLEMENT, LIVER, ANTERIOR PITUITARY, POSTERIOR PITUITARY, B-COMPLEX, PYRIDOXINE, HYDROCHLORIDE, SODIUM CITRATE, SODIUM IODIDE, SODIUM SALICYLATE AND IODIDE, VITAMIN B; JELLIES, ASEPTIC; LABORATORY REAGENTS—NAMELY, AGAR-AGAR CULTURE MEDIA; LAXATIVES—NAMELY, CASCARA, CASCARA SAGRADA, KAOLIN IN ALUMINA GEL WITH MINERAL OIL, KARAYA GUM WITH CALCIUM GLUCONATE AND LACTOSE, MINERAL OIL, AQUEOUS SUSPENSIONS, PLAIN, WITH MILK OF MAGNESIA, WITH CASCARA, WITH PHENOLPHTHALEIN; LINIMENTS—NAMELY, CAMPHORATED OIL, CAMPHORATED AMMONIUM OLEATE, CAMPHOR AND SOAP, CHLOROFORM; LOTIONS, MEDICINAL—NAMELY, AMMONIATED MERCURY WITH KAOLIN, PEDICULOSIS, EYE, KAOLIN AND ALUMINA; LIQUIDS—NAMELY, PRO-VITAMIN A WITH VITAMIN D, PRO-VITAMIN A IN OIL, PRO-VITAMIN A WITH VITAMIN D IN OIL, LICORICE, DISTILLED WATER; LOZENGES—NAMELY, BROWN COMPOUND WITH AMMONIUM CHLORIDE, BROWN COMPOUND WITH OPIUM AND AMMONIUM CHLORIDE, RED GUM; MAGMAS OF BISMUTH, MAGNESIA, ALUMINA; MEDIA—NAMELY, DEXTROSE AGAR-AGAR, DEXTROSE BOUILLON, GLYCERINE AGAR-AGAR; MIXTURES—NAMELY, BROWN COMPOUND OF OPIUM AND BLACK GLYCYRRHIZA, RHUBARB AND SODA; OILS—NAMELY, COD LIVER, CASTOR, LIQUID PETROLATUM; OINTMENTS—NAMELY, ACETYL, BETA-METHYL CHOLINE, ALOES AND CALAMINE, ANALGESIC BALM, BELLADONNA AND EPHEDRINE COMPOUND, BELLADONNA, BLUE, BORIC ACID, HYDRATED ALUMINA COMPOUND, SULPHUR AND AMMONIATED MERCURY, ICHTHAMMOL, MERCURIC OXIDE, MUSTARD MENTHOL, EPHEDRINE AND BENZOCAINE, ASTRINGENT, PROPIONATE COMPOUND, SULFATHIAZOLE, SULFUR, BENZOIC AND SALICYLIC ACID, ZINC OXIDE; OPHTHALMIC PREPARATIONS—NAMELY, BORIC ACID OINTMENT, HOMATROPINE HYDROBROMIDE, MERCURIC OXIDE OINTMENT, SULFATHIAZOLE OINTMENT; PEDICULICIDES; PLASMAS; POWDERED

EXTRACTS — NAMELY, ALOIN, BELLADONNA LEAVES, CASCARA SAGRADA, COLOCYNTH, ERGOT, ERGOTIN, HYOSCYAMUS, OPIUM; POWDERS—NAMELY, SILVER PICRATE, FIRST AID, SULFATHIAZOLE; SALTS—NAMELY, KISSINGEN, LITHIUM CITRATE, VICHY ARTIFICIAL, CASCARA AND NUX VOMICA COMPOUND; SERA—NAMELY, ANTI M TYPING, ANTIMENINGOCOCCIC POLYVALENT, ANTI N TYPING, ANTIPERTUSSIS, ANTIPNEUMOCOCCIC, ANTI RH TYPING, ANTI ROCKY MOUNTAIN SPOTTED FEVER, BLOOD GROUPING, LOEFFLER'S BLOOD, MENINGOCOCCUS TYPING, NORMAL HORSE, PNEUMOCOCCUS TYPING; SOLUTIONS—NAMELY, ALKALINE AROMATIC, AMMONIUM ACETATE, ANTISEPTIC, BUFFERED SALINE, CRESOL, EPHEDRINE SULFATE, ERGOT, GLYCERITE OF BOROGLYCERIN, HYDRIODIC ACID, IRON IODIDE, IRON AND MANGANESE, METHYLENE BLUE, RENNET, SILVER NITRATE, SODIUM PHOSPHATE, PROPIONATE COMPOUND, TOLU; SPIRITS — NAMELY, AROMATIC AMMONIA, CAMPHOR, ETHYL NITRITE, PEPPERMINT; SPARYS—NAMELY, MINERAL OIL, MINERAL OIL WITH EPHEDRINE; SUPPOSITORIES—NAMELY, AMINOPHYLLINE, DIGITALIS, GLYCERINE, HEMORRHOIDAL, SILVER PICRATE, AMMONIUM ICHTHOSULFONATE, MORPHINE SULFATE, OPIUM, OPIUM AND BELLADONNA, QUININE SULFATE, LEAD AND CREOSOTE, ACETANILID, BORATES AND HYDRASTINE, BOROGLYCERIDE, GELATIN, ICHTHAMMOL, PICRIC ACID; SYRUPS—NAMELY, ALTHEA, SQUILL AND COLTSFOOT COMPOUND WITH CODEINE SALICYLATE, AMMONIUM MANDELATE, CHERRY, CODEINE PHOSPHATE, HYPOPHOSPHITES, SQUILL, TOLU, VITAMIN B, WHITE PINE AND WILD CHERRY, WHITE PINE, WILD CHERRY AND TAR, WHITE PINE, WILD CHERRY; TABLETS—NAMELY, OF ACETANILID AND CAFFEINE COMPOUND, ACETANILID, CAFFEINE AND SODA, ACETOPHENETIDIN, ACETOPHENETIDIN AND SALOL, ACETYLSALICYLIC ACID, ALKALINE AROMATIC COMPOUND, ALOIN, BELLADONNA, STRYCHNINE AND CASCARA, ALUMINA, HYDRATED, AMINOPHYLLINE, AMINOPHYLLINE AND PHENOBARBITAL, AMINOPYRINE, AMMONIUM CHLORIDE, ANTACID COMPOUND, APOMORPHINE HYDROCHLORIDE, ASCROBIC ACID, ASFETIDA, ASPIRIN, ASPIRIN COMPOUND, ATROPINE SULFATE, BARBITAL, BILE SALTS, BISMUTH, MAGNESIA AND SODIUM BICARBONATE, BISMUTH SUBCARBONATE, BISMUTH SUBGALLATE, BISMUTH SUBNITRATE, BLAND COMPOUND, BREWERS' YEAST, BUCHU, ANTROPINE COMPOUND, CAFFEINE AND SODIUM BENZOATE, CALCIUM GLUCONATE, CALCIUM LACTATE, CALOMEL RHUBARB, CALOMEL RHUBARB AND COLOCYNTH, BROMDIETHYLACETYLUREA, CASCARA WITH STRYCHNINE, CASCARA SAGRADA, COCAINE HYDROCHLORIDE, CODEINE PHOSPHATE, CODEINE SULFATE, CORROSIVE SUBLIMATE, DIETHYLSTILBESTROL, DIGITALIS, DOBELL, ERGONOVINE MALEATE, HEXAMETHYLENAMINE, HYDRATED ALUMINA, HYOSCINEHYDRO BROMIDE, SCOPOLAMINE HYDROBROMIDE, IRON, LIME WATER, LITHIA, (2-METHYL-1,4-NAPHTHOQUINONE), METHIONINE, BICHLORIDE OF MERCURY, MERCURY CYANIDE, MORPHINE SULFATE, NIACINAMIDE, NITROGLYCERIN, PHENACETIN, PHENACETIN AND SALOL, PHENOBARBITAL, PHENOBARBITAL AND ASPIRIN, POTASSIUM CHLORATE, POTASSIUM PERMANGANATE, RHINITIS, RHUBARB AND ALOES, RINGER'S SOLUTION, SACCHARIN SOLUBLE, SODA MINT, SODIUM BICARBONATE, SODIUM BROMIDE, SODIUM CHLORIDE, SODIUM NITRITE, SODIUM SALICYLATE, STRYCHNINE SULFATE, SULFADIAZINE, SULFANILAMIDE, SULFAPYRIDINE, SULFATHIAZOLE, THEOBROMINE AND PHENOBARBITAL, THIAMINE HYDROCHLORIDE, THIAMINE CHLORIDE, MENTHOLATED WITH BENZOCAINE, THYROID, TRIPLE BROMIDES, BILE SALTS; TINCTURES — NAMELY, OF ACONITE, ARNICA, BELLADONNA, BENZOIN, BENZOIN COMPOUND, CANTHARIDES CAPSICUM, CARDAMON COMPOUND, COLCHICUM, DIGITALIS FERRIC CHLORIDE, FERRIC CITROCHLORIDE, GELSEMIUM, GENTIAN, GREEN SOAP, HYOSCYAMUS, IODINE, IRON CITROCHLORIDE, IRON CHLORIDE, LAUDANUM, LAVENDER, OPIUM, LOBELIA, MYRRH, NUX VOMICA, OPIUM CAMPHORATED, STRAMONIUM, VALERIAN, VANILLA; TONICS—NAMELY, BEEF, IRON AND WINE, BEEF LIVER WITH IRON, BEEF AND WINE, YEAST; TOXINS—NAMELY, DIPHTHERIA, SCARLET FEVER STREPTOCOCCUS, TESTING SCARLET FEVER STREPTOCOCCUS FOR IMMUNIZATION; TOXOIDS—NAMELY, DIPHTHERIA TETANUS, STAPHYLOCOCCUS, TETANUS; TRITURATES—NAMELY, CODEINE SULFATE, MORPHINE SULFATE, SACCHARIN SOLUBLE, SODIUM NITRITE, STRYCHNINE SULFATE; VACCINES—NAMELY, ACNE, ARTHRITIS, CHOLERA, DIPHTHERIA PERTUSSIS, GONOCOCCIC, INFLUENZA, PERTUSSIS ENDOTOXOID, PNEUMO-STREPTO, RABIES, ROCKY MOUNTAIN SPOTTED FEVER, SMALLPOX, STAPHYLOCOCCUS, STAPHYLO-STREPTO, TYPHOID, TYPHOID PARA TYPHOID, UNDULANT FEVER; VITAMINS—NAMELY, ASCORBIC ACID, B-COMPLEX, NIACINAMIDE, VITAMIN B_6 HYDROCHLORIDE, RIBOFLAVIN, B-MULTIPLE; AND WAFERS—NAMELY, CALCIUM PHOSPHATE COMPOUND WITH VIOSTEROL.

Claims use since Feb. 16, 1945.

Ser. No. 542,385. WYETH INCORPORATED, Philadelphia, Pa. Filed Nov. 25, 1947. Under section 2f of the act of 1946.

Wyeth

Applicant claims ownership of registrations Nos. 68,110, 104,497, and 319,304.

FOR CHEMICAL, MEDICINAL, PHARMACEUTICAL, MYCOLOGICAL, BIOLOGICAL, NUTRITIONAL AND COSMETIC PRODUCTS—NAMELY, ALLERGENS; ALUMINA GELS—NAMELY, PLAIN, WITH MAGNESIUM TRISILICATE, WITH LIQUID PETROLATUM, FOR DENTAL PURPOSES, ALUMINUM PHOSPHATE; AMBOCEPTORS; ANTIBIOTICS—NAMELY, PENICILLIN, STREPTOMYCIN, TYROTHRICIN; ANTIGENS—NAMELY, DUCREY, FREI; ANTISERA—NAMELY, B. TULARENSE; ANTITOXINS—NAMELY, DIPHTHERIA, DYSENTERY, GAS GANGRENE, SCARLET FEVER, SCARLET FEVER STREPTOCOCCUS, STAPHYLOCOCCUS, TETANUS, TETANUS GAS GANGRENE; BACTERINS—NAMELY, CATARRHALIS VACCINE; CAPSULES AND GLOBULES CONTAINING APIOL AND ERGOTIN COMPOUND, ASPIRIN, ASPIRIN COMPOUND, BEEF LIVER WITH IRON, PRO-VITAMIN A, PRO-VITAMIN A WITH VITAMIN D, COLCHICINE METHYL SALICYLATE, CYSTINE, CALCIUM PHOSPHATE COMPOUND WITH VIOSTEROL, DIGITALIS, EPHEDRINE SULFATE, PENTOBARBITAL, QUININE SULFATE, SALOL CUBEB AND COPAIBA, SALOL CUBEB AND SANTAL, SANTOL OIL, VITAMINS A, B, B-COMPLEX, D; CITRATED SHEEP BLOOD; COLD CREAM; CORDIALS—NAMELY, BUCHU; DIAGNOSTICS—NAMELY, STAINS; ELIXIRS—NAMELY, AMINOPYRINE AND POTASSIUM BROMIDE COMPOUND AROMATIC, B-COMPLEX, YEAST CONCENTRATE, VITAMIN B-1 AND B-2, JUNIPER AND POTASSIUM ACETATE, CALISAYA, CALISAYA WITH IRON AND STRYCHNINE, CATNEP AND FENNEL, SYNTHETIC WILD CHERRY, CHOLINE CHLORIDE, DIGESTIVE FERMENTS, CREOSOTE AND TERPIN HYDRATE, DIURETIC, FIVE BROMIDES, GENTIAN GLYCERINATED, GLYCERO PHOSPHATES WITH SODA AND LIME, HYDRASTINE AND CRAMP BARK, PEPSIN, PHENOBARBITAL, RHUBARB, SIX GLYCEROPHOSPHATE, SAW PALMETTO AND SANTAL, SODIUM SULFOCYANATE, TERPIN HYDRATE, TERPIN HYDRATE AND CODEINE, TERPIN HYDRATE CODEINE AND WILD CHERRY, THIAMINE HYDROCHLORIDE, THIAMINE CHLORIDE, STRONTIUM SALICYLATE, THREE BROMIDES; FLUID EXTRACTS — NAMELY, ARNICA, BELLADONNA LEAF, BLACK COHOSH, BUCHU, CASCARA SAGRADA, CIMICIFUGA, COLCHICUM, COTTON ROOT BARK, ERGOT, EUPHORBIAPILULIFERA, FRANGULA, GENTIAN, LICORICE, GRINDELIA, HOPS, HYDRASTIS, HYOSCYAMUS, IMITATION VANILLA, IPECAC, LICORICE ROOT, MALT, NUX VOMICA, ORANGE AROMATIC, ORANGE PEEL, ROOT BEER, RHUBARB, SARSAPARILLA, SENEGA, SENNA, DANDELION ROOT, SQUILL, VALERIAN; GLOBULINS—NAMELY, IMMUNE (HUMAN PLACENTAL ORIGIN), IMMUNE (HUMAN SERUM ORIGIN); HORMONES—NAMELY, CONJUGATED ESTROGENS (EQUINE), CORPUS LUTEUM, DIETHYLSTILBESTROL, ESTROGENS, ANTERIOR PITUITARY, POSTERIOR PITUITARY; INJECTIONS — NAMELY, CAFFEINE AND SODIUM BENZOATE, DEXTROSE, DIETHYLSTILBESTROL, EPINEPHRINE HYDROCHLORIDE, ERGONOVINE MALEATE, GUINEA PIG COMPLEMENT, LIVER, ANTERIOR PITUITARY, POSTERIOR PITUITARY, B-COMPLEX, PYRIDOXINE, HYDROCHLORIDE, SODIUM CITRATE, SODIUM IODIDE, SODIUM SALICYLATE AND IODIDE, VITAMIN B; JELLIES, ASEPTIC; LABORATORY REAGENTS—NAMELY, AGAR-AGAR CULTURE MEDIA; LAXATIVES—NAMELY, CASCARA, CASCARA SAGRADA, KAOLIN IN ALUMINA GEL WITH MINERAL OIL, KARAYA GUM WITH CALCIUM GLUCONATE AND LACTOSE, MINERAL OIL, AQUEOUS SUSPENSIONS, PLAIN, WITH MILK OF MAGNESIA, WITH CASCARA, WITH PHENOLPHTHALEIN; LINIMENTS—NAMELY, CAMPHORATED OIL, CAMPHORATED AMMONIUM OLEATE, CAMPHOR AND SOAP, CHLOROFORM; LOTIONS, MEDICINAL—NAMELY, AMMONIATED MERCURY WITH KAOLIN, PEDICULOSIS, EYE, KAOLIN AND ALUMINA; LIQUIDS—NAMELY, PRO-VITAMIN A WITH VITAMIN D, PRO-VITAMIN A IN OIL, PRO-VITAMIN A WITH VITAMIN D IN OIL, LICORICE, DISTILLED WATER; LOZENGES—NAMELY, BROWN COMPOUND WITH AMMONIUM CHLORIDE, BROWN COMPOUND WITH OPIUM AND AMMONIUM CHLORIDE, RED GUM; MAGMAS OF BISMUTH, MAGNESIA, ALUMINA; MEDIA—NAMELY, DEXTROSE AGAR-AGAR, DEXTROSE BOUILLON, GLYCERINE AGAR-AGAR; MIXTURES—NAMELY, BROWN COMPOUND OF OPIUM AND BLACK GLYCYRRHIZA, RHUBARB AND SODA; OILS—NAMELY, COD LIVER, CASTOR, LIQUID PETROLATUM; OINTMENTS—NAMELY, ACETYL, BETA-METHYL CHOLINE, ALOES AND CALAMINE, ANALGESIC BALM, BELLADONNA AND EPHEDRINE COMPOUND, BELLADONNA, BLUE, BORIC ACID, HYDRATED ALUMINA COMPOUND, SULPHUR AND AMMONIATED MERCURY, ICHTHAMMOL, MERCURIC OXIDE, MUSTARD MENTHOL, EPHEDRINE AND BENZOCAINE, ASTRINGENT, PROPIONATE COMPOUND, SULFATHIAZOLE, SULFUR, BENZOIC AND SALICYLIC ACID, ZINC OXIDE; OPHTHALMIC PREPARATIONS—NAMELY, BORIC ACID OINTMENT, HOMATROPINE HYDROBROMIDE, MERCURIC OXIDE OINTMENT, SULFATHIAZOLE OINTMENT; PEDICULICIDES; PLASMAS; POWDERED EXTRACTS — NAMELY, ALOIN, BELLADONNA LEAVES, CASCARA SAGRADA, COLOCYNTH, ERGOT, ERGOTIN, HYOSCYAMUS, OPIUM; POWDERS—NAMELY, SILVER PICRATE, FIRST AID, SULFATHIAZOLE; SALTS—NAMELY, KISSINGEN, LITHIUM CITRATE, VICHY ARTIFICIAL, CASCARA AND NUX VOMICA COMPOUND; SERA—NAMELY, ANTI M TYPING, ANTIMENINGOCOCCIC POLYVALENT, ANTI N TYPING, ANTIPERTUSSIS, ANTIPNEUMOCOCCIC, ANTI RH TYPING, ANTI ROCKY MOUNTAIN SPOTTED FEVER, BLOOD GROUPING, LOEFFLER'S BLOOD, MENINGOCOCCUS TYPING, NORMAL HORSE, PNEUMOCOCCUS TYPING; SOLUTIONS—NAMELY, ALKALINE AROMATIC, AMMONIUM ACETATE, ANTISEPTIC, BUFFERED SALINE, CRESOL, EPHEDRINE SULFATE, ERGOT, GLYCERITE OF BOROGLYCERIN, HYDRIODIC ACID, IRON IODIDE, IRON AND MANGANESE, METHYLENE BLUE, RENNET, SILVER NITRATE, SODIUM PHOSPHATE, PROPIONATE COMPOUND, TOLU; SPIRITS — NAMELY, AROMATIC AMMONIA, CAMPHOR, ETHYL NITRITE, PEPPERMINE; SPRAYS—NAMELY, MINERAL OIL, MINERAL OIL WITH EPHEDRINE; SUPPOSITORIES—NAMELY, AMINOPHYLLINE, DIGITALIS, GLYCERINE, HEMORRHOIDAL, SILVER PICRATE, AMMONIUM ICHTHOSULFONATE, MORPHINE SULFATE, OPIUM, OPIUM AND BELLADONNA, QUININE SULFATE, LEAD AND CREOSOTE, ACETANILID, BORATES AND HYDRASTINE, BOROGLYCERIDE, GELATIN, ICHTHAMMOL, PICRIC ACID; SYRUPS—NAMELY, ALTHEA, SQUILL AND COLTSFOOT COMPOUND WITH CODEINE SALICYLATE, AMMONIUM MANDELATE, CHERRY, CODEINE PHOSPHATE, HYPOPHOSPHITES, SQUILL, TOLU, VITAMIN B, WHITE PINE AND WILD CHERRY, WHITE PINE, WILD CHERRY AND TAR, WHITE PINE, WILD CHERRY; TABLETS—NAMELY, OF ACETANILID AND CAFFEINE COMPOUND, ACETANILID, CAFFEINE AND SODA, ACETOPHENETIDIN, ACETOPHENETIDIN AND SALOL, ACETYLSALICYLIC ACID, ALKALINE AROMATIC COMPOUND, ALOIN, BELLADONNA, STRYCHNINE AND CASCARA, ALUMINA, HYDRATED, AMINOPHYLLINE, AMINOPHYLLINE AND PHENOBARBITAL, AMINOPYRINE, AMMONIUM CHLORIDE, ANTACID COMPOUND, APOMORPHINE HYDROCHLORIDE, ASCORBIC ACID, ASFETIDA, ASPIRIN, ASPIRIN COMPOUND, ATROPINE SULFATE, BARBITAL, BILE SALTS, BISMUTH, MAGNESIA AND SODIUM BICARBONATE, BISMUTH SUBCARBONATE, BISMUTH SUBGALLATE, BISMUTH SUBNITRATE, BLAND COMPOUND, BREWERS' YEAST, BUCHU, ANTROPINE COMPOUND, CAFFEINE AND SODIUM BENZOATE, CALCIUM GLUCONATE, CALCIUM LACTATE, CALOMEL RHUBARB, CALOMEL RHUBARB AND COLOCYNTH, BROMDIETHYLACETYLUREA, CASCARA WITH STRYCHNINE, CASCARA SAGRADA, COCAINE HYDROCHLORIDE, CODEINE PHOSPHATE, CODEINE SULFATE, CORROSIVE SUBLIMATE, DIETHYLSTILBESTROL, DIGITALIS, DOBELL, ERGONOVINE MALEATE, HEXAMETHYLENAMINE, HYDRATED ALUMINA, HYOSCINEHYDRO BROMIDE, SCOPOLAMINE HYDROBROMIDE, IRON, LIME WATER, LITHIA, (2-METHYL-1,4-NAPHTHOQUINONE), METHIONINE, BICHLORIDE OF MERCURY, MERCURY CYANIDE, MORPHINE SULFATE, NIACINAMIDE, NITROGLYCERIN, PHENACETIN, PHENACETIN AND SALOL, PHENOBARBITAL, PHENOBARBITAL AND ASPIRIN, POTASSIUM CHLORATE, POTASSIUM PERMANGANATE, RHINITIS, RHUBARB AND ALOES, RINGER'S SOLUTION, SACCHARIN SOLUBLE, SODA MINT, SODIUM BICARBONATE, SODIUM BROMIDE, SODIUM CHLORIDE, SODIUM NITRITE, SODIUM SALICYLATE, STRYCHNINE SULFATE, SULFADIAZINE, SULFANILAMIDE, SULFAPYRIDINE, SULFATHIAZOLE, THEOBROMINE AND PHENOBARBITAL, THIAMINE HYDROCHLORIDE, THIAMINE CHLORIDE, MENTHOLATED WITH BENZOCAINE, THYROID, TRIPLE BROMIDES, BILE SALTS; TINCTURES — NAMELY, OF ACONITE, ARNICA, BELLADONNA, BENZOIN, BENZOIN COMPOUND, CANTHARIDES CAPSICUM, CARDAMON COMPOUND, COLCHICUM, DIGITALIS, FERRIC CHLORIDE, FERRIC CITROCHLORIDE, GELSEMIUM, GENTIAN,

GREEN SOAP, HYOSCYAMUS, IODINE, IRON CITRO-CHLORIDE, IRON CHLORIDE, LAUDANUM, LAVENDER, OPIUM, LOBELIA, MYRRH, NUX VOMICA, OPIUM CAMPHORATED, STRAMONIUM, VALERIAN, VANILLA; TONICS—NAMELY, BEEF, IRON AND WINE, BEEF LIVER WITH IRON, BEEF AND WINE, YEAST; TOXINS—NAMELY, DIPHTHERIA, SCARLET FEVER STREPTOCOCCUS, TESTING SCARLET FEVER STREPTOCOCCUS FOR IMMUNIZATION; TOXOIDS—NAMELY, DIPHTHERIA TETANUS, STAPHYLOCOCCUS, TETANUS; TRITURATES—NAMELY, CODEINE SULFATE, MORPHINE SULFATE, SACCHARIN SOLUBLE, SODIUM NITRITE, STRYCHNINE SULFATE; VACCINES—NAMELY, ACNE, ARTHRITIS, CHOLERA, DIPHTHERIA PERTUSSIS, GONOCOCCIC, INFLUENZA, PERTUSSIS ENDOTOXOID, PNEUMO-STREPTO, RABIES, ROCKY MOUNTAIN SPOTTED FEVER, SMALLPOX, STAPHYLOCOCCUS, STAPHYLO-STREPTO, TYPHOID, TYPHOID PARA TYPHOID, UNDULANT FEVER; VITAMINS—NAMELY, ASCORBIC ACID, B-COMPLEX, NIACINAMIDE, VITAMIN B_1 HYDROCHLORIDE, RIBOFLAVIN, B-MULTIPLE; AND WAFERS—NAMELY, CALCIUM PHOSPHATE COMPOUND WITH VIOSTEROL.
Claims use since Feb. 16, 1945.

Ser. No. 543,701. RALPH I. GUY, doing business as The Rig Company, Glendale, Calif. Filed Dec. 8, 1947.

AS 2

FOR IODINE PREPARATION.
Claims use since Jan. 10, 1936.

Ser. No. 549,358. WESTERN CHEMICAL COMPANY, Kansas City, Mo. Filed Nov. 14, 1947.

PLUMB KLEEN

The word "Kleen" is disclaimed apart from the mark.
Applicant claims ownership of registration No. 187,622.
FOR SOLVENT FOR CLEANING DRAIN PIPES, PLUMBING, OIL BURNERS, RADIATORS, ETC.
Claims use since Nov. 25, 1922.

Ser. No. 557,120. WILLIAM C. DABNEY, JR., doing business as Dabney Pharmacal Company, Louisville, Ky. Filed May 15, 1948.

UNDEX

FOR FUNGICIDAL OINTMENT AND FUNGICIDAL POWDER.
Claims use since Apr. 27, 1948.

Ser. No. 557,277. THE HARROWER LABORATORY, INC., Glendale, Calif. Filed May 18, 1948.

Plestrin

Applicant claims ownership of registration Nos. 500,143 and 233,746.
FOR SOLUTION WHICH IS AN ESTRUS STIMULATING PRINCIPLE DERIVED FROM THE PLACENTA AND USED AS AN OVARIAN AND SEX STIMULANT.
Claims use since May 2, 1927.

Ser. No. 557,335. THE ARLINGTON CHEMICAL COMPANY, Yonkers, N. Y. Filed May 19, 1948.

CAMINOIDS

FOR PHARMACEUTICAL PREPARATION OF AMINO ACIDS AND POLYPEPTIDES FROM HYDROLYSED PROTEIN FOODS.
Claims use since Apr. 26, 1948.

Ser. No. 557,697. STANDARD OIL COMPANY OF CALIFORNIA, Wilmington, Del., and San Francisco, Calif. Filed May 24, 1948.

CALOL

Applicant claims ownership of registration Nos. 108,183, 275,589, 306,326, 309,873, and 275,576.
FOR LIQUID PETROLATUM, ALSO KNOWN AS WHITE OIL.
Claims use since Apr. 6, 1948.

Ser. No. 557,878. WALLERSTEIN COMPANY, INC., New York, N. Y. Filed May 26, 1948.

ALCOZYME

FOR ENZYME PREPARATION ESPECIALLY FOR THE PRODUCTION OF ALCOHOL FOR INDUSTRIAL OR BEVERAGE USE.
Claims use since Apr. 6, 1948.

Ser. No. 557,982. WILLIAM SAVIOU, Warren, Ohio. Filed Apr. 16, 1948.

Applicant disclaims the words "Face Lotion" apart from the mark shown.
FOR FACE LOTIONS.
Claims use since Mar. 22, 1948.

CLASS 12

CONSTRUCTION MATERIALS

Ser. No. 527,522. J. W. MORTELL COMPANY, Kankakee, Ill. Filed July 5, 1947. Under section 2f of the act of 1946.

NO Drip

Applicant claims ownership of registration No. 401,487.
FOR ADHESIVE PLASTIC COMPOUND CONTAINING GRANULATED CORK TO BE APPLIED TO CONCRETE MASONRY AND METAL SURFACES FOR INSULATION PURPOSES.
Claims use since Jan. 15, 1942.

Ser. No. 556,309. BAY STATE ABRASIVE PRODUCTS COMPANY, Westboro, Mass. Filed May 6, 1948. Under section 2f of the act of 1946.

BAY STATE

Applicant claims ownership of registration No. 345,340.
FOR FURNACE REFRACTORIES AND LININGS, AND REFRACTORY CEMENTS.
Claims use since Dec. 1, 1925.

CLASS 15

OILS AND GREASES

Ser. No. 523,893. FRONTIER OIL REFINING CORPORATION, Buffalo, N. Y. Filed Apr. 5, 1948.

FRONTIER

Applicant claims ownership of registration No. 391,979.
FOR MOTOR LUBRICATING OIL.
Claims use since Aug. 1, 1946.

CLASS 17

TOBACCO PRODUCTS

Ser. No. 515,640. F. R. TRIPLER & CO. INC., New York, N. Y. Filed Sept. 17, 1947.

The English translation of the Latin words "Esse Quam Videri," which appear on the trade-mark to be registered, is "To be rather than to seem."
FOR PIPE TOBACCO.
Claims use since June 11, 1940.

Ser. No. 533,239. JOSE ESCALANTE & CO., Chicago, Ill. Filed Aug. 30, 1947.

The portrait forming a part of the mark is fanciful.
FOR CIGARS.
Claims use since 1901.

Ser. No. 542,827. GRADIAZ, ANNIS & CO., INC., Tampa, Fla. Filed Dec. 1, 1947.

GOLD LABEL

Ignacio Haya

The words "Ignacio Haya" are disclaimed apart from the mark as shown. Applicant also disclaims the right to the exclusive use of a label colored gold. Applicant claims ownership of registration No. 238,627.

FOR CIGARS.

Claims use since 1914.

Ser. No. 562,178. CHRISTIAN PEPER TOBACCO COMPANY, St. Louis, Mo. Filed July 26, 1948.

ALL JACKS

FOR CIGARETTES.

Claims use since Mar. 1, 1930.

CLASS 19

VEHICLES

Ser. No. 528,381. SOLAR CORPORATION, doing business as Beam Manufacturing Company, Milwaukee, Wis., and Webster City, Iowa. Filed July 11, 1947.

BEAM MANUFACTURING COMPANY WEBSTER CITY, IOWA

The words "Manufacturing Company, Webster City, Iowa" are disclaimed as part of the trade-mark. The lining in the drawing indicates the colors blue, gray, and gold but such coloring is not an essential characteristic of the mark.

FOR MOTOR SCOOTERS.

Claims use since Apr. 9, 1947.

Ser. No. 529,191. PALMER SCOTT & COMPANY, INC., New Bedford, Mass. Filed July 22, 1947.

The mark comprises the letters "W P" arranged in a stylized monogram suggestive of a cat having an arched back.

FOR SAIL BOATS WITH OR WITHOUT AUXILIARY POWER.

Claims use since May 1, 1945.

Ser. No. 529,811. NOBLITT-SPARKS INDUSTRIES, INC., Columbus, Ind. Filed July 28, 1947. Under section 2f of the act of 1946.

ARVIN

Applicant claims ownership of registrations Nos. 352,329 and 367,700.

FOR AUTOMOBILE HEATERS.

Claims use since Jan. 15, 1922.

Ser. No. 530,587. STERLING MOTOR TRUCK COMPANY, INC., West Allis, Wis. Filed Aug. 5, 1947.

Sterling

Applicant claims ownership of registrations Nos. 111,612 and 140,062.

FOR MOTOR TRUCKS.

Claims use since Nov. 5, 1914.

Reg. No. 332,078. Registered Feb. 4, 1936. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

NULSONASTIC

FOR ASPHALT OR TAR EMULSION MATERIALS IN BOTH LIQUID AND SEMI-LIQUID FORM, USED FOR FLOOR RESURFACING, ROOF TREATMENT AND WATERPROOFING.
Claims use since April 1928.

Reg. No. 351,473. Registered Nov. 2, 1937. DEWEY PORTLAND CEMENT COMPANY, Kansas City, Mo., a corporation of West Virginia. Republished by registrant.

The words "Fibred Cement" are disclaimed apart from the mark as shown.
FOR PORTLAND CEMENT.
Claims use since Oct. 22, 1936.

Reg. No. 397,836. Registered Sept. 22, 1942. THE TREMCO MANUFACTURING COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

TREMSEAL

FOR SURFACE COATING MATERIAL FOR SEALING PURPOSES TO PREVENT BLEEDING OF ASPHALT, TAR, SAPPY WOOD, OIL SOLUBLE REDS OR STAINS, ETC.
Claims use since Jan. 26, 1942.

Reg. No. 429,463. Registered Apr. 29, 1947. BASIC REFRACTORIES, INC., Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

RAMSET

FOR REFRACTORY MATERIALS SUITABLE FOR FURNACE LINING AND REPAIRING.
Claims use since Aug. 28, 1946.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Reg. No. 120,992. Registered Mar. 19, 1918. THE NATIONAL SUPPLY COMPANY, Toledo, Ohio. Republished by The National Supply Company, Pittsburgh, Pa., a corporation of Pennsylvania.

N.S.CO

FOR METAL PLUGS FOR DRY OIL AND GAS WELLS, METAL PIPE, PIPE-COUPLINGS, PIPE-REDUCERS, AND ALL THE OTHER ITEMS NAMED IN THE ORIGINAL REGISTRATION.
Claims use since the year 1900.

Reg. No. 161,644. Registered Nov. 14, 1922. THE STRONG, CARLISLE & HAMMOND COMPANY, Cleveland, Ohio. Republished by Strong, Carlisle & Hammond Company, Cleveland, Ohio, a corporation of Illinois.

ANUM-METL

FOR STEAM SPECIALTIES, COMPRISING THE VALVES AND SEATS AND OTHER WEARING PARTS OF STEAM TRAPS, VACUUM TRAPS, STEAM AND OIL SEPARATORS, REDUCING VALVES, AND FEED-WATER REGULATORS.
Claims use since Oct. 8, 1921.

Reg. No. 257,033. Registered May 28, 1929. THE GARLOCK PACKING COMPANY, Palmyra, N. Y., a corporation of New York. Republished by registrant.

The drawing is lined for shading only.
FOR CORD PLUGS FOR CLEANING CONDENSER TUBES.
Claims use since March 1925.

Reg. No. 318,299. Registered Oct. 23, 1934. FOSTER L. TALGE, doing business as Rival Manufacturing Company, Kansas City, Mo. Republished by Rival Manufacturing Company, Kansas City, Mo., a corporation of Missouri.

FOR ALUMINUM CULINARY UTENSILS—NAMELY, POTS, PANS, PLATTERS, BROILERS, TRAYS, STEINS, TEA KETTLES, PATTY MOLDS, COOKIE MOLDS, DOUGHNUT MOLDS, CHEESE BOARDS.
Claims use since August 1932.

Reg. No. 333,389. Registered Mar. 17, 1936. ROBERT H. WAGER, New York, N. Y. Republished by registrant.

B.K.W.

FOR INVERTED VENT CHECK VALVES.
Claims use since March 1931.

Reg. No. 426,269. Registered Dec. 24, 1946. STRONG, CARLISLE & HAMMOND COMPANY, Cleveland, Ohio, a corporation of Illinois. Republished by registrant.

HI-CAP

FOR VALVE AND SEAT ASSEMBLIES FOR STEAM TRAPS.
Claims use since Aug. 10, 1945.

CLASS 14

METALS AND METAL CASTINGS AND FORGINGS

Reg. No. 311,490. Registered Mar. 27, 1934. GENERAL STEEL CASTINGS CORPORATION, Ridley Township, Delaware County, Pa., a corporation of Delaware. Republished by registrant.

FOR ROUGH AND SEMI-FINISHED METAL CASTINGS AND FORGINGS OF FERROUS METALS, BRASS AND LEAD.
Claims use since on or about Jan. 7, 1933.

Reg. No. 416,971. Registered Oct. 9, 1945. RENE D. WASSERMAN, doing business as Eutectic Welding Alloys Company, New York, N. Y. Republished by Eutectic Welding Alloys Corporation, New York, N. Y., a corporation of New York.

FLOTECTIC

FOR WELDING ELECTRODES, WHICH ARE CONSUMED IN THE WELDING OPERATION, WELDING, BRAZING AND SOLDERING OVERLAY ALLOYS IN THE FORM OF RODS AND WIRES, EITHER BARE OR COATED WITH FLUX SUBSTANCE FOR USE IN CONNECTION WITH OXY-ACETYLENE TORCHES, WITH ELECTRIC HEATING AND CARBON-ARC DEVICES.
Claims use since Jan. 31, 1945.

Reg. No. 428,270. Registered Mar. 18, 1947. EUTECTIC WELDING ALLOYS CORPORATION, New York, N. Y., a corporation of New York. Republished by registrant.

EUTALLOY

FOR ALLOYS IN VARIOUS FORMS SUITABLE FOR WELDING, BRAZING, SOLDERING AND HARD SURFACING OPERATIONS.
Claims use since Feb. 10, 1946.

CLASS 15

OILS AND GREASES

Reg. No. 132,165. Registered June 15, 1920. WALTER H. HART, Philadelphia, Pa. Republished by Arthur H. Thomas Company, Philadelphia, Pa., a corporation of Pennsylvania.

LUBRISEAL

FOR GREASE FOR STOPCOCKS AND THE LIKE.
Claims use since on or about Oct. 15, 1919.

STRAT-O-MASTER
BY ARKWRIGHT

The words "Arkwright" and "By" are disclaimed apart from the mark as shown.
FOR RADIO RECEIVING SETS AND PARTS THEREOF.
Claims use since Sept. 10, 1945.

Reg. No. 430,166. Registered June 10, 1947. THE SHEPARD ELEVATOR COMPANY, Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

S-P-D

FOR ELEVATOR PARTS—NAMELY, LIMIT SWITCHES AND GATE SWITCHES.
Claims use since 1936.

Reg. No. 433,114. Registered Sept. 23, 1947. ELECTRA MANUFACTURING COMPANY, Kansas City, Mo., a corporation of Missouri. Republished by registrant.

Criterion

FOR VOLTAGE REGULATORS, HEAD LIGHT RELAYS, HORN RELAYS, GENERATOR CUTOUTS, DIMMER SWITCHES.
Claims use since 1935.

Reg. No. 433,122. Registered Sept. 23, 1947. THE VENDO COMPANY, Kansas City, Mo., a corporation of Missouri. Republished by registrant.

THE Vendo

FOR COMBINATION MECHANICALLY AND ELECTRICALLY OPERATED DOOR OPENING MECHANISM.
Claims use since Dec. 4, 1946.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Reg. No. 132,902. Registered July 6, 1920. THE BRUNSWICK-BALKE-COLLENDER COMPANY, Wilmington, Del., and Chicago, Ill., a corporation of Delaware. Republished by registrant, present address Chicago, Ill.

MINERALITE

FOR BOWLING BALLS.
Claims use since October 1905.

CLASS 23

CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Reg. No. 85,816. Registered Mar. 19, 1912. THE HOLT MANUFACTURING COMPANY, Stockton, Calif. Republished by Caterpillar Tractor Co., Peoria, Ill., a corporation of California.

CATERPILLAR

FOR GASOLENE AND TRACTION ENGINES, AND ROAD WORKING MACHINES.
Claims use since Sept. 1, 1904.

Reg. No. 140,773. Registered Mar. 29, 1921. THE CINCINNATI TOOL COMPANY, Norwood, Ohio, a corporation of Ohio. Republished by registrant.

STANDARD

FOR HAND-CLAMPS.
Claims use since 1886.

Reg. No. 147,287. Registered Oct. 11, 1921. CONTINENTAL GIN COMPANY, Birmingham, Ala., a corporation of Delaware. Republished by registrant.

CONTINENTAL

FOR COTTON GINS AND DISTRIBUTERS, LINT FLUES, AND BATTERY CONDENSERS FOR COTTON GINS, AND COTTON PRESSES.
Claims use since 1900.

Reg. No. 179,317. Registered Feb. 5, 1924. FARREL FOUNDRY & MACHINE COMPANY, Ansonia, Conn., and Buffalo, N. Y. Republished by Farrel-Birmingham Company, Incorporated, Ansonia, Conn., and Buffalo, N. Y., a corporation of Connecticut.

FARREL

The representation of the meshing double helical gear wheel and pinion, and the legend "U. S. Pat. Office" are disclaimed apart from the mark as shown.
FOR GEAR-CUTTING MACHINES AND PARTS THEREOF, PINION-TOOTHED GEAR CUTTERS, GEARING, GEAR WHEELS, AND GEAR PINIONS.
Claims use since on or about May 15, 1923.

Reg. No. 198,624. Registered May 19, 1925. CONTINENTAL GIN COMPANY, Birmingham, Ala., a corporation of Delaware. Republished by registrant.

CGC

FOR OIL ENGINES.
Claims use since Aug. 9, 1924.

Reg. No. 223,872. Registered Feb. 15, 1927. YATES-AMERICAN MACHINE COMPANY, Beloit, Wis., and Rochester, N. Y., a corporation of Delaware. Republished by registrant, present address Beloit, Wis.

THE SEAL OF QUALITY

The words "Trade-Mark," "Yates-American," also the representation of a band saw and parts of machinery are disclaimed apart from the mark as shown.

FOR WOODWORKING MACHINES—NAMELY, BAND SAWS, BORING MACHINES, BUZZ PLANERS, CARVING MACHINES, CIRCULAR-SAW BENCHES, DOOR CLAMPS, DOOR STICKERS, MOLDERS, PLANERS AND MATCHERS, KNIFE-GRINDING MACHINES, LATHES, MORTISERS, SANDERS, SHAPERS, TENONERS, UNIVERSAL SAW BENCHES AND VARIETY SAW BENCHES.

Claims use since Mar. 27, 1926.

Reg. No. 224,283. Registered Feb. 22, 1927. CONTINENTAL GIN COMPANY, Birmingham, Ala., Atlanta, Ga., Dallas, Tex., and Prattville, Ala., a corporation of Delaware. Republished by registrant, present address Birmingham, Ala.

FOR COTTON GINS, COTTONSEED LINTERS, FEEDERS AND CONDENSERS FOR GINS AND LINTERS, AND COTTON CLEANERS.

Claims use since 1877.

Reg. No. 224,284. Registered Feb. 22, 1927. CONTINENTAL GIN COMPANY, Birmingham, Ala., Atlanta, Ga., Dallas, Tex., and Prattville, Ala., a corporation of Delaware. Republished by registrant, present address Birmingham, Ala.

EAGLE

FOR COTTON GINS, COTTONSEED LINTERS, FEEDERS AND CONDENSERS FOR GINS AND LINTERS, AND COTTON CLEANERS.

Claims use since 1877.

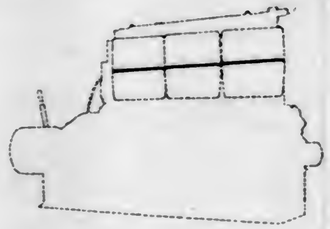
Reg. No. 252,457. Registered Feb. 5, 1929. YATES-AMERICAN MACHINE COMPANY, Beloit, Wis., a corporation of Delaware. Republished by registrant.

TRIPLE C KNIVES

The word "Knives" is disclaimed apart from the mark as shown.

FOR KNIVES FOR WOODWORKING MACHINES.

Claims use since Aug. 16, 1928.



Reg. No. 283,120. Registered May 19, 1931. CLIMAX ENGINEERING COMPANY, Clinton, Iowa. Republished by Climax Industries, Inc., Clinton, Iowa, a corporation of Delaware.

Blue Streak

FOR INTERNAL-COMBUSTION ENGINES.

Claims use since Aug. 30, 1930.

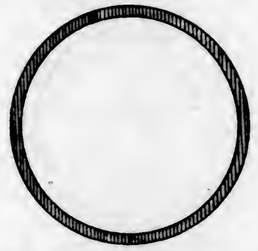
Reg. No. 283,205. Registered May 19, 1931. CLIMAX ENGINEERING COMPANY, Clinton, Iowa. Republished by Climax Industries, Inc., Clinton, Iowa, a corporation of Delaware.

The lining in the drawing indicates the color blue.

FOR INTERNAL-COMBUSTION ENGINES.

Claims use since Oct. 17, 1928.

Reg. No. 294,181. Registered May 24, 1932. THE CINCINNATI TOOL COMPANY, Norwood, Ohio, a corporation of Ohio. Republished by registrant.



SUPERCLAMP

The word "Clamp" is disclaimed apart from the mark as shown.

FOR CLAMPS.

Claims use since June 12, 1931.

Reg. No. 356,074. Registered Apr. 12, 1938. NATIONAL BROACH & MACHINE CO., Detroit, Mich., a corporation of Michigan. Republished by registrant.

The drawing is lined for the color red.

FOR GEAR MANUFACTURING EQUIPMENT—NAMELY, MACHINES FOR FINISHING, SHAVING, LAPPING, AND CHECKING GEARS; BROACHING TOOLS AND MACHINES, SPLINE GRINDERS; FLAT SEAL FACE GRINDING MACHINES; GEAR TOOTH FORM GRINDERS; GEAR TOOTH SHAPER CUTTERS, FORM AND SHAVING TOOLS FOR GEARS, LAPPING TOOLS, AND HOLDERS THEREFOR.

Claims use since on or about Apr. 26, 1924.

Reg. No. 380,006. Registered Aug. 6, 1940. STEPHENS-ADAMSON MFG. CO., Aurora, Ill., a corporation of Illinois. Republished by registrant.

SEALMASTER

FOR ANTI-FRICTION BEARINGS AND BEARING SEALS.

Claims use since Jan. 4, 1938.

Reg. No. 386,556. Registered Apr. 15, 1941. ARTHUR L. JOHNSON, doing business as Hexacon Electric Company, Roselle Park, N. J. Republished by registrant.

SOLDER MASTER

The word "Solder" is disclaimed apart from the mark as shown.

FOR ELECTRIC SOLDERING IRONS.

Claims use since June 1, 1933.

Reg. No. 396,112. Registered June 30, 1942. LE ROI COMPANY, West Allis, Wis., a corporation of Wisconsin. Republished by registrant.

ECONOTROL

FOR AUTOMATIC REGULATORS FOR CONTROLLING THE SPEED OF ENGINE DRIVEN COMPRESSORS OR PUMPS.

Claims use since about Sept. 20, 1941.

Reg. No. 398,387. Registered Oct. 27, 1942. LE ROI COMPANY, West Allis, Wis., a corporation of Wisconsin. Republished by registrant.

CENTAUR

FOR TRACTORS, PLOWS, CULTIVATORS, HARROWS, SEEDERS, HOES, DIGGERS, HILLERS, MOWERS, LEVELERS, SPRAYERS, PLANTERS, TRACTOR HITCHES, FERTILIZER SPREADERS, VINE GUARDS, AND PARTS THEREOF AND ATTACHMENTS THEREFOR.

Claims use since Mar. 3, 1921.

Reg. No. 405,591. Registered Feb. 8, 1944. CLIMAX ENGINEERING COMPANY, Clinton, Iowa. Republished by Climax Industries, Inc., Clinton, Iowa, a corporation of Delaware.

CLIMAX

FOR OIL FIELD DRILLING UNITS AND PUMPING UNITS.

Claims use since June 1925.

Reg. No. 410,502. Registered Nov. 28, 1944. LE ROI COMPANY, West Allis, Wis., a corporation of Wisconsin. Republished by registrant.

FOR INTERNAL COMBUSTION ENGINES, AIR OR GAS COMPRESSORS, AND PARTS THEREOF.

Claims use since on or about Apr. 24, 1944.

Reg. No. 412,785. Registered Mar. 27, 1945. LE ROI COMPANY, West Allis, Wis., a corporation of Wisconsin. Republished by registrant.

LE ROI

FOR INTERNAL COMBUSTION ENGINES, AIR OR GAS COMPRESSORS, AND PARTS THEREOF.

Claims use since on or about Apr. 24, 1944.

Reg. No. 415,198. Registered July 31, 1945. THE SALVAJOR COMPANY, Kansas City, Mo., a firm. Republished by registrant.

SALVAJOR

FOR TABLEWARE CLEANING AND SALVAGING MACHINES FOR USE IN CLEANING DISHES, KNIVES, FORKS, SPOONS, ETC., OF ADHERING AND/OR ACCOMPANYING GARBAGE MATTER, AND HAVING A RECEPTACLE FOR THE LATTER, AND A TRAP THROUGH WHICH THE GARBAGE IS ADAPTED TO PASS ON ITS WAY TO SAID RECEPTACLE, FOR RETAINING AND PREVENTING THE LOSS OF SMALL TABLEWARE ARTICLES, SUCH AS THOSE LISTED ABOVE AND BUTTER PLATES, COASTERS AND THE LIKE, WHICH MAY BE MINGLED WITH THE GARBAGE ON THE PASSAGE OF THE SAME THROUGH SAID TRAP TO THE SAID RECEPTACLES.
Claims use since Oct. 30, 1943.

Reg. No. 419,922. Registered Mar. 12, 1946. RIVAL MANUFACTURING COMPANY, Kansas City, Mo. Republished by Rival Manufacturing Company, Kansas City, Mo., a corporation of Missouri.

Can-O-Mat

The word "Can" is disclaimed apart from the mark as shown.
FOR CAN OPENERS.
Claims use since July 5, 1945.

Reg. No. 422,185. Registered July 9, 1946. RIVAL MANUFACTURING COMPANY, Kansas City, Mo., assignor to Rival Manufacturing Company, Kansas City, Mo., a corporation of Missouri. Republished by Rival Manufacturing Company, Kansas City, Mo., a corporation of Missouri.

Ice-O-Mat

The word "Ice" is disclaimed apart from the mark as shown.
FOR ICE CRUSHERS.
Claims use since May 31, 1939.

Reg. No. 422,191. Registered July 9, 1946. JABSCO PUMP COMPANY, Beverly Hills, Calif., a firm. Republished by registrant, present address Burbank, Calif.

JABSCO
THE PUMP WITH THE RUBBER IMPELLER

The representation of the goods and the words "The Pump With the Rubber Impeller" are disclaimed apart from the mark as shown.
FOR WATER PUMPS.
Claims use since May 1, 1945.

Reg. No. 422,642. Registered Aug. 6, 1946. FARREL-BIRMINGHAM COMPANY, INCORPORATED, Ansonia, Conn., a corporation of Connecticut. Republished by registrant.

FB

FOR HYDRAULIC RUBBER PRESSES, HOSE-MAKING MACHINES, RUBBER CALENDERS, RUBBER MIXERS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION, EXCEPT, HAND-SCREW PRESSES FOR RUBBER MANUFACTURE, ALLIGATOR SHEARS FOR ROLLING MILLS, AND FRICTION CLUTCHES.
Claims use since on or about July 1, 1932.

Reg. No. 426,836. Registered Jan. 14, 1947. M. E. CUNNINGHAM COMPANY, Pittsburgh, Pa., a corporation of Pennsylvania. Republished by registrant.

UTILITY

FOR DIE HOLDERS FOR METAL EMBOSSING AND COUNTERSINKING DIES.
Claims use since Oct. 15, 1945.

Reg. No. 428,167. Registered Mar. 11, 1947. THE ARO EQUIPMENT CORPORATION, Bryan, Ohio, a corporation of Ohio. Republished by registrant.

ARO

FOR AUTOMOTIVE AND INDUSTRIAL LUBRICATING EQUIPMENT—NAMELY, CABINET TYPE LUBRICATORS, STATIONARY LUBRICANT SYSTEMS, LUBRICANT PUMPS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION.
Claims use since Mar. 15, 1946.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

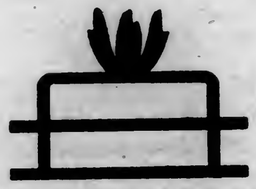
Reg. No. 338,437. Registered Sept. 8, 1936. FRANK P. SCULLY, doing business as Scully Signal Company, Cambridge, Mass. Republished by Scully Signal Company, Cambridge, Mass., a corporation of Massachusetts.

VENTALARM

FOR LIQUID LEVEL INDICATORS FOR LIQUID FUEL TANKS AND THE LIKE.
Claims use since Nov. 8, 1935.

Reg. No. 356,472. Registered Apr. 26, 1938. NATIONAL BROACH & MACHINE CO., Detroit, Mich., a corporation of Michigan. Republished by registrant.

RED RING



The drawing is lined for the color red.
FOR GAUGES AND MACHINES FOR SOUND TESTING GEARS.
Claims use since on or about Apr. 26, 1924.

Reg. No. 364,852. Registered Feb. 14, 1939. BACHARACH INDUSTRIAL INSTRUMENT COMPANY, Pittsburgh, Pa., a corporation of Pennsylvania. Republished by registrant.

PREMAX

FOR ENGINE PRESSURE INDICATORS.
Claims use since Feb. 28, 1938.

Reg. No. 375,717. Registered Feb. 27, 1940. BACHARACH INDUSTRIAL INSTRUMENT COMPANY, Pittsburgh, Pa., a corporation of Pennsylvania. Republished by registrant.

FOR DRAFT GAUGES, PORTABLE GAUGE ANALYZERS, AND THERMOMETERS.
Claims use since Oct. 26, 1935.

Reg. No. 388,439. Registered June 24, 1941. SCULLY SIGNAL COMPANY, East Cambridge, Mass., a Massachusetts corporation. Republished by registrant, present address Cambridge, Mass.

GAJALARM

FOR LIQUID LEVEL INDICATORS FOR LIQUID FUEL TANKS AND THE LIKE.
Claims use since Jan. 16, 1941.

Reg. No. 423,226. Registered Aug. 27, 1946. OAKITE PRODUCTS, INC., New York, N. Y., a corporation of New York. Republished by registrant.

OAKITE

FOR ELECTRICALLY OPERATED APPARATUS FOR MEASURING AND INDICATING THE CONCENTRATION OF CLEANING SOLUTIONS USED IN MECHANICAL WASHING EQUIPMENT, AUTOMATIC RELATIVE-GRAVITY CONTROLLER REGULATORS FOR CONTROLLING EFFECTIVE CLEANING CONDITION OF SOLUTIONS USED IN MILK-CAN WASHING, DISH-WASHING, METAL-WASHING AND SIMILAR MECHANICAL WASHING EQUIPMENT; SCOOP MEASURES, HEAT CLEAN METERS, TITRATING APPARATUS, BACTERICIDE TEST-SETS AND MEASURES, AND PARTS OF AND ACCESSORIES FOR ALL SUCH ARTICLES.
Claims use since August 1931.

Reg. No. 423,466. Registered Sept. 3, 1946. OAKITE PRODUCTS, INC., New York, N. Y., a corporation of New York. Republished by registrant.

OAKOMETER

FOR ELECTRICALLY OPERATED APPARATUS FOR MEASURING AND INDICATING THE CONCENTRATION OF CLEANING SOLUTIONS USED IN MECHANICAL WASHING EQUIPMENT.
Claims use since 1940.

CLASS 27

HOROLOGICAL INSTRUMENTS

Reg. No. 347,721. Registered July 6, 1937. E. M. ROSENTHAL JEWELRY CO., Washington, D. C., a corporation of the District of Columbia. Republished by registrant.

PAUL BREGUETTE

FOR WATCHES.
Claims use since Nov. 14, 1936.

FOR CANDY.
Claims use since May 1, 1926.

Reg. No. 225,701. Registered Mar. 22, 1927. R. U. DELAPENHA & Co. INC., New York, N. Y., a corporation of New York. Republished by registrant.

IMPERIAL BRAND

The word "Brand" is disclaimed apart from the mark as shown.
FOR CANDY, CRYSTALLIZED GINGER, PRESERVED GINGER, OLIVES, PRESERVED FIGS, CAPERS, GLACE FRUITS, CANDIED CITRON, LEMON PEEL, AND ORANGE PEEL.
Claims use since October 1901.

Reg. No. 233,826. Registered Oct. 11, 1927. THE WINORR CANNING COMPANY, Circleville, Ohio, a corporation of Ohio. Republished by registrant.

WOODLAWN

FOR CANNED VEGETABLES.
Claims use since Mar. 1, 1927.

Reg. No. 252,789. Registered Feb. 12, 1929. TAYLOR & CALDWELL, Walkerton, Va. Republished by Taylor & Caldwell, Inc., Walkerton, Va., a corporation of Virginia.

LONDON HILL

FOR CANNED VEGETABLES.
Claims use since 1926.

Reg. No. 254,114. Registered Mar. 12, 1929. TAYLOR & CALDWELL, Walkerton, Va. Republished by Taylor & Caldwell, Inc., Walkerton, Va., a corporation of Virginia.

YORK RIVER

FOR CANNED VEGETABLES.
Claims use since 1896.

Reg. No. 257,743. Registered June 18, 1929. TAYLOR & CALDWELL, Walkerton, Va. Republished by Taylor & Caldwell, Inc., Walkerton, Va., a corporation of Virginia.

LORNA DOONE

FOR CANNED VEGETABLES.
Claims use since Nov. 15, 1928.

Reg. No. 262,930. Registered Oct. 29, 1929. ANTHONY MACARONI CO., INC., Los Angeles, Calif. Republished by Anthony Macaroni & Cracker Co., Los Angeles, Calif., a firm.

LA PALOMA

FOR ALIMENTARY PASTES, CANNED RAVIOLI, CHILI SAUCE, MUSHROOM SAUCE, TOMATO SAUCE, AND CHEESE.
Claims use since Feb. 1, 1928.

Reg. No. 263,156. Registered Oct. 29, 1929. PICKLE PRODUCTS COMPANY, Baltimore, Md. Republished by Kraft Foods Company, Chicago, Ill., a corporation of Delaware.

SALAD BOWL

The word "Salad" is disclaimed apart from the mark as shown.
FOR SALAD DRESSING.
Claims use since on or about Apr. 1, 1929.

Reg. No. 269,865. Registered Apr. 22, 1930. TAYLOR & CALDWELL, Walkerton, Va. Republished by Taylor & Caldwell, Inc., Walkerton, Va., a corporation of Virginia.

PITCH INN

FOR CANNED VEGETABLES.
Claims use since Nov. 26, 1929.

Reg. No. 280,187. Registered Feb. 10, 1931. TAYLOR & CALDWELL, INC., Walkerton, Va., a corporation of Virginia. Republished by registrant.

Summer Sweet

The word "Sweet" is disclaimed apart from the mark as shown.
FOR CANNED LIMA BEANS.
Claims use since August 1930.

Reg. No. 280,275. Registered Feb. 10, 1931. ROBERT A. JOHNSTON COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

PADDLE POP

LIQUID COATING FOR ICE-CREAM.
Claims use since July 20, 1929.

Reg. No. 300,568. Registered Jan. 24, 1933. A. ARENA & CO., LTD., Los Angeles, Calif., a corporation of California. Republished by registrant.

ARENAS

FOR FRESH VEGETABLES—NAMELY, LETTUCE, CARROTS, PEAS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION.
Claims use since July 15, 1930.

Reg. No. 303,880. Registered June 13, 1933. HENRY P. TAYLOR, doing business as King & Queen Canneries, Walkerton, Va. Republished by Taylor & Caldwell, Inc., Walkerton, Va., a corporation of Virginia.

Vite'Em In

FOR CANNED VEGETABLES AND CANNED SWEET POTATO DESSERT PREPARATION.
Claims use since June 1931.

Reg. No. 316,995. Registered Sept. 11, 1934. VENICE MAID COMPANY, INC., Vineland, N. J., a corporation of New Jersey. Republished by registrant.

VENICE MAID

ORIGINAL
COOKED SPAGHETTI DINNER

The words "Cooked Sphagetti Dinner" are disclaimed apart from the mark as shown.
FOR CANNED SPAGHETTI.
Claims use since May 8, 1934.

Reg. No. 323,253. Registered Apr. 9, 1935. ROBERT A. JOHNSTON COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

The words "Instant Fudge" are disclaimed apart from the mark as shown. The drawing is lined for the colors black, white, and red.
FOR POWDER PREPARATION FOR MAKING CANDY.
Claims use since Oct. 18, 1934.

Reg. No. 331,218. Registered Dec. 31, 1935. MERWANJEE POONJIAJEE & SONS, Mandvi, Bombay, India, a co-partnership. Republished by registrant.

The drawing is lined for shading only. The word "Brand" is disclaimed apart from the mark as shown.
FOR CHUTNEYS, TAP SAUCE, AND CURRY POWDER.
Claims use since 1906.

Reg. No. 332,363. Registered Feb. 11, 1936. INTERNATIONAL BROKERAGE COMPANY, Minneapolis, Minn. Republished by Fine Foods, Inc., Seattle, Wash., a corporation of Washington.

SEA CAP

FOR CANNED FISH.
Claims use since Aug. 1, 1935.

Reg. No. 336,437. Registered July 7, 1936. CONWAY IMPORT CO., INC., Long Island City, N. Y., a corporation of New York. Republished by registrant.

MOULIN ROUGE

FOR OLIVE OIL.
Claims use since 1913.

Reg. No. 356,191. Registered Apr. 19, 1938. ROBERT A. JOHNSTON COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

COKAY

FOR COCOA.
Claims use since October 1934.

Reg. No. 363,069. Registered Dec. 13, 1938. HUNTER PACKING COMPANY, East St. Louis, Ill., a corporation of Illinois. Republished by registrant.

The outline of the label is disclaimed.
FOR DOG FOOD.
Claims use since June 1934.

Reg. No. 363,560. Registered Jan. 3, 1939. HUNTER PACKING COMPANY, East St. Louis, Ill., a corporation of Illinois. Republished by registrant.

FOR CANNED TAMALES.
Claims use since April 1936.

Reg. No. 377,022. Registered Apr. 16, 1940. GROWERS FRUIT COMPANY, INC., Edinburg, Tex. Republished by The H. Rouw Company, Edinburg, Tex., a corporation of Arkansas.

JO-JO

FOR FRESH CITRUS FRUITS.
Claims use since Sept. 1, 1936.

Reg. No. 379,695. Registered July 23, 1940. R. U. DELAPENHA & COMPANY, INC., New York, N. Y., a corporation of New York. Republished by registrant.

FOR OLIVE OIL.
Claims use since Apr. 18, 1914.

Reg. No. 380,198. Registered Aug. 13, 1940. ROBERT A. JOHNSTON COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

CHOCOTONE

FOR PREPARED CHOCOLATE POWDER.
Claims use since June 6, 1938.

Reg. No. 380,199. Registered Aug. 13, 1940. ROBERT A. JOHNSTON COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

CHOCKAY

FOR PREPARED CHOCOLATE POWDER, TO BE USED IN THE PREPARATION OF FUDGE.
Claims use since Jan. 22, 1937.

Reg. No. 389,604. Registered Aug. 12, 1941. GODCHAUX SUGARS, INC., New Orleans, La., a corporation of New York. Republished by registrant.

The drawing is lined for the color blue.
FOR SUGAR.
Claims use since Apr. 6, 1939.

Reg. No. 392,506. Registered Dec. 30, 1941. GOELITZ CONFECTIONERY COMPANY, North Chicago, Ill., a corporation of Illinois. Republished by registrant.

The drawing is lined for the color red. The representations of candy corn kernels are disclaimed apart from the mark as shown.
FOR CANDY.
Claims use since 1908.

Reg. No. 392,582. Registered Jan. 6, 1942. KOLD KIST, INC., Los Angeles, Calif., a corporation of California. Republished by registrant.

Kold Kist

The word "Kold" is disclaimed apart from the mark as shown.
FOR FROZEN FRESH COOKED MEATS INCLUDING BEEF STEW, LAMB STEW, SWISS STYLE STEAK, SPAGHETTI AND MEAT BALLS, CHOP SUEY, CHICKEN AND NOODLES, FISH, FOWL, AND VEGETABLES.
Claims use since Dec. 18, 1939.

Reg. No. 414,632. Registered June 19, 1945. WEDDLE TEA CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

WEDDLE'S MAYBLOOM

FOR TEA.
Claims use since 1927.

Reg. No. 415,498. Registered Aug. 7, 1945. PI-DO CORPORATION, Dallas, Tex., a corporation of Texas. Republished by registrant.

"Aunt Ellen's"

FOR PIE AND PASTRY CRUST MIX.
Claims use since June 12, 1944.

Reg. No. 416,704. Registered Sept. 25, 1945. ROBERT A. JOHNSTON COMPANY, Milwaukee, Wis., a corporation of Wisconsin. Republished by registrant.

R·S·V·P

FOR CANDY.
Claims use since Dec. 15, 1922.

Reg. No. 421,957. Registered June 25, 1946. JOHN A. DOMENICO, Denver, Colo. Republished by registrant.

GARDEN BOY

The word "Garden" is disclaimed apart from the mark as shown.
FOR FRESH VEGETABLES.
Claims use since September 1942.

Reg. No. 431,657. Registered July 29, 1947. JELLUM, INC., Joliet, Ill., a corporation of Delaware. Republished by registrant.

RICHERONI

FOR MACARONI.
Claims use since Aug. 19, 1946.

CLASS 47

WINES

Reg. No. 254,585. Registered Mar. 26, 1929. J. R. PARKINGTON & CO., LTD., London, England, a corporation organized under the laws of Great Britain. Republished by registrant.

GOLDEN GUINEA

FOR MUSCATEL WINE.
Claims use since Oct. 9, 1914.

Reg. No. 323,059. Registered Apr. 2, 1935. J. R. PARKINGTON & CO., LTD., London, England, a corporation of Great Britain and Northern Ireland. Republished by registrant.

The words "Grand," "Vin" and "Bordeaux" are disclaimed apart from the mark as shown.
FOR BORDEAUX WINES.
Claims use since May 2, 1914.

Reg. No. 328,986. Registered Oct. 15, 1935. J. R. PARKINGTON & CO., LTD., London, England, a corporation of Great Britain and Northern Ireland. Republished by registrant.

The words "Sauterne," "Qualite" and "Superieure" are disclaimed apart from the mark as shown.
FOR SAUTERNE WINE.
Claims use since Sept. 18, 1913.

Reg. No. 330,797. Registered Dec. 17, 1935. BISCEGLIA BROTHERS, San Jose, Calif. Republished by Bisceglia Brothers Wine Co., Fresno, Calif., a corporation of California.

SILVER CUP

FOR WINES.
Claims use since Jan. 2, 1935.

Reg. No. 397,332. Registered Sept. 1, 1942. PIRRONE WINERIES, INC., Garfield, N. J. Republished by F. Pirrone & Sons, Inc., a corporation of New Jersey.

Invitation

FOR WINE.
Claims use since January 1940.

CLASS 48

MALT BEVERAGES AND LIQUORS

Reg. No. 315,874. Registered Aug. 14, 1934. SAN ANTONIO BREWING ASSOCIATION, San Antonio, Tex., a corporation of Texas. Republished by registrant.

FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT.
Claims use since 1879.

Reg. No. 321,357. Registered Jan. 29, 1935. SAN ANTONIO BREWING ASSOCIATION, San Antonio, Tex., a corporation of Texas. Republished by registrant.

Pearl

FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT.
Claims use since on or about March 1883.

Reg. No. 378,887. Registered June 25, 1940. MONARCH BREWING COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

MONARCH
Encore

FOR BEER.
Claims use since Jan. 20, 1939.

CLASS 49

DISTILLED ALCOHOLIC LIQUORS

Reg. No. 302,116. Registered Mar. 28, 1933. WHITE HORSE DISTILLERS, LIMITED, Glasgow, Scotland, a corporation of Great Britain. Republished by registrant.

FOR WHISKY.
Claims use since Mar. 20, 1890.

Reg. No. 302,117. Registered Mar. 28, 1933. WHITE HORSE DISTILLERS, LIMITED, Glasgow, Scotland, a corporation of Great Britain. Republished by registrant.

WHITE HORSE

FOR WHISKY.
Claims use since Mar. 20, 1890.

Reg. No. 309,146. Registered Jan. 2, 1934. CRAIGHALL BONDING COMPANY, Glasgow, Scotland, a firm. Republished by registrant.

All of the wording shown in the drawing except the applicant's name is disclaimed apart from the mark as shown. Neither is any claim made to the shape of the label.
FOR WHISKY.
Claims use since Aug. 5, 1932.

Reg. No. 315,239. Registered July 24, 1934. WHITE HORSE DISTILLERS, LIMITED, Glasgow, Scotland, a corporation organized under the laws of Great Britain. Republished by registrant.

WHITE HOUSES

FOR WHISKY.
Claims use since Feb. 10, 1933.

Reg. No. 327,555. Registered Aug. 27, 1935. GLENMORE DISTILLERIES CO., INC., Louisville, Ky. Republished by Glenmore Distilleries Co., Inc., Louisville and Owensboro, Ky., a corporation of Delaware.

Mint Springs

FOR WHISKEY.
Claims use since July 1915.

Reg. No. 334,303. Registered Apr. 28, 1936. CRAIGHALL BONDING COMPANY, Glasgow, Scotland, a firm. Republished by registrant.

All wording except "Sunny Scotch" is disclaimed apart from the mark as shown.
FOR WHISKY.
Claims use since July 10, 1935.

Reg. No. 335,882. Registered June 16, 1936. GLENMORE DISTILLERIES COMPANY, Owensboro, Ky. Republished by Glenmore Distilleries Company, Louisville and Owensboro, Ky., a corporation of Delaware.

COLONEL GLEN

FOR WHISKEY.
Claims use since Jan. 7, 1935.

Reg. No. 432,362. Registered Sept. 2, 1947. AUSTIN, NICHOLS & CO., INCORPORATED, Brooklyn, N. Y., a corporation of Virginia. Republished by registrant.

Grand Mouquin

The word "Grand" is disclaimed apart from the mark as shown.
FOR LIQUEUR.
Claims use since Sept. 4, 1945.

CLASS 50

MERCHANDISE NOT OTHERWISE CLASSIFIED

Reg. No. 338,857. Registered Sept. 15, 1936. THE KOVA KNIT CO., New York, N. Y. Republished by Fidelity Machine Company, Inc., Philadelphia, Pa., a corporation of Pennsylvania.

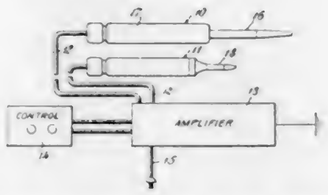
'CAMOUFLAGE'

FOR FABRIC COVERINGS FOR HOUSEHOLD CONTAINERS, SUCH AS CANS OR HOLDERS FOR DISINFECTANTS, DEODORIZERS, CLEANSERS, AND LIKE MATERIALS.
Claims use since Feb. 4, 1935.

PLANT PATENTS

GRANTED OCTOBER 12, 1948

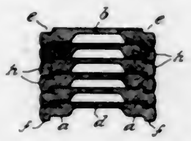
Owing to the fact that almost all of the illustrations of the plant patents are in colors, it is not practicable to print a cut of the drawing.



808
APRICOT TREE
Marshall E. Francisco, Fresno, Calif.
Application December 16, 1946, Serial No. 716,589
1 Claim. (Cl. 47—62)

The variety of apricot tree herein described and illustrated characterized particularly by large fruit buds in the dormant stage; by its vigorous growing habits, by tolerance to heat and cold; by its heavy production of fruit of superior size and color; by the fruit's firmness of flesh and resulting superior shipping, drying, and canning qualities; and by the fruit's ripening from the outside inwardly as distinguished from the reverse procedure commonly known in apricots.

PATENTS



GRANTED OCTOBER 12, 1948

2,450,868
VARIABLE TRANSFORMER
Samuel Berman, Richmond Hill, N. Y., assignor to Waugh Equipment Company, New York, N. Y., a corporation of Maine
Original application April 13, 1943, Serial No. 482,860, now Patent No. 2,437,455, dated March 9, 1948. Divided and this application February 14, 1945, Serial No. 577,910
9 Claims. (Cl. 171—119)

9. A control transformer which comprises a primary winding, a pair of axially aligned secondary windings in inductive relation to respective sections of the primary and connected in series opposition, stationary cores, one within each secondary, the cores being in axial alignment, a non-magnetic member forming a closed circuit of greater diameter than the windings, a casing enclosing the windings, cores, and member, the casing having a lengthwise slot, an element attached to the member and projecting out of the casing through the slot, the element extending lengthwise of the windings, and a rotary member outside the casing and mounted for rotation on a fixed axis transverse to the axis of the windings, the rotary member engaging the element and being manually operable to move the element and non-magnetic member lengthwise of the windings.

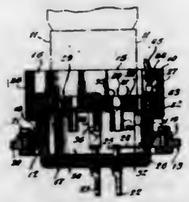
2,450,869
LEAF SPRING
Walter Richard Berry, Leeds, England, assignor to Jonas Woodhead & Sons Limited, Leeds, England
Application May 2, 1945, Serial No. 591,459
In Great Britain October 14, 1944
2 Claims. (Cl. 267—47)

1. A plate for laminated springs having a tension face and a compression face; open side grooves at the marginal edges of said tension face; a central longitudinal groove extending partly across said compression face; and downward stepped ribs along the marginal edges of said compression face so as to provide for interlocking engagement with adjacent plates of similar shape.

2,450,870
PROCESS OF MAKING MANGANOUS SULFATE
Charles C. Daugherty, Siler City, N. C., assignor to The Chatham Chemical Company, Siler City, N. C., a corporation of North Carolina
No Drawing. Application September 20, 1945, Serial No. 617,692
7 Claims. (Cl. 23—117)

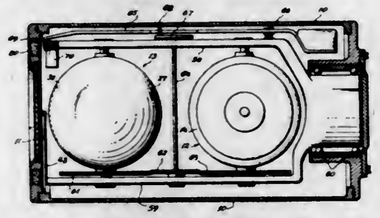
2. The process of extracting maganese from ore containing a substantial proportion of manganese dioxide which comprises treating said ore with a mixture of sulphuric acid and a material composed of a major portion of cellulose whereby the manganese in said ore is transformed into manganous sulphate, and, thereafter, recovering the manganous sulphate from the reaction mixture.

2,450,871
RELATIVE TEMPERATURE INDICATOR
Paul F. Adair, Dayton, Ohio
Application June 20, 1947, Serial No. 756,079
7 Claims. (Cl. 73—359)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



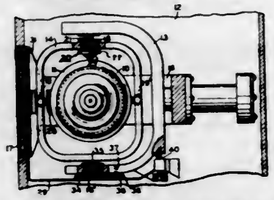
1. In a portable testing device for electrically determining relative temperatures of different portions of an electrically conductive metallic apparatus; electrically responsive gauge means calibrated to indicate relative temperatures in predetermined ratio to electrical current impressed on the gauge means; a pair of electrical conductors connected to the gauge means for the actuation thereof; a connector on one of said conductors for detachably connecting the same electrically to the apparatus to be tested; a testing contact member comprising a stem; a manipulating handle therefor; a contact tip on the end of the stem for electrical contact with portions of the apparatus to be tested for relative temperatures, composed of metal dissimilar from the metal of the portions of the apparatus to be contacted thereby and electrically connected to the other of the aforesaid electrical conductors, whereby the dissimilar metals at the tip and in the apparatus in contact with the tip constitute a thermocouple at the instant of contact, utilizing the electrically conductive portions of the apparatus being tested between the contacting tip and the detachable conductor to complete the thermocouple circuit to the gauge means; and a normally closed shunt circuit between the two conductors including means for interrupting said shunting circuit after said contact tip is brought into testing contact with the portions of said apparatus to be tested.

2,450,872
CONDENSER TESTER
Elmer W. Aiken, Dayton, Ohio, assignor to the United States of America as represented by the Secretary of War
Application June 27, 1944, Serial No. 542,421
1 Claim. (Cl. 175—183)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



An apparatus for testing capacitors comprising a switch normally biased in open position, a releasable latch to retain said switch closed upon closure thereof, a release coil for releasing said latch to restore said switch to open position, a circuit for connecting a capacitor to be tested in series with said coil and switch to a source of variable direct-current potential, whereby upon closure of said switch the potential of said source will be impressed upon said capacitor, breakdown of said capacitor causing a current surge through said coil to release said latch and open said switch, and means to disconnect said circuit from said source and connect it across a short circuiting element whereby a capacitor which has not broken down may be discharged through said coil, said coil being so constructed that it will release said latch in response to the discharge current of said capacitor and open said switch.

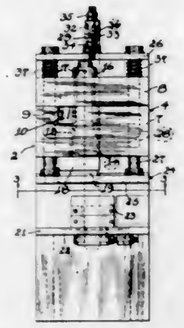
2,450,873
TUBE SOCKET
Charles Antony, Jr., Rockville Centre, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Application September 27, 1943, Serial No. 504,036
4 Claims. (Cl. 173—328)



4. A combined tube socket and closure element comprising a generally cup-shaped receptacle of electrical insulating material open at the top and closed at the base, first terminal means disposed on a diaphragm within said receptacle and adapted to receive and grip the prongs of a tube, second terminal means adapted to be electrically connected to said first terminal means and extending exteriorly of the base of said receptacle, and third terminal means arranged interiorly of said receptacle in radially spaced relation to said first terminal means, said third terminal means simultaneously electrically connecting said first and second terminal means to each other and to an exteriorly extending conductor and serving at least in part to fasten said diaphragm within said receptacle.

2,450,874
GYRO VERTICAL INSTRUMENT
Frederick D. Braddon, Babylon, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Application August 16, 1943, Serial No. 498,742
4 Claims. (Cl. 33—204)

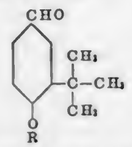
1. In a horizon compass instrument, the combination with a gyro rotor case and compass housing, of, a common gimbal mounting on which said case and compass housing are respectively supported for movement about parallel axes, a horizon bar pivotally mounted on the gimbal mounting, a gear train carried in the gimbal mounting coupling the case and housing about the respective parallel axes thereof including an idler gear, and drive means connecting the idler gear and horizon bar.



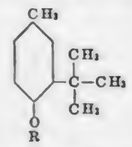
2,450,875
GYROSCOPIC INSTRUMENT
Frederick D. Braddon, Babylon, and Lennox Frederick Beach, Port Washington, N. Y., assignors to The Sperry Corporation, a corporation of Delaware
Application October 8, 1943, Serial No. 505,512
11 Claims. (Cl. 33—204)

4. Means for preventing a gimbal lock condition in a gyroscopic instrument having a rotor case, said means including a main gimbal, an auxiliary gimbal carrying said case pivotally mounted on the main gimbal with the axes of the respective gimbals mutually perpendicular, and a coupling, one part of which is located on the case and the other part of which is situated on the main gimbal, that normally locks the auxiliary gimbal to the case, the connecting ends of the respective coupling parts being constructed to release the auxiliary gimbal from a locked condition when the main gimbal is inclined more than a predetermined amount from its normal position relative to the auxiliary gimbal.

10. A completely maneuverable gyroscopic artificial horizon having a gimbal mounted rotor case including a longitudinally slotted horizon bar pivotally mounted in the gimbal, and mechanism for positioning the bar comprising first and second engaged gear means having a 2 to 1 gear ratio, the first and larger of which is positioned by the rotor case and the second and smaller of which is rotatably mounted on the gimbal, said second gear having a pin engaging the slot in the horizon bar.



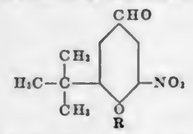
2,450,876
WIRE TWISTING DEVICE
Svend G. Blumensaadt, Beachwood Village, and Frank A. Bielak, Fairview Village, Ohio, assignors to Universal Wire Spring Company, Cleveland, Ohio, a corporation of Ohio
Application September 19, 1945, Serial No. 617,226
26 Claims. (Cl. 140—71)



1. In a device for twisting the connecting wire portions of adjoining left and right-hand loops of corrugated wire strips, supporting and holding means for a corrugated wire strip, other supporting and holding means spaced from said first means and pivotally arranged with respect thereto, and aligning means arranged to align a loop connecting wire portion of a corrugated wire strip with the pivot axis of said other supporting and holding means.

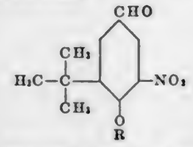
2,450,877
3-TERTIARY-BUTYL-4-ALKOXY BENZALDEHYDES.
Marion Scott Carpenter, Nutley, and William M. Easter, Jr., Lodi, N. J., assignors to Burton T. Bush, Inc., New York, N. Y., a corporation of New Jersey
No Drawing. Application May 24, 1947, Serial No. 750,355
7 Claims. (Cl. 260—599)

4. The process for preparing compounds having the structural formula:



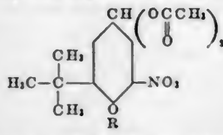
wherein R is selected from the group consisting of CH_3 and C_2H_5, which comprises reacting a material having the structural formula:

wherein R has the same significance as above, with manganese dioxide in the presence of sulfuric acid at an elevated temperature.



2,450,878
3-TERTIARY-BUTYL-4-ALKOXY-5-NITRO BENZALDEHYDES
Marion Scott Carpenter, Nutley, and William M. Easter, Jr., Lodi, N. J., assignors to Burton T. Bush, Inc., New York, N. Y., a corporation of New Jersey
No Drawing. Application May 24, 1947, Serial No. 750,356
7 Claims. (Cl. 260—599)

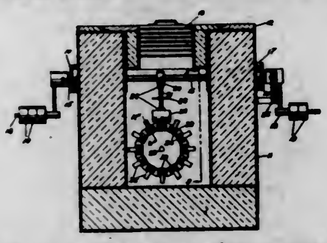
1. Compounds having the structural formula:



wherein R is from the group consisting of CH_3 and C_2H_5.

4. The process for preparing compounds having the structural formula:

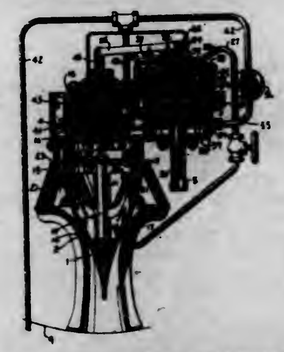
wherein R is selected from the group consisting of CH_3 and C_2H_5, which comprises treating the corresponding non-nitrated compounds with a mixture consisting of acetic acid, acetic anhydride and nitric acid at a temperature within the range of about −10° and +20° C., to form compounds having the structural formula:



and hydrolyzing the latter to form the corresponding aldehydes.

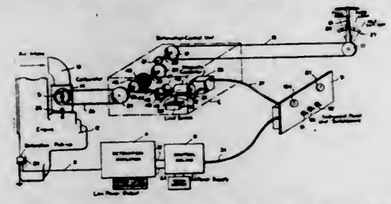
2,450,879
2,4-DI-TERTIARY-BUTYL-5-METHOXY BENZALDEHYDE
Marion Scott Carpenter, Nutley, and William M. Easter, Jr., Lodi, N. J., assignors to Burton T. Bush, Inc., New York, N. Y., a corporation of New Jersey
No Drawing. Application May 24, 1947, Serial No. 750,358
3 Claims. (Cl. 260—599)

2. The process for preparing 2,4-di-tertiary-butyl-5-methoxy benzaldehyde, which comprises treating 2,4-di-tertiary-butyl-5-methoxy toluene with manganese dioxide in the presence of sulfuric acid at an elevated temperature.



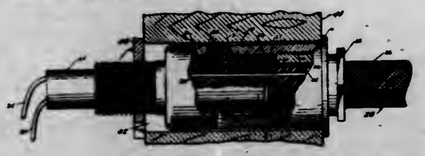
2,450,880
BRITTLE POINT TESTING APPARATUS
Clarence K. Chatten and Saul A. Eller, New York, N. Y.
Application April 10, 1945, Serial No. 587,602
5 Claims. (Cl. 73—15.4)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

3. An apparatus for determining the brittle points of elastic materials comprising a regulable low temperature cabinet, a shaft rotatably mounted in said cabinet and extending therethrough, said shaft being supported by bearings outside said cabinet, means disposed outside said cabinet for turning said shaft and for holding it in any desired position, said means being adapted to receive and hold a varying number of weights with the centers of gravity of said weights offset from the axis of said shaft, an arm radially extending from said shaft inside said cabinet, said arm being adjustably extensible, a hammer affixed to said arm, a stub shaft extending through



one wall of said cabinet, a specimen jig rigidly affixed to the end of said stub shaft within said cabinet, the outer face of said specimen jig being disposed directly below said shaft and being coplanar with it, the outer face of said specimen jig also being perpendicular to said stub shaft, multiple individual specimen clamps on the outer face of said specimen jig, and means affixed to the end of said stub shaft outside said cabinet for rotating said specimen jig and for holding it in any desired position.

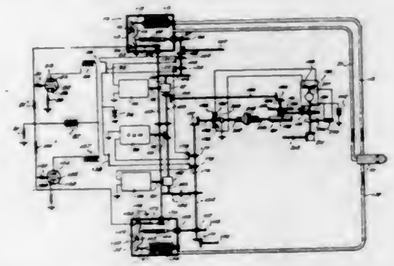
2,450,881
PRESSURE CABIN CONTROL
James B. Cooper and Alfred B. Jepson, Seattle, Wash., assignors to Boeing Airplane Company, a corporation of Delaware
Application October 18, 1941, Serial No. 415,602
10 Claims. (Cl. 98—1.5)



5. A device to control the pressure within an aircraft cabin comprising a valve movable to control outflow from the cabin, valve regulating means operatively connected to said valve, and control means for said valve regulating means including a casing, a diaphragm therein dividing the casing into two chambers and movable to effect actuation of said valve regulating means to move said valve, an evacuated bellows secured to the diaphragm within one casing chamber, and reducing the effective diaphragm area to an annulus which is a given fraction of the total diaphragm area, a port freely open to admit cabin pressure to the other chamber, tending to press said diaphragm in a direction to effect shifting of said valve in a sense to reduce cabin pressure, a spring arranged to oppose such movement of the diaphragm and operable at a predetermined altitude to overcome the air pressure on the cabin pressure side of said diaphragm to effect its movement, and consequently movement of said valve to terminate decrease of cabin pressure at a rate equal to the rate of decrease of ambient atmospheric pressure, a bleed orifice restrictedly admitting air from the cabin to the bellows housing casing chamber, and an orifice for escape of air from the bellows housing casing chamber to the atmosphere to reduce the air pressure on the bellows side of the diaphragm sufficiently to effect its movement, and consequently movement of said valve to decrease cabin pressure at a rate less than the rate of decrease of ambient atmospheric pressure and which is a function of the ratio of the annulus area to the entire diaphragm area, and of the ratio of the area of the bleed orifice to the area of the escape orifice.

2,450,882
DETONATION SUPPRESSION SYSTEM
Philip J. Costa, Franklin Square, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Application March 22, 1944, Serial No. 527,640
39 Claims. (Cl. 123—119)

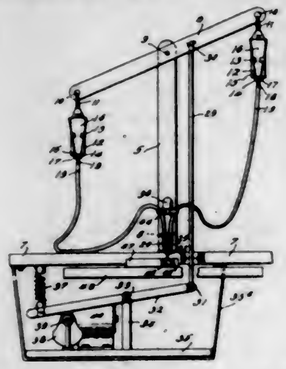
1. A combustion regulating system for a prime mover having combustion pressure enclosing chambers comprising combustion mixture controlling apparatus, and reversible motion producing means unaffected by temperature changes but responsive to detonation in said chambers for varying the adjustment of said combustion mixture controlling apparatus in correlation with changes in the intensity of said detonation.



2,450,883
STUFFING TUBE
Paul M. D'Amico, Philadelphia, Pa.
Application August 13, 1946, Serial No. 690,198
3 Claims. (Cl. 285—72)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A stuffing tube comprising a cylindrical tube having a bore extending axially of said tube and adapted to receive a cable therein, said cable having an insulation covering and an armor sheath surrounding said insulation covering, an integral cylindrical extension of reduced diameter coaxial with and extending beyond said tube and having a bore of smaller diameter than the said bore of

said tube, a flange on said tube at the end opposite to said extension, said bore of said tube being threaded at said opposite end, a first ring slideable on the insulation covering of said cable in said tube bore, a second ring slideable on the armor sheath of said cable and adjacent said first ring, the inner diameter of said first ring being smaller than the inner diameter of said second ring, the portion of the armor between said first and second rings being outwardly flared and folded back over said second ring, a gland nut threadedly engaged with the threaded portion of said tube bore, and packing material substantially filling the space within said tube bore between the reduced diameter extension and said first ring, whereby, on tightening of said gland nut, said first and second rings are pressed together clamping the armor sheath therebetween.



2,450,884
PRESSURE MEASURING APPARATUS
Edward Dawson, New York, and John Rowland Ericson, Westbury, N. Y., assignors to The Sperry Corporation, a corporation of Delaware
Application July 27, 1944, Serial No. 546,868
18 Claims. (Cl. 73—205)

4. Measuring apparatus comprising a lever, a bellows connected to said lever and adapted to exert a force thereon according to the condition being measured, a force-applying device connected to said lever for applying an opposing force to said bellows and means for controlling said force applying device including a constant speed motor, an intermittently operable motor, means for controlling the speed of said intermittently operable motor by said lever according to the difference between said forces, and differential means driven by said motors for adjusting said force-applying device according to the difference between the speeds of said motors to equate said opposing force to said exerted force.

2,450,885
MEANS FOR AND METHOD OF MAKING ARTIFICIAL TEETH
Reiner W. Erdle, Chicago, Ill., assignor to Dental Research Corporation, Chicago, Ill., a corporation of Illinois
Application February 17, 1944, Serial No. 522,706
12 Claims. (Cl. 25—156)

7. The method of charging a mold cavity with a porcelain-like mix, which comprises moving a body of fluid mix of a liquid and ground porcelain-like material back and forth in a conduit having a discharge outlet adapted to be positioned immediately adjacent to the inlet to the mold cavity, and, during the back and forth movement of said mix in said conduit and while the porcelain-like particles are maintained by such movement in a substantially complete state of suspension in the liquid content of the mix, introducing

the mix from the conduit into the mold cavity through said discharge outlet.

2,450,886
SEMICONDUCTOR
Charles Alexander Escoffery, East Orange, N. J., and Madeline Duane Merva, Bernice, Pa., assignors to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
No Drawing. Application November 20, 1944, Serial No. 564,408
1 Claim. (Cl. 175—366)

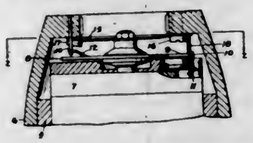
In a process for manufacturing selenium rectifier elements the improvement that comprises incorporating in the selenium layer a minor proportion of a single substance selected from the class consisting of iodine compounds of chlorine and iodine compounds of bromine.

2,450,887
SEMICONDUCTOR
Charles Alexander Escoffery, East Orange, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
No Drawing. Application November 20, 1944, Serial No. 564,409
1 Claim. (Cl. 175—36.6)

In a process for manufacturing selenium rectifier elements the improvement that comprises incorporating in the selenium layer a minor proportion of a plurality of substances selected from the class consisting of iodine compounds of chlorine and iodine compounds of bromine.

2,450,888
WEAR RESISTANT STEEL
Maurice C. Fetzer and Carl B. Post, Wyomissing, Pa., assignors to The Carpenter Steel Company, Reading, Pa., a corporation of New Jersey
No Drawing. Application July 27, 1946, Serial No. 686,725
4 Claims. (Cl. 75—123)

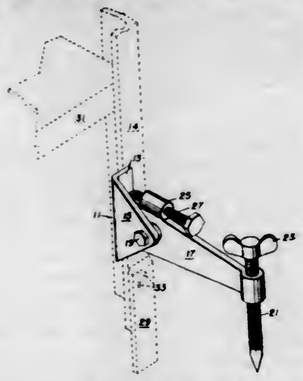
1. The combination of about 1.5 to about 4.5 per cent by weight of columbium carbide, with an alloy steel base, said base containing not less than about 70 per cent by weight of iron, about 0.30 to about 1.50 per cent by weight of carbon and being hardenable by quenching to a Rockwell C hardness not less than about 53, the columbium carbide being composed of columbium and carbon in the weight ratio of about 10 to 1, and the minimum and maximum percentages by weight of columbium carbide being correlated with the per cent by weight of carbon in the hardenable base as follows:



Per cent by weight of Columbium carbide		Per cent by weight of Carbon in the base
Minimum	Maximum	
About 3.6	to about 4.5	About 0.30
About 3.4	to about 4.0	About 0.40
About 3.1	to about 3.6	About 0.50
About 2.7	to about 3.3	About 0.60
About 2.6	to about 3.1	About 0.70
About 2.4	to about 2.9	About 0.80
About 2.2	to about 2.7	About 0.90
About 2.0	to about 2.5	About 1.00
About 1.8	to about 2.4	About 1.10
About 1.7	to about 2.3	About 1.20
About 1.6	to about 2.2	About 1.30
About 1.5	to about 2.1	About 1.40
About 1.5	to about 2.0	About 1.50

2. As an article of manufacture, a fiber comprising casein and salts of casein and fat acids.

2,450,889
MANUFACTURE OF ARTIFICIAL TEXTILE FIBERS
Antonio Ferretti, Milan, Italy; vested in the Attorney General of the United States
No Drawing. Application August 17, 1936, Serial No. 96,470. In Italy August 28, 1935
2 Claims. (Cl. 18—54)



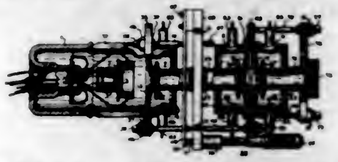
1. The process of manufacturing artificial textile fibres from animal casein prepared by the coagulation of skim milk which process includes forming a viscous spinnable solution by maturating the casein with a caustic alkali to which there is added a mineral constituent selected from the group consisting of sodium and potassium silicates; spinning fibres from the maturated solution and coagulating the same in an acid bath; and rendering the fibres insoluble and deacidifying them.

2,450,890
MECHANICAL TIME FUSE
Eugene J. Fix, Philadelphia, Pa., assignor to the Government of the United States of America as represented by the Secretary of War
Application January 23, 1939, Serial No. 252,417
5 Claims. (Cl. 102—83)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a fuse, a casing comprising relatively rotatable parts, a clockwork carried by one of said parts and including an independently adjustable timing disk adapted to be driven by the clockwork and releasably secured to rotate with the other of said parts, said disk having a peripheral slot, a movable member carried by said one part and adapted to enter the slot of the disk to thereby initiate detonation of the fuse, a setback member fixed to the other part of the casing and arranged to be moved with the timing disk during its independent adjustment, said member having an apron normally masking the slot of the disk and extending over the margin of the disk to thereby normally prevent movement of said member into said slot.

2,450,891
CLAMP
Louis O. Habicht, Thorofare, N. J.
Application November 7, 1946, Serial No. 708,362
5 Claims. (Cl. 248—229)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

5. A clamp comprising an angle iron, an arm secured at one end to a first leg portion of said angle iron, said arm being rotatable in a plane parallel to the face plane of said first leg portion, said arm carrying a first screw distal said angle iron normal to the length of said arm and in said plane, means to feed said first screw relative said arm, a second screw mounted in a lug on an edge of said arm adjacent said angle iron, said second screw being disposed parallel to the length of said arm and in said plane, means to feed said second screw relative the adjacent face of the second leg portion of said angle iron, and means to secure said arm against rotation relative said angle iron.



2,450,892
DELAY POWDER
George C. Hale, Dover, N. J.
No Drawing. Application May 5, 1944, Serial No. 534,289
13 Claims. (Cl. 52—2)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A delay powder which is substantially non-gaseous and non-explosive including a metallic chromate, a metal, and a solid non-metallic element selected from the group consisting of sulphur and phosphorus, said chromate and said metal being present in a finely divided state.

2,450,893
HIGH-FREQUENCY TUBE STRUCTURE
William W. Hansen and John R. Woodyard, Garden City, N. Y., assignors to The Sperry Corporation, a corporation of Delaware
Original application May 17, 1941, Serial No. 393,868. Divided and this application November 28, 1941. Serial No. 420,771
20 Claims. (Cl. 250—27.5)

1. An electric discharge tube comprising means for generating a stream of electrons, a first aper-

tured hollow resonator axially positioned with respect to the path of said stream and adapted to velocity modulate said electron stream, a second hollow apertured resonator also axially positioned with respect to said path, and adapted to be energized by said stream, a drift tube connecting and spacing said first and second resonators to permit electrons in electron flow therebetween and to permit said velocity modulated stream to become bunched, a third hollow apertured resonator axially placed with respect to said path close to said second resonator, said sec-

ond and third resonators being coupled to said electron stream sufficiently far apart to prevent coupling of the third resonator field back to the second resonator field, but sufficiently close that said electron stream undergoes little change in bunching while passing between said second and third resonators, and means for abstracting high frequency energy from said third resonator whereby the abstraction of high frequency energy from said electron discharge tube will not affect the resonating characteristics of said second or first resonators.

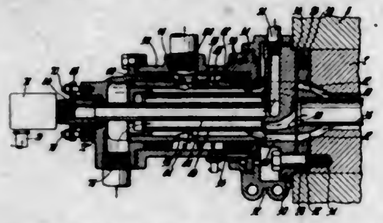
2,450,894

MECHANICAL TIME FUSE

John J. Hart, Bryn Mawr, Pa., assignor to the United States of America as represented by the Secretary of War

Application December 15, 1939, Serial No. 309,418
2 Claims. (Cl. 102—83)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

2. In a fuse of the type having a timing disk in combination, a setting cap for enclosing the timing disk and rotatable relative thereto, a cantilever setting spring secured to the setting cap, a setting lug having a beveled upper surface and depending projection secured to the free end of the setting spring, said depending projection adapted to be interlocked with the timing disk upon depression of the setting spring, a centrifugal spring provided with a weight on one end secured to the setting cap through its end remote from the weight and being biased to normally engage the beveled surface of the setting lug adjacent its weighted end portion to depress the setting spring with said projection interlocked with the timing disk, said weighted end portion of the centrifugal spring being operable by centrifugal force to be disengaged from the beveled surface of the setting lug.



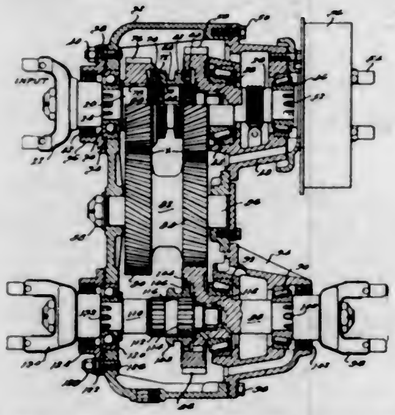
2,450,895

STUFFING BOX

Charles J. Keim, Oil City, Pa., assignor to Oil Well Supply Company, a corporation of New Jersey

Application May 22, 1946, Serial No. 671,535
11 Claims. (Cl. 285—96.3)

1. A stuffing box assembly comprising a rotatable shaft, said shaft having two fluid passageways therein, a spindle fastened to the end of said shaft for rotation therewith, said spindle having three fluid passages therein extending outwardly from the end of said shaft, a stuffing box housing surrounding said spindle, means for connecting said housing to said spindle, a packing gland fastened to the end of said housing, the first of said passages passing through said pack-



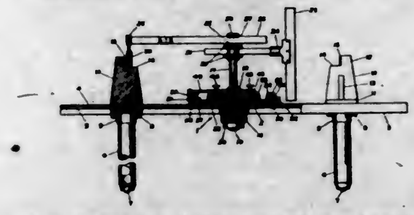
ing gland, a fluid conduit in said housing extending to the outside thereof and communicating with the second passage, said second passage communicatnig with one of said fluid passageways, and a second fluid conduit in said housing extending to the outside thereof and communicating with the third passage, said third passage communicating with the second fluid passageway.

2,450,896

POWER TRANSMISSION MECHANISM

Albert E. Kimberly, Jr., Birmingham, Mich., assignor to Chrysler Corporation, Highland Park, Mich., a corporation of Delaware

Application April 12, 1944, Serial No. 530,602
23 Claims. (Cl. 192—52)



1. Power transmitting mechanism comprising a pair of interengageable rotatable clutch members, a third rotatable member drivingly connected with one of said clutch members and in telescoping relation therewith, said third member and said one clutch member having relative axial movement and there being a pair of axially spaced pilot portions on said third member for guiding said one clutch member between engaged and disengaged positions, said one clutch member being arranged and constructed to have a portion thereof extending axially beyond one of said pilot portions into the space between said pilot portions and short of the other pilot portion when said clutch members are engaged, the said extension being at least equal to the axial extent of said one pilot portion, and there being sufficient piloting clearance between said one clutch member and said one pilot portion to permit limited axial misalignment of said one clutch member relative to said third member upon drive of said clutch members when engaged whereby said extending portion of said one clutch member may be urged into blocking position relative to said other pilot portion to oppose tendency of said one clutch member to become self disengaged.

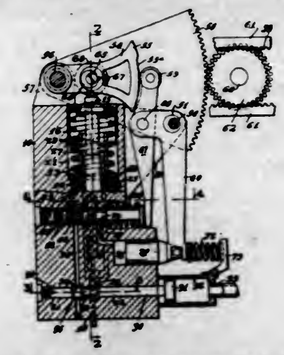
2,450,897

FIXTURE FOR SUPPORTING AND GAUGING BRUSH RIGGINGS OF MOTORS AND GENERATORS

Herbert E. Krueger, Vallejo, Calif.

Application October 26, 1945, Serial No. 624,924
8 Claims. (Cl. 33—181)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

3. A supporting fixture including, a base having an annular portion and outwardly-directed radial portions, supporting means adjustably fastened to the radial portions and movable relative thereto radially for maintaining brush riggings of various diameters in fixed positions, a support rotatably mounted axially in and extending axially from the annular portion of the base, a gage arm slidably carried by a portion of the support axially remote from said annular portion of said base, an annular protractor element rotatably mounted upon said annular base portion, a first annular member rotatably mounted on said support and having pointer means cooperating with the protractor element, a second annular member rotatably mounted on the support, retractable means carried by the annular base portion for locking the second member against rotation in adjusted positions, and means for adjustably fastening the first member to said support and second member whereby the supports and members may be rotated together or relative to each other.



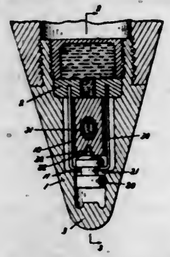
2,450,898

FUEL INJECTOR CONTROL MECHANISM FOR FREE PISTON ENGINES

Frank M. Lewis, Weston, Mass., assignor, by mesne assignments, to Lima-Hamilton Corporation, Hamilton, Ohio, a corporation of Virginia

Application October 5, 1944, Serial No. 557,284
22 Claims. (Cl. 123—46)

12. In an internal combustion engine of the free piston type having a piston synchronizing means and a fuel injection nozzle with a fuel supply passage thereto, a control valve for said passage, means connected to and actuated by said synchronizing means to move said valve to open said passage in predetermined spaced relation to the end of the piston compression stroke, a pump plunger operable by said connecting means to pump a fuel charge into said passage during a compression stroke of the pistons and before an opening of said valve, means resisting a pumping stroke of the plunger and operable to return it to starting position, means operable to resist the compression of a charge in said passage by the pump plunger and to forcefully eject the charge therefrom to the nozzle when said passage is open, means forming a relief passage from said first passage around the valve and controlled by said last means whereby the relief passage is



closed to the fuel passage during the compressing of a charge in the fuel passage and its forceful ejection therefrom and is open to the fuel passage after the ejection of a charge, said pump plunger cooperating with said relief passage to close it except when the pump plunger is at substantially the inner end of its fuel charge compressing movement.

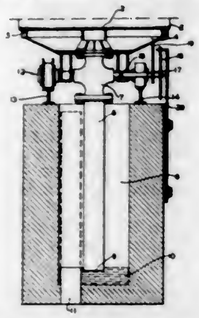
2,450,899

FUSE

Lyle K. Liljegren, Alexandria, Va.

Application February 14, 1944, Serial No. 522,289
1 Claim. (Cl. 102—79)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

In a point detonating fuze for a rotating projectile, a nose having a cylindrical axial passage opening rearwardly into a circular opening, a cylindrical block rotatably mounted in said circular opening, said block having a detonating passing diametral thereof and a peripheral detent cup disposed at an angle relatively to the central axis of said passage, a plug slidably mounted in said passage for movement therein in response to deceleration thereof, a projection on said plug to be received in said cup in a first rotational position of said block to prevent rotation thereof, and to be aligned with said passage in a second rotational position of said block, a plurality of spring wires each anchored at one end to said fuze and provided with stop means at its free end adapted to be received in an annular groove in said plug to hold said plug with said projection in said cup, said circular opening having a flat end wall



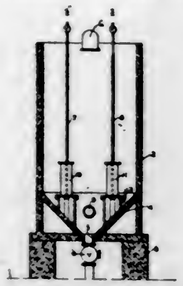
remote from and transversely across the axis of said passage, said block having a flat surface adapted to seat on the flat end wall of said opening to locate said block in first position and to abut the side wall of said opening to locate said block in second position when the block is moved thereto in response to centrifugal force after release by movement of said projection out of said cup.

2,450,900

MACHINE FOR FORMING ARTICLES FROM A LIQUID SLURRY

John D. Lyall, Lancaster Township, Lancaster County, Pa., assignor to Armstrong Cork Company, Lancaster, Pa., a corporation of Pennsylvania

Application April 23, 1943, Serial No. 484,220
10 Claims. (Cl. 92—54)



1. In a machine for the manufacture of mineral wool board and the like in which molds are moved along a path of travel into various operating stations, a closed tube extending below the mold and movable therewith, said tube having its outlet sealed in a water bath, and means for maintaining a predetermined level of water in said bath.

2,450,901

METHOD OF TREATING LIQUID SLURRIES TO SEPARATE FIBERS FROM HEAVIER PARTICLES

John D. Lyall, Lancaster Township, Lancaster County, Pa., assignor to Armstrong Cork Company, Lancaster, Pa., a corporation of Pennsylvania

Application April 30, 1943, Serial No. 485,209
6 Claims. (Cl. 209—159)

6. In a method of treating a liquid slurry containing fibers and undesirable heavier particles, a substantial portion of the solids of the slurry having a tendency to settle out, the steps of establishing a circulatory movement within the body of slurry in a generally upwardly and downwardly direction by injecting a stream of air downwardly into the slurry, confining the upwardly moving portion of the slurry separate from the downwardly moving portion in a zone spaced from and above the point of air injection and accelerating the upwardly moving portion of the slurry with respect to the downwardly moving portion in said zone, adjusting the differential in rate between the upwardly and downwardly moving portions to draw the fibers out of their downward travel and into the upwardly moving portion but insufficient to draw the undesirable heavy particles out of the downwardly moving portion, permitting said heavier particles to settle out, and withdrawing the slurry of suspended fibers from a point above the level of the settled heavier particles.

2,450,902

DECORATION OF GLASS FABRICS

Carl M. Marberg, Elmhurst, Long Island, N. Y., assignor to Interchemical Corporation, New York, N. Y., a corporation of Ohio

No Drawing. Application October 18, 1941, Serial No. 415,625
5 Claims. (Cl. 260—29.4)

2. A composition adapted for application to glass fabrics comprising pigment dispersed in a vehicle comprising a solution of a heat convertible resin prepared from formaldehyde and a substance selected from the group consisting of carbamide, melamine, biuret, guanidine and dicyanodiamide, and a vinyl chloride-vinyl acetate interpolymer in which the vinyl chloride forms the major portion, having emulsified therein an inner aqueous phase comprising at least 20% of the composition by weight, the vinyl chloride-vinyl acetate interpolymer comprising at least 50% of the pigment binder in the composition and the heat-convertible resin comprising at least about 10% of the weight of the vinyl interpolymer.

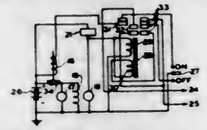
2,450,903

PHOSPHORUS ACID ESTERS OF PETROLEUM PHENOLS

Louis A. Mikeska, Westfield, N. J., assignor to Standard Oil Development Company, a corporation of Delaware

No Drawing. Application January 17, 1945, Serial No. 573,312
2 Claims. (Cl. 260—461)

1. Liquid phosphorus acid esters of petroleum phenols having at least 11 carbon atoms and boiling above 150° C. at 6 mm. pressure, said esters being soluble in hydrocarbon oils at room temperature in all proportions.



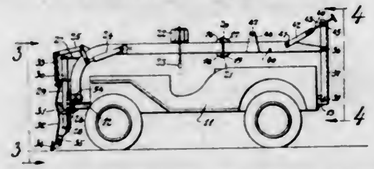
2,450,904

REMOTE-CONTROL SYSTEM FOR PRIME MOVER DYNAMO PLANTS

John L. Moncrief, Eatontown, N. J.

Original application July 12, 1944, Serial No. 544,622. Divided and this application March 18, 1947, Serial No. 735,351
6 Claims. (Cl. 290—37)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

6. In combination, an internal combustion engine including a magneto ignition system, an electric generator adapted to be driven by said engine, a motor adapted to start the engine, means for starting said motor and actuating the ignition system, a single, two-coil relay including an energizing and a de-energizing coil, a plurality of contacts operable by said relay, a remote control switch, said motor energizing means comprising a control circuit, including one of said contacts, operable by said control switch, said energizing coil connected to said generator to be energized thereby and adapted to actuate to open position



said contact in the control circuit of the motor energizing means, and a stopping circuit, including said generator, de-energizing coil, switch, and one of said relay-operable contacts, said stopping circuit adapted to be closed by said switch, whereby current may pass from the generator to the de-energizing coil to neutralize the energizing coil and thus effect stopping of the engine.

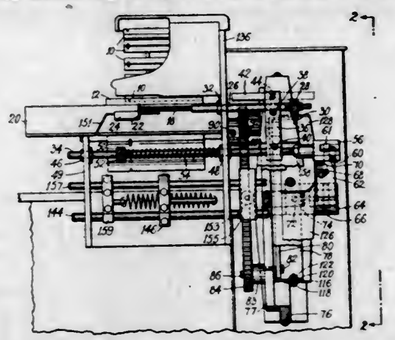
2,450,905

BULLDOZER ATTACHMENT FOR JEEPS

George W. Mork, South Milwaukee, Wis., assignor to Bucyrus-Erie Company, South Milwaukee, Wis., a corporation of Delaware

Application October 11, 1945, Serial No. 621,703
19 Claims. (Cl. 37—144)

13. In an attachment, for use on a vehicle, the combination of: a beam to extend from front to rear of the vehicle above the vehicle, said beam having a substantially vertical portion at its forward end; means for securing this beam to the vehicle, said means comprising means removably engaging one end of the vehicle and means releasably clampable to the other end of the vehicle; a material-handling instrumentality, carried by said substantially vertical portion, and vertically slidable with respect thereto; and means to raise and lower said instrumentality.



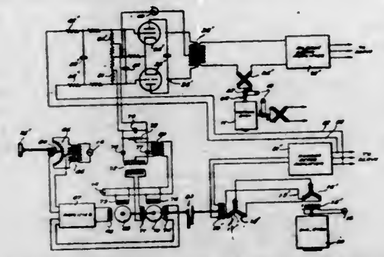
2,450,906

NECKTIE MACHINE

Max M. Newman, New York, N. Y., assignor to American Machine & Foundry Company, a corporation of New Jersey

Application December 30, 1942, Serial No. 470,596
2 Claims. (Cl. 112—136)

1. In a sewing machine for sewing together the overlapped longitudinal edges of a fabric, the combination with stitch-forming and feeding mechanism, of means operating in timed relation to the operation of said mechanism for guiding the fabric to form a stitch line of the side seam type, said means including a fabric guide arranged to engage the interior of the fold line of the fabric, and a pattern band, said pattern band including a rotary member revolving about a horizontal axis extending transversely of the fabric, a set of cam pieces secured on the periphery of said member, and said means also including a cam follower connected to said guide and engaging one edge of the cam pieces, and a device urging said follower against said edge of the cam pieces, said cam pieces having a predetermined configuration for displacing said guide transversely of the fabric to produce a side seam stitch line extending inwardly along the fabric edges in a direction toward the fold line from a point adjacent the leading end of the fabric to a point intermediate the fabric ends, and thence extending outwardly along the fabric edges in a direction toward the fabric edges from said point toward the trailing end of the fabric, said cam pieces including a stationary cam piece, a cam



piece movable axially of said rotary member, a cam piece pivotally connected at one end to said stationary cam piece and movably connected to said axially movable cam piece, and a pair of cam pieces movably connected to each other, one cam piece of said pair being pivotally connected to said stationary cam piece and the other cam piece of said pair being movably connected to said axially movable cam piece whereby said pivoted cam pieces may be swung outwardly on their pivotal connections and said movable cam pieces may be moved outwardly to permit various shapes of side seams to be obtained.

2,450,907

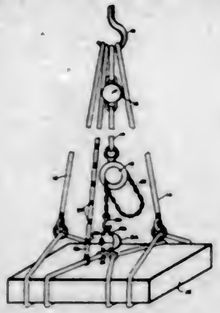
TURN CONTROL MEANS FOR AN AUTOMATIC PILOT

John C. Newton, Bayside, and Percy Halpert, Hempstead, N. Y., assignors to The Sperry Corporation, a corporation of Delaware

Application April 15, 1944, Serial No. 531,185
23 Claims. (Cl. 244—77)

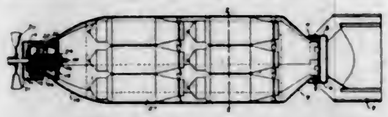
17. In an aircraft automatic pilot, a servo motor connected to operate one of the control surfaces of the craft, means for producing a signal corresponding to a desired rate of turn of the craft, motive means responsive to said turn signal to selectively rotate in the direction governed by and at a speed proportional to said signal, and a constant frequency generator driven by said motive means to provide a signal for operating

said servo motor whose amplitude varies with the speed of rotation of said motive means and whose phase depends on the direction of rotation of said motive means.



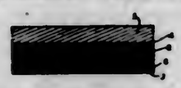
2,450,908
CONDUIT RECEPTACLE
Joseph F. O'Brien, Lebanon, and Earl S. Boynton, East Orange, N. J., assignors to John B. Pierce Foundation, New York, N. Y., a corporation of New York
Application August 2, 1944, Serial No. 547,767
4 Claims. (Cl. 174—59)

4. An electrical feed receptacle for a seriatim connected conduit system, the units of which are provided each at one end with a male formation and at the opposite end with a female formation, comprising a base member having an inlet for the reception from the rear thereof of supply electrical conductors, the body portion of said base member being provided at its front face with mutually parallel channels; a top member provided with an opening registering with said inlet and having at the rear face of its body portion mutually parallel channels and respectively coincident with said mutually parallel channels of said base member whereby to form channels for the reception and retention therein of electrical conductors; means for securing said top member relative to said base member; devices carried at the front face of said top member for securing the terminals of said supply electrical conductors, said devices extending through said top member to respectively connect with said second named electrical conductors; extensions projecting respectively at the opposite ends of said base member provided at their respective front faces with mutually parallel channels in continuation of said mutually parallel channels of the body portion of said base member for the reception and retention of said second named electrical conductors; extensions projecting respectively at the opposite ends of said top member and provided at their rear faces with mutually parallel channels in continuation of said mutually parallel channels of the body portion of said top member; said extension of said base member at one end forming with said extension of said top member at said end a male formation, said extension of said base member at its other end forming with said extension of said top member at said end a female formation; and cover means for said top member for concealing said devices and the terminal portions of said supply electrical conductors.



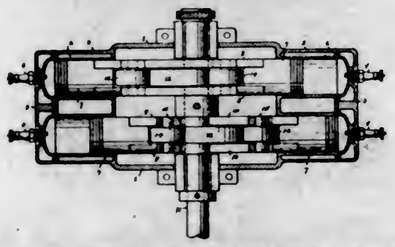
2,450,909
HYDROSTATIC TESTING DEVICE
Harold D. O'Neil, Hatboro, Pa.
Application June 17, 1946, Serial No. 677,141
3 Claims. (Cl. 73—4)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. Apparatus for testing an object under adjustable tension, said apparatus comprising a support; a sling depending from said support; a weight supported by said sling below said support; a tension line extending from said support to said weight, said tension line including means for adjusting tension in said line, means for indicating tension in said line, and means for mounting the object in the line subject to the



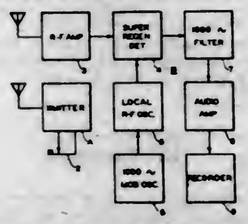
adjusted tension; and a linear scale extending vertically from the mounting means to indicate distance upward from the object.

2,450,910
AERIAL BOMB
George M. O'Rear, United States Navy
Application October 7, 1938, Serial No. 233,775
1 Claim. (Cl. 102—7.2)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



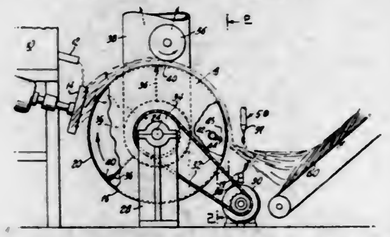
A bomb assembly adapted to contain a plurality of individual missiles, comprising a plurality of staves which normally form the side walls of a bomb container, means closing one end of said container and releasably holding the staves in their assembled state at that end, and a second means closing the other end of said container and releasably holding the staves in their assembled state at that end, a fuse assembly located at said other end of said container, said assembly comprising an internally threaded member, a shaft threaded therein, a wind operated fan fixed to said shaft, a collar rigidly secured to said shaft and normally preventing removal of said second stave holding means, and means engageable and movable by said collar after a predetermined rotation of said fan, said means when moved a sufficient distance being adapted to remove said second stave holding means whereby said staves are released and said container will fall apart in flight.

2,450,911
ACOUSTICAL STRUCTURE
Arthur D. Park and Norman A. Johnson, Lancaster, Pa., assignors to Armstrong Cork Company, Lancaster, Pa., a corporation of Pennsylvania
Application July 20, 1943, Serial No. 495,426
6 Claims. (Cl. 20—4)



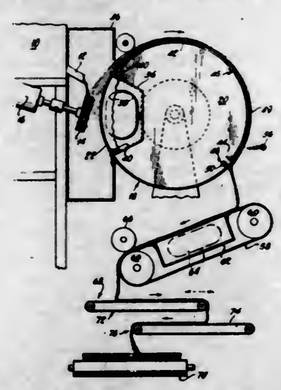
1. In a sound absorbing structure for walls and other surfaces, a base, a plurality of mats of highly porous, sound absorbing, inorganic fibrous material disposed over the base and presenting a rough and irregular outer surface, and a decorative facing in sheet form disposed over a plurality of said mats and adhesively joined to said mats and presenting a substantially planar exposed surface bridging over the irregular surface contour and joints between said mats, said facing comprising a thin, open, preformed, self-sustaining web of felted glass fibers characterized by an inherent tendency to return to its original position when bent and released, which characteristic results in the facing web lying flat and planar regardless of the irregularities in the sound absorbing mats to which the web is attached.

2,450,912
INTERNAL-COMBUSTION MOTOR WITH PISTONS SYMMETRICALLY ARRANGED ABOUT CAMS ON THE DRIVE SHAFT
James Boyd Putnam, El Campo, Tex.
Application May 5, 1944, Serial No. 534,298
2 Claims. (Cl. 121—120)



1. In an internal combustion motor a piston assembly comprising a pair of opposed pistons spaced apart, a pair of bars which are spaced apart and whose ends are countersunk into the facing ends of the pistons on opposite sides and are secured to said pistons, the outer sides of said ends of said bars conforming, in external contour, to the cylindrical contour of the pistons, said bars being provided with oblong slots which are in alignment, rotatable bearing units mounted on the bars to rotate between the bars and spaced inwardly of the ends of said pistons and being spaced apart and a power takeoff cam mounted between the bars and shaped to constantly contact the rotatable bearing units during the rotation of the cam.

2,450,913
RADIOTELEGRAPHY SUPERREGENERATIVE RECEIVER
Glen Peterson, Asbury Park, N. J.
Application April 4, 1945, Serial No. 586,614
6 Claims. (Cl. 250—8)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



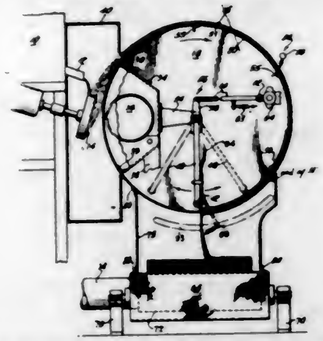
2. The method of translating continuous carrier waves which are interrupted in accordance with an intelligence signal, comprising the steps of locally generating a second continuous wave having substantially the same frequency as said carrier wave and an amplitude which is less than the normal amplitude of said first wave but greater than noise currents present, modulating said second wave with a lower frequency, superregeneratively detecting said first and second waves, filtering from the output of said detector only currents of said lower frequency, and reproducing said filtered output.

2,450,914
APPARATUS AND PROCESS FOR THE MANUFACTURE OF MINERAL WOOL
Edward R. Powell, North Plainfield, N. J., assignor to Johns-Manville Corporation, New York, N. Y., a corporation of New York
Application September 16, 1943, Serial No. 502,572
14 Claims. (Cl. 154—27)

1. In a mineral wool apparatus having means for disintegrating a stream of molten material into fibers, a drum including a fiber receiving area adjacent said means, a foraminous surface on said drum, means for rotating said drum, and means for blowing a current of a gaseous medium through said foraminous surface at a point remote from said fiber receiving area whereby said fibers are forced from said drum.

2,450,915
METHOD AND APPARATUS FOR FORMING MINERAL WOOL PRODUCTS
Edward R. Powell, North Plainfield, N. J., assignor to Johns-Manville Corporation, New York, N. Y., a corporation of New York
Application September 30, 1944, Serial No. 556,541
8 Claims. (Cl. 154—27)

1. In an apparatus for the manufacture of mineral wool felt or the like having fiberizing means for disintegrating a molten material into fibers, an open-work surface adapted to receive a layer of fibers thereon, suction means behind



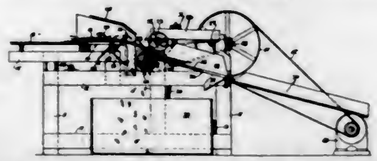
said surface adjacent said fiberizing means, and a shield behind said surface extending from adjacent said suction means and in the direction of rotation of said drum to a point removed from said suction means, and means beyond said shield to remove said fibrous layer from said surface.

2,450,916

APPARATUS FOR FORMING MINERAL WOOL MATS

Harold T. Coss, Plainfield, and Edward R. Powell, North Plainfield, N. J., assignors to Johns-Manville Corporation, New York, N. Y., a corporation of New York

Application September 30, 1944, Serial No. 556,562
12 Claims. (Cl. 154—27)



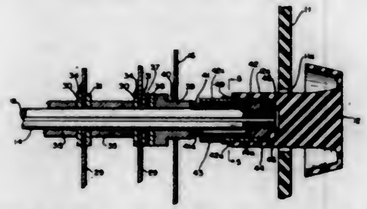
10. In a mineral wool apparatus having means for converting a molten material into fibers, a rotatable drum having an air-pervious surface, means to cause deposit of said fibers to form a thin layer on said surface, means for rotating said drum, receiving means below said drum to receive the layer therefrom, and a nozzle member for removing said layer from said drum and depositing it in folds on said receiving means, said nozzle member comprising a pipe located within said drum and extending axially thereof and having a plurality of nozzles positioned to direct fluid jets through said surface above said receiving means, an oscillatory arm carrying said pipe, means for supplying a fluid under pressure to said pipe through said arm, and means for oscillating said arm to move said pipe through an arc to lay said fiber in folds back and forth across said receiving means.

2,450,917

APPARATUS FOR STRIPPING PODS FROM MILKWEED PLANTS

Cortes F. Reed, Anoka, Minn., assignor to Federal Cartridge Corporation, Minneapolis, Minn., a corporation of Minnesota

Application July 8, 1944, Serial No. 544,081
4 Claims. (Cl. 130—30)



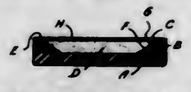
3. An apparatus for stripping pods from milkweed comprising a rotatable raking means comprising a plurality of spaced rake elements mounted for rotation on a shaft and extending outwardly therefrom, the outer ends of the rake elements being curved rearwardly with respect to the direction of the rotation of the shaft, a grate structure composed of a plurality of spaced bars, said bars being bent and having a horizontal portion and a vertical portion, said shaft being disposed beneath the horizontal portion of the bars, said rake elements extending between and above the bars at the horizontal portion and being retractable between the bars at the vertical portion and means for drawing the plants between the rake elements to strip the pods therefrom.

2,450,918

CONTROL APPARATUS FOR RADIO RECEIVERS

Leslie L. Royal, Chicago, Ill., assignor to Belmont Radio Corporation, Chicago, Ill., a corporation of Illinois

Application April 6, 1946, Serial No. 660,027
15 Claims. (Cl. 74—10)



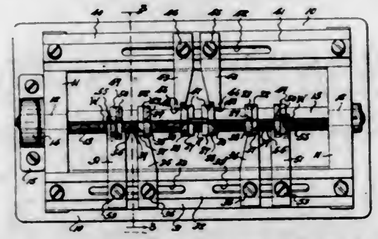
1. In a frequency control device for a radio receiver or transmitter including a movable control element for varying either the inductance or capacitance of a tuning circuit, a selecting member carried on said control element for both fixed and relative movement therewith, frictional means for locking said member and said element in a fixed relative position, and actuating means engageable with said member to move said member and consequently said element as a unit to a position predetermined by the relative position of said element and said member; means for controlling the condition of said frictional means comprising, manually engageable means independent of said actuating means for moving said control element, a bevelled member movable with respect to said control element for increasing or decreasing the frictional effect of said frictional means, a collet having spring fingers at one end thereof engaging the beveled surface of said member, and means responsive to a predetermined movement of said manually engageable means for causing said collet to move said beveled member to vary the condition of said frictional means.

2,450,919

POWDER APPLICATOR

Garland D. Runnels, Seattle, Wash.

Application January 14, 1942, Serial No. 426,667
8 Claims. (Cl. 15—131.1)



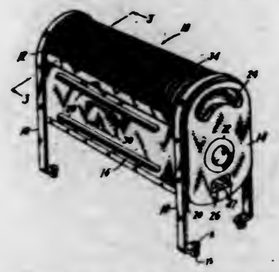
6. In a powder applicator, a body of pliable rubber of substantial thickness so as to be held in the hand when the applicator is in use and having a pocket formed therein which is open at one face of the body, the pocket being surrounded on its sides by a self-sustaining rim of the rubber and being for the reception of powder to be applied to the skin by the applicator, and a cloth having a soft pile outer surface, the cloth being stretched across the opening and sealed to the outer surface of the rim so as to close the opening and the pocket against the escape of powder from the applicator, except from that portion of the cloth which is exposed over the opening, whereby application of the powder to the skin is readily controlled by the user.

2,450,920

WIRE CUTTING AND BENDING PRESS

John A. Shand, West Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York

Application May 30, 1945, Serial No. 596,630
5 Claims. (Cl. 140—71)



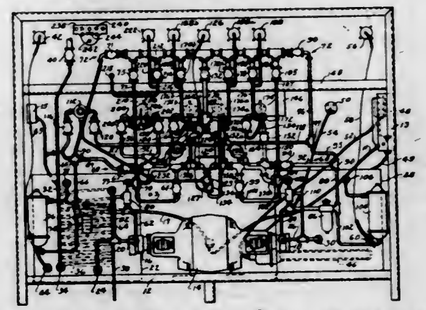
1. A press for the purposes described comprising a framework, a longitudinal rock-shaft centrally journaled in said framework, means to actuate said rock-shaft, wire carriers on said rock-shaft, means to yieldably hold said rock-shaft and its actuating means in a normal initial position adapted to dispose said wire carriers in normal initial upstanding positions, said wire carriers having force pins upstanding from their free ends to engage and hold wire to be operated upon, anvil members supported by said framework to project from one side thereof in opposition to certain of said wire carriers, other anvil members supported by said framework to project from the opposite side thereof in opposition to other of said wire carriers, said wire carriers being adapted to be moved by actuation of said rock-shaft, whereby to engage the wire between said force pins and anvil members to produce desired wire bending effects.

2,450,921

ELECTRIC SPACE HEATER AND METHOD OF MAKING

John Ernest Smith, Plainfield, N. J.

Application May 4, 1946, Serial No. 667,278
8 Claims. (Cl. 219—38)

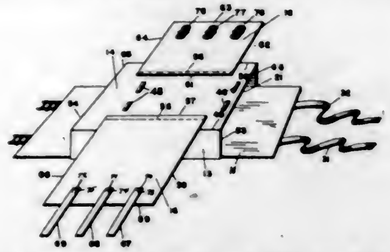


1. In an electrical space heater, a heating core comprising an aluminum body enclosing a resistance element and having a plurality of spaced apart fins held in and by said body, terminals extending from one end of said body, brackets secured to the end fins of said core respectively, and a casing comprising parallel side plates enclosing side edges of said fins, end plates having inturned flange portions and enclosing the ends of said finned heating core, supporting legs for the heater and positioned along said flange portions, the side plates and flange portions interfitting, and screw means securing together the side plates, the supporting legs, the flange portions and the brackets whereby the sides and ends of the heating core are enclosed and the bottom and top are open to cause circulation of air into the bottom of the casing, upwardly through the fin spaces and out of the top of the casing.

2,450,922

OIL REGULATOR TEST STAND

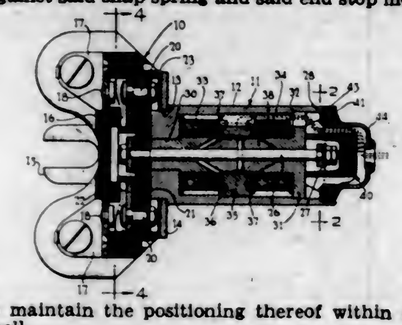
Carl J. Snider, Dayton, Ohio.



Application November 26, 1945, Serial No. 630,966
1 Claim. (Cl. 73—1)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

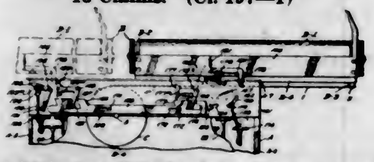
A stand for testing oil regulator valves and the like, which comprises, in combination, a cold oil pump, a hot oil pump, power means for driving both pumps, a relief valve for each pump, a cold oil tank in communication with the suction side of the cold oil pump, a hot oil tank in communication with the suction side of the hot oil pump, a cooling coil in said cold oil tank, valve means to control flow of a coolant through said cooling coil, electric heating means in said hot oil tank, means to control flow of electric current through said electric heating means, an oil temperature gauge for each tank, an upper header, a lower header, a temperature gauge for each header, valve controlled header supply passageways connecting both headers to the cold oil pump, valve controlled header supply passageways connecting both headers to the hot oil pump, valve controlled header/ return passageways connecting both headers to the cold oil tank, valve controlled header return passageways connecting both headers to the hot oil tank, a mixing valve having selectively controlled inlet passageways, one from each pump, and a discharge passageway having a valve controlled branch extending to each header, an accumulator in said discharge passageway, a gauge connected to indicate oil temperature within said accumulator, a sink, adapter pads within the boundary of and above said sink, each said pad having three test openings for connection to corresponding openings in the valve to be tested, a valve controlled passageway connecting the lower header to the front test opening, a valve controlled passageway connecting the lower header to the middle test open-

ing, a valve controlled passageway connecting the upper header to the rear test opening, a three-way valve in the passageways adjacent the test openings, said three-way valves each being adapted to direct oil either to the test opening, to the sink, or to shut off the oil from the test opening, and selectively controllable valves for draining the oil in the sink back to one or the other or both of said tanks.



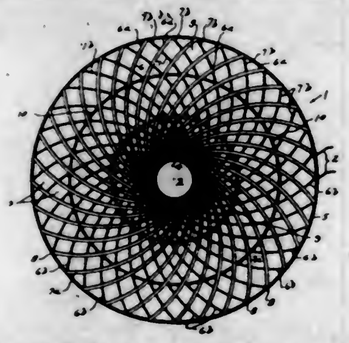
2,450,923
COMBINATION MATTRESS COVER AND BLANKET RETAINER
Edward H. Spiro, Jr., New York, N. Y.
Application January 15, 1945, Serial No. 572,791
7 Claims. (Cl. 5—354)

1. A cover and retainer (for use with a mattress, a sheet, and a blanket) comprising: a casing having top, bottom and side panels, and head and foot open ends through which the mattress may be inserted or removed; said bottom panel being shorter in length than the mattress; said top panel being longer than the length of the mattress so that the ends may be folded downwardly and inwardly about the ends of the mattress; means, a portion of which, is adapted to lie below the bottom of the mattress for detachably interconnecting the opposed ends of the top panel; a pair of wings connected to the bottom panel along longitudinal lines spaced inwardly a substantial distance from the longitudinal edges of the bottom panel, said wings having sufficient width to extend upwardly over the side panels of the casing and to approach each other; and means to adjustably interconnect said wings in a position above the top panel; said sheet and blanket being adapted to overlie the top panel and have their longitudinal edges folded inwardly to frictionally engage between the bottom panel and the portions of the wings lying therebelow.



2,450,924
ELECTROMAGNETIC SWITCH
William E. Stilwell, Jr., Cincinnati, Ohio, assignor to John B. Pierce Foundation, New York, N. Y., a corporation of New York
Continuation of application Serial No. 378,066, February 8, 1941. This application September 18, 1943, Serial No. 502,924
2 Claims. (Cl. 175—337)

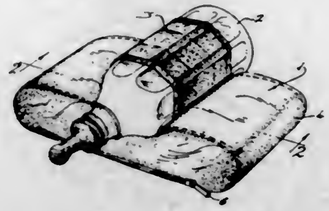
1. Electromagnetic means, comprising a magnetic shell formed with a plurality of concentric bores of successively smaller diameters, the line of demarcation between successive bores being of the nature of angular shoulders, magnetic end stop means and an intermediate magnetic annular member positioned within said shell by engagement with said shoulders, an armature slidably positioned within said annular member for operation between said end stops, a snap spring operatively associated with said armature, and cap means disposed within said shell and bearing against said snap spring and said end stop means



to maintain the positioning thereof within said shell.

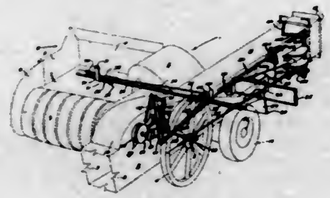
2,450,925
CARRIAGE CONTROLLED STOP SETTING AND KEY OPERATING MECHANISM FOR TYPEWRITING MACHINES
Ferdinand J. Tillman, St. Louis, Mo.
Application June 25, 1942, Serial No. 448,375
13 Claims. (Cl. 197—1)

3. A typing machine having a frame, a carriage on the frame having means for propelling it in one direction, a stop on the frame to limit the return movement of the carriage, key levers, setting means cooperable with one of the key levers and said stop, and means on the carriage to actuate said setting means and the key lever cooperable therewith.



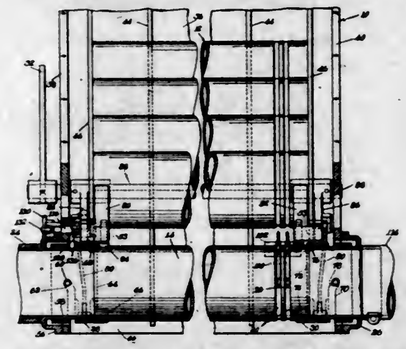
2,450,926
PARACHUTE MADE OF SELF-SUPPORTING RIBBONS WHICH ARE COMPOSED OF BROAD AND NARROW BANDS
Friedrich Stefan Weinig, Stuttgart-Moehringen, Germany
Application August 18, 1947, Serial No. 769,284
9 Claims. (Cl. 244—145)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A parachute canopy having an apex vent, composed of load-sustaining ribbons of unequal



width throughout their length extending across the top of the canopy in pairs at opposite sides of the vent from points at opposite sides of the canopy equally spaced around the skirt of the canopy to provide a canopy of load-sustaining ribbons crossing each other obliquely to form rhombic-shaped openings throughout the canopy area.

2,450,927
BOTTLE HOLDER
Paul E. Allen, Skokie, Ill., assignor to Baby's Pal Company, Chicago, Ill., a corporation of Illinois
Application October 11, 1944, Serial No. 558,133
2 Claims. (Cl. 248—104)



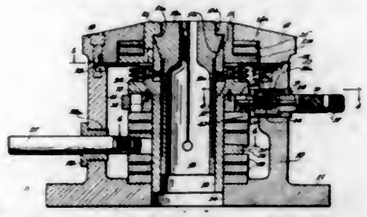
1. A bottle holder for nursing bottles comprising an outer bag and an inner bag fitting conformably within and completely enclosed by but readily removable from or replaceable in the outer bag, the inner bag being provided with a filler consisting of a shiftable and loose mass of relatively heavy mobile particles adapted to conform to a surface on which it is placed for retaining the holder and bottle in any desired position for nursing an infant, the outer bag being formed of a washable fabric providing a protective covering for the inner bag, a closure provided along one edge of the outer bag for quick insertion or replacement of the inner bag with its filler, and an elastic band on and forming an integral part of the upper surface of the outer bag for receiving and retaining a nursing bottle thereon.

2,450,928
HAY BALER
Ira E. Allison, McLoud, Okla.
Application October 8, 1945, Serial No. 620,924
4 Claims. (Cl. 100—24)

1. In hay baling apparatus, the combination with mechanism for driving a divider into a body of compressed hay, of; power driven means for re-setting the mechanism; and power driven means for withdrawing the divider from the hay body.

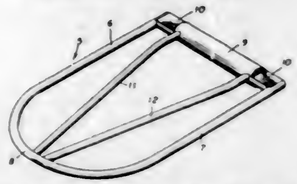
2,450,929
ROCKET LAUNCHER
Fred Ashworth, Wenham, and Chester W. Carter, Topsfield, Mass., assignors to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application September 25, 1946, Serial No. 699,120
11 Claims. (Cl. 89—1.7)

3. In a launcher for tube-mounted rockets, a firing tube, rocket-tube holding means associated with said firing tube, and mechanism operable in one direction to move said holding means into flash-tight engagement with the ends of a rocket-tube in firing position, said mechanism being operable in another direction to separate said holding means from the rocket-tube whereby the latter is permitted to fall out of the launcher by gravity.



2,450,930
ELECTRICAL BRIDGE NETWORK
Theodore Baclawski, Philadelphia, Pa., assignor to Philco Corporation, a corporation of Pennsylvania
Application October 3, 1945, Serial No. 620,154
7 Claims. (Cl. 323—75)

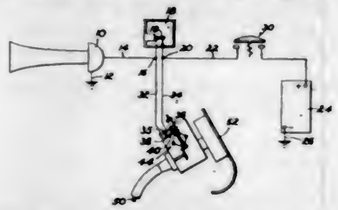
1. An electrical network having a pair of input terminals and a pair of output terminals, said network comprising a set of bridge networks connected in cascade, the one of said bridge networks which contains said input terminals comprising two resistors each of value 3R ohms, a capacitor of value C farads, and an inductor of value L henries, said values being chosen so that the equaiton $R^2=L/C$ is substantially satisfied, said input terminals being placed one at the junction of said two resistors and the other at the junction of said capacitor and said inductor, the second of said bridges being of the same configuration as the first with its input terminals connected one to the junction of one resistor and the capacitor in the first bridge, and the other to the junction of the other resistor and the inductor in the first bridge, the values of the components of said second bridge being proportioned so that the resistors are each of



value 9R ohms, and the ratio of the values of the inductor and capacitor of said second bridge being substantially equal to the square of 3R.

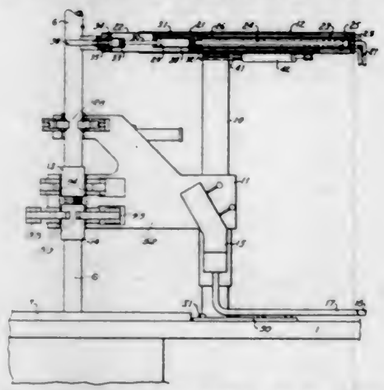
2,450,931
CHUCK
William V. Bault, Watseka, Ill.
Application December 27, 1945, Serial No. 637,341
10 Claims. (Cl. 90—56)

1. A chuck comprising a housing, a contractible work-engaging generally cylindrical collet rotatably supported in the housing, a sleeve surrounding the collet and mounted in the housing for axial movement relative thereto, cooperating cam means supported by the collet and sleeve for contraction of the collet upon axial movement of the sleeve, a wedge ring surrounding the sleeves and confined to axial movement therewith, an elliptical wedge ring surrounding the sleeve and cooperating with the first wedge ring, means supporting the elliptical wedge ring from the housing for movement transversely of the axis of the sleeve, and means for selectively rotating and securing the collet about its axis in said housing.



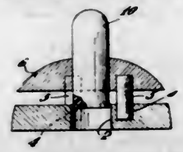
2,450,932
TEXTILE SPREADER
Edward S. Beard, Spring City, Pa.
Application February 27, 1947, Serial No. 731,184
2 Claims. (Cl. 26—55)

1. A tubular fabric spreader for use in the textile industry comprising a frame including a U-shaped portion, a base rod between the ends of the limbs of said U-shaped portion, said base rod having a cylindrical central portion and reduced end-portions, the reduced end-portions being connected to the adjacent ends of the limbs of the U-shaped portion, and a pair of converging reinforcing rods within the confines of said U-shaped portion and connected at their diverging ends to the base rod and connected at their converging ends to the inner marginal surfaces of the central region of the bight of said U-shaped portion, all portions of said frame being in the same plane.



2,450,933
HORN CONTROL
Lawrence D. Bell, Eggertsville, N. Y., assignor to Bell Aircraft Corporation, Wheatfield, N. Y.
Application April 5, 1946, Serial No. 659,706
5 Claims. (Cl. 177—7)

1. A horn control system for automobiles comprising an operating circuit, sound producing means controlled by said circuit, a source of electric current supply, a single manually controlled and normally open switch, an automatic make-and-break switch device continuously actuated during energization substantially at constant frequency and independently of vehicle speed, said sound means, said manual switch, and said make-and-break switch being connected in said operating circuit in series with each other, a shunt circuit directly connected in parallel with said

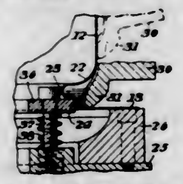


make-and-break switch to by-pass the last mentioned switch and to allow maximum current to flow to the sounding means, a normally open control switch for closing said shunt circuit, and means geared to the automobile for movement in response to variations of speed of travel thereof, said last mentioned means being coupled to said shunt switch for actuation thereof to closed position during operation of the automobile under speeds exceeding a preselected speed of travel.

2,450,934
WELL PIPE HANDLING APPARATUS
Ingram X. Calhoun, Oklahoma City, Okla.
Application May 25, 1946, Serial No. 672,273
5 Claims. (Cl. 255—35)

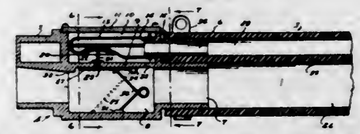
1. Pipe handling equipment for well drilling including in combination with a single supporting post adjacent the drill hole of a well, providing a common mounting for said equipment, the latter comprising a frame oscillatably and vertically displaceable on said post, a jaw carrying member supported by said frame for holding a pipe string in said drill hole, a complementary jaw carrying member above said first member for rotating a pipe section suspended above said pipe string, a third jaw carrying member above said second member for imparting to said suspended pipe section rapid rotation preliminary to the action of said second member, a pipe manipulating arm oscillatably mounted on the upper end of said post and having pipe engaging jaws, hydraulic means associated with each of said members and said manipulator arm for actuating the jaws thereof, a detachable control head on said frame and separate valve means in said head for controlling pressure fluid to and selectively actuating the hydraulic means in each of said jaw carrying members and said manipulator arm.

2,450,935
THERAPEUTIC DEVICE
Charles H. Carr, Boston, Mass.
Application July 10, 1946, Serial No. 682,459
2 Claims. (Cl. 128—1)



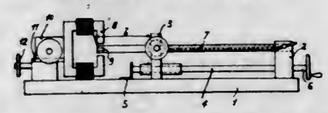
1. A therapeutic device comprising a base, a cap, the cap and base having alined openings, means for yieldingly holding the cap in spaced relation to the base, and a finger made of resilient material having a pressed fit within the opening in said cap, the outer end of said finger projecting from the outer face of said cap and its inner end projecting into the opening in said base with sufficient clearance to permit the cap and finger to be rocked universally relative to said base.

2,450,936
CONDITIONING OF DRILLING FLUIDS
William T. Cardwell, Jr., Whittier, Calif., assignor to California Research Corporation, San Francisco, Calif., a corporation of Delaware
No Drawing. Application February 26, 1945, Serial No. 579,892
8 Claims. (Cl. 252—8.5)



3. An aqueous mud-laden drilling fluid containing an effective amount, up to about 2 pounds per 42 gallons of fluid, of an alkali metal stannate substantially to reduce viscosity and to maintain reduced viscosity at temperatures encountered in well drilling.

2,450,937
APPARATUS FOR MAKING TUBS OR THE LIKE
Robert M. Chesney, deceased, late of Alliance, Ohio, by Jane L. Chesney, executrix, Youngstown, Ohio, assignor to The Alliance Porcelain Products Company, Alliance, Ohio, a corporation of Ohio
Original application November 29, 1941, Serial No. 421,014. Divided and this application April 5, 1945, Serial No. 586,718
3 Claims. (Cl. 153—48)



1. Apparatus for deforming a flat flange extending laterally from a contracted neck in a generally cylindrical member comprising a die ring having a flat surface adapted to engage the flange and a dished surface inwardly of the flat surface, against which the flange may be shaped, a plurality of segmental die blocks having inwardly projecting tongues adapted to engage the flange within the side wall of the member and force the flange against said dished surface, and pivotal mounting means for said blocks whereby they swing outwardly to clear said side wall.

2,450,938
AUTOMATIC SHUTOFF VALVE
Brooks W. Copeland, Prescott, Ariz.
Application June 24, 1946, Serial No. 678,915
2 Claims. (Cl. 226—127)

1. A shut-off valve for gasoline delivery hoses comprising a valve body and a flexible nozzle thereon having a gasoline delivery channel and an air pressure channel; said valve body having a gasoline flow channel connected to said gasoline delivery channel and a bulb compartment having a bulb connected to said air pressure channel, a hinged clapper valve operative in said flow channel and arranged to close in the direction of gasoline flow thru them, and a spring normally holding said valve in opened position out of said gasoline flow channel; a pressure plate operative in said bulb compartment, having a stem in operative relation to said valve; an inflatable bulb connected with the air pressure channel of said nozzle positioned in said bulb compartment and arranged to move said pressure plate stem against said valve tab when inflated so as to initiate closing movement of said valve when back pressure of air is applied by immersion of said nozzle; said valve being arranged so that the said initial closing movement positions it in said flow channel whereby flow of gasoline therethrough forces it to fully closed position.

2,450,939
VIBRATION FATIGUE TESTING METHOD AND MACHINE
Pierre Cor, Paris, France
Application April 20, 1940, Serial No. 330,782
In France April 20, 1939
Section 3, Public Law 690, August 8, 1946
Patent expires April 20, 1959
6 Claims. (Cl. 73—67)

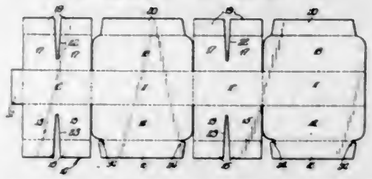
1. A machine for testing the vibration fatigue of materials in the form of test pieces, comprising a main frame, a fixed vise mounted upon said main frame and adapted to clamp one end of said test piece, a vise whose position is adjustable along the test piece, a clamping device mounted on the said adjustable vise and adapted to clamp the test piece at an intermediate point with a given pressure, a first carriage slidable on the said main frame, a second carriage slidable on the first carriage in a direction perpendicular to that of the first carriage, an electro-magnet mounted on the second carriage and adapted to act upon the free end of the test piece in order that it will oscillate, and indicating means which are responsive to the amplitude of the oscillations of the test piece.

2,450,940

POLYAMIDES FROM POLYMERIC FAT ACIDS

John C. Cowan, Lee Bert Falkenburg, and Howard M. Teeter, Peoria, and Philip S. Skell, Urbana, Ill., assignors to the United States of America as represented by the Secretary of Agriculture

No Drawing. Application April 20, 1944, Serial No. 531,966
3 Claims. (Cl. 260—404.5)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. A process of preparing a hard, fusible, polyamide resin soluble in butyl alcohol and insoluble in ethers, esters, and ketones, and having a molecular weight within the range 3,000 to 5,000, and a melting point no lower than 70° C., comprising heating a polymeric substance of the group consisting of polymerized polyene fatty acids, and the esters and anhydrides thereof, with an equivalent amount of ethylene diamine, the temperature of the reaction being maintained initially at no higher than 160° C for at least one hour, and thereafter raising the temperature to within the range 175°–225° C. and maintaining it there for a time sufficient to form the said hard, fusible, polyamide.

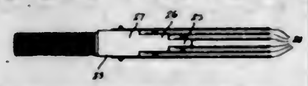
2,450,941

SHIPPING, STORAGE, AND DISPLAY CARTONS

Walton B. Crane, Los Angeles, Calif., assignor to Alpak, Los Angeles, Calif., a copartnership

Application August 25, 1943, Serial No. 499,909
8 Claims. (Cl. 229—27)

1. An article of the character described, which comprises a shipping, storage and display device comprising a single blank of cut and scored board material and which, when folded and secured into container formation, constitutes continuous end and side walls having inner and outer bottom and top walls integral therewith, longitudinal partitions connected to outer walls and cross partitions connected to inner walls, said cross partitions and said inner walls having slots to receive said longitudinal partitions, the distance between the bottoms of the slots being less than the length of the walls which are parallel to said longitudinal partitions, and the bottom ends of said longitudinal partitions having adjacent locking notches interlockingly engaging the bottoms of said inner wall slots, and the length of the lower longitudinal partitions adjacent said locking notches within said container being greater than the distance between the bottoms of said slots.



2,450,942

MULTIPLE BLADE HACKSAW

Thomas Donnelly, Wilmington, Calif.

Application March 8, 1946, Serial No. 653,097
2 Claims. (Cl. 145—31)

2. Blade-holding and tensioning means for a hacksaw, comprising a pair of bolts, each bolt having a shank including opposed outer side faces and a free end, both of said side faces comprising a plurality of inwardly offset stepped portions toward said free end, and means on each stepped portion for detachably connecting a hacksaw blade thereto, means mounting said bolts in longitudinally spaced relation with corresponding

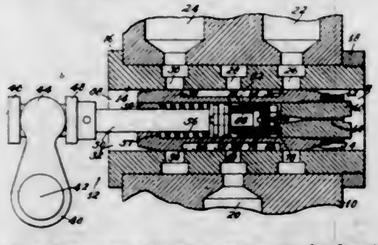
stepped portions opposed and aligned, means for tensioning said bolts, said means on each pair of aligned stepped portions of said bolts being each adapted to support a blade of different length.

2,450,943

BRAKE PEDAL LOCK

Rexford D. Downing, Rock Island, Ill., assignor to International Harvester Company, a corporation of New Jersey

Application October 25, 1946, Serial No. 705,514
8 Claims. (Cl. 74—534)



1. In a vehicle having separate mechanical brakes for wheels on each side thereof, separate arcuately depressible brake pedals connected respectively to said separate brakes, said brake pedals swingable about a common axis, an arcuate ratchet rack pivoted to the vehicle spaced from said common brake pedal axis and projecting between the adjacent brake pedals, pawl means on each of said brake pedals, said arcuate ratchet rack normally engageable by both of said pawls, said pawls arranged and constructed to permit depressing of each of said brake pedals independently of the other and to automatically prevent return movement of said brake pedals, and means for releasing said brake pedals.

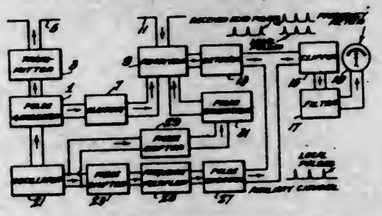
2,450,944

DITHERING VALVE

Fred C. Eastman, Marblehead, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey

Application October 12, 1944, Serial No. 558,354
11 Claims. (Cl. 137—139)

1. A valve comprising a valve body having a chamber with an intermediate fluid inlet port and two spaced ports, a valve member slidable in said chamber with lands arranged to control fluid flow from the inlet port to the two spaced ports, a control member projecting from one end



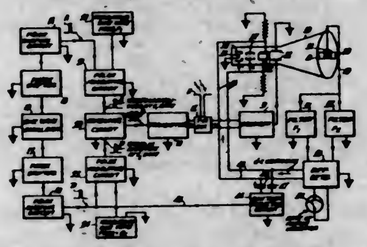
of the chamber, and means within the valve member responsive to fluid pressure from the inlet port to effect vibration of the valve member with relation to the control member.

2,450,945

PULSE-ECHO MOTION DETECTOR

Thomas T. Eaton, Haddon Heights, N. J., assignor to Radio Corporation of America, a corporation of Delaware

Application September 13, 1941, Serial No. 410,693
9 Claims. (Cl. 343—8)



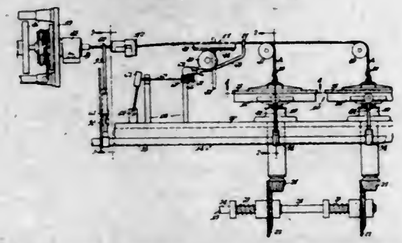
3. A pulse-echo system for indicating motion of a pulse-reflecting object including, in combination, means for radiating pulses of energy toward said object, means for receiving said pulses after reflection from said object, means for establishing a delayed set of pulses corresponding to said radiated pulses, a combining circuit connected to said receiving means, said combining circuit including means responsive to the combined amplitudes of coincident received pulses and established pulses and nonresponsive to noncoincident pulses, and means connected to said combining means for indicating the frequency of such coincidence.

2,450,946

PULSE-ECHO RADIO VELOCITY INDICATOR

John Evans, Kingston, N. J., assignor to Radio Corporation of America, a corporation of Delaware

Application April 25, 1944, Serial No. 532,639
6 Claims. (Cl. 343—8)



1. In a system wherein there is a cathode ray tube having means for producing an electron beam, the method of determining the speed of a moving object which comprises producing regularly recurring radio pulses, transmitting said pulses toward said object, receiving said pulses after reflection, modulating said electron beam by said received pulses while sweeping it along a time axis in synchronism with the pulse transmission, utilizing the electrons of said beam during the electron beam modulation by said pulses to center the beam trace of said pulses on said time axis, and indicating the resulting amount of centering control whereby the rate of motion of said object is indicated.

2,450,947

TWINE MAKING MACHINE

Harold Flater, Ernst Teodor Waernhoff, and Nils Gunnar Franson, Norrkoping, Sweden, assignors to International Harvester Company, a corporation of New Jersey

Application June 15, 1946, Serial No. 677,020
In Sweden June 25, 1945
7 Claims. (Cl. 57—32)

1. A twine-making machine comprising in combination, a plurality of spinning disks, each of said disks supporting a spool of paper strip, twisting means associated with each disk for individually twisting said strips into twisted strands, impregnating means for impregnating the twisted strands, means for driving said spinning disks, a brake associated with each spinning disk, and means operable to actuate said brake upon the breaking of said twisted impregnated strands.

2,450,948

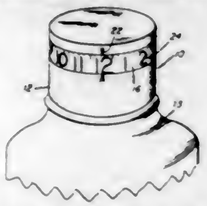
METHOD OF MAKING ELASTIC FABRICS

Boutwell H. Foster, Maplewood, N. J., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey

Application September 26, 1947, Serial No. 776,383
7 Claims. (Cl. 28—73)

1. The method of making an elastic fabric, which includes the steps of forming a shrinkable yarn by twisting together a non-thermoplastic yarn and a heat-shrinkable resinous filament, forming a loosely constructed fabric embodying this shrinkable yarn, heating the fabric sufficiently to contract the shrinkable yarn in situ and thereby contract the fabric, bonding a sheet of rubber to a face of the contracted fabric, and heating the fabric to destroy said filaments so that the contracted fabric and rubber sheet can be stretched together.

2,450,949



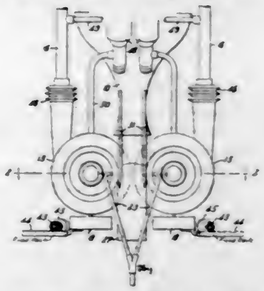
BOTTLE CAP

Salvadore Gattuccio and Leland G. Cerruti, San Jose, Calif.

Application June 18, 1947, Serial No. 755,496
1 Claim. (Cl. 116—121)

A bottle cap comprising an internally threaded sleeve having an integral closure plate at one end, an annular channel provided in the outer surface of the closure plate having opposed annular, substantially horizontal bearing surfaces and an annular substantially vertical bearing surface, an internally toothed ring gear rotatably mounted in said channel having an upper annular edge and a lower annular edge for engaging the hori-

zontal bearing surfaces of the channel, a fixed protuberance carried by the vertical bearing surface of the channel for selectively engaging the



teeth of the ring gear, indicia provided on the outer surface of the ring gear, and a pointer carried by the outer surface of the closure plate for registering with the indicia on the ring gear.

2,450,950

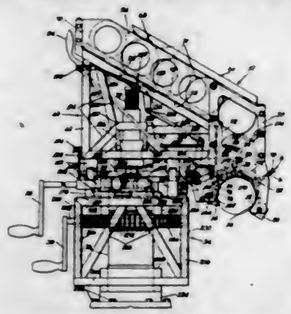
GAS BLAST ACTUATED AUXILIARY TURBINE FOR GAS BLAST PROPELLED CRAFT

Robert H. Goddard, Annapolis, Md.; Esther C. Goddard executrix of said Robert H. Goddard, deceased, assignor of one-half to The Daniel and Florence Guggenheim Foundation, New York, N. Y., a corporation of New York

Application June 11, 1945, Serial No. 598,755
9 Claims. (Cl. 60—35.6)

1. An auxiliary power device for gas blast propelled craft comprising a plurality of turbines mounted on the craft with the blades of said turbines engaging symmetrically disposed peripheral portions only of the propulsion blast.

7. An auxiliary power device for gas blast propelled craft comprising a plurality of turbines mounted on the craft with the blades of said turbines engaging symmetrically disposed peripheral portions only of the propulsion blast, and means movable into the propulsion blast between said turbines to direct substantially the entire blast into engagement with the blades of said turbine.



2,450,951

ROCKET LAUNCHER

William V. Goodhue, Ipswich, and Chester W. Carter, Topsfield, Mass., assignors to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey

Application September 25, 1946, Serial No. 699,294
3 Claims. (Cl. 89—1.7)

1. In a rocket launcher, a launching way, a magazine through which rockets are advanced by gravity toward a firing position on said way, a gate for controlling the advance of the rockets into firing position, said gate being mounted to move in synchronism with the advance of the leading rocket into the firing position, means for immobilizing said gate to stop the leading rocket short of the firing position, and connections actuated by one rocket of a succession of rockets be-

hind the leading rocket for rendering said means inoperative until the supply of rockets in said magazine has been reduced to a predetermined number.

2,450,952

PHOSPHATE CEMENTS

Herbert H. Greger, Washington, D. C.

No Drawing. Application January 6, 1945, Serial No. 571,672
5 Claims. (Cl. 106—121)

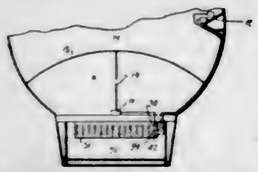
1. A dry cement mixture comprising components reactible upon admixture with water to form a chemical setting cement, said components consisting of water soluble aluminum phosphate ranging from mono- to di-aluminum phosphate and a magnesium compound from the group consisting of magnesia, olivine, magnesium silicate, and mixtures thereof, the ratio by weight of aluminum phosphate to the magnesium compound ranging from about 1:8 to 1:2.

2,450,953

ESCHAROTIC SOLUTION FOR DEHORNING CALVES

James E. Guthrie, Ashland, Ohio, assignor to Dr. Hess & Clark, Inc., Ashland, Ohio, a corporation of Ohio

No Drawing. Application June 3, 1946, Serial No. 674,048
2 Claims. (Cl. 167—53.2)



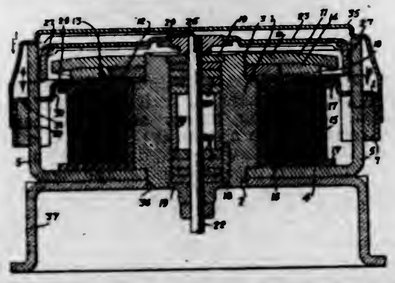
1. A dehorning solution for dehorning young calves comprising antimony chloride, as sole active dehorning ingredient, dissolved in a nitrocellulose lacquer.

2,450,954

MEANS FOR INDICATING THE STATE OF GAS IN CELLS OF AIRCRAFT

Charles S. Hall, New York, N. Y.

Application September 4, 1945, Serial No. 614,314
4 Claims. (Cl. 244—97)



1. In lighter-than-air craft, a gas-holding cell comprising an envelope having a curved peripheral wall, said wall being adapted to assume a circular shape under maximum pressure conditions in said cell and a portion of said wall being adapted to assume a reversely curved shape under less than maximum pressure conditions, and means for indicating the position of the mentioned wall portion and, consequently, the volume of the gas in the cell, said latter means comprising a volume indication transmitting unit associated with the cell, a volume indication receiving device operatively connected with the transmitting unit and remotely located with respect thereto, and means operatively connecting the mentioned wall portion and said volume indication transmitting unit comprising a reel on said unit and a line controlled by the reel and connected to a mid-point of said wall portion.

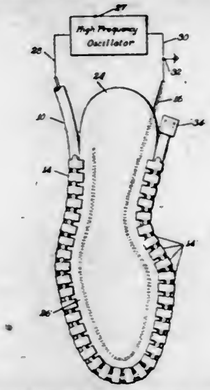
2,450,955

SYNCHRONOUS MOTOR

William L. Hansen and Ira N. Hurst, Princeton, Ind., assignors to Hansen Mfg. Company, Princeton, Ind., a corporation of Indiana

Application July 31, 1947, Serial No. 765,110
6 Claims. (Cl. 172—278)

1. In a synchronous motor, a magnetic core, a coil surrounding said core, a magnetic field member mounted on one end of said core and having outer pole pieces disposed axially in a substantially cylindrical path, a second magnetic field member mounted on the other end of said core and having inner pole pieces disposed radially with their tips spaced from the tips of the axial pole pieces to leave a continuous annular opening between the pole tips, a rotor positioned within said annular opening, and a shading ring positioned adjacent to and intertwining said outer pole pieces and arranged to shade alternate outer pole pieces, and means mounted on said core between said second magnetic field member and said coil for maintaining said outer pole pieces rigidly in position with respect to the inner pole pieces.



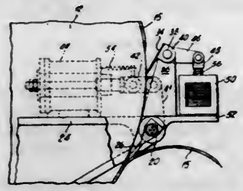
2,450,956

ELECTRODE RETAINING CLAMPS FOR MARGINAL BONDING WITH HIGH-FREQUENCY ELECTRIC FIELD

George T. Hart, Lynn, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey

Application August 17, 1946, Serial No. 691,222
6 Claims. (Cl. 219—47)

1. In a device of the class described, an elongated flexible electrode, a series of two-sided clamps, adapted to be distributed along the periphery of two parts which are to be joined by a thermoactive cement, to press these pieces together, and means on said clamps for supporting said electrode in insulated relation to the clamps and in a position adjacent to the periphery of the work whereby a high-frequency electric field may be set up between electrodes of which this is one,



said field traversing a margin of the work to activate the cement.

2,450,957

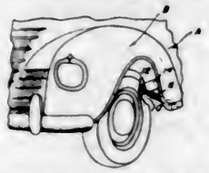
ROLL STRIPPING MECHANISM

Louis A. Hawthorne, Hillside, N. J., assignor to Johns-Manville Corporation, New York, N. Y., a corporation of New York

Application February 17, 1945, Serial No. 578,526
9 Claims. (Cl. 92—66)

9. In combination with a rotatable accumulator roll, a stripper bar extending lengthwise of the roll, a plurality of closely spaced fingers carried by said bar, means for mounting said bar for rotation to swing said fingers toward said roll into stripping position with the fingers pointing substantially opposite to said direction of rotation of the roll, a scraper supported above said stripper for movement toward and away from said roll, means controlled by the thickness of the sheet built up on the roll to rotate said stripper bar and move said fingers into stripping position, and means to cause said scraper to move against the roll in timed relationship to the movement of said fingers.

2,450,958



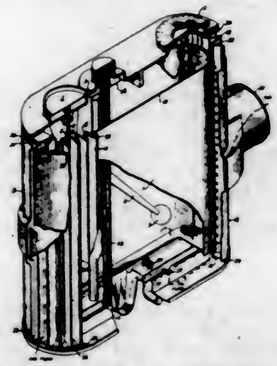
ADJUSTABLE FENDER SKIRT BRACE

Arthur R. Hayes, Cambridge, Ohio

Application March 18, 1946, Serial No. 655,138
1 Claim. (Cl. 280—152)

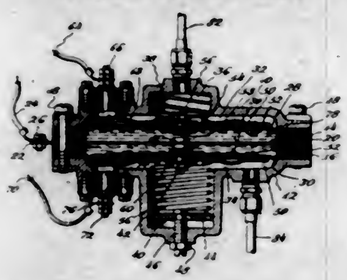
An adjustable brace adapted to support the skirted fender of an automobile from the chassis thereof, said adjustable brace being secured at one end to said skirted fender, and at the other end to the chassis of said motor vehicle, and comprising a pair of tubiform rod-like telescopically interfitted sections, which sections when adjusted in place are adapted to be welded together to provide a strong skirted fender supporting structure, the free end of one of said

tubiform sections being curved and flattened, and provided at its flattened portion with a flattened terminal ear, said ear being secured to said automobile chassis by a bolt and nut, and



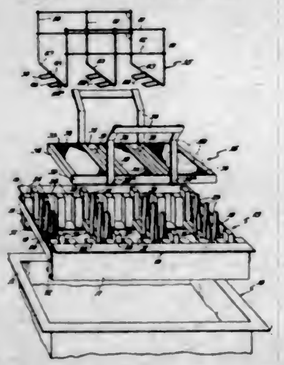
the free end of the other of said tubiform rod-like sections being provided with a flattened terminal ear so disposed as to permit securement of said terminal flattened ear to said skirted fender by means of a bolt and nut.

2,450,959
SILK SCREEN PRINTING INK
William Heinecke, New York, N. Y.
No Drawing. Application August 11, 1945, Serial No. 610,403
8 Claims. (Cl. 106—30)



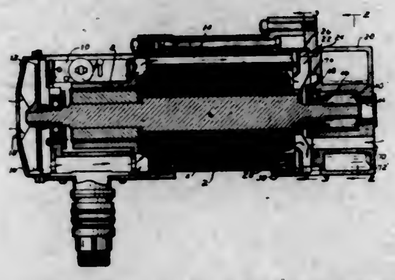
1. A silk screen printing ink consisting of a mixture of the reaction product of 100 g. shellac and 8 g. diethanol amine dissolved in a mixture of 200 g. iso propyl alcohol and 50 g. octyl alcohol; 125 g. bentonite; and 75 grams of carbon black, said ink being characterized by an absence of warping action on paper when applied thereto, removable from the screen by a water wash and a drying time of about 15 minutes at room temperature.

2,450,960
OIL TANK AND COOLER ASSEMBLY
Ralph M. Heintz, Cleveland, Ohio, assignor, by mesne assignments, to Jack & Heintz Precision Industries, Inc., Cleveland, Ohio, a corporation of Delaware
Application September 12, 1945, Serial No. 615,815
4 Claims. (Cl. 257—191)



1. In an oil tank and cooling assembly therefor, a main oil reservoir, an outside shell surrounding said oil reservoir, an inlet for flow of hot oil in the bottom of said shell below the bottom of said oil reservoir, a plurality of vertical passages for oil flow therefrom between the walls of said oil reservoir and shell, an inlet from said oil passages into said oil reservoir, vertical passages alternately disposed on either side of said oil passages for air flow, said air passages being adapted to be filled with cool air sucked therethrough from the exterior of said shell by suction means for cooling the oil as it passes through said vertical oil passages into said oil reservoir.

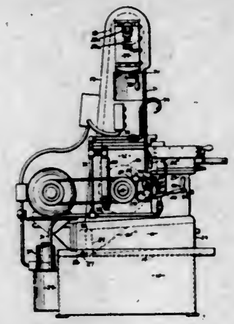
2,450,961
ELECTRIC SWITCH
Seymour E. Heymann, Evanston, John H. Leslie, II, Winnetka, and William A. Marshall, Jr., Chicago, Ill., assignors to Stewart-Warner Corporation, Chicago, Ill., a corporation of Virginia
Application June 16, 1945, Serial No. 599,846
16 Claims. (Cl. 200—81.4)



1. A pressure actuated switch device comprising a closed chamber, a pair of flexible diaphragms extending across said chamber in spaced relation with a quantity of fluid confined between them, a relatively rigid partition in the chamber disposed between said diaphragms and having a restricted orifice permitting limited flow of the fluid from one side of said partition to the other side, an electrical contact element carried by each of said diaphragms and electrical contact means carried by the partition in position to engage the other contacts, means for applying pressure against one of said diaphragms and yielding means reacting in the opposite direction against the other diaphragm.

2,450,962
DOUGHNUT COOKING ART
Carl J. Hornkohl and Freeland H. Leslie, Chicago, Ill.; said Leslie assignor to said Hornkohl
Application May 28, 1945, Serial No. 596,198
8 Claims. (Cl. 99—409)

1. In a doughnut cooking means for use with doughnut row forming means, a turn-over frame including a plurality of U-shape vertical struts, a strut having its bight at its lower end and having a plurality of doughnut contact fingers spaced along said bight and extending angularly thereto, and means connecting and spacing the struts to register with the rows respectively.

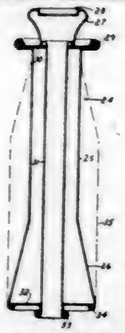


2,450,963
COOLING SYSTEM FOR ELECTRIC MOTORS AND HYDRAULIC PUMPS
Vaino A. Hoover, Los Angeles, Calif., assignor to Electrical Engineering and Manufacturing Corporation, Los Angeles, Calif., a corporation of California
Application November 13, 1945, Serial No. 627,980
1 Claim. (Cl. 103—118)

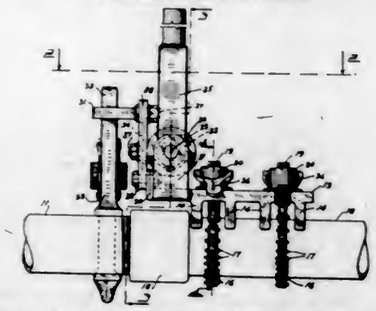
In combination, an electric motor having a housing, a rotatable armature, a rotatable armature shaft, a commutator at one end of said shaft and drive means at the other end thereof, a casing providing an oil reservoir attached to the motor housing at the drive end of the motor in axially spaced relation to the armature to provide a chamber therebetween, said chamber having a peripheral wall having openings therein through which the interior of the chamber is communicated to atmosphere, a pump housing within said casing surrounding the drive end of the shaft having an opening through which the interior thereof communicates with the interior of the casing, pump means within said pump housing operatively connected to said shaft, a plurality of air ducts extending axially through said casing and at least partially surrounding said pump housing and opening to atmosphere at their outer ends and into said chamber at their inner ends, and a fan mounted on the armature shaft within said chamber for drawing air in one direction through said air ducts and in another direction through said motor and exhausting it through the openings in the peripheral wall of said chamber to simultaneously cool the oil in said casing, the pump housing and the motor.

2,450,964
MACHINE TOOL
Fraser A. Hurd, Liverpool, N. Y.
Application September 16, 1944, Serial No. 554,369
5 Claims. (Cl. 51—143)

5. A machine tool of the abrasive belt type comprising an enclosed housing having an opening in one side thereof, a support arranged in juxtaposition to the lower portion of said opening and extending outwardly therefrom, pulleys journalled in the upper and lower ends of said housing, an abrasive belt trained over said pulleys and having a portion exposed to said opening, an intermediate member slidably mounted on said support and movable toward and from the face of the belt, a work table slidably mounted on said intermediate member and movable transversely of and parallel to the face of the belt to move a work piece carried by the table from a work loading position to a work abrading position, a feeding means cooperable, upon actuation, with said support and said intermediate member to yieldingly move said intermediate member and the table carried thereby toward the belt, stop means carried by the support and cooperable with said intermediate member to limit movement of the latter toward the belt, and dash pot means cooperable with said support and said intermediate member to oppose movement of the latter by said feeding means.



2,450,965
METHOD OF DETERMINING CORRECT CURVATURES OF LENSES AND SPACINGS THEREOF
John Henry Jeffree, Cobham, England, assignor to Combined Optical Industries Limited, Slough, England, a British company
Application February 23, 1945, Serial No. 579,392
In Great Britain October 29, 1943
5 Claims. (Cl. 88—57)

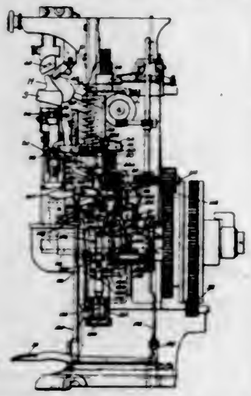


1. The method of determining the correct curvatures and dispositions of the surfaces of lenses in a proposed lens system, which comprises, forming thin test pieces of optical media similar to those to be employed in said system, representing axial sections of the components of said system, with their edges shaped proportionally to the curvatures deemed approximately correct for the said components, arranging the same in one plane on a common optical axis between an object and an observation point at distances apart between curved surfaces deemed appropriate for the lens surfaces in such system with said edges normal to a plane including said optical axis, directing light from said object through said test pieces, examining the resulting image at said observation point to determine the paths taken by the light through the test system, and forming other test pieces with curvatures of their edges altered with a view to correcting optical errors determined by such examination, substituting them, appropriately spaced, for test components previously used, and repeating the above described operations as required with altered test components until desired curvatures and disposition of the lenses of the proposed system are determined.

2,450,966
YARN SUPPORT
Albert W. Keight, Cumberland, Md., assignor to Celanese Corporation of America, a corporation of Delaware
Application August 1, 1945, Serial No. 608,139
2 Claims. (Cl. 242—118)

1. A yarn package support having a barrel comprising a hollow tube cylindrically shaped along the major portion of its length and conically shaped along the remainder of its length, said conically shaped portion flaring outwardly towards one end of said barrel, a flange at the other end of said barrel, and a hollow tube within and spaced from the interior of said barrel and having a portion thereof extending beyond the conically shaped portion of said barrel, said extending portion comprising means for receiving a magazine wrap or transfer tail.

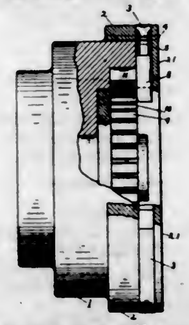
2,450,967
COMBINED PIPE WRENCH AND VISE
John Keiser, Windsor, Colo.
Application January 27, 1947, Serial No. 724,654
3 Claims. (Cl. 81—53)



1. A pipe wrench comprising: a table portion adapted to rest upon the top a length of pipe adjacent one extremity thereof; means for securing said table portion to said length; a threaded shaft rotatably supported from said table and extending transversally of the axis of said length; a lever mounted on said shaft for oscillating the latter; a threaded nut on said shaft to move longitudinally thereof as said shaft is oscillating; a wrench lever hinged to said table to swing in a transverse plane to said pipe; means transmitting the movements of said nut to swing said wrench lever; a pipe wrench adapted to engage an adjacent pipe length; and means for transmitting the swinging movement of said wrench lever to said pipe wrench to cause the latter to screw the second length into the first length.

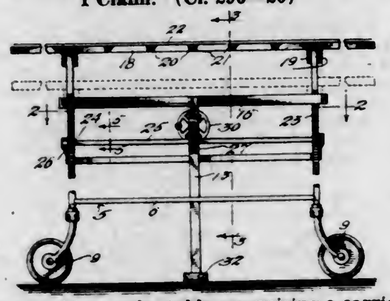
2,450,968
STOCKING PROTECTOR
Barbara B. Knubel, Westport, Conn.
Application March 4, 1947, Serial No. 732,197
2 Claims. (Cl. 36—70)

2. A device of the character described comprising a cylindrical sheath of pliable material having overlapping vertical front edges and whose upper portion is folded downwardly upon itself so as to form an upper cuff and which is adapted to be laid loosely around the lower portion of a person's leg, a U-shaped cross-strip attached to the lower edge portion of said sheath for fastening the latter beneath the instep, and means for detachably connecting the overlapping edges of said sheath to one another, the major portion of said sheath being adapted for being worn inside of a boot while its cuff is folded over the outer top section of the boot, all substantially as described.



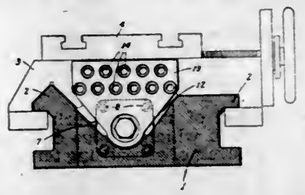
2,450,969
PRESSURE MECHANISM
John T. Lancaster, Newton, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application March 10, 1945, Serial No. 582,043
24 Claims. (Cl. 1—32)

1. In combination, a frame, a work-support mounted thereon, a pressure member co-operating with the support, power mechanism acting to produce relative movement between the support and pressure member to clamp the work upon the support, a member movable by the operator to initiate the action of the power mechanism,



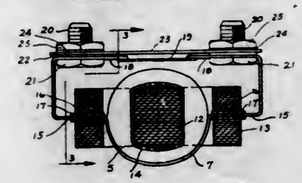
means for disconnecting the power mechanism from the clamping element being moved when the clamping pressure has attained a predetermined amount, a member secured to the clamping element and mounted to move therewith, a member secured against movement on the frame, and means for connecting the two last mentioned members together to prevent the movement of that secured to the clamping element.

2,450,970
CHUCK FOR INTERNAL GRINDERS
Herbert C. Lance, Rock Island, and Herman A. Hippen, Moline, Ill.
Application January 30, 1946, Serial No. 644,378
7 Claims. (Cl. 279—1)



2. In an internal grinder, the combination with a revolvable chuck, of annular supporting means mounted upon the chuck, weighted means pivotally united to the supporting means, detaining means pivotally united to the weighted means arranged to be actuated by the relative movement of said weighted means and to bear against and detain a part held in the chuck for grinding when the chuck is revolving at a predetermined speed.

2,450,971
PATIENT TRANSFER CARRIAGE
Gerald C. Letch, Fort Sam Houston, Tex.
Application October 31, 1945, Serial No. 625,743
1 Claim. (Cl. 296—20)



An invalid transfer table comprising a carriage, a platform mounted for vertical adjustment on the carriage, spaced parallel, laterally extending guide rods carried by the platform, a top for the platform having collars on its under side slidably mounted on said rods for movement into and out of position overlying an object on which a person is lying for moving the person onto or off of the table, upper end cross bars on said carriage with upwardly inclined end flanges, and end frames on said platform comformably fitting against said bars when said platform is lowered.

2,450,972
OPERATING MECHANISM FOR LATHES
Robert G. Le Tourneau, Peoria, Ill., assignor to R. G. Le Tourneau, Inc., Stockton, Calif., a corporation of California
Application June 10, 1946, Serial No. 675,632
1 Claim. (Cl. 82—32)

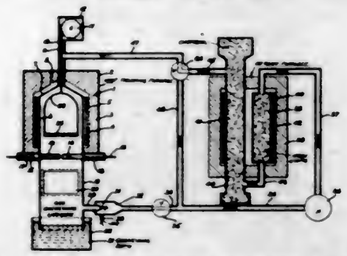
A lathe carriage operating means comprising a lathe bed, such bed consisting of a substantially solid metal block and including integral transversely spaced apart carriage ways, such bed being provided with a cylindrical bore adjacent one end of the bed, such bore being disposed below and between the ways, the bed being provided with an upwardly opening trough commencing at a point adjacent the inner end of the bore and extending toward the opposite end of the bed, said trough lying between the ways, a piston disposed for reciprocating movement within the bore, a piston rod on the piston projecting out of the bore and into the trough, and means on the outer end of the piston for connecting the same with a carriage riding the ways.

2,450,973
INSTRUMENT CURRENT TRANSFORMER WITH PART TURN WINDING
Frederick J. Lingel, Bluffton, Ohio, assignor to The Triplett Electrical Instrument Company, Bluffton, Ohio, a corporation of Ohio
Application April 28, 1945, Serial No. 590,839
2 Claims. (Cl. 175—358)

2. An instrument transformer comprising a laminated core of rectangular configuration and having a central leg on which is mounted a pair of windings, one of said windings completely surrounding the core leg, and the other of said windings only partially surrounding the core leg, the last mentioned winding passing through oppositely disposed portions of the core.

2,450,974
METHOD OF MAKING MULTIPLE CABLES FOR TERMINAL BANKS
Rudolph F. Mallina, Hastings on Hudson, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application June 19, 1942, Serial No. 447,729
17 Claims. (Cl. 29—155.5)

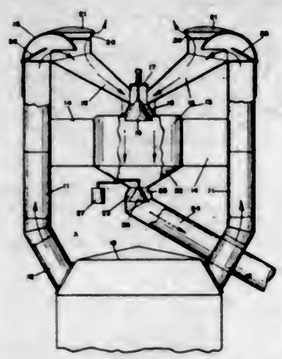
1. The method of fabricating a ribbon cable of wires by forming a flat layer of equally spaced wires in succeeding alternate rectangular and



rhomboidally-shaped sections, securing a fabric covering to the rhomboidally-shaped sections and strips of fabric to the rectangular sections, folding the rectangular sections in one direction and the rhomboidally-shaped sections in another direction so that the folded rectangular sections form succeeding flat groups of loops of wires in a straight line.

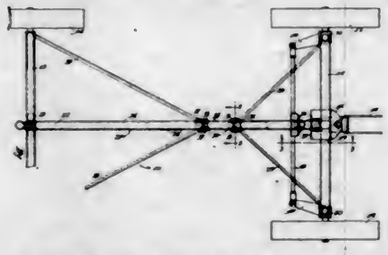
9. The method of manufacturing a series of terminal banks in which groups of terminals in corresponding levels of succeeding terminal banks are multipled together by wire cables comprising fabricating a wire cable, connecting succeeding groups of terminals at intervals to said cable, cutting said cable in sections each including a predetermined number of succeeding groups and assembling these sections one on top of the other to form succeeding interconnected terminal banks.

17. The method of assembling terminal banks which comprises longitudinally advancing a plurality of insulation covered wires in a common plane, electrically connecting the corresponding terminals of successive individual groups each having the terminals thereof disposed in the same plane to selected wires at successive zones through the insulation of the wires, and finally assembling the groups in stacked banks.



2,450,975
METHOD OF PRODUCING A NITROGEN ATMOSPHERE
Gordon J. Maxson, Western Springs, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application January 10, 1942, Serial No. 426,367
4 Claims. (Cl. 23—2)

1. A method of supplying nitrogen to an article treating apparatus which comprises passing air over heated iron particles, passing the gas thus prepared over heated carbonaceous material, and directing the gas from said material through the treating apparatus and back through the heated iron particles.

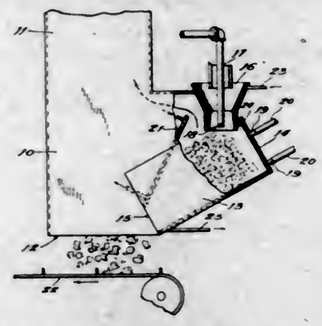


2,450,976
DUST ARRESTER FOR BLAST FURNACES
Reuben M. McKelvey, Johnstown, Pa.
Application October 3, 1945, Serial No. 620,101
3 Claims. (Cl. 266—31)

1. A device of the kind described, comprising a plurality of furnace top stacks, a receiving tank intermediate of the stacks, funnels establishing communications between the stacks and tank, caps crowning the communications between the stacks and funnels and having escape outlets, flap-like baffles at the tops of said stacks confined within said caps, a discharging spout leading

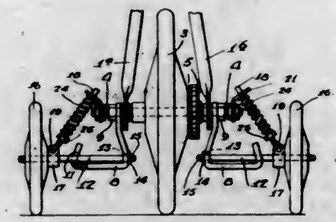
from the tank, and valves controlling communications between the funnels and the tank and the latter and the spout respectively.

2,450,977
VEHICLE REACH AND HOUND CONSTRUCTION
Gordon G. McNamara, Jr., Chicago, Ill., assignor to International Harvester Company, a corporation of New Jersey
Application July 16, 1946, Serial No. 683,841
11 Claims. (Cl. 280—142)



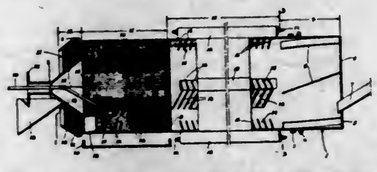
1. A vehicle comprising front and rear transverse axles, a longitudinal reach means between said axles including a first and second reach part connected together for relative longitudinal adjustment, hound members connected to said axles and extending angularly for connection to said reach means, said hound members and said first reach part having alined openings, a clamping means, and a radially inwardly extending member associated with said clamping means, said member engaging said alined openings and constructed and arranged to lock said hounds against longitudinal movement with respect to said first reach part.

2,450,978
METHOD AND APPARATUS FOR PRODUCTION OF EXPANDED SLAG
Arthur E. Meinzer, Birmingham, Ala., assignor to Wallace L. Caldwell, Birmingham, Ala.; Leona Templeton Caldwell executrix of said Wallace L. Caldwell, deceased
Application July 3, 1944, Serial No. 543,388
3 Claims. (Cl. 49—1)



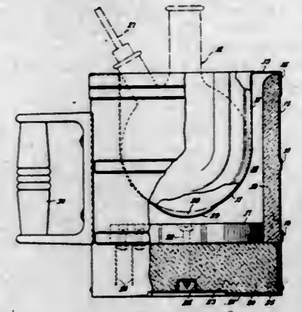
1. Apparatus for producing agglomerated particle masses of light weight cellular slag aggregate

from molten slag comprising a vertically extending chamber defining an upwardly opening path for discharge of gaseous products and a downwardly opening path for discharge of solid products, a horizontally inclined receptacle defining a slag expansion and granulation zone projecting into and the lower discharge end opening within said chamber, means adjacent the upper end of said receptacle for introducing a stream of molten slag and for impinging water against said slag stream in limited amount to reduce it to hot plas-



tic pellets of cellular slag, nozzle means opening within said receptacle for impelling said slag particles therefrom in a stream by means of high velocity jets of gaseous fluid, and a vertically extending baffle within said chamber adjacent the discharge end of said receptacle and inclined thereto to deflect the flight of the plastic pellets and to cause them to become amalgamated and welded together by impact into the form of relatively enlarged particle masses, and to be thereafter downwardly and externally discharged.

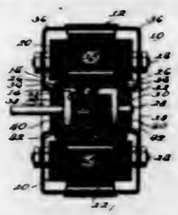
2,450,979
BICYCLE AND LIKE VEHICLES
Wilhelm Moller, Kirklyn, Pa.
Application July 11, 1946, Serial No. 682,869
11 Claims. (Cl. 280—293)



11. In a stabilizing device for bicycles and like vehicles, a pair of brackets to be secured on an axle of the vehicle at respectively opposite sides of a wheel thereon, spindles on said brackets pivotally supported thereby at their inner ends for vertical swinging movement, supplementary wheels on the outer extremities of said spindles, collars on said spindles inwardly adjacent said supplementary wheels, rods pivotally connected to said collars and inclined inwardly therefrom, arms fixed on the extremities of said axle of the vehicle slidably receiving the ends of said rods, and spring means associated with said rods and acting between said spindles and said arms tending to oppose swinging movement of said spindles.

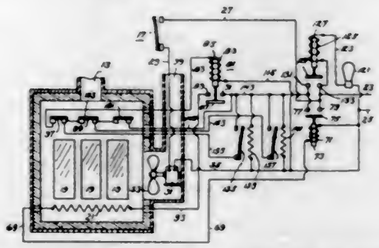
2,450,980
SCRUBBER FOR REMOVING DIRT FROM AGGREGATES SUCH AS SAND AND GRAVEL
George Ernest Moyer, Alturas, Calif.
Application August 24, 1945, Serial No. 612,495
7 Claims. (Cl. 209—452)

7. An aggregate processing machine comprising a longitudinal trommel having a perforate aggregate separating section, means to feed water into said section, a dewatering section beyond said separating section, said dewatering section including a plurality of circumferentially spaced, inwardly projecting perforate dewatering units operative to receive and elevate aggregates from the separating section for draining, means to feed aggregates from the separating section to the dewatering units, and catch means onto which said dewatering units discharge the drained aggregates; said aggregate feeding means comprising a scoop plate mounted on each dewatering unit and projecting into the adjacent end of said separating section, each scoop plate being pitched in the direction of rotation of the trommel.



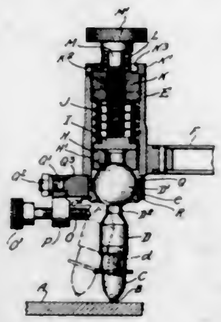
2,450,981
FLASK HEATER
Alexander I. Newman, River Forest, Ill., assignor to Precision Scientific Co., Chicago, Ill., a corporation of Illinois
Application April 25, 1945, Serial No. 590,256
1 Claim. (Cl. 219—43)

A flask heater of the character described comprising, in combination, a seamless metallic flask holding bowl of such shape and size as to correspond relatively closely with the flask to be heated therein and an integral flange extending over the entire top of the heater, said flange having a depending marginal rim, an insulating jacket joining said flange and located inside said ring, said jacket being spaced from the sides of said bowl to provide an air space around said bowl, a relatively flat electric heating element spaced below the hemispherical bottom of said bowl and adapted to heat said bottom by radiant heat and also to heat the air in said space for delivering heat to the sides of said bowl by air convection, said bowl being offset at the point of closest proximity to said heater to provide an air space between said bowl and the bottom of the flask



resting in the bowl, a layer of insulation at the bottom of said heater, and a nonmetallic connection connecting said heating element to the bottom of the heater.

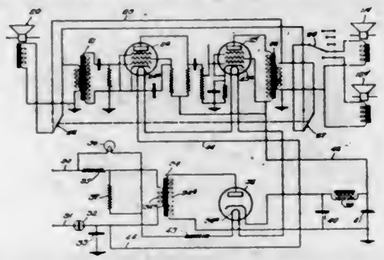
2,450,982
DYNAMOELECTRIC MACHINE
William J. O'Brien, Chicago, Ill., assignor to Edward F. Andrews, Chicago, Ill.
Application July 22, 1942, Serial No. 451,865
12 Claims. (Cl. 172—120)



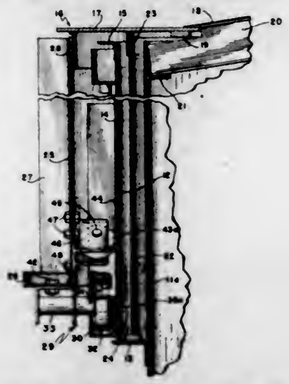
1. In a dynamo-electric machine, the combination including, angularly spaced apart polar members having a high magnetic permeability the inner ends of which are spaced apart to define a central aperture, a rotor in said aperture, continuous flux distributing means located between said rotor and polar members, said means including a pair of continuous rings of magnetic material having a permeability lower than that of said polar members and a high magnetic saturation point, one of said rings being secured to and rotating with said rotor and the other being fixedly secured to and in contact with the polar members.

2,450,983
HEAT STORAGE CONTROL SYSTEM
Clark M. Osterheld, Stoughton, Wis., assignor to McGraw Electric Company, Elgin, Ill., a corporation of Delaware
Application April 27, 1945, Serial No. 590,655
9 Claims. (Cl. 219—20)

3. An off-peak heat storage system for heating a heat storage mass, comprising an electric heater for said mass, a light-sensitive cell subject to daylight and to darkness, a plurality of thermostats in close heat-receiving relation to said heat-storage mass and adapted to move to closed position at different temperature values of said heat storage mass, a first electromagnetic switch controlled by said light-sensitive cell and adapted to be in open position when said light-sensitive cell is subject to daylight, a second electromagnetic switch connected in series electric circuit with said first electromagnetic switch, said two electromagnetic switches being adapted to jointly control the energization of said heater, a plurality of time delay relays electrically connected in series electric circuit with certain of said thermostats and with the coil of said second electromagnetic switch, each time delay relay comprising a normally open thermally-actuable member and a heating coil adapted to be energized by said first electromagnetic switch after fall of darkness to cause closure of said thermally-actuable members after different predetermined periods of time and energization of said electric heater upon closure of that thermally-actuable member adapted to being closed in the shortest period of time.



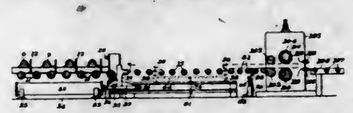
2,450,984
GEM GRINDING AND POLISHING TOOL
Alfredo Pastore, Brooklyn, N. Y.
Application June 28, 1947, Serial No. 757,897
2 Claims. (Cl. 51—229)



1. A gem grinding and polishing device comprising in combination, a dop holder having a spherical head portion at its upper end and an adjacent neck portion, a supporting member formed with a chamber in which said head portion is loosely received and having an annular portion at the lower end of said chamber with an internal diameter larger than the diameter of said neck and smaller than the diameter of said head portion, and forming a seat for the underside of the latter, a bearing member in said chamber above said head portion and movable toward and away from said seat, resilient means mounted in said holder and acting between the latter and said bearing member to press the latter against said head portion and thereby yieldingly clamp said head portion between said seat and bearing member, and clamping means mounted in said supporting member and adjustable to increase the pressure with which said head portion is pressed against said lower annular seat so as to positively clamp said head portion against movement relative to said holder.

2,450,985
POWER SUPPLY FOR ELECTRONIC APPARATUS
Lawrence R. Faust, Chicago, Ill.
Application August 30, 1945, Serial No. 613,599
12 Claims. (Cl. 315—95)

1. Electronic apparatus of the character described adapted to be connected to an alternating current power source, including: a tube having at least plate and cathode elements, a plate cathode circuit associated therewith and heating connections for the cathode element; a transformer having electrically separate primary and secondary windings; means for connecting the secondary winding into the plate cathode circuit of said tube; means for connecting the primary winding to said power source; and means for connecting said heating connections directly to said power source.



2,450,986
GUIDE CONSTRUCTION FOR MOVABLE TANK TOPS
Fred L. Plummer, Warren, Pa., assignor to Hammond Iron Works, Warren, Pa., a corporation of Pennsylvania
Application March 28, 1946, Serial No. 657,824
4 Claims. (Cl. 48—176)

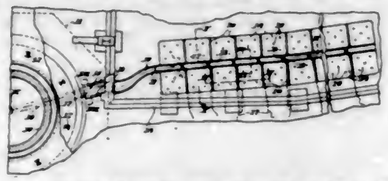
1. In a circular storage tank construction having a vapor sustained cover adapted to rise and fall, said cover having an outer cylindrical shielding skirt surrounding the launder, and an inner cylindrical sealing skirt substantially concentric with the outer skirt and extending into said launder and having sealing relationship therewith, guide means for stabilizing up and down movement of the cover relative to the tank comprising a plurality of at least three spiral guide rail units of relatively steep pitch provided upon the outer face of the outer wall of the launder and substantially evenly spaced from one another along the circumference of the launder, guide roller means cooperatively associated with said spiral guide rail units comprising an inverted bracket mounted upon the extreme lower edge portion of said outer skirt, a guide roller mounted upon said bracket at the underside thereof to rotate about a horizontal axis extending radially with respect to the tank and having guide relationship with one of said spiral guide rail units, and an auxiliary guide roller mounted upon said outer skirt portion rotating about an axis extending transversely of and at right angles to the line of pitch of the spiral up and down motion of the cover and to have guiding relationship with the outer wall of said launder.

2,450,987
HANDLING AND JOINING COOPERATING MEMBERS
Robert Potter, Mount Lebanon, Pa., assignor to Superior Steel Corporation, Pittsburgh, Pa., a corporation of Virginia
Application February 19, 1942, Serial No. 431,595
11 Claims. (Cl. 153—1)

2. Peining means comprising a pair of cooperating rolls respectively having yielding face portions for squeezing work therebetween, at least one of such rolls having a metal face portion for engaging and peining a portion of the work.

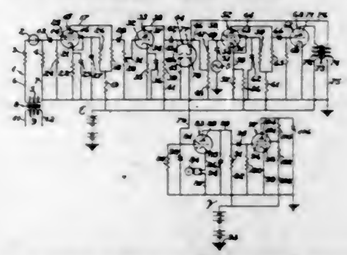
4. Apparatus for joining a member having opposed flanges and a member adapted to be held thereto by said flanges comprising supporting means for the second mentioned member, conveying means at opposite sides of said supporting means whereby the first mentioned member is movable parallel to the length of its flanges into cooperative relationship with the second mentioned member while straddling the second mentioned member and with said flanges in engagement with said conveying means and means for deforming said flanges into holding position relative to said second mentioned member.

2,450,988
ARTIFICIAL FISH BAIT
Earl R. Putnam, Grosse Pointe Woods, and Frank J. Nefske, Detroit, Mich.
Application January 10, 1947, Serial No. 721,226
4 Claims. (Cl. 43—42)



1. An artificial bait consisting of a flexible body bent and rebent upon itself to form a plurality of folds, each having a transverse passageway formed therethrough, there being a portion of said body having a longitudinal passageway therethrough, said last named passageway communicating with a slot adapted to accommodate a substantial part of the curved portion of a fish hook, there being an insert of hard material positioned in an enlargement of said slot and adapted to reinforce said body at one end of said slot.

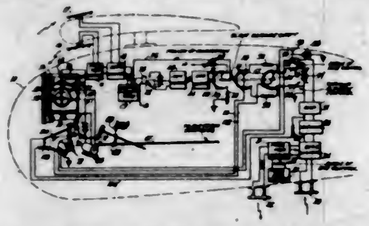
2,450,989
METHOD AND MOLD FOR CASTING BLAST-FURNACE SALAMANDERS
William J. Rees, Trenton, Mich., assignor to National Steel Corporation, a corporation of Delaware
Application June 19, 1944, Serial No. 541,058
3 Claims. (Cl. 22—131)



3. A mold adapted to accommodate the metal constituting a blast-furnace salamander, comprising a bed at a level below the bottom of the furnace hearth, spaced walls built up on the bed, said walls forming a plurality of separate molds, a runner alongside the molds, hollow stakes ex-

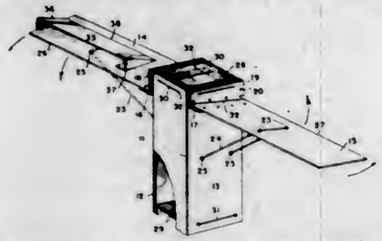
tending upwardly from the bed in spaced relation within said molds, and a sand filling in said

stakes to provide cores for forming holes extending through the blocks cast in the molds.



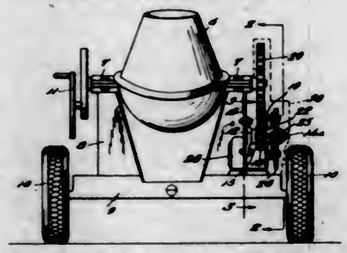
2,450,990
SENSITIVE PHOTOELECTRIC CONTROL FOR SIGNAL DEVICES
Theodore K. Riggen, Elmira, N. Y.
Application June 4, 1947, Serial No. 752,511
4 Claims. (Cl. 177—311)

1. In a photo-metric device a signal generating circuit including a source of alternating current, a resistor and a photo-sensitive electronic tube, means for amplifying and rectifying the signal produced by said circuit so as to produce a positive voltage which varies in accordance with the intensity of illumination of said photo-sensitive tube; a second amplifying and rectifying means including an amplifying tube having a cathode, an anode and a control grid; means for impressing a substantially constant alternating signal voltage on said grid, means for biasing the grid negatively with respect to the cathode to render the tube non-conductive, means for filtering the amplified and rectified signal from the signal circuit and impressing it on said grid of tne amplifying tube so as to render the amplifying tube conductive when the photo-sensitive tube receives light of a pre-determined intensity, a signalling device, and means responsive to a reduction in out-put of the second amplifying means for causing actuation of said signalling device.



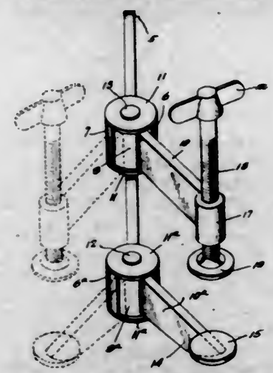
2,450,991
RADAR CONTROL SYSTEM
Royden C. Sanders, Jr., Hightstown, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application May 4, 1944, Serial No. 534,108
16 Claims. (Cl. 343—7)

5. A control system for a dirigible air-borne device comprising gyrostabilizer means for controlling the attitude of said device, distance measuring means for measuring altitude, distance measuring means for obtaining an indication of the slant distance to a point on the earth's surface, means actuated by one of said distance measuring means for controlling said gyrostabilizer means to make said device go to an altitude selected by an adjustment of said one distance measuring means, and means for changing said adjustment of said one distance measuring means in response to a change in the ratio of said altitude



and slant distance measurements for causing a decrease in said altitude as said distance decreases.

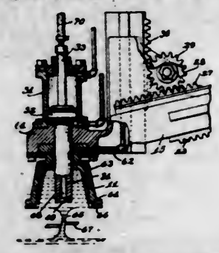
2,450,992
FREE-FALL AERIAL CONTAINER
William J. Sanderson, Madison, Wis., assignor to the United States of America as represented by the Secretary of Agriculture
Application November 16, 1945, Serial No. 629,205
6 Claims. (Cl. 244—138)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. A device of the character described comprising a container, wings on the sides of the container, each wing having an end hinged to the container to permit inward retraction against the sides of the container, and means to restrain the wings from outward movement beyond a predetermined position, whereby said device in falling through the air will tend to rotate by the action of the air against said wings, and at least one auxiliary wing secured to one of said main wings for retarding such rotation.

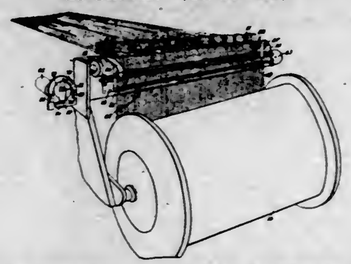
2,450,993
ELECTRIC MOTOR-DRIVEN CONCRETE MIXER
Joseph Santagata, Cranston, R. I.
Application April 5, 1945, Serial No. 586,690
3 Claims. (Cl. 259—177)

1. A special motion take-off and transmitting gearing assembly for use on a conventional concrete mixer machine for coaction with a standard-type driving gear on the mixer drum and adapted to accommodate a standard sprocket gear equipped electric motor comprising an adapter fixture adapted to be secured rigidly to the frame of the mixer machine, and including an outstanding axle, and a rotor including hub means mounted for rotation on said axle, said hub means including a motion transmitting gear located for coaction with the driving gear on said mixer drum, and further including a sprocket wheel arranged for coaction with a complemental sprocket driven by said motor.



2,450,994
C-CLAMP WITH LATERALLY ADJUSTABLE ARM EXTENSIONS
Norman G. Schaefer, Jersey City, N. J.
Application September 25, 1946, Serial No. 699,307
3 Claims. (Cl. 144—304)

1. A clamp of the character described comprising, a U-shaped frame, a pair of axially aligned sleeves carried by the ends of said frame, upper and lower arms having cylindrical ends swingably mounted on said sleeves, said sleeves having an opening in their forward walls to provide for the working of the arms in the sleeves, a pair of plates carried by the ends of the sleeves to secure the cylindrical ends therein, said plates holding the cylindrical ends of the upper and lower arms in their respective sleeves, a fixed clamping plate carried by the lower arm, an adjustable screw carried by the upper arm, and a clamping plate carried by the inner end of the screw cooperating with the fixed clamping plate.

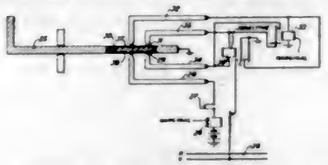


2,450,995
APPARATUS FOR FORMING HOLLOW GLASSWARE
Harold R. Schutz, Toledo, Ohio, assignor, by mesne assignments, to Owens-Illinois Glass Company, Toledo, Ohio, a corporation of Ohio
Application August 14, 1943, Serial No. 498,639
5 Claims. (Cl. 49—5)

1. A machine for forming hollow glass articles comprising, in combination, a blank mold formed with a mold cavity therein and open at its lower end, the mold being formed with an opening through its upper end wall into the mold cavity, said opening being of smaller diameter than the mold cavity, a plunger projecting downwardly through said opening into the mold cavity and spaced inwardly from the surrounding mold walls and having its lower end spaced above the bottom level of the mold, said plunger having a channel extending downwardly therethrough and terminating in an opening formed in the lower end of the plunger, means for drawing a charge of glass upwardly by suction into the mold and thereby filling the mold and enveloping the plunger in the glass, means for thereafter with-

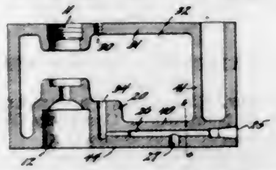
drawing the plunger upwardly relative to the mold, and means for maintaining suction through said channel during said withdrawal of the plunger and thereby reshaping the glass as the plunger is withdrawn to form a hollow blank open at its lower end.

2,450,996
AUTOMATIC STOP MECHANISM FOR WARPERS
John S. Seney, Richmond, Va., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del., a corporation of Delaware
Application March 27, 1947, Serial No. 737,585
10 Claims. (Cl. 28—51)



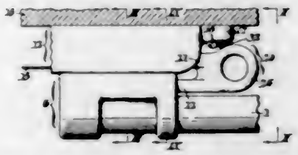
1. An automatic control for a warper or the like having a moving thread sheet and driving means therefor, comprising a switch having an actuating head adapted to span two threads of said thread sheet but to pass through the space left by a missing or loose thread, a switch carriage carrying said switch, means mounting said carriage to traverse said thread sheet with the switch normally held open by contact of said head with the threads of said sheet, means causing said head to enter the space left by a missing or loose thread to close said switch, a stop circuit connected to be actuated by the closing of said switch and adapted to stop the thread sheet driving means, means continuously feeding said carriage across said thread sheet in checking and return strokes, and means actuated during the return strokes to test the operative condition of said stop circuit.

2,450,997
SIGNALING SYSTEM
Oscar A. Shann, Short Hills, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application May 23, 1945, Serial No. 595,302
3 Claims. (Cl. 177—353)



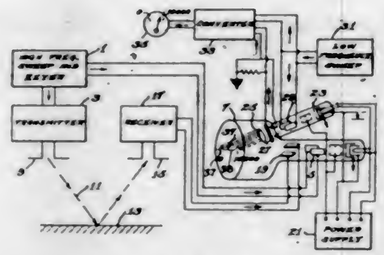
1. In a check-controlled signaling system, a check having a changeable internal resistance, a

circuit into which said check may be inserted, means responsive to the insertion of said check in said circuit for causing a change in the in-



ternal resistance of said check, and means responsive to the sequential values of the resistance of said check for transmitting a signal.

2,450,998
CYLINDER HEAD CONSTRUCTION, BRIDGE COOLING
Richard H. Sheppard, Hanover, Pa.
Application May 5, 1947, Serial No. 745,910
6 Claims. (Cl. 123—173)

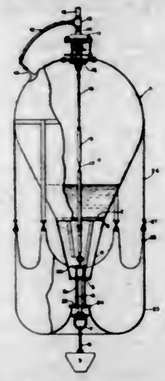


2. A cylinder head casting for a Diesel engine having therein coaxial recesses to receive an injector and a combustion chamber insert, and having in proximity thereto an inlet valve guide and an exhaust valve guide, recesses in the bottom of said casting, coaxial with said guides for reception of valve seat inserts, a bridge of metal extending downwardly from the guides to the bottom of the casting forming a bridge integral with and proximate to the combustion chamber recess characterized by the provision of a vertical bore extending downwardly through the bridge, in proximity to the combustion chamber recess, and a bore at right angles thereto and communicating therewith, extending horizontally to said vertical bore and between the axes of said valve insert recesses.

2,450,999
TERMINAL FOR ELECTRIC DISCHARGE TUBES
George E. Shoemaker, Ithan, Pa.
Application January 14, 1948, Serial No. 2,167
13 Claims. (Cl. 176—122)

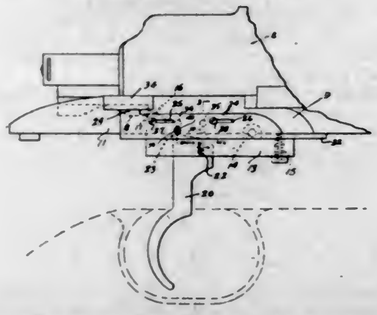
1. In combination, an electric discharge tube, a base, and a link for electrically connecting and mechanically supporting said tube in relation to said base, said tube and said base each having therein a socket and a conductor with a portion exposed within said socket and otherwise insulated, said sockets being relatively deep and narrow whereby the exposed portions of the conductors are inaccessible to human fingers, and said link having prongs adapted to fit within said sockets and having a conductor embedded within the link and exposed only at areas where said prongs contact the conductors of said tube and base.

2,451,000
REPEATER INDICATOR FOR PULSE ECHO DISTANCE MEASURING DEVICES
Rogers M. Smith, Merchantville, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application November 30, 1940, Serial No. 367,909
12 Claims. (Cl. 343—13)



1. A repeater for a pulse transmitting-pulse echo receiving distance measuring device for repeating at a remote point the visual indications of such device including means responsive to the received echo signal for deriving a current corresponding to the echo, means responsive to the outgoing pulses for deriving a reference current, said corresponding current and said reference current both having a frequency lower than the pulse transmission rate, and means including a moving element for indicating the distance as a function of the relative phase of said currents.

2,451,001
BRASSIÈRE
Leda I. Speiser, Chicago, Ill., now by marriage Leda I. Lash
Application December 11, 1944, Serial No. 567,567
8 Claims. (Cl. 2—42)

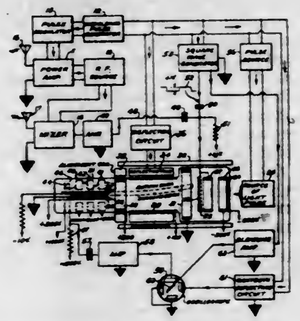


1. A brassière comprising a lower girdle member extending around the body underneath the breasts, an upper girdle member extending around the body above the breasts, two breast pockets secured at their upper edges to the upper girdle member and at their lower edges to the lower girdle member, a third girdle member overlying the upper portion of the breasts, the front portions of said third girdle member lying intermediate the front of said upper and lower girdle members, said third girdle member comprising two strap members, and means for uniting said strap members in front comprising a portion symmetrical about a vertical axis and having downwardly diverging side edges lying between the breast and body.

2,451,002
SALVAGE APPARATUS
Mark J. Sturtevant, Akron, Ohio, assignor to Wingfoot Corporation, Akron, Ohio, a corporation of Delaware
Application June 19, 1946, Serial No. 677,851
19 Claims. (Cl. 114—54)

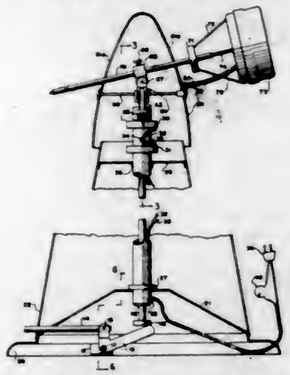
1. A salvage device for raising submerged objects from a body of water comprising an air chamber open at the underside thereof, normally closed valve means at the upper side thereof for preventing escape of air therefrom, and actuating means connected to said valve arranged in a position to be retarded sufficiently by the water when the rise of said container in a body of water is at a rate exceeding that desired, to thereby cause opening of said valve to release air from said chamber to decrease the buoyancy thereof.

2,451,003
SAFETY DEVICE FOR FIREARMS
Irene E. Syrjala, Mount Clemens, Mich.
Application January 9, 1948, Serial No. 1,412
5 Claims. (Cl. 42—70)



1. The combination with a rifle action comprising a receiver frame, a sear pivotally mounted intermediate its ends on the frame and having its forward end normally positioned in spaced relation beneath the frame, and means for actuating the sear, of a safety device comprising a body mounted on a side of the receiver frame for slidable forward and backward movement, and a plate on the body projecting laterally thereof beneath the frame and adapted, upon backward and forward actuation of said body, to be moved into and out of the space between the frame and sear for respectively precluding and providing for pivotal movement of the sear.

2,451,004
SECTIONALIZED AERIAL DUCT
George S. Van Antwerp, Norristown, Pa.
Application June 23, 1945, Serial No. 601,258
4 Claims. (Cl. 174—41)

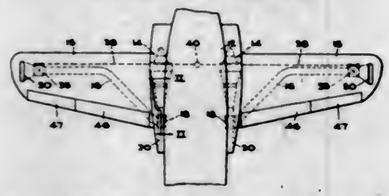


1. A messenger-supported aerial duct system composed of a plurality of contiguous sections of duct, each section comprising a hanger member and a saddle member, the hanger member having a groove for receiving the messenger and having downwardly and outwardly diverging portions, and the saddle member having upwardly and outwardly diverging portions interlocked with the downwardly diverging portions of the hanger member and forming therewith a continuous ductway for one or more cables, of which the hanger member defines the ceiling and the saddle member defines the floor.

2,451,005
CATHODE-RAY STORAGE TUBE APPARATUS AND METHOD OF OPERATION
Paul K. Weimer and Vladimir K. Zworykin, Princeton, and Irving Wolff, Manasquan, N. J., assignors to Radio Corporation of America, a corporation of Delaware
Application August 30, 1946, Serial No. 694,042
18 Claims. (Cl. 315—12)

3. In combination a cathode ray tube having a mosaic that functions to store signals applied thereto, means for directing a beam of electrons against said mosaic, means for varying the potential of said mosaic with respect to a fixed reference potential and in accordance with an applied signal whereby the charge acquired by a capacity element of said mosaic when it is scanned by said beam is a function of said mosaic potential, means for causing said beam to scan said mosaic once while a signal is varying the potential of said mosaic for causing the capacity elements of the mosaic which are thus scanned to acquire charges in accordance with the potential variations of the mosaic with reference to said fixed potential, means for causing said beam to scan said once-scanned elements a second time while an applied signal is again varying the potential of said mosaic with reference to said fixed potential whereby if the two signals are alike the voltage difference between the fixed potential point and successive scanned capacity elements is constant during said second scanning so that there is no signal output.

2,451,006
HELICOPTER ROUNDABOUT
William L. West, Belmont, N. C.
Application July 16, 1946, Serial No. 683,857
2 Claims. (Cl. 272—31)

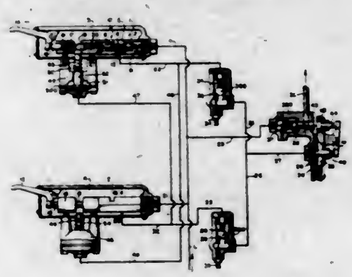


2. In a roundabout, a vertically disposed hollow support, a vertically slidable shaft disposed in said support, an elongated pipe mounted intermediate its ends on the upper end of said vertically slidable shaft, a driving motor on one end of the elongated pipe, and a helicopter having a rotor on the other end of the pipe, a driving shaft connected to the motor and to said rotor for imparting rotation thereto, said vertical support having annular conducting rings disposed therearound, a bushing in the upper end of the vertical support having a pair of brushes contacting said rings, means for supplying electric current to the rings, the upper end of said slidable shaft having a bracket pivotally secured thereon, the upper end of said bracket having a second bracket pivotally secured thereon on a pivot at right angles to the first pivot, a lever on the first bracket, a link pivotally connected to the lever and to said bushing, means in the second bracket for mounting the elongated pipe intermediate its ends so that raising of the shaft will tilt the second bracket to vary the angle of attack of the helicopter, thereby controlling direction of flight.

2,451,007
BABY STRAP
Gertrude K. White, Philadelphia, Pa.
Application July 29, 1946, Serial No. 686,851
1 Claim. (Cl. 155—189)

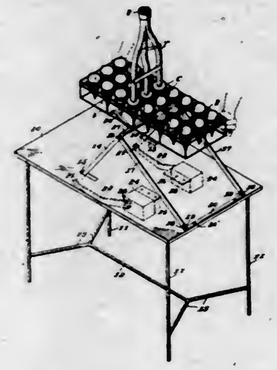
A strap for tying babies in chairs, comprising a body portion including a length of wide fabric material, the side edges of the body portion being curved inwardly from the ends thereof providing wide ends and a narrow intermediate portion forming a clearance for the legs of the baby positioned within the strap, laterally extended strap sections formed integral with each end of the body portion, the laterally extended straps adapted to be secured to the back of a high chair above the arms thereof, and the intermediate portion of the body portion providing a sling in which the baby using the device is held.

2,451,008
REACTION JET SYSTEM FOR AIRCRAFT CONTROL
William W. Williams, Buffalo, N. Y., assignor to Bell Aircraft Corporation, Buffalo, N. Y.
Application March 26, 1945, Serial No. 584,923
1 Claim. (Cl. 244—52)



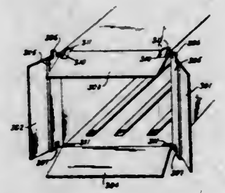
In an aircraft, in combination, a jet propulsion power unit having a tail pipe for directing the gas discharge from said power unit rearwardly of said aircraft for motivating said aircraft and a reaction flight control device for rotating the aircraft about a flight control axis thereof, said control device comprising a pair of jets each of which is disposed to receive a gas blast from said tail pipe and to direct it upwardly, a pair of jets each of which is disposed to direct a gas blast downwardly, said paired jets being disposed exteriorly of the aircraft at positions oppositely remote from said flight control axis, gas take off means in communication with the interior of said tail pipe for diverting through said pets a portion of the gas discharge from the tail pipe of the power unit, and control means for selectively directing the gas received from said take off means to the pair of upper jets, the pair of lower jets, and opposite upper and lower jets.

2,451,009
AIRCRAFT CONTROL SURFACE
William W. Williams, Buffalo, and Herbert L. Bowers, Kenmore, N. Y., assignors to Bell Aircraft Corporation, Buffalo, N. Y.
Application October 18, 1945, Serial No. 622,976
9 Claims. (Cl. 244—42)



1. A mechanism for mounting and controlling extension-retraction motions of an aircraft flap, said mechanism comprising in combination, a bracket adapted to be fixedly mounted upon an aircraft wing structure, a first bearing carried by said bracket in positionally fixed relation thereon, a trunnion bearing device on said bracket, a second bearing carried by said trunnion bearing device for axial alignment with said first bearing while in spaced relation therefrom, said trunnion bearing device having its pivot axis disposed horizontally and transversely of the direction of alignment of said bearings, an arm disposed to extend through said bearings in cantilever mounted relation thereon and so as to be longitudinally slidable and axially rotatable therein, a gear rack projecting from said arm and integral therewith and extending generally longitudinally thereof while being curved helically therearound, said second bearing being recessed to accommodate said gear rack in longitudinally slidable relation therethrough, gear means rotatably mounted upon said second bearing and in mesh with said gear rack and adapted to be coupled to a pilot controlled device for operation of said gear means to procure axial displacement of said arm relative to said bracket and coincident rotation of said arm in response to the camming action of said rack relative to said second bearing, a member carried by the outboard end of said cantilever arm in longitudinally fixed but rotatable relation thereon and carrying a pivot connection device for connection to an aircraft flap about a horizontal pivot axis extending spanwise of the flap, and a crank carried by the outboard end of said arm to rotate therewith and adapted to be connected to said flap at a position spaced from said pivot connection in a direction chordwise of the flap for tilting said flap about said pivot connection in response to rotation of said cantilever arm.

2,451,010
SAFETY LOCKING AND UNLOCKING TWO-HAND CONTROL
Basil J. Yanchenko, Syracuse, N. Y., assignor, by mesne assignments, to G. A. Braun, Inc., Syracuse, N. Y., a corporation of New York
Application January 11, 1946, Serial No. 640,657
4 Claims. (Cl. 121—38)



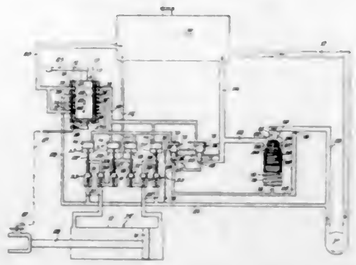
1. In a two hand control mechanism, right and left hand manually operated self-returning control valves of the combined intake and exhaust type connected to a fluid pressure supply line and normally in closed position in which the intake is closed, each control having a normally open exhaust port, a self-closing master valve connected in a pressure fluid supply line and normally in closed position, a pressure fluid motor operable to open the master valve, a check valve paired with and located in a line in series with each manual control valve, each check valve having its valve member arranged to check the flow of fluid from its companion control valve when the companion control valve is open, and having a restricted open by-pass around its check member to the outlet end of the check valve, the outlet ends of the check valves being connected by a conduit to permit the fluid by-passing either check valve to pass out the exhaust port of the other manual control valve when the latter control valve is closed, and motive fluid operated means for locking the control valves in starting position, the lock means for the right hand valve being connected in multiple in the line connected to the check valve paired with the left hand valve, the lock means for the left hand valve being connected in the line to the check valve paired with the right hand control valve, the motor for the master valve being connected to the pipe conduit connecting the outlet ends of the check valves.

2,451,011
APPARATUS FOR FILLING CONTAINERS
Fred P. Yoars, New Orleans, La.
Application April 21, 1945, Serial No. 589,587
5 Claims. (Cl. 226—94)

1. Apparatus for supporting a container-holding rack beneath a semi-solid material filling tube for movement of the rack toward and from the tube as well as horizontally for successive filling of the containers, comprising a rigid horizontal base support, a horizontally disposed rack engaging bar disposed above the base support and having laterally disposed legs integral therewith extending downwardly through slots in the base support, pivotal connections between the base support and the upper ends of the legs, and yieldable means disposed below the base support having pivotal connection with the lower ends of the legs for urging the rack-supporting bar upwardly while offering little resistance to manual lowering of the bar, said bar having a rounded rack-engaging surface, and laterally disposed rack-engageable guides connected to the bar and projecting thereabove.

2,451,012
FILE CABINET INTERLOCK AND REINFORCING ELEMENTS
Philip Zalkind, New York, N. Y.
Original application February 26, 1943, Serial No. 477,204. Divided and this application May 24, 1944, Serial No. 537,133
13 Claims. (Cl. 312—108)

1. In a collapsible container having a side wall and top and bottom walls; an extension from the



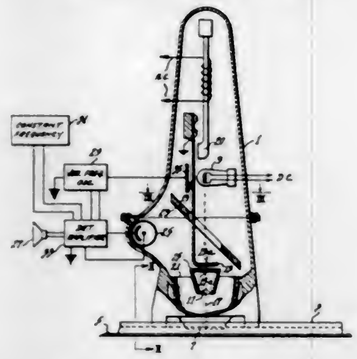
side wall hingedly connected thereto, and foldable into said container between said top and bottom walls; a vertical reinforcement member on said extension disposable between said top and bottom walls; openings in said top and bottom walls registerable with the ends of said reinforcement member; interlock elements at the ends of said reinforcement member accessible through said openings for interlocking said container with other containers.

2,451,013

APPARATUS FOR CONTROLLING SELECTIVE DELIVERY OF FLUID FROM A CONTINUOUS DELIVERY SOURCE TO A FLUID-DRIVEN MOTOR

Joseph F. Ziskal, Cicero, and William O. Bechman, Chicago, Ill., assignors to International Harvester Company, a corporation of New Jersey

Application July 18, 1945, Serial No. 605,706
6 Claims. (Cl. 60—52)



3. In apparatus for controlling delivery of actuating fluid to a fluid-actuated device from a constant delivery source conditionable for relatively high and low pressure operation and for controlling exhaust of the fluid from the device; an inlet passage communicative between said source and said device, an admittance valve in said passage and selectively closable or openable to respectively block the admittance of fluid to the device through said passage or terminate its blocking function; an outlet passage communicative with said device; an exhaust valve in said outlet passage and selectively closable or openable to respectively block the exhaust of fluid from the device through such outlet passage or terminate its blocking function, fluid motor means operable when subjected to one status of fluid pressure to incur opening of said admittance valve and while incurring conditioning of said source for high pressure delivery and operable when subjected to another status of fluid pressure to incur closing of said admittance valve while incurring conditioning of said source for low pressure operation, additional fluid motor means operable when subjected to one status of fluid pressure to incur opening of the exhaust valve and operable when subjected to another status of fluid pressure to incur closing of the exhaust valve, and settable valve means communicatively interposed between said source and each of said motor means to utilize the pressure of fluid at said source in subjecting the motor means to different fluid pressure statuses, said settable valve means being settable from a neutral position wherein each of said motor means is subjected to fluid pressure at its other status to positions selectively creating the one status of pressure subjection of said motor means.

2,451,014

OPTOPHONE

Vladimir K. Zworykin, Princeton, and James Hillier, Cranbury, N. J., assignors to Radio Corporation of America, a corporation of Delaware

Application October 26, 1944, Serial No. 560,472
6 Claims. (Cl. 250—41.5)

1. A method of enabling a blind person to locate and distinguish between different degrees of light through the ear and thus to read printed matter, said method comprising, producing an audible tone, synchronously varying the frequency of said tone and moving a spot of light in a vertical direction over an elementary area of said printed matter while advancing said spot horizontally from one elementary area to the next, and interrupting said audible tone when said spot of light encounters a light reflecting area during its said vertical and horizontal movements.

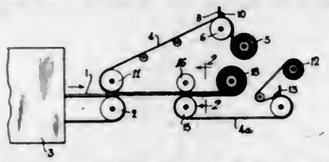
2,451,015

DISPENSING PACKAGE FOR CARTRIDGE RELOADING COMPONENTS

Heston D. Adams, Mount Morrison, Colo.

Application April 26, 1944, Serial No. 532,845
2 Claims. (Cl. 206—47)

1. A dispensing package for cartridge loading components, comprising a container, a predetermined weight of powder confined in a smaller container, and a bullet of a predetermined size, weight and type, positioned in the first mentioned container means comprising a fibrous spacer positioned between the bullet and the smaller container, and means for closing the first mentioned container, the quantity of powder being in predetermined relation to the size and weight of the bullet.



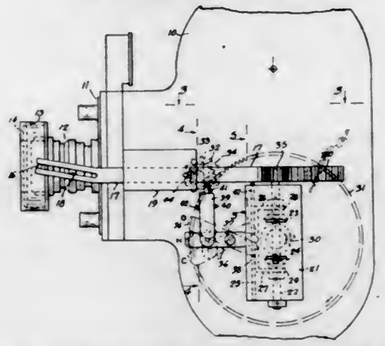
2,451,016

ELASTIC THREAD AND PROCESS OF MAKING SAME

Sterling W. Alderfer, Akron, Ohio

Application October 18, 1945, Serial No. 623,026
15 Claims. (Cl. 154—91)

1. A process of making elastic threads comprising the steps of placing a sheet of uncured rubber between two layers of a fugitive backing material, said material having the property of permanently elongating when stretched to a predetermined degree, curing the rubber, slitting the composite sheet thus formed into ribbons,



stretching the ribbons, and thereafter removing the backing.

2,451,017

MOVIE CAMERA ATTACHMENT FOR MAKING LAP DISSOLVES

Victor Aldreany, Danbury, Conn.

Application February 14, 1945, Serial No. 577,887
9 Claims. (Cl. 88—16)

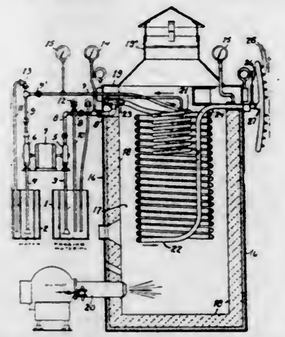
1. In a motion picture camera including a housing enclosing mechanism for operating a film, and an adjustable shutter for controlling passage of light through the lens to the film, an easily removable side plate for the housing permitting access to the housing for insertion and removal of film in and from the film operating mechanism, mechanism mounted on the plate and removed and applied with it for gradually operating the shutter to gradually vary the light entering therethrough, means connecting said latter mechanism with the film operating mechanism for operation thereby and placed in operative relation by the act of placing the plate in position on the open side of the housing, manually controlled means on the plate for placing the second mechanism in driving relation with the shutter to operate the shutter during movement of the film, and means on the plate operated in timed relation with the shutter operating means for automatically rendering the shutter operating means inoperative after a given operation of the shutter.

2,451,018

METHOD OF PREPARING AN ISOMERIZATION CATALYST FOR NORMAL PARAFFINS

Robert E. Burk, Cleveland Heights, Ohio, assignor to The Standard Oil Company, Cleveland, Ohio, a corporation of Ohio

No Drawing. Application October 28, 1943, Serial No. 508,070
3 Claims. (Cl. 260—683.5)



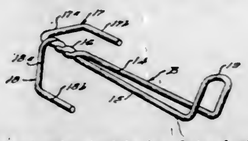
1. A method of preparing a catalyst for use in effecting isomerization of normal paraffins under isomerizing conditions, which comprises bringing together liquid hydrogen fluoride, and boron trifluoride under a partial pressure of 5–550 pounds per square inch, in contact with a normal paraffin to be isomerized and ½ to 25 weight percent of an olefin based on the weight of the hydrocarbon to be isomerized, said amount of olefin being merely that which modifies the catalytic activity of the fluorides in effecting the isomerization of the normal paraffin as the primary reaction.

2,451,019

APPARATUS FOR PRODUCING ARTIFICIAL FOG

Garland H. B. Davis, Elizabeth, N. J., assignor to Standard Oil Development Company, a corporation of Delaware

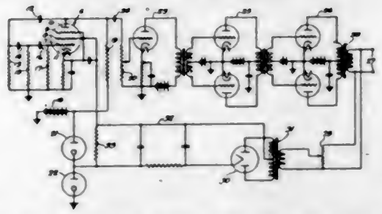
Application August 31, 1943, Serial No. 500,608
2 Claims. (Cl. 252—359)



1. Apparatus for producing an artificial fog comprising a portable fire chamber and a source for heating the same, a steam coil mounted therein, a second coil also mounted therein and adapted to heat and completely vaporize a distillable organic liquid, a nozzle connected with the discharge end of the first mentioned coil and connected with the inlet end of the second mentioned coil whereby steam is continuously supplied to the organic liquid, a means for discharging the completely vaporized mixture into the atmosphere at a velocity of at least 50 feet per second at the coil outlet.

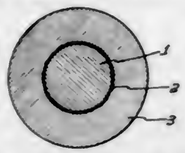
2,451,020

EASEL BRACKET



Orrie Earl Davis, Ballston Spa, N. Y.

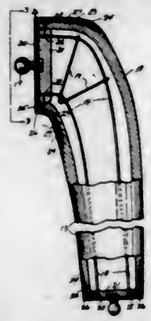
Application July 11, 1945, Serial No. 604,465
2 Claims. (Cl. 248—210)



1. A bracket adapted to be detachably mounted on a step ladder for supporting a sash screen or the like, comprising a single length of wire bent upon itself to provide two shank members terminating at their inner ends in two angularly related hooks adapted to embrace the adjacent rear edges of a step and a side rail of the ladder, said shank members being adapted to rest on said step and terminating at their outer ends in an upstanding abutment positioned outwardly of said rail in front of the ladder.

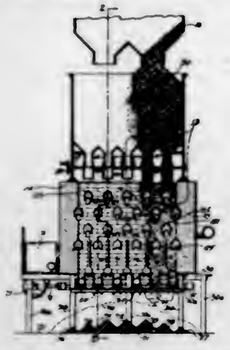
2,451,021
VOLTAGE REGULATING AMPLIFIER SYSTEM
Rocco J. Detuno, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a corporation of New York
Application June 27, 1944, Serial No. 542,416
11 Claims. (Cl. 250—36)

11. An electronic generator having an output circuit connectable to an external load, said generator comprising a thermionic tube having an anode, a cathode, an input grid and a screen grid, means tending to apply a constant positive potential to said screen grid, and means for adding to said positive potential at the screen grid a negative potential inversely proportional to the output current of said system, said last means being coupled to the output circuit and responsive to current fluctuations in the output circuit due to variations in the external load.



2,451,022
COLOR CHANGING ANTISEPTIC COMPOSITION
Frederick C. Dohrmann, Los Angeles, Calif. Substituted for application Serial No. 333,881, January 21, 1929. This application filed February 28, 1944, Serial No. 524,219
4 Claims. (Cl. 167—13)

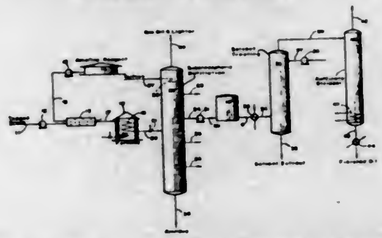
1. A capsule having an inner core of a dye, a shell enclosing said dye, said shell having the property of allowing access to said dye after an extended interval of time when immersed in water, and an outer body associated with said core containing a water soluble antiseptic and germicidal composition.



2,451,023
MANNEQUIN LIMB
Joseph R. Dusko, Youngstown, Ohio
Application December 15, 1945, Serial No. 635,190
2 Claims. (Cl. 46—163)

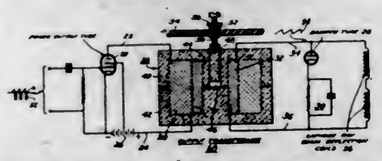
1. A mannequin limb including a hollow body section, a metallic supporting structure positioned therein, metallic end plates affixed to both ends of the said supporting structure and defining the ends of the said limb, joint means affixed to the said metallic end plates, nailer sections positioned immediately adjacent the said metallic end plates and inwardly therefrom, and means for attaching the end sections of the hollow limb to the said nailer sections and metallic end plates, said means comprising a layer of screen encircling each end section of the limb, fasteners driven through the screen and the material of the hollow limb and into the circumferential edge of the nailer section, and a metal cap encircling and overlying at

least part of the screened section and enclosing the end of the hollow limb, and finishing material filling the surface area between the metal cap and the finished surface area of the said hollow limb.



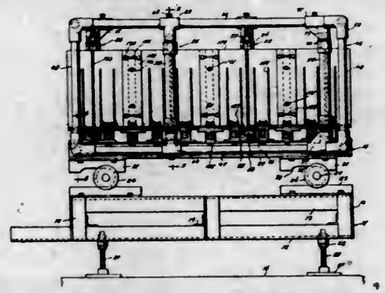
2,451,024
METHOD OF CALCINING AND CALCINING APPARATUS
Thomas R. Ellerbeck, Salt Lake City, Utah
Application April 7, 1942, Serial No. 438,047
27 Claims. (Cl. 263—29)

7. Calcining apparatus, comprising walls defining a calcining chamber; a hopper engaging said walls in a substantially gas-tight manner, and rising above said calcining chamber, for holding a supply of massed discrete pieces of material to be calcined and for substantially continuously feeding said material to said calcining chamber; walls defining enclosed chamber means laterally of and immediately adjacent to said calcining chamber; combustion means arranged for firing said chamber means; means disposed within said calcining chamber for maintaining the mass of said material in a loose condition during its descent through the calcining chamber; means for passing gases of combustion from the said chamber means substantially uniformly into and throughout the said mass of material as it descends through the said calcining chamber; means for exhausting said gases of combustion from the calcining chamber following their passage through the said mass of material; means for controlling the passage of said gases of combustion from said chamber means through said material, and the exhaust of said gases from said calcining chamber; and



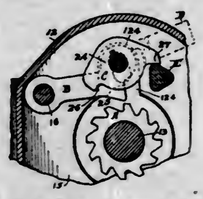
means operative to continuously discharge the calcined material from said calcining chamber variably at different locations substantially throughout both the length and the breadth of the transverse area of said calcining chamber.

2,451,025
METHOD OF REFINING LUBRICATING OILS
Harold L. Ellender, Baytown, Tex., assignor to Standard Oil Development Company, a corporation of Delaware
Application November 15, 1945, Serial No. 628,819
4 Claims. (Cl. 196—35)



1. A process for refining mineral lubricating oils having a neutralization value greater than 1.0 milligram of KOH per gram of oil which comprises intimately contacting a mineral oil comprising lubricating oil fractions and organic acids naturally occurring therein with an alkaline reagent to form a substantially neutralized mineral oil, passing the neutralized mineral oil in a stream to a distillation zone and continuously distilling to form a lubricating oil distillate, adjusting the amount of alkaline reagent to obtain a distillate having a neutralization value of about 1.0 milligram of KOH per gram of distillate, extracting said distillate with phenol to form a raffinate phase and an extract phase, separately removing the phases and recovering an improved lubricating oil from said raffinate phase.

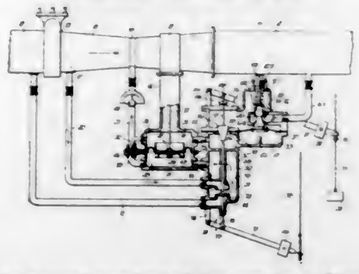
2,451,026
TELEVISION SYSTEM
Albert W. Friend, Collingswood, N. J., assignor to Radio Corporation of America, a corporation of Delaware
Application October 2, 1945, Serial No. 619,869
12 Claims. (Cl. 315—27)



1. Apparatus for regulating the size of the image raster scanned by a cathode ray beam in a television system of the type in which a power output tube is adapted to deliver cyclically varying current, a portion of each cycle of which varies in a substantially linear manner with respect to time, through a coupling transformer to at least one cathode ray beam deflection coil, said coupling transformer being designed with a core having an aperture therein, said apparatus including a core segment normally lying at least partly within said aperture, and means for varying the position of said segment relative to said core and, hence, the permeability of said core, whereby the peak amplitude of the cyclically varying current flowing through said cathode ray beam deflection coil is altered to effect a change in the size of the image raster scanned by the cathode ray beam.

2,451,027
CUTTING MACHINE FOR PLASTIC MATERIAL
Joseph J. Gano, Worcester, and Leon W. Richardson, Cherry Valley, Mass., assignors to Controls Laboratories, Inc., a corporation of Delaware
Application February 17, 1945, Serial No. 578,514
5 Claims. (Cl. 25—108)

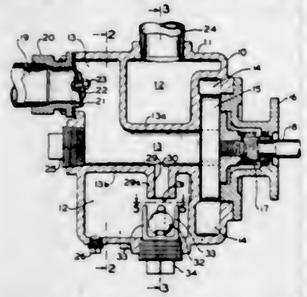
1. A machine for making transverse cuts in a moving column of extruded plastic material to form blocks having recessed end walls of predetermined contour, such machine comprising a base support, a carriage mounted on the base support, means for permitting movement of the carriage in a direction parallel with the moving column during the cutting operation, an elongated platen on the upper side of the carriage for receiving the column, means for guiding movement of the column over the platen in a substantially straight line of travel relative to such platen, a frame structure carried by the carriage and being movable transversely of the column, a plurality of pairs of cutting wire frames pivotally mounted on a vertical axis on the frame structure, the frames in each pair being generally aligned transversely of the frame structure, each frame including interconnected upper and lower arms, and a cutting wire mounted between the outer ends of the arms, cam means carried by the carriage for guiding such outer ends to cause the cutting wire to make a cut of predetermined contour, a cam follower, and means connecting the cam follower with the outer ends of the cutting wire frames.



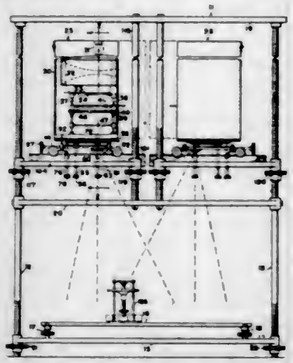
2,451,028
HAND BRAKE
Stacy B. Haseltine, La Grange, Ill., assignor to W. H. Miner, Inc., Chicago, Ill., a corporation of Delaware
Application October 22, 1945, Serial No. 623,726
6 Claims. (Cl. 188—81.1)

4. In a hand brake, the combination with a member adapted to be rotated to effect tightening of the brake; of a ratchet wheel rotatable

with said member; a locking dog pivoted at one end and having a tooth at the other end engageable with said ratchet wheel; a fixed stop member; a trip element rotatably connected to said dog at the toothed end thereof; a lever fixed to said trip element for rotating the same; and a pair of spaced cam lugs on said element, one of said lugs being engageable with said stop member to swing said dog into engagement with the ratchet wheel, and the other of said lugs being engageable with said stop member to swing said dog out of engagement with the ratchet wheel.



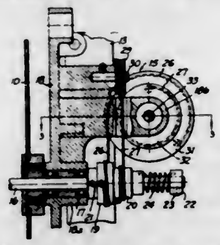
2,451,029
FLOW CONTROLLER RESET
Walter J. Hughes, Chicago, Ill., assignor to Infilco Incorporated, Chicago, Ill., a corporation of Delaware
Application February 4, 1944, Serial No. 521,096
11 Claims. (Cl. 210—122.1)



1. An actuator adapted for use in a filter system including a main conduit, a shutoff valve in said conduit, and a pressure differential creating member in said conduit, said actuator comprising a casing, a diaphragm dividing said casing into two chambers, means adapted to operatively join said diaphragm to a device to be actuated, a first pressure port adapted to connect one of said chambers with a point of high pressure in the pressure differential creating member, a second pressure port adapted to connect the other chamber with a point of low pressure in said pressure differential creating member, an inlet into said first chamber adapted to connect the same to a point in said main conduit on the upstream side of said shutoff valve, an outlet from said second chamber, a normally closed valve on said outlet, means effective on closing of said shutoff valve to position said valve means to open said inlet and close said first pressure port, and means effective on opening of said inlet to open said valve on said outlet.

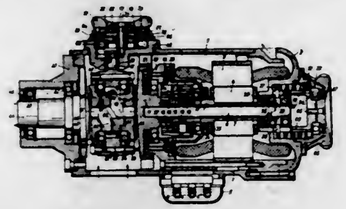
2,451,030
CENTRIFUGAL PUMP
Fred C. Jones, Teaneck, N. J., assignor to Ralph B. Carter Company, Hackensack, N. J., a corporation of New York
Application November 29, 1946, Serial No. 712,894
1 Claim. (Cl. 103—113)

In a centrifugal pump having a casing with a central cylindrical chamber formed of walls in the casing, forming a suction passage, a supply pipe at one end thereof, an impeller at the other end thereof having its eye aligned with said suction passage, and a discharge chamber in said casing communicating with said impeller, and surrounding said central cylindrical chamber, and having a discharge opening, one of said walls of the central chamber having an opening therethrough, providing an orifice spaced between the ends of the central chamber and spaced from the impeller, subject to the suction action of the flow in the central chamber, a cylindrical extension having one end in registration with said orifice, and having its other end in communication with the fluid in the discharge chamber, forming a velocity conduit bypass passage, a spherical member of larger diameter than the open end of the extension, a cage for the spherical member for holding it spaced from said open end, within the velocity flow of the bypass passage during priming and moved to close the open end, when the pressure in the central chamber is sufficiently less than the pressure in the discharge chamber to draw the spherical member to said open end, until priming again becomes necessary, the closed position of the spherical member on the extension preventing recirculation and the open position permitting recirculation of the discharging fluid.



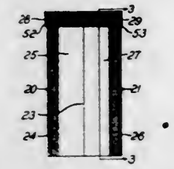
2,451,031
MAP MAKING AND PROJECTION INSTRUMENT
Harry T. Kelsh, Washington, D. C.
Application May 15, 1946, Serial No. 669,772
3 Claims. (Cl. 88—24)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. An instrument for making maps by stereophotogrammetric methods by projecting directly from a pair of overlapped, standard size slides obtained in taking overlapped snapshots of the terrain by aeroplane, comprising a frame, two projection lanterns provided with casings supported side by side on the frame for projecting superimposed images from a pair of consecutive slides, and a map table on which a sheet of drawing paper may be placed on which the superimposed images are projected to show a stereoscopic model, each of said lanterns being provided with a lens for casting an image on the map table reversed to the slide, and, supported inside the casing, each of said lanterns being provided with substantially a point light source, with a light condenser located between the lens and light source with the axis of the light condenser coincident with a line adjoining the light source and nodal point of the lens for converging the light rays at the nodal point of the lens, and with a support for carrying the slide between the condenser and lens with the converging light passing through the slide and the axis of the light condenser passing through the optical center of the slide, said slide support being adjustable toward and away from the lens to obtain sharp focus, each of said lanterns being laterally angularly adjustable to compensate for tip of the aeroplane in taking the snapshots, angularly adjustable normal to the laterally angular adjustment to compensate for tilt of the aeroplane, adjustable parallel to each other, adjustable toward and away from each other, and adjustable toward and away from the map table, each of said lantern casings and carried parts being rotatably adjustable to compensate for crab of the aeroplane, the lens being so mounted as to be non-rotatable with the casing and being provided with means for supporting a polarizer oriented normal to the polarizer of the lens of the other lantern, the light, light condenser, and lens of each lantern being positioned off-center in the casing toward the corresponding parts of the other lantern, whereby when the slide is properly positioned in the casing its non-overlapped portion projects therefrom toward the other casing.



2,451,032
INSTRUMENT DRIVE
Rufus M. Kingman, Palo Alto, Calif., assignor, by mesne assignments, to Hewlett-Packard Company, Palo Alto, Calif., a corporation of California
Application March 26, 1946, Serial No. 657,243
3 Claims. (Cl. 74—501)

1. In an instrument drive, a drive shaft, a driven shaft, one of said shafts having a pair of pulleys mounted thereon, one of said pulleys being fixed to said one shaft and the other of said pulleys being free on said one shaft, a torque applying spring interconnecting said free pulley and said shaft, cables connected to said respective pulleys and wound in opposite directions thereon, and a second pair of pulleys on said driven shaft and receiving said respective cables.

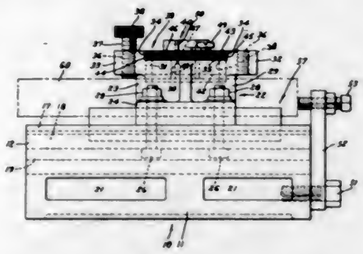


2,451,033
FRICTION-WHEEL REGULATING GEAR
Ernst Krebs, Zurich, Switzerland
Application August 13, 1945, Serial No. 610,439½
In Switzerland August 28, 1944
10 Claims. (Cl. 74—200)

1. A friction-wheel regulating gear comprising two coaxial spaced cone discs, one of said cone discs being adapted to be driven by a driving machine and the other of said cone discs being adapted to drive a driving shaft, a friction-wheel transmission device adapted to alter the gear ratio and displaceably arranged between said discs, the driving-side part and the driven-side part of said regulating gear and said friction-wheel transmission device being each constructed as a structural unit, said friction-wheel transmission device comprising two discs each with a friction-bead and coupled together with regard to rotation but axially displaceable in relation to each other, one of said beads lying on a point on a conical-surface line of the driving-side cone disc and the other of said beads lying on a point on a

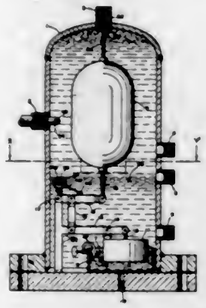
conical-surface line of the driven-side cone disc which latter conical-surface line lies opposite and parallel to said conical-surface line of the driving-side cone disc, spring means for urging said beads apart and against said two cone discs, contact of said beads with said cone discs being adapted to take place on said conical-surface lines, a supporting ring in which said discs are mounted, rollers on which said supporting ring is arranged, a guide which is parallel to said conical-surface lines of said cone discs and in which said rollers are adapted to be displaceably guided, and a shifting device adapted to displace said rollers in said guide within two limiting positions and thus to alter the gear ratio.

2,451,034
CURTAIN AND CURTAIN HANGING MEANS
Clive W. Lanphere, New York, N. Y.
Application March 13, 1947, Serial No. 734,376
5 Claims. (Cl. 248—263)



1. A bracket for holding curtain rods, said bracket having a body portion, a hook integral with said body portion, said hook projecting downwardly, and another hook above said first mentioned hook also integral with said body portion, said second mentioned hook projecting upwardly.

2,451,035
JIG
Newman M. Marsilius, Trumbull, Conn.
Application September 20, 1945, Serial No. 617,554
7 Claims. (Cl. 77—62)



1. In a jig of the character described, a base including a support engaging portion and a pair

of spaced upstanding walls defining a way, a V-block in said way, a saddle-like device including a portion spanning said way and a pair of foot portions disposed on the upper edges of said walls, means for securing said foot portions to said walls and to thus secure said saddle-like device in adjusted position on said base, means on said saddle-like device and adjustable to clamp.

work against said V-block, said saddle-like device having an opening therethrough in alignment with the groove of said V-block, a master slip bushing adapted to be removably and concentrically received in said opening, and said master slip bushing including a head having an opening therethrough for the reception of a standard slip renewable bushing.

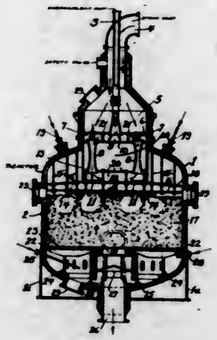
2,451,036
SPECIFIC GRAVITY RECORDER
John R. Martin and Forrest B. Burrell, Baytown, Tex., assignors to Standard Oil Development Company, a corporation of Delaware
Application September 30, 1944, Serial No. 556,534
7 Claims. (Cl. 73—33)

1. In a device for continuously measuring the specific gravity of a flowing stream of liquid, a chamber having a portion adapted to retain a reference liquid, a float mounted to be partially immersed in said reference liquid, an inlet port on said chamber for the test liquid, the gravity of which is to be measured, an outlet port for said test liquid arranged so as to maintain a predetermined body of said test liquid in said chamber, a float arranged to be totally immersed in said test liquid, a lever system arranged within said chamber between said floats, said floats being connected to said lever system in opposition to each other, means for indicating the resultant of the motion of said lever system, and means for maintaining said lever system completely enveloped in a sealing liquid immiscible with said reference liquid and with said test liquid.

2,451,037
LUBRICATING OIL
Rush F. McCleary, Beacon, and Stiles M. Roberts, Glenham, N. Y., assignors to The Texas Company, New York, N. Y., a corporation of Delaware
No Drawing. Original application May 13, 1941, Serial No. 393,244, now Patent No. 2,322,376, dated June 22, 1943. Divided and this application December 5, 1942, Serial No. 468,000
12 Claims. (Cl. 252—42.7)

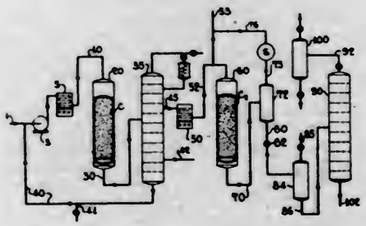
1. An improved lubricant comprising a major proportion of a mineral lubricating oil having incorporated therein a small proportion, sufficient to stabilize said oil, of an oil-miscible alkyl thiophenol methylene thioether.

2,451,038
BIB
Isadore Mink, Brooklyn, N. Y., assignor to Fine Art Apron Co., Inc., New York, N. Y., a corporation of New York
Application July 23, 1945, Serial No. 606,672
4 Claims. (Cl. 2—49)



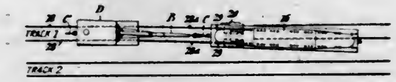
1. A bib comprising a blank having a pair of oppositely disposed openings; said blank having a bottom edge, spaced side edges and an upper edge with an indentation therein adapted to engage the neck of a wearer; said openings being spaced a distance sufficient to permit the entrance therein of the upper portions of the arms of the wearer and defining epaulet portions extending toward said side edges, and flap members each having a substantially semi-circular free edge whose convexity is directed toward the bottom edge of the blank; and ties extending from the edges of said indentation, said ties being adapted to be disconnectably connectable for encirclement of the neck of the wearer.

2,451,039
LUBRICANT
Arnold J. Morway, Clark Township, Union County, and John C. Zimmer, Union, N. J., assignors to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application December 27, 1941, Serial No. 424,590
5 Claims. (Cl. 252—36)



1. An improved lubricating grease composition comprising a major proportion of a low pour point lubricating mineral oil distillate, a minor proportion, sufficient to thicken said oil to a grease consistency, of a lithium soap of a saturated fatty acid and an aluminum soap of a saturated fatty acid, said aluminum soap being present in an amount substantially smaller than that of said lithium soap but not less than 0.25% of the total composition.

2,451,040
PROCESS FOR PRODUCTION OF BUTADIENE
Eger V. Murphree, Summit, N. J., assignor to Standard Oil Development Company, a corporation of Delaware
Application May 2, 1942, Serial No. 441,438
5 Claims. (Cl. 260—680)

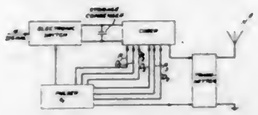


2. The process of producing butadiene by the catalytic dehydrogenation of butylene which comprises heating the butylene to a temperature of about 1000 to 1200° F., passing the heated butylene vapors to a Venturi throat, superheating steam to about 1300–1400° F., passing the superheated steam through an orifice into the Venturi throat thereby picking up the butylene vapors, diluting them to a ratio of one volume of butylenes to several volumes of steam and bringing the butylene vapors to the desired reaction temperature, immediately passing the butylene-steam mixture into contact with an active dehydrogenating catalyst comprising MgO, Fe_2O_3, CuO and K_2O and having water gas activity thereby forming butadiene while avoiding any substantial degradation of the butylene to products of lower molecular weight and quenching the reaction products immediately after they leave the catalyst.

2,451,041
CATALYTIC CRACKING AND REFORMING PROCESS FOR THE PRODUCTION OF AVIATION GASOLINE
Eger V. Murphree, Summit, N. J., assignor to Standard Oil Development Company, a corporation of Delaware
Application July 14, 1944, Serial No. 544,894
8 Claims. (Cl. 196—49)

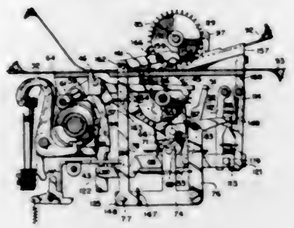
1. The method of producing high quality aviation gasoline which comprises cracking a gas oil in the presence of a synthetic alumina-silica gel catalyst, recovering a fraction boiling in the gasoline range from said cracking step, and subjecting said fraction to reforming at elevated temperatures and in the presence of a dehydrogenation catalyst which comprises about 10% of a 6th group metal oxide and about 90% of a zinc spinel base which carries the 6th group metal oxide and added hydrogen whereby the cracked gasoline is converted to a product of low acid heat and increased aromaticity and isoparaffinicity without net consumption of hydrogen.

2,451,042
METHOD OF AND DEVICE FOR RETRACKING RAIL VEHICLES
Harry L. Nancarrow, Philadelphia, and Allen R. Wilson, Lansdowne, Pa., assignors to The Pennsylvania Railroad Company, Philadelphia, Pa., a corporation of Pennsylvania
Application November 29, 1945, Serial No. 631,602
5 Claims. (Cl. 104—262)



1. The method of re-tracking a derailed locomotive or the like which comprises parting the rails of an adjacent track in a transverse line approximately even with a pair of end wheels of the locomotive; shifting two rail ends of the parted track side-wise by bending them without any further disconnection of any rail joints, to displace a portion of the track equal substantially in length to that of the locomotive, into alignment with the latter; inserting between the free ends of the displaced rail sections and said end wheels, ramps with slopes extending from the track bed level to the tops of said displaced rail sections; and thereupon moving the locomotive to roll its wheels up the ramps for ultimate diversion onto the track proper by way of the displaced portions of the rails.

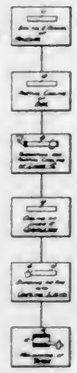
2,451,043
GAS DISCHARGE LAMP
Miles Pennybacker, Westport, Conn.
Application December 23, 1944, Serial No. 569,488
8 Claims. (Cl. 176—122)



1. In an elongated positive column discharge tube containing an ionizable gas, two electrodes positioned within said tube, at the respective ends thereof, a trough-shaped metallic starting strip positioned within said tube, partly surrounding and extending longitudinally a substantial distance along the path of the discharge, and a coating of insulating material in the form of discrete particles, each particle being relatively impermeable and insulative, said insulating coating covering substantially the entire active interior surface of said strip and being porous, to allow a cathode glow discharge to pass through the interstices between said particles, and yet offering a material electrical resistance, whereby current flow via said starting strip is minimized both before and after establishment of the positive column discharge, and whereby the outer surface of said strip reduces light emission from a portion of said tube.

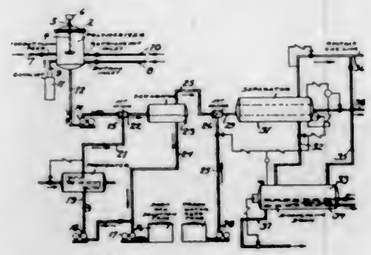
2,451,044
COMMUNICATION SYSTEM EMPLOYING PULSE CODE MODULATION
John R. Pierce, Millburn, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application July 9, 1945, Serial No. 603,934
14 Claims. (Cl. 179—1.5)

3. In a communication system in which the amplitude of a complex wave is sampled at recurrent intervals and the sample amplitude represented by a permutation code group of pulses each of either of two different signaling conditions for transmission, means for storing a voltage proportional to the sample amplitude of the wave, means for building up a reference current of components of successively smaller amplitudes, the number of components corresponding to the number of pulses of said group, means for comparing the stored voltage with the voltage produced by the flow of the reference current through an impedance upon the addition of each component current, and means responsive to said means for comparing for establishing the signaling condition of each of said pulses.



2,451,045
AUTOMATIC MESSAGE NUMBERING TELEGRAPH TRANSMITTER
Louis M. Potts, Evanston, Ill., assignor to Teletype Corporation, Chicago, Ill., a corporation of Delaware
Application December 20, 1943, Serial No. 514,888
25 Claims. (Cl. 178—17)

1. A transmitter apparatus comprising, a plurality of step-by-step form feeding devices, a common form sensing device, and means responsive to the signals sensed by said common form sensing device to concurrently arrest one of said form feeding devices and initiate the operation of another of said plurality of form feeding devices.



2,451,046
METHOD OF COUPLING PIPE
Ernest Wayne Rembert, Hinsdale, Ill., assignor to Johns-Manville Corporation, New York, N. Y., a corporation of New York
Application September 20, 1944, Serial No. 554,882
4 Claims. (Cl. 18—59)

1. A method of forming a coupling sleeve comprising introducing a molten thermoplastic material within a tubular member, rotating said tubular member to distribute said thermoplastic material in a substantially uniform thickness layer to form a liner, cooling and setting said thermoplastic material, dividing said tubular member into a plurality of sleeves, and shaping the liner

within said sleeves to define tapers extending substantially uniformly from a minimum thickness adjacent the ends thereof to a maximum thickness adjacent the center thereof.

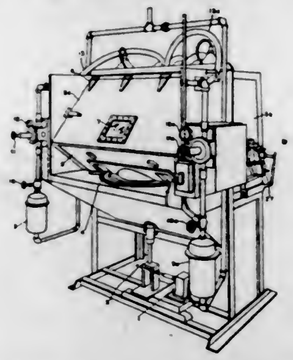
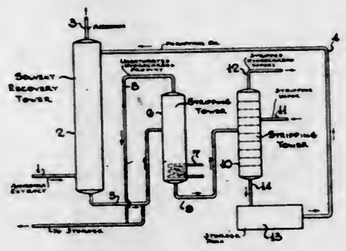
POLYMER RECOVERY FROM LOW-TEMPERATURE POLYMERIZATION OF OLEFINIC MATERIAL
Arthur C. Skooglund, Clark Township, Union County, and Charles C. Swoope, Union, N. J., assignors to Standard Oil Development Company, a corporation of Delaware
Application May 14, 1943, Serial No. 486,980
11 Claims. (Cl. 260—93)



1. The process of preparing a purified low temperature olefinic polymer comprising the steps of cooling a liquid solution of olefin hydrocarbon having a carbon atom number within the range between 4 and 10 inclusive carbon atoms per molecule to a polymerization temperature within the range between —40° C. and —164° C. in the presence of a solvent for both the olefinic material and the polymer, polymerizing the olefinic material by addition thereto of a Friedel-Crafts catalyst to yield a cold polymer solution, jetting the cold polymer solution at a temperature within the range between 80° F. and 90° F. and a pressure within the range between 400 and 500 pounds per square inch into intimate admixture with an aqueous alkaline solution to produce turbulent mixing and thereafter separating the polymer from the aqueous alkaline solution.

2,451,048
LUBRICATING OIL ADDITION AGENTS
William J. Sparks, Cranford, N. J., and Donald C. Field, Baton Rouge, La., assignors to Standard Oil Development Company, a corporation of Delaware
No Drawing. Application March 23, 1944, Serial No. 527,838
7 Claims. (Cl. 260—4)



1. The process for preparing a compound soluble in hydrocarbon oil which comprises reacting one part of an unsaturated high molecular weight essentially hydrocarbon polymeric material having an unsaturation greater than 25% as measured by the Kemp method for natural rubber and characterized by having a substantially aliphatic linear chain structure with the unsaturation interspersed along the chain as double bonds and by being capable of reacting with sulfur to give a product which has an elongation under tension of from 200% to 1200% at break, a forcible retraction upon release of the tension to the original dimension and shape and a tensile strength at break ranging between 500 lbs. and 5000 lbs. per sq. in., with 0.5 to 10 parts of a C_4 unsaturated hydrocarbon selected from the group consisting of isobutylene and butadiene, at a temperature between —20° C. and 40° C. in the presence of 0.2% to 5% by weight, based on the total reacting material, of an amphoteric metal halide polymerization catalyst in a highly dispersed fluid state.

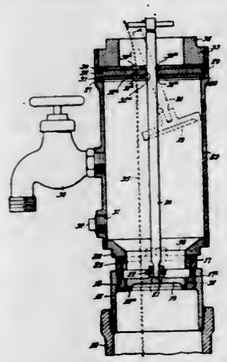
ABRASIVE PNEUMATIC FINISHING MACHINE
Alta W. Tell, Ligonier, Pa., assignor to Stupakoff Ceramic & Manufacturing Company, Latrobe, Pa., a corporation of Pennsylvania
Application June 12, 1946, Serial No. 676,247
10 Claims. (Cl. 51—15)



1. An abrasive finishing machine comprising a housing, a turntable mounted in said housing in a manner so as to have a portion thereof projecting exteriorly of the housing through an aperture thereof, a plurality of pockets on said turntable for seating articles whose surfaces are to be blasted and thereby finished by an abrasive fluid, gun means mounted in said housing above said pockets to direct a blast of said abrasive fluid on said pocketed articles and a flexible mask mounted on said turntable and having a plurality of cutaway portions registering with said pockets, and means overhanging said turntable for lifting only a portion of said flexible mask during rotation of the turntable in order to uncover said portion of the turntable projecting exteriorly of the housing.

2,451,050
OLEFIN EXTRACTION
Carl O. Tongberg, Westfield, N. J., assignor to Standard Oil Development Company, a corporation of Delaware
Application November 24, 1945, Serial No. 630,679
7 Claims. (Cl. 260—681.5)

3. In the extraction and segregation of an olefin from a mixture of hydrocarbons having a molecular weight difference of not over 30 between the highest and lowest molecular weight components thereof and containing olefin where ammonia and a modifier that increases the solvent power of the ammonia is used as a solvent to obtain an extract of the olefin in the ammonia, the following steps which comprise passing the ammonia extract containing the olefin in countercurrent flow to a paraffinic oil having an initial boiling point of at least 450° F. and a Saybolt viscosity at 100° F. of 80 to 90 seconds, separating the paraffinic oil from the ammonia and modifier, heating the paraffinic oil to expel the major fraction of the olefin, and separately stripping the residual paraffinic oil with a saturated hydrocarbon boiling at a higher temperature than the olefin, and within a range of 96° F. to 160° F. to obtain overhead an olefin and, as a residue, paraffinic oil substantially free of the olefin.

2,451,051
SANITARY PIPE CLEANOUT DEVICE
Riley R. Tubbs, Great Bend, Kans.
Application February 18, 1946, Serial No. 648,289
5 Claims. (Cl. 15—104.30)

5. In a pipe cleanout device, a cylinder open at its upper end, and having an annular internal shoulder adjacent its upper end, a gasket resting upon said shoulder, a pair of metal discs, a compressible disc between said pair of discs and

a ring threadedly secured in the upper end of the cylinder and adapted to bear against said discs, the metal discs having centrally located holes, a rod of considerably less diameter than said holes extending therethrough and capable of being tilted therein, a plug pivotally connected to said rod, said discs having other holes through which a cleanout tool may be inserted and the compressible disc having a centrally located hole, the wall of which fits tightly against the rod and the compressible disc having also a slit therein registering with said other holes through which a cleanout tool may be moved.

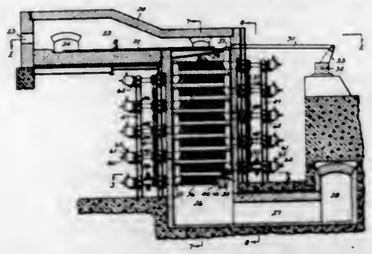
METALLO-ORGANIC COMPOSITIONS

Carl N. Andersen, Pleasantville, N. Y., assignor, by mesne assignments, to Gallowhur Chemical Corporation, a corporation of New York

No Drawing. Application March 2, 1945, Serial No. 580,703
3 Claims. (Cl. 260—432)



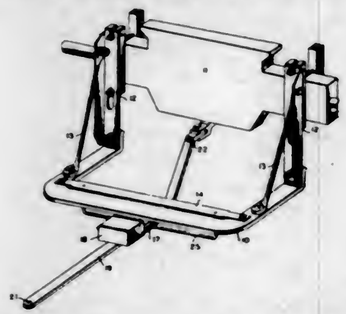
3. As a new composition of matter, the product that is formed by adding copper acetate to a solution containing para-amino phenyl mercury lactate and lactic acid.

2,451,053

CONVEYING MECHANISM FOR BILLET HEATING FURNACES

David P. Anderson, Pittsburgh, Pa., and Strickland Kneass, Jr., Boylston, Mass., assignors to Morgan Construction Company, Worcester, Mass., a corporation of Massachusetts

Application June 15, 1945, Serial No. 599,566
14 Claims. (Cl. 263—6)



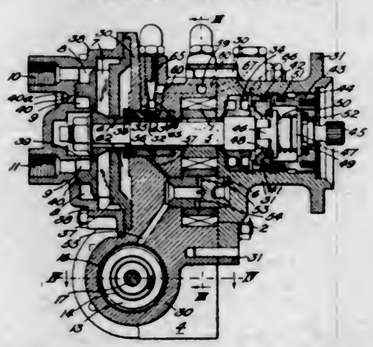
14. Conveying mechanism for a billet heating furnace having a hearth, a horizontal passage for the flow of hot gases rearwardly above the hearth, and a vertical passage through which the gases flow downwardly from the rear end of the horizontal passage, the said mechanism comprising a plurality of vertically spaced sets of rotatable cantilever beams extending into the vertical passage to support vertically spaced layers of billets for absorption of heat from the gases, the uppermost set of beams extending forwardly and the remaining sets extending alternately in a rearward and forward direction, each beam having a helical groove extending therearound to receive the billets, means to rotate the beams and cause the billets in each layer to move broadside along the associated beams in a direction away from the free ends thereof, a set of stationary cantilever beams extending rearwardly from the hearth at the top of the vertical passage and somewhat above the uppermost set of rotatable beams, cams on the rotatable beams adjacent the supported ends thereof, the cams being shaped and arranged to lift the billets successively from the corresponding sets of beams and deposit them on the free ends of the beams in the set next thereabove, and means to move the billets broadside in a forward direction along the stationary beams and the hearth.

2,451,054

SELF-ALIGNING SWINGING DRAWBAR

Linwood Atkinson, Hillman, Mich.

Application June 18, 1946, Serial No. 677,554
10 Claims. (Cl. 280—33.44)



1. A tractor hitch with self-adjusting drawbar in combination with a stationary transverse drawbar member, comprising a track member secured parallel to and substantially level with said stationary drawbar, an auxiliary drawbar pivoted at one end of the tractor for limited horizontal and vertical swinging movement and extending beyond said stationary drawbar beneath the same, a runner element on the track, a shock absorber secured on the auxiliary drawbar adjacent to said track to move horizontally with the auxiliary drawbar, and a coupling between the runner element and the shock absorber whereby the shock absorber is made to function upon vertical swinging movement of the auxiliary drawbar.

2,451,055

FUEL PUMP

Thomas Edward Beacham, London, England

Application May 9, 1944, Serial No. 534,750
In Great Britain March 8, 1943
Section 1, Public Law 690, August 8, 1946
Patent expires March 8, 1963
7 Claims. (Cl. 103—5)

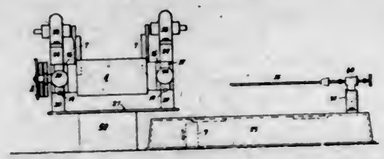
1. A fuel pump for an internal combustion engine comprising a gear pump adapted to be connected to and driven by the internal combustion engine at a speed corresponding to the engine speed and having inlet and outlet conduits adapted to be connected respectively to a fuel supply and said engine to deliver fuel from the former to the latter, an impeller coupled to the gear pump and driven therewith at a corresponding speed, a high pressure chamber connected with the discharge of said impeller, a low pressure chamber connected with the intake of the impeller, a pressure responsive means connected between said high and low pressure chambers and means associated with said pressure responsive means for varying the flow of fuel from said gear pump to the engine.

2,451,056

KEY HOLDER

Joseph Berger and Morris Wachman, Brooklyn, N. Y.

Application January 2, 1948, Serial No. 282
2 Claims. (Cl. 70—456)



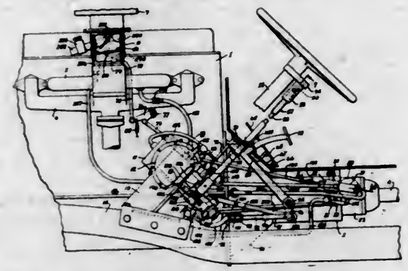
1. In a key holder, a casing providing a plurality of longitudinally extending slots opening through one end and along one longitudinal edge thereof, a cross-pin extending through said casing, a plurality of coiled springs mounted on said cross-pin and located in said slots respectively, yoke members releasably affixed to the keys respectively, studs swivelly connected with said yoke members and linked to the coiled springs at one end thereof respectively and slides mounted on said casing for longitudinal reciprocatory movement into and out of overlying relation with the ends of the shanks of the keys for securing the same in position in the slots in the casing under tension of said springs and for releasing the keys for projecting the same from the casing.

2,451,057

BED FRAME AND DETACHABLE GRINDING ROLLER UNIT

Julius Z. Bernard, Freeport, N. Y.

Application April 28, 1947, Serial No. 744,411
1 Claim. (Cl. 241—285)



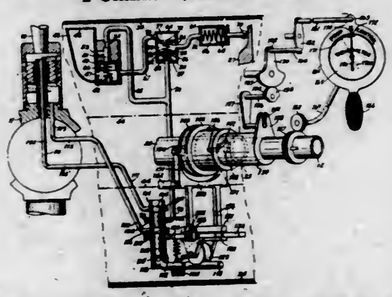
A roller mill including a support and a roller unit detachably mounted upon said support and arranged to be detached therefrom as a unit comprising a bed frame for the support of the roller unit and water cooling means for the grinding rollers of the unit mounted upon said bed frame, a roller mill unit removably mounted upon said bed frame and comprising a plurality of hollow grinding rollers, bearing boxes for supporting said rollers in cooperative grinding relation, water cooling pipes extending from said cooling means through the said bearing boxes and into said rollers to cool the same, a single base plate for supporting the entire roller unit, said base plate including upstanding side rails for supporting the said bearing boxes in slidable relation for adjusting the frictional contact between said rollers, gear means in said unit for operating the said rollers, a motor mounted within the said bed frame and detachably operatively connected to said gear means, and means for securing said single base plate to the said bed frame in detachable relation whereby to remove the entire roller mill unit from the bed frame and removing the grinding rollers from said water cooling pipes and cooling means.

2,451,058

SEMIAUTOMATIC AUTOMOTIVE TRANSMISSION WITH GOVERNOR-SYNCHRONIZED GEARS

David S. Bennetch, Sheridan, Pa.

Application July 6, 1939, Serial No. 282,982
19 Claims. (Cl. 74—472)

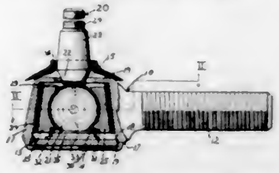


1. In an automotive vehicle, an engine having a carburetor and throttle, a propeller shaft having a speed governor, an operator's control element, a transfer mechanism for shifting control of said throttle between said operator's element and said governor, said transfer mechanism having a vacuum chamber, said transfer mechanism having normally lost motion connection with said governor and a normally operative connection with said operator's element, means actuated by applying vacuum to said chamber for converting said normally lost motion connection to an operative connection, and for converting said normally operative connection to a lost motion connection.

2,451,059

PROPELLER MECHANISM

Werner J. Blanchard and Charles S. J. MacNeil, Dayton, Ohio, assignors, by mesne assignments, to General Motors Corporation, Detroit, Mich., a corporation of Delaware



Application August 5, 1942, Serial No. 453,654
1 Claim. (Cl. 170—163)

In a hydraulically controlled constant speed variable pitch propeller having a reservoir rotatable therewith and enclosing a quantity of fluid
